Management discussion and analysis

The product mix of the Group reflects that the portion of sales of innerwear and casual wear to the total sales has dropped from 64.4% to 61.1% and 17.9% to 14.8%, respectively. The portion of sales of baby and children wear has increased from 17.7% to 24.1%. The innerwear products of the Group will remain the main products of the Group.

FINANCIAL REVIEW

The turnover of the Group for the nine months ended 30 June 2014 was approximately HK\$49.1 million, representing a decrease of 24.1% from the same period last year. Cost of sales of the Group decreased by approximately 28.8% from approximately HK\$63.0 million for the nine months ended 30 June 2013 to approximately HK\$44.9 million the nine months ended 30 June 2014. The decrease in cost of sales was mainly due to the decrease in sales order during the period. The gross profit increased by HK\$2.5 million, due to written-off stock in last period.

The Euro bond crisis seems to pass through and we have lost some major customers in this event. Further, we have suffered contraction of turnover and also operation loss, due to some major factors such as strong renminbi policy, increase of labour costs in China and keen competition in South East Asia countries. Although our major market is still in Europe, the customer mix has changed and one of our major customers comes from Spain.

In consistent to our Group strategic, sales in China is our future focus. In reviewing our marketing strategy, the Directors consider that our existing base of customers is in Dongguan, Guangdong Province, of which is experiencing a big downturn due to serious closure of factories and other governmental policy change. During the period, we decide to terminate the existing sales in supermarket in Dongguan which has suffered a mild loss. The Directors is now considering change of different locations and different sales channels in China.

LIQUIDITY AND FINANCIAL POSITION

At 30 June 2014, cash and bank balances of the Group amounted to approximately HK\$9.6 million (At 30 September 2013: HK\$9.4 million). The current ratio (current asset divided by current liabilities) of the Group was 5.3 times and 2.6 times as at 30 June 2014 and 30 September 2013, respectively. In view of the Group's current level of cash and bank balances, funds generated internally from our operations and the banking facilities available, the Board is confident that the Group will have sufficient resources to meet its finance needs for its operations.

Management discussion and analysis

CAPITAL MANAGEMENT

The Group's objectives when managing capital are to ensure that entities in the Group will be able to continue as a going concern while maximising the return to owners through the optimisation of the debt and equity balance. The management reviews the capital structure by considering the cost of capital and the risks associated with each class of capital. In view of this, the company will balance its overall capital structure through the payment of dividends, new share issues as well as the issue of new debt as it sees fit and appropriate.

The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt/(cash) is calculated as total borrowings (including "current and non-current borrowings" as shown in the consolidated statement of financial position) less cash and cash equivalents. Total capital is calculated as "equity" as shown in the consolidated statement of financial position plus net debt, if any.

OUTLOOK

During the period, the Group has disposed its manufacturing base in Huizhou City, Guangdong Province. In future, by re-focusing the Group's principal business to apparel distribution, the Directors believe that the Group will be able to shift its resources to better serve its customers, to increase its efforts in PRC sales and other potential investments, which in turn enable the Group to improve its profitability.

The Group will strategically focus on its sales in China. With the encouragement of the PRC government and improvement of living standards of Chinese, we are confident that consumer market in the PRC will continue booming in the coming years. After termination of sales in supermarket in Dongguan City, the Group is now considering internet sales and also the possibilities to direct acquisition of existing sales outlets network or cooperation plan with existing operator. We are also in discussion with a local Chinese brand name for acquisition and or co-operation plan.

The Group's business plan is centered on three pillars. Firstly, the Group will focus on the distribution of apparel products to its existing and other potential customers and customer management will be enhanced. Secondly, the Group will increase its efforts to capture the consumer sentiment initially in the PRC through selling and distribution of own-brand products through internet. Thirdly, the Group will cautiously explore potential investment opportunities from time to time, and may consider diversifying the Group's businesses, with the aim to achieve the best utilization of resources and to maximize the returns to shareholders. Bearing in mind of this objective, the Group will consider other investments not limited to apparel related business. Meanwhile, the Group will consider, with reference to market conditions, different ways to broaden the assets base of the Group aiming to support for its acquisition and its potential for long term growth as well. Currently, no such plan has been entered into any agreement or in negotiation or has been fixed.
