REASONS FOR AND BENEFITS OF THE DISPOSAL

The Directors consider the Disposal a good opportunity for the Group to eliminate certain green building services, including; the green construction services (involves the usage of green building technology in building construction, including equipment procurement, installation and other related work) and the energy station management services, which are considered as services with long operating cycle and large initial investment cost. Meanwhile, the provision of technical design and consultant services and green management and services will be retained in the Group.

After the Disposal, the Group is expected to focus its resources in the operation and potential investments in the healthcare industry. The Disposal is in line with the development strategy of the Group.

Although the market of green construction services and energy station management services may have potential growth in the future, the Directors are of the opinion that the business volume and the revenue contributed by those services do not match the resources deployed by and the efforts made by the Group.

The Directors consider the terms of the Equity Transfer Agreement and the Disposal are fair and reasonable and in the interests of the Company and the Shareholders as a whole.
