Interim Report 2004/05

Thiz Technology Group Limited

即時科研集團有限公司*

(Incorporated in the Cayman Islands with limited liability)

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcement in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM listed issuers.

The Stock Exchange of Hong Kong Limited takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors of Thiz Technology Group Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited for the purpose of giving information with regard to Thiz Technology Group Limited. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: 1. the information contained in this report is accurate and complete in all material respects and not misleading; 2. there are no other matters the omission of which would make any statement in this report misleading; and 3. all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

SUMMARY

- The Group recorded a turnover of approximately HK\$11,559,000 for the six months ended 30th September, 2004.

The special reserve of the Group represents the difference between the nominal value of shares of the Company and the nominal value of the shares of the subsidiaries acquired pursuant to the Reorganisation.

Notes:

1. Basis of preparation

The unaudited interim accounts have been prepared in accordance with Statements of Standard Accounting Practice ("SSAP") 25 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and with the applicable disclosure requirements of Chapter 18 of the Rules Governing the Listing of Securities on the Growth Enterprise Market (the "GEM Listing Rules") of The Stock Exchange of Hong Kong Limited.

The principal accounting policies and methods of computation adopted in preparing the unaudited interim accounts are consistent with those followed in the Group's annual financial statements for the year ended 31st March, 2004.

All significant intra-group transactions and balances have been eliminated on consolidation.

2. Turnover

Turnover represents the invoiced value of computer products sold and Group's Linux based software products distributed and training income, after allowances for returns and discounts and net of value-added tax.

4. Tax

No provision for Hong Kong profits tax has been made as the Group did not generate any assessable profits in Hong Kong during the six months ended 30th September, 2004 and 30th September, 2003.

Taxes on profits assessable elsewhere have been calculated at the rates of tax prevailing in the countries in which the Group operates, based on existing legislation, interpretations and practices in respect thereof.

Deferred taxation in respect of unused tax losses for the periods has not been recognised as it is not probable that future taxable profits will be available for setting off.

5. Loss per share

The calculations of the basic and diluted loss per share for the period are based on the following data:-

	Fox the six months ended 30th September		
	2004 HK'000	2003 HK\$'000	
Loss for the purpose of calculating basic loss per share	(4,491)	(4,795)	
Effect of dilutive potential ordinary shares:- Interest on convertible notes	151	50	
Loss for the purpose of calculating diluted loss per share	(4,340)	(4,745)	
	2004 No. of shares	2003 No. of shares	
Weighted average number of ordinary shares for the purpose of calculating basic loss per share	2,041,114,400	1,646,060,000	
Effects of dilutive potential ordinary shares:- Convertible notes	168,340,944	50,000,000	
Weighted average number of ordinary shares for the purpose of calculating diluted loss per share	2,209,455,344	1,696,060,000	

The share options had no dilutive effect for the three months and six months ended 30th September, 2004 because the exercise price of the Company's share options was higher than the average market price of the shares during the periods.

6. Trade receivables

The Group's trading terms with its customers are mainly on a cash-on-delivery basis, except for major customers, where an average credit period of 30 days is normally given.

The following is an aged analysis of trade receivables (net of provision) at the reporting date:-

INTERIM DIVIDEND

The Board does not recommend the payment of an interim dividend for the six months ended 30th September, 2004 (2003: Nil).

BUSINESS REVIEW AND PROSPECTS

Financial Performance

The Group recorded a consolidated turnover of HK\$11,559,000 for the six months ended 30th September, 2004, representing a 51% decrease compared to HK\$23,584,000 for the same period in 2003. Again the significant decrease in turnover was attributed to the termination of a Linux software licensing contract by the Group in July 2003 owing to the customer's default in payment.

On the other hand, during the period under review, loss from operations of the Group amounted to HK\$4,285,000, compared to HK\$4,671,000 in the corresponding period last year. Loss attributable to shareholders was HK\$4,491,000, while the corresponding period last year was HK\$4,795,000.

Although the termination of the licensing contract did have a significant impact, but the encouraging result of "Thiz BEST" training programme and the sale of "Thiz Easy Shop" in China and Taiwan respectively had already started to reverse the situation. Owing to the foreseeable growth in these markets, the Group continued to invest substantial resources in marketing and research and development. However, the Group had strived to maintain profitability through more efficient financial and operational management.

Business review

Under our definitive development tactic of "4 Wheels in One Track with Cross-duplication", the Group's business had been progressing and achieved numerous breakthroughs. First of all, we established the first ThizLinux Institute in Dalian, China, following that the second ThizLinux Institute was also established in Beijing on 23rd July, 2004. During the period under review, the Institutes had gathered some 80 software engineers, a number of teams were formed to engage in various Linux software development projects including a hotel room booking system and a travel system under "Thiz Easy Shop", Li Ning database system, net phone system and a home theatre remote control system. We had also categorised our "Thiz Easy Theatre" product into 3 versions, namely M2, M3 and M4. A grand press conference was held in Beijing on 8th September 2004 to introduce the products, with academician Ni Guangnan as the honourary guest speaker who gave his words of support to us. Leading PC manufacturers like Peking Founder, Tsinghua Tongfang, Tsinghua Unisplendour, Beijing Compower, Hisense and TCL have all agreed to bundle their PCs with "Thiz Easy Theatre Desktop System", making it to become one of the world's professional multimedia players on the Linux platform. This should pave the way for "Thiz Easy Theatre" to become a household software product in home theatre. In particular, the M3 products will feature two powerful functions in addition to its multimedia function i.e. "remote maintenance" and "net phone". Hardware manufacturers face the problem of unpredictable expenses incurred in relation to maintenance that will easily erode away their already thin profit margins. Therefore, the newly added "remote maintenance" function will be most welcomed by PC manufacturers as it can help reduce their maintenance expenses by more than 80%. Such function will be an attractive feature for PC users as they can easily enjoy the otherwise unavailable maintenance service directly from PC manufactures.

With its boundary-free concept, low charges and multiple communication modes included PC to PC, PC to Phone and PC to Mobile Phone, and the possible addition of visual data transmission, the net phone, which employs the concept of IP Phone and allows direct conversation, can bring fundamental changes to the way people uses telephone, making all people to have their personal phone lines in office or residence or anywhere with very low costs or even free of charge.

Prospect

With production and delivery of the M3 software that features "net phone" and "remote maintenance" to commence in the final quarter this year, the Group expects to see a fast growth in the desktop segment. Coupled with the wide-range promotion programme for "Thiz Easy Shop" in the final quarter this year, the Group is expecting a significant growth in geographical regions like Beijing and Dalian in China. Adding to these with the establishment of Linux software institutes in the two cities, personnel recruitment and commencement of operation, the Group is expecting a promising result by the end of 2004. With the eventual graduation of the software engineers under the "1+1+1 Project" and their subsequent enrolment into the Linux software institutes for internship, there shall be considerable human resources supplied to support the development and promotion of the Linux software applications, thereby further enhancing the recognition of Linux software.

MANAGEMENT DISCUSSION AND ANALYSIS

Liquidity, financial resources and capital structure

As at 30th September, 2004, the Group had current assets amounted to HK\$43,075,000, of which HK\$1,723,000 were cash and bank deposits. Current liabilities of HK\$19,677,000 mainly comprised of trade payables, other payables, accruals and deposits received, and amounts due to the directors. The current ratio of the Group was 2.2. The Group had net current assets of approximately HK\$23,398,000 as at 30th September, 2004.

Current ratio and net current assets show a notable decrease from 4.53 and HK\$31,954,000 at 31st March, 2004. The sharp decrease was mainly due to several significant amounts of trade deposits received and amounts due to directors.

At the same date, the Group had outstanding unlisted convertible notes of HK\$14,000,000 bearing interest rate of 2.5% per annum, issued at 17th January, 2003 with maturity at 16th January, 2006 and at 26th March, 2004 with maturity at 25th March, 2007. The notes are convertible into new shares of the Company at a conversion price of HK\$0.036 per share.

The gearing ratio calculated on the basis of total liabilities over shareholders' funds as at 30th September, 2004 was 1.6, compared with 0.9 at 31st March, 2004. This was also due to the increase in trade deposits received and amounts due to directors.

Investments held and material acquisitions and disposals

The Group had no material investments, acquisitions or disposals during the reporting period.
