CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM. The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange of Hong Kong Limited takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors of GreaterChina Technology Group Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of the Stock Exchange (“GEM Listing Rules”) for the purpose of giving information with regard to GreaterChina Technology Group Limited. The directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (1) the information contained in this report is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this report misleading; and (3) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

CHAIRMAN'S STATEMENT

On behalf of the Board of Directors (the "Board"), we hereby present the results of GreaterChina Technology Group Limited (the "Company") and its subsidiaries (together the "Group") for the three months ended 31 October 2006.

We remain fully committed to our goal of becoming a leader in producing Traditional Chinese Medicine ("TCM") health supplements, by using TCM-based ingredients, western biotechnology and maintaining high international standards by manufacturing under the USA Good Manufacturing Practice ("GMP").

Since November 2001, the Group has expanded its business by producing a range of health supplements with the usage of TCM and Chinese herbs by applying pharmaceutical scientific techniques to TCM remedies. As research and development play a major role in the exploration of TCM, the Group utilizes its advanced biotechnology and the support of renowned academic establishments in the Chinese medicinal field to ensure the consistent efficacy of its products and to maintain the stability of the products' chemical ingredients, with a view to ascertain that the products are of higher quality standard than most traditional Chinese medicine.

The Group is intensely engaged in the study of Proteomics through the establishment of the Chinese Medicinal Fungal ("CMF") Proteomics Laboratory, a collaboration with the Department of Biology, Chinese University of Hong Kong. The study of Proteomics enables the detection of abnormalities for protein profile in diseases and tissues and apply a TCM/fungal methodology to identify and treat certain life threatening diseases such as leukemia, renal tumor, pancreatic tumor, liver tumor and other genetic diseases in which they are unique in this part of Asia Pacific Region.

On 4 November 2004, the Group had gained control of the board of directors of the pharmaceutical manufacturing plant in the People's Republic of China, which is currently a wholly owned subsidiary of the Group. After diversification of the Group's business in the PRC, the business development plan of the Group is further enhanced by the production facilities, the existing product lines and the distribution network of this pharmaceutical manufacturing plant. Therefore, the Group has fully complied with a vertical integration of its business model, research and product development through its own CMF Proteomics Laboratory, its manufacturing and procession in the pharmaceutical plant in the PRC and its distribution network in Hong Kong, the PRC and worldwide. Hence, the Group has positioned itself as a leader in this cutting edge technology in both Chinese herbal and western medicine.

We have devoted our efforts to strengthening our business foundation to ensure we stand a strong position to strive for market opportunities, broaden our revenue, increase the growth potential and thus enhance the shareholders' worth.

FINANCIAL REVIEW

Segment Information

For the three months ended 31 October 2006 under review, the Group recorded a total revenue of HK\$3.9 million, of which HK\$2.4 million was contributed from the Group's core business of sales of nutraceutical Chinese herbal products and related services, HK\$1.3 million from sales of western medicine in the PRC and approximately HK\$0.2 million from consultation income, interest income and other sundries. For the comparative figures in the corresponding period in last year, the Group earned a total revenue of HK\$7.4 million, of which HK\$5.6 million was generated from the sale of nutraceutical Chinese herbal products and related services, HK\$1.6 million from sales of western medicine in the PRC and HK\$0.2 million from interest income and other sundries.

For the three months ended 31 October 2006, the Group's total revenue decreased by approximately 48% as compared to the total revenue in the corresponding period last year. The decrease in revenue was mainly attributable from the decrease of sales of nutraceutical Chinese herbal products. It is because during the period under review, the Group was in the course of changing the packaging of most of its nutraceutical Chinese herbal products and was in arrangement with various chain stores the exchange of products, which caused a temporary reduction in sales.

The loss attributable to equity holders for the three months ended 31 October 2006 was HK\$4.4 million, which was approximately the same as the loss attributable to equity holders for the three months ended 31 October 2005.
