

GLOSSARY OF TECHNICAL TERMS

This glossary contains explanations of certain terms and definitions used in this prospectus in connection with our Group and its business. The terms and their meanings may not correspond to standard industry meaning or usage of those terms.

- “DRP” Distribution Resource Planning, a method used in business administration for planning orders within a supply chain. DRP enables the user to set certain inventory control parameters (like a safety stock) and calculate the time-phased inventory requirements
- “ERP” Enterprise Resource Planning systems, which integrate internal and external management information across an entire organisation, embracing finance/accounting, manufacturing, sales and service, customer relationship management, etc. ERP systems automate this activity with an integrated software application
- “ODM” original design manufacturer, a company which designs and manufactures a product which is specified and eventually branded by another company for sale
- “OEM” original equipment manufacturer, a company manufactures products or components that are purchased by another company and retailed under that purchasing company’s brand name
- “SKU” stock-keeping unit, with products that are exactly the same except for their different colors deemed as different stock-keeping units, and products that are exactly the same except for their different sizes deemed as one stock keeping unit
