ANNUAL REPORT 2000 年報

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

This annual report, for which the directors of Beijing Beida Jade Bird Universal Sci-Tech Company Limited (the "Directors") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of The Stock Exchange for the purpose of giving information with regard to Beijing Beida Jade Bird Universal Sci-Tech Company Limited. The directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief:— (1) the information contained in this annual report is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this annual report misleading; and (3) all opinions expressed in this annual report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

Chairman's Statement

丰 席 報

To all Shareholders,

The Year 2000 was a year of significant growth for us. Through corporate reorganization, we have received investments from strategic investors and raised funds from the international capital market.

With the embedded system technology developed by Peking University, the Company's operating philosophy hinges on "talent-based, core technology and product backup". Prior to the reorganization, our proprietary embedded technology was not widely recognized in the Through the sustained efforts of our management, research and development personnel as well as sales personnel, our embedded products are now readily recognized by the market in the PRC. Our trademark "Jade Bird Universal" has also been successfully registered. We will try to establish the trademark as a brand name and a quality benchmark of embedded system products with exceptional quality.

In October 2000, we were approved by the China State Cryptography Control Authority Office ("CSCCAO") as a designated commercial cryptographic product manufacturer, which we believe is a recognition of our advantages and status in the production technology and development of the commercial cryptographic products. Last year, our "SSP01 Encryption Algorithm Chip" also passed the trials and accreditation of CSCCAO for production, which is an official recognition of our outstanding achievement in the research and development of specific security integrated circuits ("ICs"). Leveraged upon our distinct advantages and experience in encryption technology, CSCCAO also approved our proposal to research and develop "SJY01-A Data Encryption Card" and to apply our accredited "SSP01 Encryption Algorithm Chip" on the card.

These approvals are recognitions of our accomplishments in the research and development of network security and ASIC products, and further increase our confidence in this area.

二零零零年,本公司透過業務重組,引入策 略性投資者,及於國際資本市場集資,業務 得到了重大的發展。

本公司擁有的嵌入式系統技術源自於北京 大學。秉承「以人才為根本,以技術為核心, 以產品為依托」的經營宗旨。於業務重組 前,本公司的專有嵌入式技術仍未廣泛地 被市場認識。經過本公司管理層、研發人 員,以及銷售人員的努力,本公司的嵌入式 產品現已漸漸被市場認可。而「青鳥環宇」 的商標亦已成功註冊,並且成為一個品牌 及客戶對嵌入式系統產品質量的信心標 誌。

本公司於二零零零年十月獲得了中國國家 密碼管理委員會辦公室(「國密辦」)的批 文,成為商用密碼產品生產定點單位,認定 了本公司在擁有生產商用密碼產品技術發 展方面的優勢和地位。同時,本公司的 「SSP01密碼算法芯片」亦通過了國密辦的 驗收,並且可進行生產。這更進一步肯定了 本公司在研制專用芯片上的卓越成績。乘 著本公司在密碼技術上的優勢,國密辦同 意本公司研制「SJY01-A數據密碼卡」,並 且在該數據密碼卡上採用已通過測試驗收 的「SSP01密碼算法芯片」。

上述兩項的國家級批文,認同了本公司在 研發網絡安全及ASIC產品上的成就,亦增 強了本公司研發人員在研發該等產品的動 力和信心。

Chairman's Statement

主 席 報 告

In January 2001, the State Intellectual Property Bureau awarded the Company an "Invention Patent Certificate" for our anti-hacker network security technology. Our invention is considered as not only a major advancement in network security technology, but it also enhances our position in the research and development of specific network security products.

二零零一年一月,本公司的一項防黑客專用安全網關技術得到中國國家知識產權局頒發「發明專利証書」。此項專利為網絡安全技術上一重大躍進。同時,亦提昇了本公司在研發專用網絡安全產品的地位。

This year, we commenced the adoption of the Wireless Fire Alarm System ("WFAS") in urban areas, which is a change in application of this technology from government departments to commercialization. Our fire alarm and monitoring systems have passed the examination of the State Testing Centre and are currently being used in local regions. Our "Hainan Jade Bird Safeguard Fire Alarm and Monitor Technologies" project has laid down the foundation of the concept of wireless fire alarm system. Encouraged by the emphasis of the PRC government on the "double backup" of fire alarm system, we believe that WFAS will set a new trend for the demand of fire alarm products.

本年度,本公司亦實現了在城市範圍內採 用無線消防報警,從以往的政府部門走向 商業用途。本公司設計的報警系統及控制 器現時已可應用於區域火災報警上,而且 相關產品正通過國家檢測中心的測試。「海 南青鳥衛士消防報警監控技術」項目奠定 了無線消防概念向商業用途發展的基礎, 加上中國政府對消防系統需要「雙備份」的 重視,本公司相信無線消防報警系統產品 將會成為一種新趨向。

In conclusion, we believe that the on-going innovation and creation of our research and development team has achieved advancement and remarkable performance in the embedded technology. Currently, we have 120 personnel in the research and development and expect to expand our research and development team for further development in technology.

綜合上述,本公司的研發人員不斷創新,在 研發嵌入式產品上有了重大的躍進和卓越 的成績。目前,本公司的研發隊伍已達一百 二十人,並預期為未來的技術發展會繼續 擴大。

To make the Company a technology and market leader of the PRC in the field of the information security industry, the management intends to seek extensive international technological collaboration with institutions and businesses in Germany, the United Kingdom, Canada, India, Japan and other countries in order to secure better returns for shareholders, investors and the Company in the flourishing information market.

管理層將繼續努力,使本公司在信息安全 領域裡成為中國技術及市場的領導者,並 與德國、英國、加拿大、印度、日本等國家的 機構及企業開展廣泛的國際合作,使股東、 投資者和公司在日益增長的信息市場中取 得更大的回報。

管 理 層 討 論 及 分 析

Network security is one of the major focuses in developing the network industry. The Company is one of the few designated commercial encryption product manufacturers accredited by CSCCAO. Commercial network security product is now the second largest source of revenue for the Company depicting a noticeable rising trend. In 2000, the revenue derived from this segment amounted to RMB22,043,000, an increase of 2.6 times over last year. Given our unique proprietary technology and market position, we believe a sustained growth in the related revenue will continue.

Wireless Fire Alarm System ("WFAS")

In 2000, the revenue derived from our WFAS amounted to RMB6,621,000, an increase of 5.4 times over last year. The urban WFAS products designed and installed for Hainan Jade Bird Safeguard Firefighting Alarm & Monitor Technologies Co. Ltd. have already become an industry benchmark. The marketing of WFAS products will be extended to other provinces and cities in the PRC.

ASIC Products

ASIC products have always been the centre of attention in the information technology industry. The Company's ASIC products have become fully fledged from previous year's research and development phase of rudimentary products and achieved a revenue of RMB6,287,000 in 2000, an increase of 8.2 times over last year. In view of the huge potential market demand in the PRC coupled with our proprietary technology and its application in network security, the Company believes that ASIC products will mature over time in line with the special features of the PRC market.

網絡安全產品

網絡安全是發展網絡事業極為重要的一環,本公司是少數得到國密辦公室認定的商用密碼產品生產定點單位之一。商用網絡安全產品現時已成為本公司收入第二位的產品,並且有顯著的上升趨勢。二零零年,來源自網絡安全產品收入為人民幣22,043,000元,較去年增長2.6倍。本公司預計憑著網絡安全產品獨特的專有技術及市場地位,有關收入仍會持續增長。

無線消防報警系統

二零零零年,本公司獨有的無線消防報警系統於二零零零年帶來了收益達人民幣6,621,000元,較去年增長5.4倍。本公司為海南青鳥衛士消防報警監控技術有限公司設計及安裝的城市無線消防報警系統已成為典範,而無線消防報警系統產品亦會漸漸推廣至各省、市。

ASIC產品

ASIC產品一直備受信息科技行業關注。從去年仍處於研發階段,尚屬雛型的產品,於本年度,ASIC產品已為本公司帶來達人民幣6,287,000元的收益,較去年增長8.2倍。由於本公司設計的專用芯片面對的是一個潛在的巨大中國市場,加上本公司獨有的技術,並應用於網絡安全上,本公司相信ASIC產品將會配合中國市場的特色漸漸成熟。

理 層 討 論 及 析

Smart Card Application Systems

Since smart card application systems products have been widely accepted and used, competition is relatively intense amongst suppliers. However, benefited from the Company's origin in tertiary education institutions and close relationship with our peers as well as the practicality in the concept of "One Card for Campus Services" project, the revenue derived from smart card application systems reached RMB3,329,000, an increase of 0.3 times over last year. At present, the Company has completed the design and installation of smart card application systems in a number of middle schools and universities. It provides an alternative payment method for the younger generation. In addition, our smart card application systems have been also applied by a number of government authorities such as the China State Statistics Department, the China State Planning Committee and the Ministry of Finance, which broadened our customer base in the application of this product.

Outlook

Since March 2000, the information technology industry has been under enormous impact and is undergoing a period of consolidation. In face of the ever-intense competition, the Company leveraged its proprietary technology and employee dedication in achieving a satisfactory result during a very tough year.

In the coming year, the Company will continue to strengthen its research and development team by increasing its number from 120 to 180. Meanwhile, the Company will establish a technology research centre and a sales and distribution centre in Beijing and recruit experienced sales personnel to spearhead the introduction of our proprietary embedded system products into the market.

聰明卡應用系統

聰明卡應用系統產品現時已廣泛地被社會 人士接納及應用。因此,聰明卡應用系統面 對的市場競爭亦較為激烈。然而,憑藉著本 公司與各大學府的深厚淵源及良好關係, 以及「校園一卡通」項目的概念實際,二零 零零年有關收入亦達到人民幣3,329,000 元,較去年增長0.3倍。現時本公司已為多間 中學及大學設計及安裝了聰明卡應用系 統, 為社會的新一代提供了另一種的付款 形式。同時,本公司的聰明卡應用系統,亦 已應用到國家統計局,國家計劃委員會,財 政部等國家行政機構的相應部門,成功拓 展了新的應用領域。

未來展望

2. Principal accounting policies (Cont'd)

(i) Fixed assets and depreciation (Cont'd)

The carrying value of fixed assets is assessed periodically or when factors indicating an impairment are present. (j) Inventories

Inventories are carried at the lower of cost and net realisable value. Cost is calculated on the weighted average method of costing and includes costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realisable value is based on estimated selling prices in the ordinary course of business, less further costs expected to be incurred to completion and disposal. Provision is made for obsolete, slow-moving or defective items where appropriate.

According to the tax rules and regulations in Mainland China, when there is uncertainty as to whether value-added tax or business tax should be applied to service income generated by a primary VAT payer, the relevant state tax bureau is authorised to determine the appropriate turnover tax. During the year ended 31st December, 2000, contracts with total sales value of approximately RMB36 million were considered by the Company and Haidian Local Tax Bureau to be subject to business tax but not VAT, and accordingly, business tax at 5% of the said value was paid. Management has obtained a verbal consent from the Haidian State Tax Bureau that these transactions are subject to business tax. However, there is a contingent liability that if higher tax authorities eventually determine that VAT is the appropriate tax for these contracts, the Company may be required to pay additional turnover tax of approximately RMB4.3 million in respect of the above revenues. Taking into consideration of the common practice of paying the relevant taxes in Mainland China, the management considers the possibility of paying additional turnover tax is remote.

7. 税項(續)

本公司的主要業務為銷售嵌入式系統 產品,和通過應用其嵌入式系統產品 提供全面解決方案服務。適用於本公 司的流轉税(包括營業税及增值税) 已載列於上文。根據中國大陸的稅務 法規,當不確定增值稅或營業稅適用 於增值税付款人所賺取的服務收入 時,相關的國家稅務局可有權釐定其 合適的流轉税項。於截至二零零零年 十二月三十一日止年度內,銷售價值 總額約人民幣36,000,000元的合約被 本公司及海淀區地方税務局列為適用 營業税而非增值税。因此,上述的銷售 價值已按5%支付營業稅。管理層已取 得海淀區國家税務局的口頭同意此等 交易適用營業税。然而,倘若更高級別 的税務機關最終決定增值税適用於此 等合約,則本公司有可能有就以上收 入額外繳付約人民幣4,300,000元的 流轉税的或然負債。考慮中國大陸繳 付有關税項的通常做法,管理層認為 需額外繳付流轉稅的機會甚微。
