FIRST QUARTERLY RESULTS ANNOUNCEMENT FOR THE THREE MONTHS ENDED 30 NOVEMBER 2017

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

This announcement, for which the directors (the “Directors”) of ECI Technology Holdings Limited (the “Company”, together with its subsidiaries, the “Group”) collectively and individually accept full responsibility, include particulars given in compliance with the Rules Governing the Listing of Securities on the GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

We have been providing ELV solutions primarily on central control monitoring systems to our customers in Hong Kong since 2003. Central control monitoring systems refer to all of the wide variety of systems relating to management of a single block of building, residential development, commercial and industrial buildings, sewage treatment facilities, hospitals or other government facilities. The key central control monitoring systems we install and maintain include security systems, car park systems, clubhouse management systems, etc. In addition, we also provide ELV solutions on telecommunications and broadcasting services systems such as CABD System and SMATV System.

Our customers come from both the private and public sectors. Customers in the private sector are mainly property developers and property management companies in Hong Kong. Our customers in the public sector are mainly Government departments such as Drainage Services Department, Leisure and Cultural Services Department, Electrical and Mechanical Services Department, etc.

During the Period, some of the projects were completed, such as the carpark access control system at Coastal Skyline, CCTV system at Kwu Tung Market Shopping Centre, octopus card system at Ocean Court etc. Meanwhile, approximately HK\$70,000,000 operation and maintenance contract has been awarded from a major government project. The contract period is from 1 December 2017 to 30 November 2020.

As green energy and environmental protection are on the trend all over the world, the Group believes that it is important to catch up with this trend in its business. To promote energy saving, the Group plans to provide more green building solutions by central control monitoring systems. During the Period, the Company had entered into a non-legally binding letter of intent (the “Letter of Intent”) on 2 November 2017 with Allied Sustainability and Environmental Consultants Group Limited (Stock

Code: 8320) (“AEC”). Pursuant to the Letter of Intent, AEC and the Company agree to conduct further negotiations on a possible mutually beneficial cooperation and collaboration between the parties. The new cooperation and collaboration between AEC and the Company may include provision of solutions and products in relation to smart building and green buildings (such as energy savings, daylight savings, building management system, and building performance monitoring, etc.) globally including but not limit to Hong Kong, China, Asia Pacific Region and other locations under One-Belt-One-Road strategy and framework. Details of the Letter of Intent are set out in the announcement dated 2 November 2017. The Company is confident that the current financial position of the Group shall provide full support of this development and business strategy.

The net profit after tax of the Group for the three months ended 30 November 2017 amounted to approximately HK\$1,400,000 (three months ended 30 November 2016: net loss of approximately HK\$2,865,000). As non-recurring listing expenses of approximately HK\$4,122,000 was no longer incurred in the results for the three months ended 30 November 2017, in addition that there were more contracts for maintenance service and installation brought by successful bids during the Period, the result for the three months ended 30 November 2017 has turned from loss to profit.

OUTLOOK AND PROSPECTS

There are broad usages of ELV in Hong Kong. ELV is a voltage range in electricity supply, used as a means to protect against dangerous electrical shock. ELV integrated service is one of the electrical services that can be used in all types of building infrastructure installations in commercial and industrial premises.

The net proceeds of the Share Offer provided us with the necessary funding to expand our business, allowed us to take up larger projects and strengthen our financial position. The results for the Period is a promising testimony that the Company is developing gradually in its business. Our Directors also believe that listing of the shares of the Company (the “Shares”) on GEM allowed us to access to the capital market for raising funds in the future and promoted our brand to potential new customers.

Nowadays, 20%-60% of the total building cost is spent on building services. Since people now recognise the importance of safety, comfort and convenience in using building systems and equipment, developers have spent more effort on developing better building services, especially in developing intelligent ELV systems. In view of this market condition and given the increasing popularity of mobile technology, the Group has grabbed hold of the trend and also has planned to expand its existing ELV solution business, we have started engaging external professionals to develop a new mobile application for our customers to place order.

Meanwhile, there are currently approximately 70 sewage plants in Hong Kong. As such, in the next two years, we target to be selected under the category “Electrical and Mechanical Installation for Sewage Treatment and Screening Plant” on the list of approved suppliers of materials and specialist contractors for public work for the Development Bureau. This will enable us to become a main contractor to projects in relation to sewage treatment and screening plant, and the Directors believe that being qualified as a main contractor in such projects will provide more certainty in securing our role in the project than only acting as a subcontractor. Once we secure the project, we can achieve higher profit margin than acting as a subcontractor. To kick things up a notch, the Group is applying for the approved contractor list and approved supplier list of several property developers in order to seize for larger contract sum projects. The Group anticipates this can not only generate more income but also help to build up the brand name and reputation of the Group in the industry.

In order to expand for larger market share, the Group will expand its business in various education institutions. Pursuant to the Letter of Intent, the Company may form a company with AEC to provide occupational safety training and licensing courses for people in construction industry.

Our goal is to continue to be one of the leading ELV solutions providers in Hong Kong. The Shares were successfully listed on the GEM of the Stock Exchange on 10 March 2017. The Listing enables us to have sufficient financial resources to meet and achieve the abovementioned goals. With the support of the shareholders of the Company (the “Shareholders”), the Company shall hold on with its aspirations and bring benefits to the Company and the Shareholders as a whole.
