CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the main board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the "Directors") of Yantai North Andre Juice Co., Ltd.* (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of the Stock Exchange ("GEM Listing Rules") for the purpose of giving information with regard to the Company. MANAGEMENT DISCUSSION AND ANALYSIS

Financial Review

For the three months ended 31 March 2006, the Group's turnover increased to approximately RMB187,097,000 as compared to approximately RMB158,684,000 for the corresponding period in 2005, representing an increase of approximately RMB28,413,000 or 18%. The Group's turnover was principally derived from the manufacture and sale of apple juice concentrate, pear juice concentrate, apple essence, feedstuff and related products. The increase in turnover was mainly attributable to the increase in sales volume of apple juice concentrate. The increase in sales volume was mainly due to active market expansion and increase in the market share of the Company.

For the three months ended 31 March 2006, the Group's gross profit was approximately RMB34,352,000 and the gross profit margin was approximately 18%. For the corresponding period in 2005, the gross profit was approximately RMB63,795,000 and gross profit margin was approximately 40%. The decrease in gross profit and gross profit margin was mainly attributable to the increase in production costs arising from the decrease in apple supply and thus significant increase in material cost in 2006.

For the three months ended 31 March 2006, the Group's net profit (i.e. the profit for the period attributable to equity shareholders of the Company) decreased to approximately RMB6,556,000 as compared to approximately RMB33,822,000 for the corresponding period in 2005, representing a decrease of approximately RMB27,266,000 or 81%. The decrease in net profit was mainly attributable to the rise in production costs and thus the decrease in gross profit margin.

For the three months ended 31 March 2006, the Group incurred distribution expenses of approximately RMB13,421,000, as compared to approximately RMB18,747,000 for the corresponding period in 2005, representing a decrease of approximately RMB5,326,000. The Group's distribution expenses mainly included transport, export inspection and marketing expenses. Such decrease was mainly attributable to the decrease in sea freight charges.

For the three months ended 31 March 2006, the Group incurred administration expenses of approximately RMB6,768,000 as compared to approximately RMB5,094,000 for the corresponding period in 2005, representing an increase of approximately RMB1,674,000. Such increase was mainly attributable to the commencement of operation of the two new factories in Dalian and Xiangyang in the second half of 2005 which led to the increase in general administrative expenses.

For the three months ended 31 March 2006, the net finance costs of the Group increased to approximately RMB8,521,000, as compared to approximately RMB4,648,000 for the corresponding period in 2005, representing an increase of approximately RMB3,873,000 or 83%. Such increase was mainly due to the increase in the amount of bank borrowings resulting from expansion of production scale, the rise in basic interest rate in the People's Republic of China (the "PRC") and the London Interbank Offered Rate Index in the international finance market during the period.

Business Review

Enhance Market Coverage

With years of continuous effort, the Group has already expanded its sales network to major countries and regions in the world, including the US, Japan, European countries and PRC market.

Product Diversification

The Group had further implemented various aspects of the production of pectin during the reporting period. The construction of the factory premises located in Yantai was started on 26 August 2005. The required production equipment was purchased and is being installed. The Directors believe that the production and sales of pectin can be further enhanced in accordance with its plan.

Cooperation with International Financial Institutions

The Group has arranged various long-term and short-term funding arrangements in foreign currency with international renowned financial institutions such as International Finance Corporation ("IFC"), Rabobank, The Hongkong and Shanghai Banking Corporation Limited and Bank of China (Hong Kong) Limited. The Directors believe that such long-term and short-term

funding arrangements in foreign currency can reduce the Group's exchange rate risk and finance cost, and can facilitate better business development.

Subscription and Placing of H Shares

On 23 February 2006, the Company entered into a subscription agreement with IFC, pursuant to which IFC agreed to subscribe an aggregate of 50,000,000 new H shares of the Company at a price of HK\$0.70 per H share.

The Company has also entered into a placing agreement on 23 February 2006 with Guotai Junan Securities (Hong Kong) Limited, pursuant to which Guotai Junan Securities (Hong Kong) Limited agreed to place an aggregate of 61,580,000 new H shares of the Company at a price of HK\$0.70 per H share.

The above subscription and placing were completed on 10 March 2006. From 13 March 2006, the new H shares, representing an aggregate of approximately 6.17% of the total share capital of the Company as enlarged by the issue of the new H shares, are traded on the GEM.

Future Prospects

In 2006, with the gradual implementation of specific measures inclining to the agricultural industry under the PRC government's macroeconomic policies, and the gradual improvement of various related PRC laws and regulations, the Group will enjoy more development and financing opportunities. Aiming at enlarging its business scale, the Group will strive to further enlarge market, enhance productivity, diversify products, expand sales, disperse markets and to develop financing channels, etc. Moreover, the Group has obtained the approval from shareholders' meeting to make applications for switching the listing of the H shares from GEM to the Main Board of the Stock Exchange. The Company will make applications to the China Securities Regulatory Commission and the Stock Exchange according to the related rules and regulations and with reference to the market condition and the Group's own situation. Future development plans of the Company are summarized as follows:

Expand Markets

While strengthening its position in the existing markets, the Group will at the same time focus on market diversification. In respect of the overseas market, apart from strengthening its US market and the developed European market and Japanese market, the Group is actively liaising with its various customers and has set up sales office in Canada with a view to achieving further breakthroughs in the European, North American, Asian and even Australian markets. At the same time, the Group will actively promote its products in the domestic PRC market.

Uplift Production Capacity

To meet the growing demand for juice concentrate both in local and overseas markets and considering the abundant supply of apple resources in Dalian, the Group plans to build a new production line in factory situated in Dalian with an expected production capacity of approximately 30,000 tonnes of juice concentrate per pressing season, bringing the annual

production capacity of the Group's self-constructed production lines to reach approximately 210,000 tonnes of juice concentrate. In addition, the Group will focus on small and medium sized enterprises both in the PRC and overseas and will also seek opportunities such as mergers and acquisitions, to boost its annual production capacity of juice concentrate to attain approximately 250,000 tonnes, thereby strengthening the Group's leading position in the industry.

Product Diversification

Other than clear apple juice concentrate, clear pear juice concentrate, apple essence, pear essence and feedstuff, the Group will endeavour to bring significant breakthroughs in the development and production of pomace, the production of cloudy apple juice concentrate, fructose (including apple fructose and pear fructose), other fruit juice types and retail drinks. The critical technology of industrialization of pectin production has been completed. Volume production can be started in the second half of 2006. For cloudy apple juice concentrate and fructose which are of high profit margin, through many years of research and development, the Group has achieved breakthrough in such industrialized production technology. In the last pressing season, the Group managed to produce a small amount of such qualified products. Volume production will be commenced in the next pressing season. For other fruit juice types, the Group has successfully developed samples of carrot juice concentrate, date juice concentrate, sweet potato juice concentrate, etc. Breakthrough in the critical production technology of guava juice will soon be achieved. The Group will catch the most appropriate time to launch new products according to the market demand. In addition, with the increase in the production volume of juice concentrate, retail-size package of juice concentrate will be promoted in the near future. The cooperation with renowned beverage manufacturer to produce OEM package of retail drinks will be implemented as soon as possible.

Development of Financing Channels

The Group will actively pursue opportunities to cooperate with other international financial institutions so that the Group can further develop financing channels and diversify funding varieties, especially long-term funding in foreign currency, such as syndicated loan. The Group can thereby reduce its foreign exchange risk and finance cost, improve its capital structure, enhance its risk-hedging ability, and at the same time facilitate better business development.

Making Use of the Opportunity arising from the Revaluation of RMB

The operating revenue of the Group is substantially denominated in US dollars. In light of the recent revaluation of RMB, the Group has made corresponding adjustments in order to offset the potential negative impacts as a result thereof. Such corresponding adjustments include the increase in selling price, the introduction of exchange rate fluctuation clause in sale contracts, the increase in the proportion of loan denominated in US dollars, the proportion of sea freight expenses denominated in US dollars, the development of the domestic market and the increase in the output of high-acidity products which are of higher profit margin, etc. The Directors believe that, the revaluation of RMB will eliminate some enterprises with small scale of operation, poor product quality and poor risk-sheltering ability, and therefore will accelerate the industry reorganization and provide a development opportunity for the Group.

EUREPGAP Accreditation System

The Group is in its plan to implement a new EUREPGAP accreditation system jointly with IFC in this year. EUREPGAP accreditation system is a technology supporting system mainly provided by IFC. Following the occurance of a series of food accidents in Europe and the emphasis on antiterrorism on food after the 911 events in the US, the establishment of a product traceability system becomes increasingly important. A product traceability system requires food and drink manufacturers to possess ability to trace the country of origin of raw materials, the manufacturing process of materials, manufacturer, supply chain and other critical problems. EUREPGAP is a well recognized accreditation system for agricultural industry in the world. The Directors believe as a pioneer in implementing such system in fruit juice concentrate manufacturing industry, the Group is expected to benefit from tremendous business opportunities.

LOAN AGREEMENT WITH IFC

On 21 April 2005, the Company entered into a loan agreement (the "Loan Agreement") with IFC for a loan of US\$15,000,000 (approximately HK\$117,000,000) repayable commencing on 15 March 2007 by 10 approximately equal instalments until all monies payable under the Loan Agreement have been fully repaid. In the event that their legal and beneficial aggregate ownership falls below the above aggregate percentage level, the Company shall be required to repay the principal amount of the loan from time to time outstanding and the interest thereon accrued.

On 21 March 2006, after the subscription of shares by IFC (details of which are set out under the section headed "Subscription and Placing of H Shares" above), the Company entered into an Amended and Restated Agreement to the Loan Agreement (the "Amended Loan Agreement") with IFC to amend the facility to be granted by IFC under the Loan Agreement from US\$15,000,000 to US\$8,000,000 and to make certain other incidental changes to the Loan Agreement, including the cancellation of all assets charged by IFC. The Amended Loan Agreement was signed subject to the entering into of (a) the Yantai Share Retention Agreement, pursuant to which each of Glory Cause Land Afforestation Co., Ltd.* (光彩事業國土綠化整理有限公司), being the controlling shareholder of the Company, Beijing RAJ Network Sales Co., Ltd.* (北京瑞澤網絡銷售有限責任公司), Yantai Donghua Fruit Co., Ltd.* (烟台東華果業有限公司) and Donghua Fruit Industry Co., Ltd. will undertake to maintain an aggregate interest of no less than 40% in the issued share capital of the Company; and (b) Donghua Share Retention Agreement, pursuant to which Mr. Wang An and Mr. Zhang Hui will agree to maintain the specified percentage interests in each of Yantai Donghua Fruit Co., Ltd.* (烟台東華果業有限公司) and Donghua Fruit Industry Co., Ltd..
