# INTERIM REPORT FOR THE SIX MONTHS ENDED 30 JUNE 2006

## CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "EXCHANGE")

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange of Hong Kong Limited takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss however arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors of Sing Lee Software (Group) Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited for the purpose of giving information with regard to Sing Lee Software (Group) Limited. The directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief:— (1) the information contained in this report is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this report misleading; and (3) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

#### 6. Earning/(Loss) per share

The calculation of the Group's basic earning/(loss) per share for the three months and six months ended 30 June 2006 is based on the Group's unaudited combined loss attributable to shareholders of approximately Rmb2,958,000 and loss attributable to shareholders of approximately Rmb4,979,000 (three months and six months ended 30 June 2005: loss attributable to shareholders of approximately Rmb5,462,000 and loss attributable to shareholders of approximately Rmb19,423,000 respectively) divided by the weighted average number of ordinary shares outstanding for three months and six months ended 30 June 2006 of 603,000,000 shares (three and six months ended 30 June 2005: 603,000,000 shares) in issue respectively.

Diluted loss per share has not been presented as the exercise of share options would have an anti-dilutive effect during the three and six months ended 30 June 2006, as well as 30 June 2005.

No diluted earnings per share has been presented for the three and six months ended 30 June 2006 because the computation of diluted earnings per share does not assume the exercise of share options as the exercise price of the Company's outstanding share options was higher than the average market price of the shares in the Company and the exercise of share options of the Company has an anti-dilutive effect.

#### 7. Dividend

The Board does not recommend the payment of an interim dividend for the six months ended 30 June 2006 (for the six months ended 30 June 2005: Nil).

#### MANAGEMENT DISCUSSION AND ANALYSIS

#### Financial review and results of operations

For the six months ended 30 June 2006, the Group recorded a total turnover of approximately Rmb7,641,000, representing an increase of 69% as compared to the same period of last year (for the six months ended 30 June 2005: Turnover amounted to approximately Rmb4,515,000). This shows that financial performance of the Group has some improvement as compared with last year.

Although the Group still recorded a loss attributable to shareholders of approximately Rmb4,979,000 for the two quarters, it has decreased significantly as compared to the same period of last year (for the six months ended 30 June 2005: loss attributable to shareholders amounted to approximately Rmb19,423,000). This loss decrease can mainly be attributable to successful cost control over the past months.

With our continuing efforts to cost control and the fact that peak season of software purchase normally takes place in the second half of the year, we are confident that the results for the coming quarters will be further improved.

#### **BUSINESS REVIEW**

After determining the business development direction for the two major projects and the two major products, the Group achieved initial progress in the first and second quarters.

#### **Banking Business**

For the EagleEye Information Platform Security System, we has won the nationwide promotion project from the Shanghai Pudong Development Bank as well as project implementation for the Industrial and Commercial Bank of Zhejiang and the Shanghai headquarters of Industrial Bank Co., Ltd.

Bidding for centralized purchasing of POS machines for some banks at the headquarters has been completed at the end of the second quarter. The Group Company has commenced work at various bank branches with a view to occupying a greater sales share.

#### **Education Business**

The project of the student information centre of Zhejiang University for which we won the bid in the first quarter has been completed and has been approved by the university. This opened a door for the Group Company to participate in constructing digital campus systems for Zhejiang University and other tertiary institutions in China. While driving the implementation of projects, the Group has initiated cooperation in respect of another large digital campus system construction project.

#### **School-Banking**

Through partnership with banks in marketing, the Group Company has signed contracts with 10 tertiary institutions and financial departments in Zhejiang in the first half of the year.

#### **FUTURE PROSPECT**

As far as business is concerned, some banks have commenced purchasing of POS machines. Sales contracts will be signed in the next quarter and be reflected in sales for the third quarter. The Group Company has actively participated in POS machine biddings of other banks and has strengthened its efforts in marketing the POS-MIS system. With strengthening cooperation with the Industrial and Commercial Bank of Zhejiang in the second half of the year, it is anticipated that greater effectiveness can be achieved in marketing School-Banking. The maintenance and upgrading of the Shenyin-Wanguo System (申銀萬國系統) has brought stable cash flow gains to the Group Company.

In order to increase performance and cost-effectiveness, the Group has conducted a series of restructuring activities in respect of the overall structure at the beginning of the year, which were basically completed in late June with smooth operation. As compared with the past, improvement has been achieved in both cost control and sales efforts.

The directors consider it inappropriate to value the options as a number of factors critical for the valuation cannot be determined accurately. Any valuation of the options based on various speculative assumptions would be meaningless and misleading. Therefore the directors believe that the cost for disclosing the value of options do not justify for the benefits it provides.
