These conditions indicate the existence of a material uncertainty which may cast significant doubt about the Group's ability to continue as a going concern.

The board of Directors of the Company (the "Board") have been taking active steps to improve the liquidity position of the Group. These steps included (1) one of the substantial shareholders has confirmed his intention and ability to provide continuing financial support to the Group so as to enable it to meets its liabilities as and when they fall due and to carry on its business for the foreseeable future; (2) the Board is considering various alternatives to strengthen the capital base of the Company through various fund raising exercise, including but not limited to private placement, open offer or right issue of new shares of the Company; and (3) the Board shall continue to take action to tighten cost controls over various operating expenses, with an aim to attaining profitable and positive cash flow operations.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Paper manufacturing business

The Group acquired 51% equity interest in Jining Gangning Paper Co, Ltd. ("Jining Gangning") in Shandong Province in the People's Republic of China ("PRC") in July 2009 and owns two industrial packaging paper production lines no.1 and 2. The re-engineering, modification and technical upgrade for production line no.1 were completed in March 2010. Grade A premium packaging paper products were put into production in April 2010.

In line with the state policies on environmental protection, the Group invested in constructing environmental sewage water recycling facilities and achieved zero sewage water discharge to local environment, in respect of which the Group is in the lead in the paper industry in PRC for protecting the local natural environment.

The Group started to engineer paper manufacturing production line no.3 in the beginning of 2011. This is a tipping paper production line with sophisticated equipment and advanced technology, with which the Group can manufacture high-end and diversified specialty papers. The line was successfully underwent testing in September and underwent trial production from October to December. This new production line has already developed and produced 60 tons of light and thin specialty papers such as white tipping paper, yellow tipping paper, food packing paper, white kraft paper and composite paper.

To strengthen the resisting ability to the rising cost of raw materials, the competitiveness in the market and corporate effectiveness, Jining Gangning suspended the operation and commenced the modification of production line no.2 in April 2011. Jining Gangning completed the line's modification in the beginning of August 2011 and started to manufacture products such as construction formwork paper, industrial paper and balance paper for engineered wood floor, which enhanced the additional value of the products. The production line no. 2 produced approximately 3200 tons of qualified formwork paper during the third quarter. The modification of production line no. 2 has successfully improved the quality of the products and the input to output ratio, resulting in cost reduction.

The paper manufacturing industry in PRC is facing the rising costs of energy, steam, water and different raw materials; the state revoked the preferential tax policy for recycled paper industry effective from January 2011, resulting in the significant increase in the purchasing cost of raw materials of paper per tonne as compared with last year; moreover, production line no.2 was suspended for modification, resulting in profit was significantly lower than expected.

Confronted with the ever rising energy prices and raw material prices in the PRC, the Group adopts three policies (the "Three Policies"): (1) moving into manufacturing diverse types of high class paper from manufacturing ordinary paper of a single category; (2) strengthening enterprise management, reinforcing cost control regarding production, supply and sales and striving to reduce the average level of consumption of energy and raw and accessory materials; and (3) searching for supply of recovered paper from PRC and international markets to relieve the effects brought by rising raw material prices, so as to enhance enterprise competitiveness and economic benefits.

The Group is more confident of Jining Gangning's development and shall continue to insist on its work on environmental protection and maintaining the standard; on the modification for the technology of the manufacturing equipment of the plants; on further investment in corporate's development to engineer the new production line no.4 to provide market demanding products such as printing paper, medical packaging paper on a timely basis; and on developing the quality, variety and volume of products so as to enhance the economic benefits.

Biodegradable materials manufacturing business

In March 2010, Fast Rise Development Limited ("Fast Rise"), a wholly-owned subsidiary of the Company, entered into an acquisition agreement (the "Acquisition Agreement") with the vendor (the "Vendor") to acquire the entire equity interest in Ever Stable Holdings Limited ("Ever Stable") at a consideration of HK\$280 million (the "Acquisition"). Ever Stable is an investment holding company incorporated in the British Virgin Islands with limited liability and owns 60% equity interest in a joint venture company, Dongguan Jiu He Bioplastics Company Limited ("Dongguan Jiu He"). Dongguan Jiu He is principally engaged in the development, production and sales of biodegradable materials and related products by entering into a patent license agreement with its PRC partner in relation to patented technologies.

As the previously selected location of the plant of Dongguan Jiu He in Dongguan was not satisfactory and there were difficulties arising from preparation works coupled with problems such as supply of electricity and labour, the board of directors of Dongguan Jiu He decided to transfer the production plant to Zhongshan Port Economic and Technical Development Zone. Zhongshan Jiu He Bioplastics Company Limited ("Zhongshan Jiu He"), the new plant has been renovated and put into operation and the equipments have been installed in September 2011. Zhongshan Port Economic and Technical Development Zone is a national development zone, where the policies are more preferential. The road and maritime transports are more convenient and the production and living auxiliary facilities there are more comprehensive, attracting more advanced technology talents and management personnel, and the labour costs are also relatively lower. The major production equipments ordered are more advanced in technology within the industry. The production equipments were delivered one after another to the plant since May and all ordered equipments had been manufactured by the end of June. The equipments were underwent testing and delivered to the plant by the end of July for installation and trial operation. The installation of around 40 sets of equipments was completed and some were put into production by the end of September 2011. Zhongshan Jiu He developed a biodegradable-based plastics company standards, which was approved by Zhongshan City Technical Supervision Authorization (中山市技術監督局) and submitted to Gaungdong Provincial for record. In the third quarter, Zhongshan Jiu He has started trail production in small scale and applied for the product certificates at the same time.

The Group has engaged technical and management personnel with extensive experience and reserved a land for the development of phase II project for the sake of corporate development in the future. Based on the existing technology patents, Zhongshan Jiu He recruited professionals for technology research and development to continuously look for newer and better technology and also to start launching independent research and development and the acquisition of the latest intellectual property rights.

It is expected after full operation that Zhongshan Jiu He would be able to produce 20,000 to 30,000 tons of biodegradable materials annually as well as environment friendly downstream products of biodegradable materials including blowing and molding, injection, extrusion and foaming.

PRC and the rest of the world are paying more attention to environment protection and set more restrictions on production and sales of environment-unfriendly products such as plastic bags. We manufacture biodegradable resin and related downstream degradable environment-friendly products with sustainable raw materials such as tapioca flour, organic raw materials, straw and fiber. Processed biodegradable products can be decomposed into soil friendly substances by natural organism after being discarded. This project is not only in line with the international and our national environmental policies but also the business plan of the environment protection industry that the Group engages in.

FINANCIAL REVIEW

The Group's total revenue for the period ended 31 December 2011 was approximately HK\$189.31 million, representing a decrease of 15.2% as compared with the same period ended 31 December 2010 (2010: HK\$223.18 million). The drop in revenue was mainly due to the suspension of the operation of production line no.2 of paper manufacturing business from April to July 2011 for the modification. The Group's strategy to develop and produce high margin paper products instead of mass production of low margin paper products after the production line modification was another reason for the decrease in turnover for the period under review. This new strategy has successfully increased the gross profit margin of the Group for the period under review as compared with the same period of last year.

For the period under review, the Group recorded a net loss of HK\$13.89 million, representing an increase of 109.2% as against a net loss of HK\$6.64 million for 2010. The net loss attributable to the owners of the Company was mainly due to the interest expenses on convertible notes and bank borrowings; and the upfront costs for the building of the production plant in Zhongshan. Further, the increases of the costs of energy, steam, water and the purchasing cost of raw materials of paper per tone have also narrowed the profit contribution from the paper manufacturing business to the Group. For the same period ended 31 December 2010, the Group recorded the gain on the disposal of IT consulting business; and the gain on the disposal of gaming and entertainment business, which had narrowed the net loss for the period.
