Chairman's Statement

BUSINESS REVIEW

For the year ended 31 December 2012, the Group recorded a consolidated turnover of HK\$1,074,970,000, representing a decrease of 4.8% from HK\$1,129,055,000 last year. Gross profit and gross profit margin were HK\$140,292,000 and 13.1% respectively. Profit for the year was HK\$10,733,000.

In these days, there are uncertainties clouded with the global economy including the unsettling debt crisis of certain European countries and the staggering retail market of the United States. These factors had all caused immense blows to the export business of PRC manufacturers. In addition, the continuous inflation of PRC has caused an increase of the production and operation costs of the manufacturing business. To cope with these uncertainties of the global economy and increased production cost, the Group had strived hard to control the operation cost and adopted flexible purchasing strategy and eventually the Group could still maintain profit in the operation.

For household products, the uncertainties of the global economy did not affect seriously to its export business as the Group has strong clientele base and good reputation and the household business still maintained marginal profit as the Group was benefitted from the steady plastic raw material prices and its effective control of production cost.

For the PVC pipes and fittings, as the property market of PRC had gradually recovered and there is no fluctuation of the plastic raw material prices, the business was steady and had brought return to the Group.

During the year under review, the turnover of property investment amounted to HK\$1,421,000, representing an increase of 37.4% from HK\$1,034,000 of the same period last year. Gain arising from fair value changes of investment properties was HK\$2,560,000.

PROSPECTS

Looking to the future, the year of 2013 will be a challenging year. The Group however still adopts a positive approach. Given its strong basis and good reputation built up from the past years, it continues to maximize its strength and adopt flexible strategy to cope with the fast changing situation. The Group is still optimistic to the business of household products and PVC pipes and fittings.

For the waste recycling and manufacturing business, the production line for food waste recycling developed by the Group's wholly owned subsidiary South China Reborn Resources (Zhongshan) Company Limited ("South China (Zhongshan)") in its factory at Zhongshan has achieved significant progress in the system optimisation, products testing and quality enhancement, and will be ready for sale of its products in the market. Besides, South China (Zhongshan) has successfully awarded the lease of a site through a public tender in Ecopark Phase 2, Tuen Mun, Hong Kong by the Environmental Protection Department of the Government of Hong Kong Special Administrative Region for the development of food waste recycling projects. The land has been handed over to the Group on 2 January 2013 and is now in the construction phase and applying for the permits for the operation. It is expected that all construction works will be completed and operation will be commenced by early 2014. By then, it is expected that the said waste recycling business may bring good prospects and return to the Group.

On behalf of the Board

Lee Tat Hing CHAIRMAN

Hong Kong 21 March 2013

TO THE SHAREHOLDERS OF WORLD HOUSEWARE (HOLDINGS) LIMITED

(incorporated in the Cayman Islands with limited liability)

We have audited the consolidated financial statements of World Houseware (Holdings) Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") set out on pages 27 to 99, which comprise the consolidated statement of financial position as at 31 December 2012, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Directors' Responsibility for the Consolidated Financial Statements

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit and to report our opinion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the HKICPA. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independent Auditor's Report

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Group as at 31 December 2012, and of the Group's profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

Notes:

(a) The non-distributable reserve of the Group arose as a result of capitalisation of retained profits by subsidiaries.

(b) As stipulated by the relevant laws and regulations for foreign investment enterprises in the People's Republic of China ("PRC"), the PRC subsidiaries are required to maintain a statutory surplus reserve fund. Statutory surplus reserve fund is non-distributable. Appropriations to such reserve are made out of net profit after taxation of the PRC subsidiaries at the discretion of its board of directors. The statutory surplus reserve fund can be used to make up prior year losses, if any, and can be applied to convert into capital by means of capitalisation issue.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2012

1. GENERAL

The Company was incorporated in the Cayman Islands with limited liability under the Companies Law and registered thereunder as an exempted company. Its shares are listed on The Stock Exchange of Hong Kong Limited (the "Stock Exchange"). Its ultimate controlling parties are Mr. Lee Tat Hing and his spouse, Madam Fung Mei Po, who are executive directors of the Company. The addresses of the registered office and principal place of business of the Company are disclosed in the corporate information of the annual report.

The Company is an investment holding company. The principal activities of its principal subsidiaries are set out in note 37.

The financial statements are presented in Hong Kong dollars, which is also the functional currency of the Company.

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs")

In the current year, the Group has applied the following amendment to HKFRSs issued by the HKICPA.

Amendments to HKAS 12	Deferred tax: Recovery of underlying assets; and
Amendments to HKFRS 7	Financial instruments: Disclosures – Transfers of financial assets

Except as described below, the adoption of the amendment to HKFRSs in the current year has had no material impact on the Group's financial performance and positions for the current and prior years and/or on the disclosures set out in these consolidated financial statements.

Amendments to HKAS 12 "Deferred Tax: Recovery of underlying assets"

Under the amendments to HKAS 12 "Deferred tax: Recovery of underlying assets", investment properties that are measured using the fair value model in accordance with HKAS 40 "Investment property" are presumed to be recovered through sale for the purposes of measuring deferred taxes, unless the presumption is rebutted in certain circumstances.

The Group measures its investment properties using the fair value model. As a result of the application of the amendments to HKAS 12, the directors reviewed the Group's investment property portfolios and concluded that the Group's investment properties located in the PRC are depreciable and are held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time. Accordingly, the presumption set out in the amendments to HKAS 12 is rebutted. The adoption of the amendments to HKAS 12 has had no impact on the consolidated financial position and performance of the Group. This is because, previously, the Group also recognised deferred taxes on changes in fair value of investment properties on the basis that the entire carrying amounts of the properties were recovered through use.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2012

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") – continued

Amendments to HKAS 12 "Deferred Tax: Recovery of Underlying Assets" – continued

Regarding the Group's investment properties located in Hong Kong, the directors concluded that the investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, and that the presumption set out in the amendments to HKAS 12 is not rebutted. As a result of the application of the amendments to HKAS 12, the Group does not recognise any deferred tax on changes in fair value of the investment properties located in Hong Kong as the Group is not subject to income tax in relation to those fair value changes upon disposal of the investment properties. The application of the amendments to HKAS 12 has been applied retrospectively and has had no material impact on the consolidated financial position and performance of the Group. As at 31 December 2011, a deferred tax liability on changes in fair value of HK\$820,000 was recognised and a deferred tax asset of HK\$820,000 in respect of tax losses was recognised and these two amounts were offset in the consolidated statement of financial position. The application of the amendments has resulted in no deferred tax liability and deferred tax asset being recognised.

Amendments to HKFRS 7 "Disclosures – Transfers of financial assets"

The amendments to HKFRS 7 increase the disclosure requirements for transactions involving transfers of financial assets. These amendments are intended to provide greater transparency around risk exposures when a financial asset is transferred but the transferor retains some level of continuing exposure in the asset. The amendments also require disclosures where transfers of financial assets are not evenly distributed throughout the period.

The application of the amendments to HKFRS 7 has increased the Group's disclosures regarding trade receivables transferred to a bank with recourse (see note 36).

HKFRS 9 "Financial instruments"

HKFRS 9 issued in 2009 introduces new requirements for the classification and measurement of financial assets. HKFRS 9 amended in 2010 includes the requirements for the classification and measurement of financial liabilities and for derecognition.

For the year ended 31 December 2012

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") – continued

HKFRS 9 "Financial instruments" – continued

Key requirements of HKFRS 9 are described as follows:

- All recognised financial assets that are within the scope of HKAS 39 "Financial instruments: recognition and measurement" are subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. All other debt investments and equity investments are measured at their fair values at the end of subsequent reporting periods. In addition, under HKFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognised in profit or loss.
- With regard to the measurement of financial liabilities designated as at fair value through profit or loss, HKFRS 9 requires that the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value of financial liabilities attributable to changes in the financial liabilities' credit risk are not subsequently reclassified to profit or loss. Under HKAS 39, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss was presented in profit or loss.

HKFRS 9 is effective for annual periods beginning on or after 1 January 2015, with earlier application permitted.

The directors anticipate that the adoption of HKFRS 9 in the future will not have significant impact on amounts reported in respect of the Group's financial assets and financial liabilities.

New and revised standards on consolidation, joint arrangements, associates and disclosures

In June 2011, a package of five standards on consolidation, joint arrangements, associates and disclosures was issued, including HKFRS 10, HKFRS 11, HKFRS 12, HKAS 27 (as revised in 2011) and HKAS 28 (as revised in 2011).

For the year ended 31 December 2012

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") – continued

New and revised standards on consolidation, joint arrangements, associates and disclosures – *continued*

Key requirements of these five standards are described below.

HKFRS 10 replaces the parts of HKAS 27 "Consolidated and separate financial statements" that deal with consolidated financial statements. HK (SIC)-INT 12 "Consolidation – Special purpose entities" will be withdrawn upon the effective date of HKFRS 10. Under HKFRS 10, there is only one basis for consolidation, that is, control. In addition, HKFRS 10 includes a new definition of control that contains three elements: (a) power over an investee, (b) exposure, or rights, to variable returns from its involvement with the investee, and (c) the ability to use its power over the investee to affect the amount of the investor's returns. Extensive guidance has been added in HKFRS 10 to deal with complex scenarios.

HKFRS 11 replaces HKAS 31 "Interests in joint ventures". HKFRS 11 deals with how a joint arrangement of which two or more parties have joint control should be classified. HK (SIC) – INT 13 "Jointly controlled entities – Non-monetary contributions by venturers" will be withdrawn upon the effective date of HKFRS 11. Under HKFRS 11, joint arrangements are classified as joint operations or joint ventures, depending on the rights and obligations of the parties to the arrangements. In contrast, under HKAS 31, there are three types of joint arrangements: jointly controlled entities, jointly controlled assets and jointly controlled operations. In addition, joint ventures under HKFRS 11 are required to be accounted for using the equity method of accounting, whereas jointly controlled entities under HKAS 31 can be accounted for using the equity method of accounting or proportionate consolidation.

HKFRS 12 is a disclosure standard and is applicable to entities that have interests in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities. In general, the disclosure requirements in HKFRS 12 are more extensive than those in the current standards.

In July 2012, the amendments to HKFRS 10, HKFRS 11 and HKFRS 12 were issued to clarify certain transitional guidance on the application of these five HKFRSs for the first time.

These five standards, together with the amendments relating to the transitional guidance, are effective for annual periods beginning on or after 1 January 2013 with earlier application is permitted provided that all of these standards are applied at the same time.

The directors anticipate that the application of these five standards effective for annual period beginning 1 January 2013 will not have significant impact on the results and financial position of the Group. Also, the Group does not have any associates or jointly controlled entities at 31 December 2012.

For the year ended 31 December 2012

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") – continued

HKFRS 13 "Fair value measurement"

HKFRS 13 establishes a single source of guidance for fair value measurements and disclosures about fair value measurements. The Standard defines fair value, establishes a framework for measuring fair value, and requires disclosures about fair value measurements. The scope of HKFRS 13 is broad; it applies to both financial instrument items and non-financial instrument items for which other HKFRSs require or permit fair value measurements and disclosures about fair value measurements, except in specified circumstances. In general, the disclosure requirements in HKFRS 13 are more extensive than those in the current standards. For example, quantitative and qualitative disclosures based on the three-level fair value hierarchy currently required for financial instruments only under HKFRS 7 "Financial instruments: Disclosures" will be extended by HKFRS 13 to cover all assets and liabilities within its scope.

HKFRS 13 is effective for annual periods beginning on or after 1 January 2013.

The directors anticipate that the application of the new Standard will not have a significant impact on the amounts reported in the consolidated financial statements but will result in more extensive disclosures in the consolidated financial statements.

Amendments to HKAS 1 "Presentation of items of other comprehensive income"

The amendments to HKAS 1 "Presentation of items of other comprehensive income" introduce new terminology for the statement of comprehensive income and income statement. Under the amendments to HKAS 1, a "statement of comprehensive income" is renamed as a "statement of profit or loss and other comprehensive income". The amendments to HKAS 1 retain the option to present profit or loss and other comprehensive income in either a single statement or in two separate but consecutive statements. However, the amendments to HKAS 1 require items of other comprehensive income to be grouped into two categories: (a) items that will not be reclassified subsequently to profit or loss; and (b) items that may be reclassified subsequently to profit or loss; and (b) items that may be reclassified subsequently to profit or loss are met. Income tax on items of other comprehensive income is required to be allocated on the same basis – the amendments do not change the option to present items of other comprehensive income either before tax or net of tax.

The amendments to HKAS 1 are effective for annual periods beginning on or after 1 July 2012. The presentation of items of other comprehensive income will be modified accordingly when the amendments are applied in the future accounting periods.

The directors of the Company anticipate that the application of other new and revised HKFRSs will have no material impact on the consolidated financial statements.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with HKFRSs issued by the HKICPA. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange and by the Hong Kong Companies Ordinance.

The consolidated financial statements have been prepared on the historical cost basis except for investment properties and certain financial instruments that are measured at fair values, as explained in the accounting policies set out below. Historical cost is generally based on the fair value of the consideration given in exchange for goods.

The principal accounting policies are set out below.

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern financial and operating policies of an entity so as to obtain benefits from its activities.

Income and expenses of subsidiaries acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the effective date of acquisition and up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with those used by other members of the Group.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Group's equity therein.

Allocation of total comprehensive income to non-controlling interests

Total comprehensive income and expense of a subsidiary is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Group's ownership interests in existing subsidiaries

Changes in the Group's ownership interests in existing subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES – continued

Basis of consolidation – *continued*

Changes in the Group's ownership interests in existing subsidiaries – continued

When the Group loses control of a subsidiary, it (i) derecognises the assets (including any goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost, (ii) derecognises the carrying amount of any non-controlling interests in the former subsidiary at the date when control is lost (including any components of other comprehensive income attributable to them), and (iii) recognises the aggregate of the fair value of the consideration received and the fair value of any retained interest, with any resulting difference being recognise as a gain or loss in profit or loss attributable to the Group. When assets of the subsidiary are carried at revalued amounts or fair values and the related cumulative gain or loss has been recognised in other comprehensive income and accumulated in equity, the amounts previously recognised in other comprehensive income and accumulated in equity are accounted for as if the Group had directly disposed of the related assets (i.e. reclassified to profit or loss or transferred directly to retained earnings as specified by applicable HKFRSs). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under HKAS 39 "Financial instruments: recognition and measurement" or, when applicable, the cost on initial recognition of an investment in an associate or a jointly controlled entity.

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods sold in the normal course of business, net of discounts and sales related taxes.

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Service income is recognised when services are provided.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES – continued

Revenue recognition – *continued*

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation. Investment properties include land held for undetermined future use, which is regarded as held for capital appreciation purpose.

Investment properties are initially measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment properties are measured at their fair values using the fair value model. Gains or losses arising from changes in the fair value of investment properties are included in profit or loss for the period in which they arise.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use or no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit or loss in the period in which the property is derecognised.

Property, plant and equipment

Property, plant and equipment including leasehold land (classified as finance leases) and buildings held for use in the production or supply of goods or services, or for administrative purposes (other than construction in progress) are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and accumulated impairment losses, if any.

Depreciation is recognised so as to write off the cost of items of property, plant and equipment other than construction in progress less their residual value, over their estimated useful lives, using the reducing balance method. The estimated useful lives and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Construction in progress includes property, plant and equipment in the course of construction for production or for its own use purposes. Construction in progress is carried at cost less any recognised impairment loss. Construction in progress is classified to the appropriate category of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES – continued

Property, plant and equipment – continued

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Leasing

Leases are classified as finance leases when the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised in profit or loss on a straight line basis over the term of the relevant lease.

The Group as lessee

Operating lease payments are recognised as an expense on a straight line basis over the lease term.

Leasehold land and building

When a lease includes both land and building elements, the Group assesses the classification of each element as a finance or an operating lease separately based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Group, unless it is clear that both elements are operating leases in which case the entire lease is classified as on operating lease. Specifically, the minimum lease payments (including any lump-sum upfront payments) are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land element and building element of the lease at the inception of the lease.

To the extent the allocation of the lease payments can be made reliably, interest in leasehold land that is accounted for as an operating lease is presented as "prepaid lease payments" in the consolidated statement of financial position and is amortised over the lease term on a straight line basis. When the lease payments cannot be allocated reliably between the land and building elements, the entire lease is generally classified as a finance lease and accounted for as property, plant and equipment.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES – continued

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in the respective functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchanges prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss in the period in which they arise. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. Hong Kong dollars) at the rate of exchange prevailing at the end of the reporting period, and their income and expenses are translated at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case, the exchange rates prevailing at the dates of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of translation reserve (attributed to non-controlling interests as appropriate).

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All borrowing costs are recognised in profit or loss in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES – continued

Government grants – *continued*

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

Retirement benefit costs

Payments to the Mandatory Provident Fund Scheme in Hong Kong and retirement benefit schemes in the PRC are recognised as an expense when employees have rendered service entitling them to the contributions.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before taxation as reported in the consolidated statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax base used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary difference to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES – continued

Taxation – continued

The carrying amount of deferred tax assets is reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax liabilities or deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. If the presumption is rebutted, deferred tax liabilities and deferred tax assets for such investment properties are measured in accordance with the above general principles set out in HKAS 12 (i.e. based on the expected manner as to how the properties will be recovered).

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Intangible assets

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES – continued

Intangible assets – *continued*

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is charged to profit or loss in the period in which it is incurred. Subsequent to initial recognition, internally-generated intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

Impairment

Intangible assets with finite useful lives are tested for impairment when there is an indication that an asset may be impaired (see the accounting policies in respect of impairment losses for tangible and intangible assets below).

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the firstin, first-out method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Impairment losses on tangible and intangible assets

At the end of the reporting period, the Group reviews the carrying amounts of its tangible and intangible assets with finite useful lives to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

For the year ended 31 December 2012

3. SIGNIFICANT ACCOUNTING POLICIES – continued

Impairment losses on tangible and intangible assets - continued

Where an impairment loss subsequently reverses, the carrying amount of the asset (or a cashgenerating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a cash-generating unit) in prior years. A reversal of an impairment loss is recognised as income immediately.

Financial instruments

Financial assets and financial liabilities are recognised in the consolidated statement of financial position when a group entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss.

Financial assets

The Group's financial assets are mainly classified as loans and receivables. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Interest income is recognised on an effective interest basis for debt instruments.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Subsequent to initial recognition, loans and receivables (including trade and other receivables, pledged bank deposits and bank balances and cash) are carried at amortised cost using the effective interest method, less any identified impairment losses (see accounting policy on impairment loss on financial assets below).

Impairment of financial assets

Financial assets are assessed for indicators of impairment at the end of the reporting period. Financial assets are considered to be impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been affected.

Objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation.

For certain categories of financial assets, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment as a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the credit period granted, observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade and other receivables, where the carrying amount is reduced through the use of an allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss. When a trade or other receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to profit or loss.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment losses was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Financial instruments – continued

Financial liabilities and equity instruments

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the group after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

The Group's financial liabilities are generally classified into financial liabilities at FVTPL and other financial liabilities.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Interest expense is recognised on an effective interest basis other than those financial liability classified as at FVTPL, of which the interest expense is included in net gains or losses.

Other financial liabilities

Other financial liabilities including trade and other payables, bank borrowings and amounts due to directors are subsequently measured at amortised cost, using the effective interest method.

Derivative financial instruments

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at the end of the reporting period. The resulting gain or loss is recognised in profit or loss immediately.

For the year ended 31 December 2012

Derecognition

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Share-based payment transactions

Equity-settled share-based payment transactions

Share options granted to employees, directors and non-executive directors

The fair value of services received determined by reference to the fair value of share options granted at the grant date is recognised as an expense in full at the grant date when the share options granted vest immediately, with a corresponding increase in equity (share option reserve).

At the end of the reporting period, the Group revises its estimates of the number of options that are expected to ultimately vest. The impact of the revision of the original estimates during the vesting period, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to share option reserve.

When share options are exercised, the amount previously recognised in share option reserve will be transferred to share premium. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share option reserve will be transferred to retained profits.

For the year ended 31 December 2012

4. KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in note 3, the directors of the Company are required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Estimated impairment loss of inventories

The Group makes allowance for inventories obsolescence based on an assessment of the net realisable value of inventories. Allowances are applied to inventories where events or changes in circumstances indicate that the net realisable value is lower than the cost of inventories. The identification of obsolete inventories requires the use of judgment and estimates on the conditions and usefulness of the inventories. The amount of allowance would be changed as a result of the changes in current market conditions subsequently.

The carrying amount of inventories at 31 December 2012 is HK\$228,897,000 (net of allowance for inventories obsolescence of HK\$6,269,000) (2011: HK\$232,958,000 (net of allowance for inventories obsolescence of HK\$6,782,000)).

Estimated impairment loss recognised on trade receivables

When there is objective evidence of impairment loss, the Group takes into consideration the estimation of future cash flows. The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). Where the actual future cash flows are less than expected, a material impairment loss may arise.

As at 31 December 2012, the carrying amount of trade receivables is HK\$237,991,000 (net of allowance for bad and doubtful debts of HK\$56,278,000) (2011: HK\$230,274,000 (net of allowance for bad and doubtful debts of HK\$54,462,000)).

For the year ended 31 December 2012

4. **KEY SOURCES OF ESTIMATION UNCERTAINTY** – continued

Income taxes

As at 31 December 2012, a deferred taxation asset of HK\$1,909,000 (2011: HK\$1,769,000) in relation to unused tax losses has been recognised in the Group's consolidated statement of financial position. No deferred tax asset has been recognised on the tax losses of HK\$145,818,000 (2011: HK\$144,516,000) due to the unpredictability of future profit streams. The realisability of the deferred taxation asset mainly depends on whether sufficient future profits or taxable temporary differences will be available in the future. In cases where the actual future profits generated are less than or more than expected, a material reversal or recognition of deferred taxation assets may arise, which would be recognised in profit or loss for the period in which such a reversal or recognition takes place.

Deferred taxation on investment properties

For the purposes of measuring deferred tax liabilities or deferred tax assets arising from investment properties that are measured using the fair value model, the directors have reviewed the Group's investment property portfolios and concluded that the Group's investment properties located in the PRC are depreciable and are held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time. Accordingly, the presumption set out in the amendments to HKAS 12 is rebutted. The adoption of the amendments to HKAS 12 has had no impact on the consolidated financial position and performance of the Group. This is because, previously, the Group also recognised deferred taxes on changes in fair value of investment properties on the basis that the entire carrying amounts of the properties were recovered through use.

Regarding the Group's investment properties located in Hong Kong, the directors concluded that the investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, and that the presumption set out in the amendments to HKAS 12 is not rebutted. As a result of the application of the amendments to HKAS 12, the Group does not recognise any deferred tax on changes in fair value of the investment properties located in Hong Kong as the Group is not subject to income tax in relation to those fair value changes upon disposal of the investment properties. The application of the amendments to HKAS 12 has been applied retrospectively and has had no material impact on the consolidated financial position and performance of the Group. As at 31 December 2011, a deferred tax liability on changes in fair value of HK\$820,000 was recognised and a deferred tax asset of HK\$820,000 in respect of tax losses was recognised and these two amounts were offset in the consolidated statement of financial position. The application of the amendments has resulted in no deferred tax liability and deferred tax asset being recognised.

For the year ended 31 December 2012

5. CAPITAL RISK MANAGEMENT

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from prior year.

The capital structure of the Group consists of net debts, which includes bank borrowings, disclosed in note 24, pledged bank deposits, cash and cash equivalents and equity attributable to owners of the Company, comprising issued share capital, reserves and retained profits.

The directors of the Company review the capital structure on a regular basis. As part of this review, the directors consider the cost of capital and the risks associates with each class of capital. Based on recommendations of the directors, the Group will balance its overall capital structure through the payment of dividends, new share issues and the issue of new debts.

6. SEGMENT INFORMATION

Information reported to the executive directors of the Company, being the chief operating decision makers, for the purposes of resource allocation and assessment of segment performance focuses on types of goods delivered. This is also the basis upon which the Group is arranged and organised.

Specifically, the Group's reportable and operating segments under HKFRS 8 are as follows:

Household products	—	manufacture and distribution of household products
PVC pipes and fittings	-	manufacture and distribution of PVC pipes and fittings
Others	_	investment in properties

Hong Kong Profits Tax is calculated at 16.5% of the estimated assessable profit for both years.

Under the Law of the PRC on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate of the PRC subsidiaries is 25% from 1 January 2008 onwards.

Pursuant to the relevant laws and regulations in the PRC, four (2011: four) of the Company's PRC subsidiaries are entitled to a 50% relief on applicable domestic tax rate from PRC Enterprise Income Tax for current year up to 31 December 2012 under the EIT Law. For certain of the Company's subsidiaries that have not yet entitled to tax exemption and reduction because no profit is generated since commencement of operation, under the application of the Guofa [2007] No. 39 promulgated by the State Council ("Guofa"), the deemed first profit making year would be in 2008 and therefore, the PRC Enterprise Income Tax rate on these Company's subsidiaries would be 12.5% for three years from 2010.

For the year ended 31 December 2012

9. **TAXATION** – continued

Certain of the Company's subsidiaries were entitled to enjoy preferential PRC Enterprise Income Tax rate prior to 2008. Under the application of the Guofa as mentioned above, the PRC Enterprise Income Tax rate of those companies that enjoyed such tax benefits would be increased progressively to 25% in five years commencing from 1 January 2008. The applicable PRC Enterprise Income Tax rate for these subsidiaries is 18% in 2008, 20% in 2009, 22% in 2010, 24% in 2011 and 25% in 2012.

The tax charge (credit) for the year can be reconciled to the profit (loss) before taxation per the consolidated statement of comprehensive income as follows:

19. TRADE AND OTHER RECEIVABLES – continued

Aging of trade receivables based on the invoice date which are past due but not impaired – *continued*

Based on the payment pattern of the customers of the Group, trade receivables which are past due but not impaired are generally collectable. Allowance on doubtful debts recognised for 2011 and 2012 are based on estimated irrecoverable amounts by reference to financial background, creditability of individual customers, past default experience, subsequent settlement and payment history of the customers. Full provision has been made for individual trade receivables aged over one year with no subsequent settlement as historical evidence shows that such receivables are generally not recoverable, or individual trade receivables which has either been placed under liquidation or in severe financial difficulties.

2012	2011
HK\$'000	HK\$'000
-	3,009
	2012 HK\$'000

During the year ended 31 December 2011, the Group had the following outstanding foreign currency forward contracts. The major terms of the outstanding foreign currency forward contracts at 31 December 2011 were as follows:

Notional amount	Maturity	Exchange rates (Note)
Non-deliverable		
Buy USD1,500,000 to USD3,000,000	23 May 2012	USD1 to RMB6.65 - 6.86
Buy USD4,000,000 to USD8,000,000	19 December 2012	USD1 to RMB6.46 - 6.65

Note: The Group will earn foreign exchange gain when the expiry reference rate is less than or equal to the range of pivot rates set above. The expiry reference rate is determined by the counterparty banks by reference to the USD/RMB official rate which is publicly available on the expiry date.

The above derivatives were disposed of upon their maturity during the year ended 31 December 2012 with a gain arising on changes in fair value of approximately HK\$4,404,000. As at 31 December 2011, the derivatives were measured at fair values, which were determined based on the valuation amount provided by the relevant counterparty financial institutions at the end of the reporting period. The above derivative financial instruments are denominated in USD, which is the currency other than the functional currency of the relevant group company.

At 31 December 2012	(9,549)	(1,064)	1,909	3,873	(4,831)

At the end of the reporting period, the Group had unused tax losses of approximately HK\$154,185,000 (2011: HK\$162,626,000) available to offset against future assessable profits. A deferred taxation asset of HK\$1,909,000 (2011: HK\$1,769,000) has been recognised in respect of HK\$11,570,000 (2011: HK\$10,721,000) of such losses. No deferred taxation asset has been recognised in respect of the remaining tax losses of HK\$142,615,000 (2011: HK\$151,905,000) due to the unpredictability of future profit streams. Included in unrecognised tax losses are losses of the following amounts that will expire in the following years. Other losses may be carried forward indefinitely. The Group had no other significant unprovided deferred taxation at the end of the reporting period.

26. DEFERRED TAXATION – continued

Under the EIT Law of PRC, withholding tax is imposed on dividends declared in respect of profits earned by PRC subsidiaries from 1 January 2008 onwards. Deferred taxation has not been provided for in the consolidated financial statements in respect of temporary differences attributable to accumulated profits of the PRC subsidiaries amounting to HK\$80,262,000 (2011: HK\$57,576,000) as the Group is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.

There were no changes in the authorised, issued and fully paid share capital in both years.

28. SHARE OPTION SCHEME

The Company adopted its first share option scheme on 11 March 1993, and such share option scheme was terminated in 2003. The Company's second share option scheme (the "Share Option Scheme"), was adopted at an extraordinary general meeting of the Company held on 10 June 2011 for the primary purpose of providing incentives to directors and eligible employees, and will expire on 9 June 2021. Under the Share Option Scheme, the Board of Directors of the Company may grant options to eligible employees, including directors of the Company and its subsidiaries, to subscribe for shares in the Company.

At 31 December 2012, the number of shares in respect of which options had been granted and remained outstanding under the Share Option Scheme was 102,100,000 (2011: 46,800,000), representing 15.1% (2011: 6.9%) of the shares of the Company in issue at that date. The total number of shares in respect of which options may be granted under the Share Option Scheme is not permitted to exceed 10% of the shares of the Company in issue at any point in time, without prior approval from the Company's shareholders. The number of shares issued and to be issued in respect of which options granted and may be granted to any individual in any one year is not permitted to exceed 1% of the shares of the Company in issue at any point in time, without prior approval from the Company's shareholders.

Options granted must be taken up within 1 month of the date of grant, upon payment of HK\$1 from each grantee upon acceptance of offer. Options may be exercised immediately from the date of grant of the share options to the 10th anniversary of the date of grant. The exercise price is determined by the directors of the Company, and will not be less than the highest of (i) the closing price of the Company's shares on the date of grant, (ii) the average closing price of the shares for the five business days immediately preceding the date of grant; and (iii) the nominal value of the Company's share.

The weighted average exercise price of options granted during the year, and outstanding options at the end of the reporting period is HK\$0.309 (2011: HK\$0.237) and HK\$0.276 (2011: HK\$0.237), respectively.

During the period, options were granted on 12 November 2012 (2011: 24 October 2011) with an aggregate estimated fair value of HK\$8,205,000 (2011: HK\$4,869,000). The entire amount was recognised as expense for both years.

These fair values were calculated using the Binomial model. The inputs into the model were as follows:

	2012	2011
Number of share options	55,300,000	46,800,000
Vesting period	Nil	Nil
Grant date share price per share	HK\$0.305	HK\$0.230
Exercise price per share	HK\$0.309	HK\$0.237
Expected volatility	47.59%	53.35%
Risk-free interest rate	1.022%	1.424%
Expected dividend yield	-	2.17%

Expected volatility was determined by using the historical volatility of the Company's share price over the previous 10 years. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions and behavioural considerations.

The Binomial model has been used to estimate the fair values of the options. The variables and assumptions used in computing the fair values of the share options are based on the directors' best estimate. The value of an option varies with different variables of certain subjective assumptions.

Financial risk management objectives and policies

The Group's major financial instruments include trade and other receivables, pledged bank deposits, bank balances and cash, trade and other payables, derivative financial instrument, bank borrowings and amounts due to directors. Details of these financial instruments are disclosed in respective notes. The risks associated with these financial instruments include market risk (currency risk, interest rate risk, and other price risk), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Market risk

Currency risk

Several subsidiaries of the Company have foreign currency sales and purchases, which expose the Group to foreign currency risk. Approximately 41% (2011: 42%) and 44% (2011: 41%) of the Group's sales and purchases, respectively, are denominated in currencies other than the functional currencies of the group entities making the sale and the purchase.

Several subsidiaries of the Company have foreign currency bank balances, trade and other receivables, trade and other payables and bank borrowings that are denominated in currencies other than the functional currencies of the relevant group entities which expose the Group to foreign currency risk. The Group currently does not have a foreign currency hedging policy but the management monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at 31 December 2012 and 2011 are as follows:

	Ass	Assets		lities
	2012	2011	2012	2011
	HK\$'000	HK\$'000	HK\$'000	HK\$'000
USD	64,505	78,169	(36,142)	(51,759)
HK\$	1,262	639	-	_
RMB	3,017	1,335		
	68,784	80,143	(36,142)	(51,759)

In addition, the Group is also exposed to foreign currency risk arising from intra-group loans/ trading transactions denominated in HK\$ involving PRC entities whose functional currency is RMB. The foreign currency denominated net monetary assets in relation to these intragroup balances amounted to approximately HK\$268,344,000 (2011: HK\$264,965,000). The Group has not formulated a policy to hedge the foreign currency risk.

The Group is mainly exposed to fluctuation in exchange rate of RMB against HK\$. Exposures on balances which are denominated in USD in group companies with HK\$ as functional currency, are not considered significant as HK\$ is pegged to USD. The following table details the Group's sensitivity to a reasonably possible change of 5% in exchange rate of RMB (functional currency of the relevant group companies) against HK\$ while all other variables are held constant. The sensitivity analysis includes outstanding foreign currency denominated monetary items including external loans as well as loans/trading balances with foreign operations within the Group where the denomination of the loan/balance is in a currency other than the functional currency of the lender or the borrower. It adjusts their translations at the end of the reporting period for a 5% change in RMB.

	2012 HK\$'000	2011 HK\$'000
Increase (decrease) in profit (loss) for the year		
– if RMB weaken against HK\$	10,110	10,093
 – if RMB strengthen against HK\$ 	(10,110)	(10,093)

In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk as the year end exposure does not reflect the exposure during the year.

Interest rate risk

The Group's cash flow interest rate risk relates primarily to variable rate bank borrowings (see note 24). In relation to these variable rate bank borrowings, the Group currently does not have policy on cash flow hedges of interest rate risk. However, the management monitors interest rate exposure and will consider hedging significant interest rate risk should the need arise.

The Group's sensitivity to cash flow interest rate risk has been determined based on the exposure to interest rates for the variable rate bank borrowings at the end of the reporting period and the management's assessment of the reasonably possible change in interest rates throughout the respective year.

	2012
Reasonably possible change in interest rate	100 basis points
	2012 HK\$'000
(Decrease) increase in profit for the year

Reasonably possible change in interest rate	100 basis points
Reasonably possible change in interest rate (Increase) decrease in loss for the year	100 basis points 2011

In management's opinion, the sensitivity analysis is unrepresentative of the inherent interest rate risk as the year end exposure does not reflect the exposure during the year.

Other price risk

The Group is engaged in the business activities of design, manufacture and marketing of PVC and fabric household products, PVC pipes and fittings. PVC resin is a by-product in the refinery of petroleum products from crude oil. The price of crude oil is affected by a wide range of global and domestic factors which are beyond the control of the Group. The fluctuations in such price may have favourable or unfavourable impacts to the Group. The Group historically has not used commodity derivative instruments to hedge against potential price fluctuations of crude oil and therefore the Group is exposed to general price fluctuations of crude oil.

No sensitivity analysis is presented as in management's opinion, a sensitivity analysis would be unrepresentative of the other price risk as the year end exposure does not reflect the exposure during the year.

Credit risk

The Group's credit risk is primarily attributable to trade receivables. The maximum exposure to credit risk in the event of the counterparties' failure to perform their obligations as at 31 December 2012 in relation to each class of recognised financial assets is the carrying amount of those assets as stated in the consolidated statement of financial position.

In order to minimise the credit risk, the management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at the end of the reporting period to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

The credit risk on pledged bank deposits and bank balances is limited because the counterparties are banks with good reputation and high credit ratings assigned by international credit-rating agencies.

The Group's concentration of credit risk by geographical locations is mainly in the PRC, which accounted for 74% (2011: 69%) of the total trade receivables as at 31 December 2012. The Group has no significant concentration of credit risk in trade receivables with exposure spread over a number of counterparties.

For the year ended 31 December 2012

29. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES – continued

Financial risk management objectives and policies – continued

Liquidity risk

The Group has sufficient cash and cash equivalents and available funding through bank borrowings (note 24) to meet its working capital requirement. Generally, trade payables are normally required to be settled within 3 months after receipt of goods and services.

In the management of the liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate by the management to finance the Group's operations and mitigate the effects of fluctuations in cash flows. The management monitors the utilisation of bank borrowings and ensures compliance with loan covenants.

The Group relies on bank borrowings as a significant source of liquidity. As at 31 December 2012, the Group has available unutilised bank loan facilities of approximately HK\$264,131,000 (2011: HK\$277,011,000).

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. Specifically, bank loans with a repayment on demand clause are included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities are based on the agreed repayment dates.

The table includes both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curve at the end of the reporting period.

In addition, the following table details the Group's liquidity analysis for its derivative financial instruments. The tables have been drawn up based on the undiscounted contractual net cash (inflows) and outflows on derivative instruments that settle on a net basis. The liquidity analysis for the Group's derivative financial instruments are prepared based on the contractual maturities as the management consider that the contractual maturities are essential for an understanding of the timing of the cash flows of derivatives.

Bank loans with a repayment on demand clause are included in the "on demand or less than 1 month" time band in the above maturity analysis. At 31 December 2012 and 31 December 2011, the aggregate undiscounted principal amounts of these bank loans amounted to HK\$92,068,000 and HK\$103,283,000, respectively. Taking into account the Group's financial position, the Directors do not believe that it is probable that the banks will exercise their discretionary rights to demand immediate repayment. The directors believe that such bank loans will be repaid from two to four years after the end of the reporting period in accordance with the scheduled repayment dates set out in the loan agreements. At that time, the aggregate principal and interest cash outflows will amount to HK\$93,000,000.

For the purpose of managing liquidity risk, the management reviews the expected cash flow information of the Group's variable rate bank loans based on the scheduled repayment dates set out in the loan agreement as set out in the table below:

	Weighted average interest rate %	Less than 1 month HK\$'000	1 – 3 months HK\$'000	3 months to 1 year HK\$'000	1 to 5 years HK\$'000	Over 5 years HK\$'000	Total undiscounted cash flows HK\$'000	Total carrying amounts HK\$'000
Variable rate bank loans As at 31 December 2012	2.94	29,371	34,589	23,731	5,309		93,000	92,068
As at 31 December 2011	2.63	41,159	40,338	13,951	8,890		104,338	103,283

The amounts included above for variable interest rate instruments for non-derivative financial liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

For the year ended 31 December 2012

29. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES – continued

Fair value

The fair value of derivative financial instruments is determined using quoted forward exchange rates and yield curves derived from quoted interest rates matching maturities of the contracts.

The directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the consolidated financial statements approximate their fair values.

Fair value measurements recognised in the consolidated statement of financial position

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active market for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for asset or liability that are not based on observable market data (unobservable inputs). The major inputs and assumptions include discount rates used in the valuation of the financial assets.

For the year ended 31 December 2012

33. RETIREMENT BENEFIT SCHEMES

The Group operates a Mandatory Provident Fund Scheme (the "MPF Scheme") for all qualifying Hong Kong employees. The assets of the scheme are held separately from those of the Group, in funds under the control of trustees. Mandatory benefits are provided under the MPF Scheme. The Group contributes the lower of 5% of the relevant payroll costs and HK\$1,000 (increases to HK\$1,250 with effective from 1 June 2012) per employee to the MPF Scheme.

Employees of subsidiaries in the PRC are members of the state-sponsored pension schemes operated by the PRC government. The subsidiaries are required to contribute a certain percentage of their payroll to the pension scheme to fund the benefits. The only obligation of the Group with respect to the state-sponsored pension schemes is to make the required contributions.

The total contribution to the retirement benefit schemes charged to the consolidated statement of comprehensive income is HK\$6,484,000 (2011: HK\$5,314,000).

34. RELATED PARTIES TRANSACTIONS

	- , -	,

The remuneration of directors and key executives is determined by the remuneration committee having regard to the performance of individuals and market trends.

- (b) During the year ended and as at 31 December 2012, Joy Tower Limited (note), a related party of the Group, provided its residential property to secure one of the Group's banking facilities amounting to HK\$23,562,000 (2011: HK\$24,411,000). Approximately HK\$17,473,000 (2011: HK\$19,970,000) was utilised in respect of this banking facility as at 31 December 2012.
 - Note: Mr. Lee Tat Hing and his spouse, Madam Fung Mei Po, the directors of the Group, are directors and controlling shareholders of Joy Tower Limited.

For the year ended 31 December 2012

35. OTHER MATTERS

On 14 February 2011, one of the subsidiaries of the Company, Welidy Limited ("Welidy"), has entered into a cooperative development framework agreement with an independent third party property developer in relation to the redevelopment of land which is owned by Welidy and the factory situated on the piece of land which is currently in use as one of the production plants by one of the subsidiaries of the Company, World Plastic Mat (Baoan) Company Limited ("World (Baoan)").

On 11 August 2011, Welidy further entered into a provisional removal remedy agreement ("provisional removal remedy agreement") with the same independent third party. Under the provisional removal remedy agreement, the Group will hand over the above mentioned piece of land to the independent third party for development in exchange for certain residential or commercial properties (the "compensated properties") constructed after the redevelopment of land. However, the details of compensation have not been finalised between both parties and the official removal remedy agreement has not been entered into between Welidy, the property developer and the PRC government authorities by the end of the reporting period.

As at 31 December 2012, the carrying amounts of the related prepaid lease payments and the factory situated on the piece of land are HK\$7,911,000 (2011: HK\$8,191,000) and HK\$25,200,000 (2011: HK\$28,125,000), respectively. Deposit amounting to RMB30,000,000 (equivalent to approximately HK\$37,313,000 (2011: HK\$37,037,000)) was received by the Group during the year ended 31 December 2011. The deposits are refundable upon the receipt of all the compensated properties or acknowledgement from PRC government authorities on the termination of development project. During the year ended 31 December 2011, the Group also prepaid HK\$21,500,000 for legal consultancy services to be provided by a PRC lawyer in respect of this redevelopment project. The directors of the Company are of the opinion that the development project is still at preliminary stage and conditional upon the approval by the PRC government authorities for the change of usage of land use rights of the land with a plan to redevelop it from industrial properties into residential, communal facilities and other commercial properties. Taking into account the status of the project, both the prepayment and the deposit received were classified as non-current as at 31 December 2012 as the directors of the Company believe that the redevelopment project will not be completed within one year from the end of the reporting period. Prior year figures were reclassified to conform with current year's presentation.

As at 31 December 2012, the directors of the opinion that the financial impact of the redevelopment project cannot be estimated reliably.

For the year ended 31 December 2012

36. TRANSFERS OF FINANCIAL ASSETS

The following were the Group's financial assets as at 31 December 2012 that were transferred to a bank by discounting those trade receivables on a full recourse basis. As the Group has not transferred the significant risks and rewards relating to these receivables, it continues to recognise the full carrying amount of the trade receivables and has recognised the cash received on the transfer as a secured borrowing (see note 24).

These financial assets are carried at amortised cost in the Group's consolidated statement of financial position.

As at 31 December 2012

	Trade receivables transferred to a bank with full recourse

Notes:

- (a) The registered capital of South China Reborn Resources (Zhongshan) Company Limited is US\$11,710,000. As at 31 December 2012, US\$11,710,000 (2011: US\$10,618,000) had been contributed to this company.
- (b) None of the deferred non-voting shares are held by the Group.
- (c) The deferred non-voting shares are held by Welidy.

The above table lists the subsidiaries of the Company which, in the opinion of the directors, principally affected the results or assets or liabilities of the Group. To give details of other subsidiaries would, in the opinion of the directors, result in particulars of excessive length.

All the subsidiaries operate in their respective places of incorporation/registration except Welidy Limited which holds properties in the PRC, Greatflow Investments Limited which holds properties in Hong Kong and World Houseware (BVI) Limited operates in Hong Kong.

None of the subsidiaries had any debt securities outstanding at the end of the year or at any time during the year.

38. ACQUISITION OF ADDITIONAL INTEREST OF A SUBSIDIARY/DISPOSAL OF A SUBSIDIARY

On 7 January 2012, the Group acquired an additional 19% equity interest in South China Reborn (Wuzhou), a subsidiary of the Company, principally engaged in manufacturing of cotton yarn, from a non-controlling shareholder of South China Reborn (Wuzhou) for a consideration of approximately HK\$1,173,000. A difference between the decrease in the carrying amount of the non-controlling interest and the consideration of approximately HK\$686,000 was debited to retained profits in the consolidated statement of changes in equity. After the transaction, the Group's equity interest in South China Reborn (Wuzhou) was increased from 51% to 70%.

For the year ended 31 December 2012

38. ACQUISITION OF ADDITIONAL INTEREST OF A SUBSIDIARY/DISPOSAL OF A SUBSIDIARY – continued

On 19 April 2012, the Group entered into a sale and purchase agreement with another noncontrolling shareholder of South China Reborn (Wuzhou) to dispose of its 70% equity interest of South China Reborn (Wuzhou) for a consideration of approximately HK\$4,000,000. The disposal was completed on 21 May 2012, on which date the Group lost control of South China Reborn (Wuzhou). The gain on disposal of the subsidiary has been recognised in profit or loss of the consolidated statement of comprehensive income.
