Characteristics of The Growth Enterprise Market (“GEM”) of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Excel Technology International Holdings Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited (“GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: – (1) the information contained in this report is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this report misleading; and (3) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

BUSINESS REVIEW

The Company recorded a growth of 47% in turnover of HK\$49,712,000 for the three months ended 31 March 2008, compared with HK\$33,852,000 for the corresponding period of last year.

The Group's loss attributable to equity holders for the three months ended 31 March 2008 was HK\$3,417,000, as compared to the profit of HK\$394,000 in the same period of 2007. The loss was largely due to the provision of cost incurred for an enterprise software project pending negotiation on contract extension and additional scope.

FUTURE PROSPECTS

The Group's growth in turnover is mainly attributed to a significant jump in the revenue of the systems integration business in China which includes the completion of certain backlog signed last year. On the enterprise software business, a number of new contracts were signed within the quarter.

The outsourcing business continues to grow and contributed positively to our result of this quarter. We renewed a number of outsourcing contracts with our existing customers and foresee the outsourcing business to continue to expand steadily.

The Group is moving ahead with its China Support Hub project in a steady pace, and had received positive feedback from potential clients. In-depth discussions were conducted to explore partnerships with government agencies, universities, and foreign banks in China.

Year 2008 will be a challenging year for the Group. With the steep rise in inflation and the a potential economy downturn, the management team on the one hand, will continue to pursue new business ventures but on the other hand, will be conscientious in managing cost.
