Eco-Tek Holdings Limited

(Incorporated in the Cayman Islands with limited liability)

Interim Report

For the six months ended 30 April 2006

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Eco-Tek Holdings Limited (the “Company”) collectively and individually accept responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief (1) the information contained in this report is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this report misleading; and (3) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

MANAGEMENT DISCUSSION AND ANALYSIS

Financial review

For the six months ended 30 April 2006, the Group recorded a great increase in turnover of approximately HK\$13.8 million or 43.8% as compared to last corresponding period. Net profits attributable to shareholders amounted to approximately HK\$6.6 million (2005: HK\$5.1 million), represented an increase of 30% to that of the last corresponding period. The increase in turnover was mainly attributable to the launch of VISP for Heavy Vehicles (long idling duties) in May 2005. Over 1,000 Eco-Green Supreme were recorded in this review period, and accounted for the increase in the revenue of general environmental protection related products and services by approximately 1.29 times from HK\$6.1 million to HK\$14 million. Besides, sales of industrial environmental protection related products also increased by 23.3%. After the implementation of the austerity measures in the PRC in the past two years, its effects on demands of industrial machines, construction and marine equipment was gradually reduced in the six months ended 30 April 2006. As a result of this, the demands of hydraulic components were also rebounded and lead to the increase in the Group's revenue in the same period.

The gross profit of the Group for the six months ended 30 April 2006 amounted to approximately HK\$14.1 million, representing an increase of approximately 41.7% over the gross profit of around HK\$9.9 million for the six months ended 30 April 2005 and the gross profit margins for both periods were around 31%.

The administrative expenses for the six months ended 30 April 2006 increased by approximately 43.2% from approximately 5 million to HK\$7.1 million. Such increase is mainly due to the increase in the professional costs arising from the acquisition of 42.5% interests in Asian Way in December 2005 and the **Introduction** exercise in current period as stated in the Section "PROPOSED LISTING ON THE MAIN BOARD" below.

Other operating income for the six months ended 30 April 2006 includes the write back of provision for warranty amounted to approximately HK\$117,000, which represented write back of the excess provision for the free materials and workmanship of Eco-Green and Eco-Green Supreme.

Business review and prospects

The Group is principally involved in the marketing, sales, servicing, research and development of environmental protection and quality health related products and services.

With the substantial completion of the EPD tenders for the VISP for Heavy Vehicles, the Group's revenue generated from the general environmental protection related products and services in the second half of the year is expected to be reduced. The Group will focus more on the promotion of the industrial environmental products and on widening other sources of revenue and range of products and services.

In December 2005, the Group has purchased 42.5% interests in Asian Way International Limited ("Asian Way"), a company invested in the Water Supply Plant, in the Tianjin Province of the PRC. The Directors consider that the investment in the Water Supply Plant, which will supply water after carrying out various processes including purification upon completion of its construction, will provide an opportunity for the Group to further promote and develop its business presence in the PRC. Asian Way's management is trying to shorten the originally planned construction period, which is 18 months starting from November 2005. For details of the acquisition of Asian Way, please refer to the circular dated 16 December 2005.

In April 2005, the Group has formed a Joint Venture in the Jiangsu Province to promote the Group's environmental products such as Eco-Green, Eco-Air, Eco-Water and other environmental related solutions in the region. In current review period, such Joint Venture starts to cooperate with other professional consultants to provide environmental protection consultancy services to its customers and is applying for the professional license to provide such consultancy services. It is expected that such license can be obtained within a year. Also, in the meantime, the Joint Venture plans to start its business in the industrial environmental products in the region.

Proposed listing on the main board

On 22 May 2006, the Group has made an advance booking of the application for the Proposed Listing on the Main Board to the Stock Exchange of Hong Kong Limited. The Directors believe that the Group's business will continue to develop and the proposed listing of the Shares on the Main Board will enhance the corporate profile, increase the recognition from financial institutions and institutional investors, which will be beneficial and complementary to the future development of the Group and also help to raise the Group's corporate image. All of these will benefit the future business development of the Group and increase the financial flexibility of the Group.

Liquidity and financial resources

The Group adopts a conservative policy in its financial resources management. The Group had total cash and bank balances of approximately HK\$33.8 million and approximately HK\$16.6 million as at 30 April 2006 and 31 October 2005 respectively.

Treasury policies

The Group adopts a conservative approach towards its treasury policies. The Group strives to reduce exposure to credit risk by performing ongoing credit evaluations of the financial conditions of its customers. To manage liquidity risk, the Board closely monitors the Group's liquidity position to ensure that the liquidity structure of the Group's assets, liabilities and commitments can meet its funding requirements.

Employee information

As at 30 April 2006, the Group had 93 employees (2005: 45 employees) working in Hong Kong and in the PRC. The total of employee remuneration, including that of the Directors and mandatory provident funds contributions, for the six months under review amounted to approximately HK\$3.02 million (2005: HK\$3.11 million). The dedication and hard work of the Group's staff during the six months ended 30 April 2006 are greatly appreciated and recognised.

Employees are remunerated according to their performance and work experience. On top of basic salaries, discretionary bonus and share option may be granted to eligible staff by reference to the Group's performance as well as individual's performance. In addition, the Group also provides mandatory provident fund scheme for the staff in Hong Kong and central pension scheme for the staff in the PRC.

Save as disclosed above, the Group had no significant investments for the six months ended 30 April 2006.

Material acquisitions and disposals/future plans for material investments
