(Incorporated in the Cayman Islands with limited liability)

Third Quarterly Report

For the nine months ended 30 September 2006

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (THE "GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "EXCHANGE")

The GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on the GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on the GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of the GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on the GEM, there is a risk that securities traded on the GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on the GEM.

The principal means of information dissemination on the GEM is publication on the internet website operated by the Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on the GEM-listed issuers.

The Stock Exchange of Hong Kong Limited takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss however arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors of A-S China Plumbing Products Limited (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM for the purpose of giving information with regard to the Company. The directors of the Company, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this report is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this report misleading; and (iii) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

MANAGEMENT DISCUSSION AND ANALYSIS

Business Operations Review

- Total turnover of the Group for the three months ended 30 September 2006 amounted to approximately US\$22.79 million (2005: US\$21.58 million) and turnover for the nine months ended 30 September 2006 amounted to US\$61.65 million (2005: US\$59.63 million).
- Total turnover for the third quarter ended 30 September 2006 grew 5.6%. At which, Mainland China sales grew 6.2% and export sales grew 5.0% compared to the same quarter last year.
- The Group's domestic sales showed some improvement based on it's new product and distribution initiatives. The market in China remains quiet as the Government continues to apply measures to contain the property market.
- Overseas sales continued strong on the back of the Group's good cost position and product quality.
- Material inflation has been a major issue throughout the year. For example the cost of copper, a major component of our fittings products, has risen by more than 80% since the beginning of the year. Energy cost has also shown significant increases of around 20%. The Group has been pursuing an aggressive programme of cost savings in all its manufacturing plants and also announced an increased in its fittings prices in the China market of 15%. Whilst these programmes are showing good results it will take some time for Gross Profit margins to return to normal levels. Gross profit percentage for the nine months ended 30 September 2006 decreased to 33.1% from 38.55% for the same period last year.
- The Group recorded a net profit after minority interests of approximately US\$1.2 million for the third quarter ended 30 September 2006 compared to a net profit after minority interests of approximately US\$2.5 million in the same quarter last year.
- Excluding the restructuring charges associated with the closure of manufacturing facilities in Beijing and Shanghai, the Group recorded a net profit after minority interests for the nine months ended 30 September 2006 of approximately US\$2.5 million compared to a net profit after minority interests of approximately US\$5.2 million in the same period last year.
- The Group continues to maintain a healthy financial position. As at 30 September 2006, the net current assets of the Group amounted to U\$\$54.3 million, which comprise cash and bank deposits of approximately U\$\$47.6 million. The Group has no bank loan as at the period end date and the reporting date.

Prospect

- The Group is seeing continued rises in copper and zinc although energy costs may well have plateaued. It will take some time for the programmes the Group is executing to restore Gross Margins.
- Whilst demand from overseas remains strong the Government announced plans to reduce the VAT rebate on VC products. The impact of this change is not yet clear.
