CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “EXCHANGE”)

Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

MANAGEMENT DISCUSSION AND ANALYSIS

Business review and financial review

The Company's principal business objectives are to enhance "Zhanwang" as a leading brand name in the PRC automotive parts and components market and become a major player in the global market for the procurement and supply of universal joints. During the first three months of 2009, the Company followed the business strategies in expanding the production capacity of primary production, strengthening product research and development, expanding PRC and international markets and continually improving product quality.

Turnover for the first quarter of 2009 amounted to approximately RMB18.26 million (2008: RMB24.92 million), representing an approximately 26.7% decrease as compared to that of previous period in 2008. The decrease in turnover was mainly attributable to the global financial crisis and economic downturn and the decrease in direct export of universal joints.

The profits attributable to shareholders for the three months ended 31st March, 2009 amounted to approximately RMB0.02 million (2008: loss attributable to shareholders of approximately RMB0.49 million) representing 104% increase than that of the previous period in 2008. The gross profit margin for the period increased to 20% compared to 10.5% of the corresponding period in 2008 due to sharp drop of the cost of raw material especially steel. Finance cost increased from approximately RMB1.02 million in the first quarter of 2008 to approximately RMB1.34 million in the first quarter of 2009 due to increase of bank loan and increase of interest rate.

Prospects

The Directors anticipate that the overall production capacity of universal joints will increase to approximately 12 million units per annum by 2009.

The Company is also actively developing new customers and markets and has successfully developed overseas markets in USA, Japan, Germany, India, South Africa and Middle East. The Company will continue to participate in overseas trade shows and promotion activities in order to increase direct exports.

During the period, the Company had developed 25 new products according to customers' requests and had manufactured more than two million pieces of universal joints.
