

鄭州燃氣股份有限公司 Zhengzhou Gas Company Limited*

(a joint stock limited company incorporated in the People's Republic of China)

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which these companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the main board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. GEM-listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website at "www.hkgem.com" in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the content of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the "Directors") of Zhengzhou Gas Company Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of The Stock Exchange of Hong Kong Limited (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (1) the information contained in this report is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this report misleading; and (3) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

FINANCIAL HIGHLIGHTS

- For the six months ended 30 June 2005, unaudited consolidated turnover and profit attributable to shareholders of the Group amounted to approximately RMB307,460,000 and RMB52,458,000 respectively, representing respective increases of approximately 43.14% and 41.47% over the corresponding period of last year.
- Sales of piped natural gas for the Relevant Period amounted to approximately RMB205,328,000, representing an increase of approximately 57.34% over the corresponding period of last year, which was primarily attributed to the increase in the number of residential, industrial, commercial and vehicular users, coupled with a significant increase in gas consumption by commercial and vehicular users.
- Turnover derived from gas pipeline construction aggregated to approximately RMB79,547,000 for the Relevant Period, representing an increase of approximately 15.96% over the corresponding period of last year, which was primarily attributed to satisfactory growth in gas pipeline construction projects for residential users.
- Basic earnings per share for the Relevant Period was approximately RMB0.0419, representing an increase of approximately 41.47% as compared with approximately RMB0.0300 for the corresponding period of last year.
- The Directors do not recommend the payment of any interim dividend for the Relevant Period.

14. CONNECTED TRANSACTIONS

On 26 May 2005, the Company and Zhengzhou Gas Group Company Limited ("Zhengzhou Gas Group"), the controlling shareholder of the Company, entered into a land use right lease agreement (the "New Land Use Right Lease Agreement"), pursuant to which Zhengzhou Gas Group as landlord agreed to lease the land use right in the land located at Jing Guang Nan Xi Road, Nan San Huan Bei, Er Qi District, Zhengzhou, Henan Province, the PRC to the Company as tenant for the operation of a natural gas refueling station for a duration of three years commencing from 1 June 2005 to 31 May 2008 at a rental of RMB117,026 (approximately HK\$110,298) per annum which had been determined after arm's length negotiations between the Company and Zhengzhou Gas Group in the New Land Use Right Lease Agreement with reference to fair market rental of RMB117,026 (approximately HK\$110,298) per annum as appraised by CB Richard Ellis Limited ("CB Richard Ellis"), a professional independent valuer not being a connected person (as defined in the GEM Listing Rules) of the Company, as at 29 April 2005.

In addition, the Company and Zhengzhou Gas Group have agreed to adjust the annual rentals, effective from 1 June 2005, in respect of the three pieces of land originally leased from Zhengzhou Gas Group under the four land use rights lease agreements dated 16 January 2002 and the supplemental agreements thereto dated 30 September 2002 (the "Existing Land Use Rights Lease Agreements"), with reference to the aggregate fair market rentals of RMB1,427,970 (approximately HK\$1,345,871) per annum as appraised by CB Richard Ellis as at 29 April 2005. The annual rentals payable under the Existing Land Use Rights Lease Agreements, excluding one of the land use right lease agreements (the "Effective Land Use Rights Lease Agreements") after the adjustment were the same as the professional valuations as stated in the valuation report of CB Richard Ellis which reflect the prevailing market rentals as at 29 April 2005. The aggregate annual rentals for the Effective Land Use Rights Lease Agreements and the New Land Use Right Lease Agreement are RMB1,544,996 (approximately HK\$1,456,170).

Accordingly, pursuant to Rule 20.35(2) of the GEM Listing Rules, the new annual cap for the transactions under the Effective Land Use Rights Lease Agreements and the New Land Use Right Lease Agreement shall be fixed at RMB1,544,996 (approximately HK\$1,456,170).

Details of the above connected transactions are set out in the report of the Company published on the Stock Exchange's GEM website on 26 May 2005.

MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

General

During the six months ended 30 June 2005, the Group recorded a total turnover of approximately RMB307,460,000 and a gross profit of approximately RMB104,749,000, representing an increase in total turnover of approximately 43.14% over the corresponding period of last year. The increase was primarily attributed to the increase in number of natural gas users, coupled with the substantial increase in gas consumption by industrial, commercial and vehicular users.

Gross profit margin of the Group for the Relevant Period was approximately 34.07%, which was lower than that of approximately 37.12% for the corresponding period of last year. It was mainly due to the decrease in the proportion of revenue from the construction of gas pipelines, which generated a higher gross profit margin, in the total turnover. During the six months ended 30 June 2004, the proportion of this revenue in the total turnover was 31.60%. During the Relevant Period, the proportion of this revenue in the total turnover dropped to 25.61%. Furthermore, commencing from 1 April 2005, the price of natural gas purchased from the Project of Transmitting Natural Gas through the West to the East Pipelines increased from RMB1.16 per m3 to RMB1.2 per m3, which also caused the decrease in the gross profit margin of the Group.

During the Relevant Period, non-cost-of-sales expenses amounted to approximately RMB36,492,000, representing an increase of 78.50% as compared to approximately RMB20,443,000 for the corresponding period of last year. The main reason was the substantial increases in staff costs and lease expenses. During the Relevant Period, staff costs, which were included in the selling and distribution costs and administrative costs, amounted to approximately RMB14,556,000, representing an increase of approximately 24.90% as compared to approximately RMB11,654,000 for the corresponding period of last year. In addition, due to the scaling up of production and operation, the Group's lease expenses which were included in the selling and distribution costs and administrative costs amounted to approximately RMB6,878,000 for the Relevant Period, representing an increase of 203.16% from approximately RMB2,269,000 over the corresponding period of last year.

Income tax expenses of the Group for the Relevant Period were approximately RMB8,744,000, representing a decrease of approximately 56.98% as compared to approximately RMB20,325,000 for the corresponding period of last year. The decrease was largely due to the tax arrangements made by the Group, under which part of the revenue from pipeline construction which was used to be received by the Company was received by a subsidiary which was entitled to lower income tax rate instead.

Net profit attributable to shareholders of the Group for the Relevant Period was approximately RMB52,458,000, representing an increase of approximately 41.47% from approximately RMB37,080,000 of the corresponding period of last year.

Sale of piped natural gas

The turnover attributed to the sale of piped natural gas for the Relevant Period amounted to approximately RMB205,328,000, representing an increase of approximately 57.34% from approximately RMB130,497,000 over the corresponding period of last year.

During the Relevant Period, total gas consumption by natural gas users of the Group was approximately 131,740,000 m3, representing an increase of approximately 48.90% as compared with approximately 88,475,000 m3 for the corresponding period of last year. Natural gas consumption by different types of users during the Relevant Period, together with the comparative figures for the corresponding period of last year are stated as follows:

	Six months ended 30 June				
	20	005	20		
	Gas	As a	Gas	As a	
	consumption	percentage	consumption	percentage	
	(approximately	of total gas	(approximately	of total gas	
	′000m³)	consumption	′000m³)	consumption	Increase %
Natural Gas total gas consumption	131,740		88,475		48.90%
including: residential users commercial users industrial users vehicular users	46,560 39,720 24,420 21,040	35.34% 30.15% 18.54% 15.97%	37,589 21,294 20,312 9,280	42.49% 24.07% 22.96% 10.49%	23.87% 86.53% 20.22% 126.72%

According to the table above, gas consumption by residential users of the Group was approximately 46,560,000 m3 during the Relevant Period, representing a steady increase of approximately 23.87% over the corresponding period of last year. Gas consumption by industrial users maintained a steady growth during the Relevant Period and amounted to approximately 24,420,000 m3, representing an increase of approximately 20.22% over that of the corresponding period of last year. Gas consumption by commercial users during the Relevant Period amounted to approximately 39,720,000 m3, representing a substantial increase of approximately 86.53% over the corresponding period of last year. The main reasons for the substantial increase in gas consumption by commercial users were (1) the original commercial users which were in the coal gas consumption region have changed to use natural gas by the end of 2004; (2) the temperature at the beginning of the year was

As at 30 June 2005, the Group has 531,657 residential users, representing an increase of 23,236 users as compared with 508,421 residential users as at 31 December 2004, 1,093 commercial users representing an increase of 127 users as compared with 966 commercial users as at 31 December 2004, and 45 industrial users, representing an increase of 7 users as compared with 38 industrial users as at 31 December 2004.

In respect of the gas powered vehicle business, given the persistently high oil price, vehicle operators such as taxi drivers were more eager to convert their vehicles into natural gas powered vehicles. During the Relevant Period, the Group's natural gas powered vehicular users has increased by 934, and the total number of natural gas powered vehicles converted has reached 5,013 as at 30 June 2005. The sale of gas to vehicular users reached 21,040,000 m3, representing an increase of 126.72% as compared with 9,280,000 m3 for the corresponding period of last year. It is apparent that the gas powered vehicles business has become the new momentum of the Group's profit growth.

In addition, during the Relevant Period, a subsidiary of the Company, Dengfeng Zhengran Gas Limited (登封 鄭燃燃氣有限公司) ("Dengfeng Zhengran"), completed its investment in fixed assets of approximately RMB7,789,000, and has commenced gas supply to the users.

Sales of Liquefied Petroleum Gas

In the Relevant Period, certain users were transferred to the Group from a discontinued liquefied petroleum gas ("LPG") company, and the Company would convert their LPG systems into natural gas systems. As the conversion would take time, the Group had to resume its discontinued LPG business temporarily to supply LPG to those users. Thus, a turnover of LPG sales amounting to RMB3,217,000 was recorded. The Group has no intention to resume its LPG sales business which was terminated in April 2003. In March 2005, the Company has made an arrangement with Zhengzhou Gas Group Co. Ltd., the holding company of the Company, to supply LPG to those users until the conversion is completed, upon which the Group will take over those users.

Sales of Gas Appliances and Pressure Control Equipment

The Group also engages in sales of gas appliances and pressure control equipment. The gas appliances available for sale include gas stoves, water heaters and wall-attached stoves. These gas appliances were purchased from several gas appliance producers and sold through the Group's sales outlets in Zhengzhou. As for pressure control equipment, the main marketing focuses are other natural gas distributors. During the Relevant Period, turnover attributable to the sale of gas appliances and pressure control equipment amounted to approximately RMB3,218,000.

Natural gas pipeline construction services

For the Relevant Period, the Group's turnover attributable to the natural gas pipeline construction services amounted to approximately RMB79,547,000 relating to the connection of natural gas supply for 24,768 residential users and 54 commercial users, representing a growth of 15.96% as compared with RMB68,598,000 for the corresponding period of last year. The increase was mainly attributable to the satisfactory growth in natural gas pipeline construction projects for residential users.

In addition, the Group also collects fees from users for providing gas pipelines repair and maintenance services. During the Relevant Period, such fees amounted to approximately RMB19,297,000, representing an increase of 6.68% as compared with RMB14,490,000 for the corresponding period of last year. Such increase was mainly due to an increase in the number of residential users.

Net profit and shareholders' return

Net profit margin of the Group for the Relevant Period was 17.06%, representing a decrease from 17.26% of the corresponding period of last year. Such decrease was primarily attributed to the decrease in gross profit margin and the significant increase in administrative costs.

In addition, average returns to shareholders for the Relevant Period, based on the profit attributable to shareholders of the Company divided by the average of shareholders' equity of the Company at the beginning and at the end of the period, was 13.53%, which was higher than that of 11.32% of the corresponding period of last year. Such increase was due to the growth in profits.

LIQUIDITY, FINANCIAL RESOURCES AND CAPITAL STRUCTURE

Borrowings and banking facilities

The Group relies on cash generated from its internal operation, net proceeds from the placing of H Shares and bank balances or cash in hand to meet its requirements of capital expenditure and operations. The Directors are of the view that, in the long run, the Group will generate liquidity from its business operation and may consider making use of further equity finances or bank loans when necessary.

As at 30 June 2005, the Group had no outstanding interest-bearing bank borrowings.

As at 30 June 2005, the Group had outstanding loans of RMB12,433,000 due to Zhengzhou Gas Group Co., Ltd., the holding company of the Group.

Net current assets

As at 30 June 2005, the Group had net current liabilities of approximately RMB5,648,000 (31 December 2004: net current liabilities of approximately RMB21,504,000). There was an advanced payment received of approximately RMB134,707,000 in the current liabilities, which was unrecognized income, not an amount payable as a liability in nature. The Group had net current assets of approximately RMB140,355,000 after deducting such advanced payment received.

Working capital

As at 30 June 2005, the Group had no outstanding bank borrowings and had cash and bank balances of approximately RMB150,266,000. The Directors are of the view that the Group has sufficient working capital to meet its present requirements.

Equity to liabilities ratio

As at 30 June 2005, equity to liabilities ratio (being total equity over total liabilities and expressed in percentage) of the Group was approximately 204.12% which was higher than that of approximately 174.48% as at 31 December 2004, which indicated that, with over half of the assets being financed by its shareholders, the Group had ample room for external borrowings.

Foreign currency risk

All of the Group's business are operated in the PRC and all its transactions are settled in Renminbi. Therefore, the Group's exposure to foreign currency risk is minimal.

Contingent liability and pledged assets

As at 30 June 2005, the Group had no significant contingent liability or any asset under pledge.

Employees and remuneration policy

There is no significant change in the Group's employees and remuneration policy compared to that disclosed in the annual report for the year ended 31 December 2004.

Future Prospects

Zhengzhou's precedence in the rise of Central China

The Chinese government is currently implementing the policy of "The Rise of Central China", following the development strategies of "The Development of Costal Regions", "Development of West China", etc. As the Capital of Henan, a province which is situated in Central China with a comparatively large population, Zhengzhou naturally becomes the leading city of "The Rise of Central China" strategy. Zhengzhou is currently developing a new area called "Zheng East New District", which is currently under construction and has a total area of 150 sq.m. (equivalent to that of the developed urban area in Zhengzhou) and a planned population of 1.5 million. The new development area comprises central business district, commercial and residential logistics zone, high-tech park, and economic and technological development zone. It is set to attract investments from large enterprises in industrial and commercial sectors all over the world. Upon completion of this new development area, Zhengzhou will become one of the regional hubs of the nation with massive population flows, logistics activities and fund flows. Backed by such policies, we believe that our business will have ample room for growth in the next decade.

With a stronger emphasis on environmental protection in Zhengzhou City, coal furnaces under 10 tons will be phrased out by 2006, and coal combustion free zones will continuously expand, providing the Group with opportunities for further exploring the commercial users market. Meanwhile, to maintain a balanced development of commercial and industrial sectors in Zhengzhou, Zhengzhou municipal government has promulgated certain preferential policies to encourage industrial investments, which will to a certain extent boost the Group's development in the market of industrial users. In respect of vehicular gas business, the Group will continue to build additional natural gas refueling stations to expand its vehicular gas supply network.

With a well-established base for the natural gas business in Zhengzhou, and more than 20 years of experience in the natural gas industry, the Group intends to search for appropriate acquisition and joint-venture projects outside Zhengzhou, especially in cities alongside the West to the East Pipelines Project and cities within the Henan Province, so as to increase shareholders' return.

USE OF PROCEEDS FROM THE INITIAL PUBLIC OFFERING

New shares issued by the Company were listed on GEM on 29 October 2002 (the "Listing Date"). Net proceeds from the sale of 50,060,000 Sale H Shares after deducting relevant issue expenses amounted to approximately RMB118,897,000.

During the six months ended 30 June 2005, net proceeds from the public listing were used in accordance with application plans set out in the prospectus dated 22 October 2002 (the "Prospectus") as follows:

	Six months ended 30 June 2005		
	Application of proceeds as planned in the Prospectus RMB million	Actual application of proceeds RMB million	
Ancillary works for the "West to East Pipelines" project (Note 1)	0 *	9.10	
General working capital	0	3.36	
Total	0	12.46	

Notes:

1. Proceeds from the public listing planned to be used in 2004 in ancillary works for the "West to East Pipelines" project is principally to be used in the construction of high-pressure transmission pipelines in Fourth Ring Road (四環路). Since the project is delayed to July 2004, the fund planned for such investment remains unused until the first half of 2005.

As at 30 June 2005, proceeds of approximately RMB118,897,000 raised from the public listing on 29 October 2002 by the Group have fully been used in accordance with the business objectives described in the Prospectus.

* The exchange rate used throughout this section is fixed at HK\$1.00 = RMB1.06.
