Chairman's Statement 主席報告

For and on behalf of the board of directors (the "Board") of Hua Xia Healthcare Holdings Limited (the "Company"), I am pleased to present the annual report of the Company and its subsidiaries (collectively the "Group") for the year ended 31 March 2009.

FINANCIAL OVERVIEW

The current financial crisis is expected to send the global economy into downturn. However, the impact on the People's Republic of China (the "PRC") is not expected as big as in other countries. Attributable to the growth in demand for general hospital and healthcare and hospital management services in the PRC as well as the number of general hospitals in the Group have been increased from 3 to 5, the Group's turnover has reached a record high of approximately HK\$170.087 million for the year ended 31 March 2009 as compared to the turnover of approximately HK\$114.165 million for the previous year. Gross profit of the Group has reached approximately HK\$97.337 million.

As we believe the potential for healthcare development in the PRC is expected to grow, we are confident that our business development in the healthcare related sectors in the PRC will grow accordingly. In order to raise funds to enhance the Group's working capital and strengthen its capital base and financial position in furtherance of the Group's business plans, including future investments in the healthcare sector in the PRC and other businesses when they arise, during the past 12 months and up to the date of this report, the Company completed the open offer with bonus shares on 12 March 2009 and raised approximately HK\$44.95 million. The Company intends to use the net proceeds of approximately HK\$42.50 million for investments in the healthcare sector in the PRC, business development of the Group and towards general working capital.

本人謹代表華夏醫療集團有限公司(「本公司」) 董事會(「董事會」),欣然提呈本公司及其附屬公司(統稱「本集團」)截至二零零九年三月 三十一日止年度之年報。

財務回顧

受目前金融危機影響,預期全球經濟將進入衰退期。不過,相對其他國家而言,預期中華人民共和國(「中國」)所受影響相對較小。受惠於中國對綜合性醫院及醫療和醫院管理服務的需求增加以及本集團的綜合性醫院數目由三間增加至五間,本集團截至二零零九年三月三十一日止年度的營業額創下新高,約達170,087,000港元,而前一年度的營業額約114,165,000港元。本集團之毛利約達97,337,000港元。

本集團相信中國醫療市場發展潛力巨大,本集團有信心其於中國醫療相關行業的業務發展將因而增長。為了募集資金以增強本集團的營運資金並鞏固其資本基礎及財務狀況,以便進一步推展本集團的業務計劃,包括未來於中國醫療行業及其他可能出現的業務的投資,於過去十二個月及截至本報告日期,本公司已於二零零九年三月十二日完成紅股公開發售,並集資約44,950,000港元。本公司計劃把所得款項淨額約42,500,000港元用於中國醫療行業之投資、本集團之業務發展以及一般營運資金。

Management Discussion and Analysis 管理層討論及分析

Results of the Group for the year ended 31 March 2009 have shown improvement in turnover compared with the previous year. Turnover of the continuing operations of the Group for the year was approximately HK\$170.087 million in comparison with HK\$114.165 million in 2008. The improvement in revenue for the year ended 31 March 2009 was mainly driven by the contribution in turnover generated from the PRC hospitals acquired during the year. Gross profit of the Group was approximately HK\$97.337 million in comparison with HK\$74.591 million in 2008.

Net loss attributable to the equity holders of the Company for the year ended 31 March 2009 was approximately HK\$200.548 million (2008: net loss approximately HK\$17.891 million). Such increase in the net loss was mainly due to the impairment loss on the goodwill of approximately HK\$202.547 million which arised during the acquisition of the hospitals in the PRC.

Selling and distribution expenses for the year ended 31 March 2009 to approximately HK\$19.426 million as compared to approximately HK\$5.692 million for the corresponding period last year. Such increase was related to the marketing and promotional expenses of the hospitals in the PRC.

Administrative expenses for the year ended 31 March 2009 amounted to approximately HK\$50.416 million (2008: approximately HK\$35.602 million). The increases were due to the professional expenses incurred for the fund raising activities and the administrative expense for the increased number of general hospitals in operation during the year.

本集團截至二零零九年三月三十一日止年度業績顯示營業額較去年度有所改善。本集團於本年度之持續經營業務營業額約為170,087,000港元,而二零零八年為114,165,000港元。截至二零零九年三月三十一日止年度之收益改善,主要由年內收購中國醫院所產生之營業額貢獻所帶動。本集團之毛利約97,337,000港元,而二零零八年為74,591,000港元。

截至二零零九年三月三十一日止年度本公司股本持有人應佔之虧損淨額約為200,548,000港元(二零零八年:虧損淨額約為17,891,000港元)。該虧損淨額增加主要由於就確認於中國收購醫院時產生的商譽減值虧損約202,547,000港元所致。

截至二零零九年三月三十一日止年度,銷售及 分銷費用約19,426,000港元,而去年同期則約 為5,692,000港元。該增加與位於中國之醫院之 營銷及推廣費用有關。

截至二零零九年三月三十一日止年度,行政 開支約為50,416,000港元(二零零八年:約 35,602,000港元)。該增加乃由於年內之集資 活動及營運之綜合性醫院數目增加帶來之行政 開支所致。

CONTINGENT LIABILITIES

In early 2006, an action in the PRC has been taken out by Jiaxing City Triumph Electric Company Limited against Jiaxing City Shuguang Western and Chinese Composite Hospital Company Limited ("Jiaxing Shuguang Hospital"), a non-wholly owned subsidiary of the Company, using for rental payment of an aggregate of approximately RMB0.875 million (equivalent to approximately HK\$0.99 million) for the period from 1 September 2003 to 1 March 2006, which is claimed with reference to annual rental payment of RMB0.35 million (equivalent to approximately HK\$0.36 million) in respect of the leased property on which Jiaxing Shuguang Hospital is currently occupied and operated (the "Property in Dispute") under a legally binding tenancy agreement entered into with Jiaxing City Xin Kai Yuan Industrial Trading Company Limited who has been joined as a third party to the action (the "Shuguang Dispute").

In the Shuguang Dispute, whereas the Property in Dispute is legally registered under the name of Jiaxing City Xin Kai Yuan Industrial Trading Company Limited and a legally binding tenancy agreement has been entered into between Jiaxing Shuguang Hospital and Jiaxing City Xin Kai Yuan Industrial Trading Company Limited, Jiaxing City Triumph Electric Company Limited alleged that it owns part of the interest in the Property in Dispute and that Jiaxing Shuguang Hospital has a verbal agreement with it whereby Jiaxing Shuguang Hospital has agreed to rent from it the Property in Dispute.

或然負債

於二零零六年初,嘉興市凱旋電子有限公司於中國對嘉興市曙光中西醫結合醫院有限公司(「嘉興曙光醫院」,本公司之非全資附屬公司)提出一項訴訟,就嘉興曙光醫院現時根據其與嘉興市新開元工貿有限公司訂立之一項具法律約束力之租賃協議,於二零零三年九月一日正期間佔用及經營嘉興市曙光醫院目前所在之租賃物業(「糾紛物業」),而聲稱應付之年度租金款項人民幣350,000元(約相當於360,000港元),追討租金款項合共約人民幣875,000元(約相當於990,000港元)。嘉興市新開元工貿有限公司已加入作為該訴訟之第三方(「曙光糾紛」)。

於曙光糾紛中,糾紛物業乃以嘉興市新開元工貿有限公司之名義合法註冊,而嘉興曙光醫院與嘉興市新開元工貿有限公司已訂立一項具法律約束力之租賃協議。嘉興市凱旋電子有限公司指稱,其於糾紛物業中擁有部份權益,以及嘉興曙光醫院已與其達成口頭協議,據此嘉興曙光醫院同意向其租用糾紛物業。

Management Discussion and Analysis 管理層討論及分析

The Company has been advised by its PRC legal adviser that Jiaxing Shuguang Hospital has a strong defense as the Property in Dispute is legally registered under the name of Jiaxing City Xin Kai Yuan Industrial Trading Company Limited and that there had been a legally binding tenancy agreement entered into between Jiaxing Shuguang Hospital and Jiaxing City Xin Kai Yuan Industrial Trading Company Limited, which was made in compliance with the relevant PRC law that leasing of property shall be made by way of written agreement, as contrasted with the alleged verbal agreement between Jiaxing Shuguang Hospital and Jiaxing City Triumph Electric Company Limited. The PRC legal adviser further advised that in those circumstances, Jiaxing City Xin Kai Yuan Industrial Trading Company Limited shall be responsible for the Shuguang Dispute.

本公司已獲其中國法律顧問告知,嘉興曙光醫院具有力抗辯理據,此乃由於糾紛物業乃以嘉興市新開元工貿有限公司之名義合法註冊,加上嘉興曙光醫院與嘉興市新開元工貿有限公司已遵照中國關於物業須以書面協議租賃之有關法律而訂立一項具法律約束力之租賃協議,而有別於嘉興曙光醫院與嘉興市凱旋電子有限公司聲稱達成之口頭協議。中國法律顧問亦告知,在此等情況下,嘉興市新開元工貿有限公司須對曙光糾紛負上責任。

As at 31 March 2009, the Shuguang Dispute is now stayed pending the outcome of the dispute between Jiaxing City Triumph Electric Company Limited and Jiaxing City Xin Kai Yuan Industrial Trading Company Limited regarding the ownership of the Property in Dispute.

於二零零九年三月三十一日,曙光糾紛仍待判決,以等候嘉興市凱旋電子有限公司與嘉興市新開元工貿有限公司之間就糾紛物業業權的糾紛結果。

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

Basis of consolidation - continued

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

Minority interests in the net assets of consolidated subsidiaries are presented separately from the Group's equity therein. Minority interests in the net assets consist of the amount of those interests at the date of the original business combination and the minority's share of changes in equity since the date of the combination. Losses applicable to the minority in excess of the minority's interest in the subsidiary's equity are allocated against the interests of the Group except to the extent that the minority has a binding obligation and is able to make an additional investment to cover the losses.

Business combinations

The acquisition of subsidiaries is accounted for using the purchase method. The cost of the acquisition is measured at the aggregate of the fair values, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree, plus any costs directly attributable to the business combination. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under HKFRS 3 *Business Combinations* are recognised at their fair values at the acquisition date, except for non-current assets (or disposal groups) that are classified as held for sale in accordance with HKFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*, which are recognised and measured at fair value less costs to sell.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

Business combinations – continued

Goodwill arising on acquisition is recognised as an asset and initially measured at cost, being the excess of the cost of the business combination over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities recognised. If, after reassessment, the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination, the excess is recognised immediately in the income statement.

The interest of minority shareholders in the acquiree is initially measured at the minority's proportion of the net fair value of the assets, liabilities and contingent liabilities recognised.

Goodwill

Goodwill arising on acquisitions prior to 1 January 2006

Goodwill arising on an acquisition of a subsidiary or a jointly controlled entity for which the agreement date is before 1 January 2006 represents the excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets and liabilities of the relevant subsidiary or the relevant jointly controlled entity at the date of acquisition.

For previously, capitalised goodwill arising on acquisitions of subsidiaries, the Group has discontinued amortisation from 1 January 2006 onwards, and such goodwill (net of cumulative amortisation as at 31 December 2006) is tested for impairment annually, and whenever there is an indication that the cash generating unit to which the goodwill relates may be impaired (see the accounting policies below).

Goodwill - continued

Goodwill arising on acquisitions on or after 1 January 2006

Goodwill arising on an acquisition of a subsidiary or an associate for which the agreement date is on or after 1 January 2006 represents the excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets, liabilities and contingent liabilities of the relevant subsidiary at the date of acquisition. Such goodwill is carried at cost less any accumulated impairment losses.

Capitalised goodwill arising on an acquisition of a subsidiary is presented separately in the balance sheet.

For the purposes of impairment testing, goodwill arising from an acquisition is allocated to each of the relevant cashgenerating units, or groups of cash-generating units, that are expected to benefit from the synergies of the acquisition. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, and whenever there is an indication that the unit may be impaired. For goodwill arising on an acquisition in a financial year, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that financial year. When the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated to reduce the carrying amount of any goodwill allocated to the unit first, and then to the other assets of the unit pro rata on the basis of the carrying amount of each assets in the unit. Any impairment loss for goodwill is recognised directly in the consolidated income statement. An impairment loss for goodwill is not reversed in subsequent periods.

On subsequent disposal of a subsidiary, the attributable amount of goodwill capitalised is included in the determination of the amount of profit or loss on disposal.

Subsidiaries

A subsidiary is a company in which the Company, directly or indirectly, controls more than one half of the voting power; has the power to govern the financial and operating policies; to appoint or remove the majority of the members of the board of directors; or to cast majority of votes at the meetings of the board of directors.

Investments in subsidiaries are included in the Company's balance sheet at cost less any impairment loss. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

Revenue recognition

Revenue from sales of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyers, provided that the Group maintains neither managerial involvement to the degree usually associated with ownership, nor effective control over the goods sold.

Revenue from provision of hospital service, healthcare and hospital management service is recognised when the services are provided.

Interest income is recognised on a time-proportion basis using effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flows discounted at original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

Leasing

Leases are classified as finance leases whenever the terms of the leases transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised in the consolidated income statement on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense on a straight-line basis over the lease term.

The Group as lessee

Assets held under finance assets are recognised as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated balance sheet as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly to the consolidated income statement

Rentals payable under operating leases are charged to the consolidated income statement on a straight-line basis over the terms of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised as a reduction of rental expense over the lease term on a straight-line basis.

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

The cost of an asset comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditure incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to the consolidated income statement in the period in which it is incurred. In situations where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefits expected to be obtained from the use of the property, plant and equipment, the expenditure is capitalised as an additional cost of that asset.

Depreciation is provided to write off the cost of property, plant and equipment, using the straight line method, over their estimated useful lives. The principal annual rates are as follows:

Building Over the lease terms
Leasehold improvements Over the lease terms
Plant and machinery 20%Furniture, fixtures and equipment 20% to $33^{1/3}\%$ Motor vehicles 20%Office equipment 20%

The gain or loss arising from disposal of an asset is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognised in the consolidated income statement.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost, which comprises all costs of purchase and, where applicable, other costs that have been incurred in bringing the inventories to their present location and condition, is calculated using the first-in, first-out method. Net realisable value represents the estimated selling price in the ordinary course of business less all estimated costs necessary to make the sale.

Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade and other receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The amount of the provision is recognised in the consolidated income statement.

Impairment of assets (other than goodwill, intangible assets with indefinite lives)

At each balance sheet date, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised as income immediately.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable and deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

倘減值虧損其後撥回,資產賬面值增至其 可收回數額之經修訂估計值,致使增加之 賬面值不超逾過往年度資產減值虧損未 予確認下應予確定之賬面值。撥回後減值 虧損即時確認為收入。

Taxation - continued

Deferred tax is recognised on differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liabilities method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences, and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of the other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Taxation - continued

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realised. Deferred tax is charged or credited to consolidated income statement except when it relates to items charged or credited directly or equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the entity intends to settle its current tax assets and liabilities on a net basis.

Financial instruments

Financial assets and financial liabilities are recognised on the balance sheet when the Group becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the consolidated income statement.

Financial assets

The Group's financial assets are classified into loans and receivables and available-for-sale financial assets. All regular purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. The accounting policies adopted in respect of each category of financial assets are set out below.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not guoted in an active market. At each balance sheet date subsequent to initial recognition, loans and receivables are carried at amortised cost using the effective interest method, less any identified impairment losses. An impairment loss is recognised in consolidated income statement when there is objective evidence that the asset is impaired, and is measured as the difference between the assets' carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Impairment losses are reversed in subsequent periods when an increase in the asset's recoverable amount can be related objectively to an event occurring after the impairment losses were recognised, subject to a restriction that the carrying amount of the asset at the date the impairment losses reversed do not exceed what the amortised cost would have been had the impairment losses not been recognised.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated or not classified as any of the other categories under HKAS 39. At each balance sheet date subsequent to initial recognition, available-for-sale financial assets are measured at fair value. Changes in fair value are recognised in equity, until the financial asset is disposed of or is determined to be impaired, at which time, the cumulative gain or loss previously recognised in equity is removed from equity and recognised in consolidated income statement. Any impairment losses on available-for-sale financial assets are recognised in consolidated income statement. Impairment losses on available-for-sale equity investments will not be reversed in subsequent years.

Available-for-sale equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured, are measured at cost less any identified impairment losses at each balance sheet date subsequent to initial recognition. An impairment loss is recognised in consolidated income statement when there is objective evidence that the asset is impaired. The amount of the impairment loss is measured as the difference between the carrying amount of the asset and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses will not be reversed in subsequent years.

Financial liabilities and equity

Financial liabilities and equity instruments issued by a group entity are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. The Group's financial liabilities are generally classified into other financial liabilities. The accounting policies adopted in respect of financial liabilities and equity instruments are set out below.

Other financial liabilities

Other financial liabilities are subsequently measured at amortised cost, using the effective interest method.

Convertible bond

Convertible bond issued by the Company that contain both financial liability and equity components are classified separately in respective liability and equity components on initial recognition. On initial recognition, the fair value of the liability component is determined using the prevailing market interest of similar non-convertible debts. The difference between the proceeds of the issue of the convertible bond and the fair value assigned to the liability component, respecting the embedded call option for the holder to convert the bond into equity, is included in equity (convertible bond – equity reserve).

In subsequent periods, the liability component of the convertible bond is carried at amortised cost using the effective interest method. The equity component, represented by the option to convert the liability component into ordinary shares of the Company, will remain in convertible bond – equity reserve until the embedded option is exercised (in which case the balance stated in convertible bond – equity reserve will be transferred to share capital and share premium). Where the option remains unexercised at the expiry date, the balance stated in convertible bond – equity reserve will be released to the retained profits. No gain or loss is recognised in the consolidated income statement upon conversion or expiration of the option.

Transaction costs that relate to the issue of the convertible bond are allocated to the liability and equity components in proportion to the allocation of the proceeds. Transactions costs relating to the equity component are charged directly to convertible bond — equity reserve. Transaction costs relating to the liability component are included in the carrying amount of the liability portion and amortised over the period of the convertible bond using the effective interest method.

The results and financial positions of all the companies now comprising the Group (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) Assets and liabilities are translated at the closing rate:

Current assets and liabilities

Current assets are expected to be realised within twelve months of the balance sheet date or in the normal course of the Group's operating cycle. Current liabilities are expected to be settled within twelve months of the balance sheet date or in the normal course of the Group's operating cycle.

Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that outflow of economic resources will be required or the amount of obligation cannot be measured reliably. A contingent liability is not recognised but is disclosed in the notes to the financial statements. When a change in the probability of an outflow occurs so that outflow is probable, they will then be recognised as a provision.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. A contingent asset is not recognised but is disclosed in the notes to the financial statements when an inflow of economic benefits is probable. When inflow is virtually certain, an asset is recognised.

Provisions

A provision is recognised when the Group has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Where the effect of the time value of money is material, the amount of a provision is the present value at the balance sheet date of the expenditures expected to be required to settle the obligation.

Employee benefits - continued

iii. Termination benefits are recognised when, and only when, the Group demonstrably commits itself to terminate employment or to provide benefits as a result of voluntary redundancy by having a detailed formal plan which is without realistic possibility of withdrawal.

iv. Share-based payment expenses

The fair value of share options granted to employees is recognised as an employee cost with a corresponding increase in a capital reserve within equity. The fair value is measured at the grant date using the binomial lattice model, taking into account the terms and conditions upon which the options were granted. Where the employees have to meet vesting conditions before becoming unconditionally entitled to the share options, the total estimated fair value of share options is spread over the vesting period, taking into account the probability that the options will vest.

During the vesting period, the number of share options that is expected to vest is reviewed. Any adjustment to the cumulative fair value recognised in prior years is charged/credited to the income statement for the year of the review, unless the original employee expenses qualify for recognition as an asset, with a corresponding adjustment to the capital reserve. On vesting date, the amount recognised as an expense is adjusted to reflect the actual number of share options that vest (with a corresponding adjustment to the capital reserve) except where forfeiture is only due to not achieving vesting conditions that relate to the market price of the Company's shares. The equity amount is recognised in the capital reserve until either the option is exercised (when it is transferred to the share premium account) or the option expires (when it is released directly to retained profits).

Segment revenue, expenses, assets and liabilities are determined before intra-group balances and intra-group transactions are eliminated as part of the consolidation process, except to the extent that such intra-group balances and transactions are between group enterprises within a single segment.

Segment capital expenditure is the total cost incurred during the year to acquire segment assets (both tangible and intangible) that are expected to be used for more than one year.

4. KEY SOURCES OF ESTIMATION UNCERTAINTY

In the process of applying the Group's accounting policies which are described in note 3, management has made certain key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that may have a significant risk in causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below:

(a) Estimated impairment of goodwill

The Group performs annual tests on whether there has been impairment of goodwill in accordance with the accounting policy stated in note 3. The recoverable amounts of cash-generating units are determined based on value-in-use calculations. These calculations require the use of estimates and assumptions made by management on the future operation of the business, pre-tax discount rates, and other assumptions underlying the value-in-use calculations.

(b) Impairment of trade receivables

The aged debt profile of trade debtors is reviewed on a regular basis to ensure that the trade debtor balances are collectible and follow up actions are promptly carried out if the agreed credit periods have been exceeded. However, from time to time, the Group may experience delays in collection. Where recoverability of trade debtor balances are called into doubts, specific provisions for bad and doubtful debts are made based on credit status of the customers, the aged analysis of the trade receivable balances and write-off history. Certain receivables may be initially identified as collectible, yet subsequently become uncollectible and result in a subsequent write-off of the related receivable to the consolidated income statement. Changes in the collectability of trade receivables for which provisions are not made could affect our results of operations.

4. 估算及不確定性之主要來源

於應用附註3所述之本集團會計政策時,管理層已作出若干有關未來之主要假設,以及於結算日之估算不確定因素之主要來源,其極有可能導致下一個財政年度資產和負債賬面值出現重大調整,現論述如下:

(a) 商譽之估計減值

本集團根據載於附註3之會計政策,每年就商譽是否出現減值進行測試。現金產生單位之可收回金額乃根據使用中價值計算而釐定。該等計算須運用管理層就業務之未來營運、稅前貼現率作出之估算及假設,以及其他與使用中價值計算相關之假設。

(b) 貿易應收款項減值

31 March 2009 二零零九年三月三十一日

4. KEY SOURCES OF ESTIMATION UNCERTAINTY – continued

(c) Useful lives of property, plant and equipment In accordance with HKAS 16, the Group estimates the useful lives of property, plant and equipment in order to determine the amount of depreciation expenses to be recorded. The useful lives are estimated at the time the asset is acquired based on historical experience, the expected usage, wear and tear of the assets, as well as technical obsolescence arising from changes in the market demands or service output of the assets. The Group also perform annual reviews on whether the

assumptions made on useful lives continue to be valid.

(d) Impairment of non-current assets

If a triggering event occurs indicating that the carrying amount of an asset may not be recoverable, an assessment of the carrying amount of that asset will be performed. Triggering events include significant adverse changes in the market value of an asset, changes in the business or regulatory environment, or certain legal events. The interpretation of such events requires judgment from management with respect to whether such an event has occurred. Upon the occurrence of triggering events, the carrying amounts of non-current assets are reviewed to assess whether their recoverable amounts have declined below their carrying amounts. The recoverable amount is the present value of estimated net future cash flows which the Group expects to generate from the future use of the asset, plus the assets residual value on disposal. Where the recoverable amount of non-current assets is less than its carrying value, an impairment loss is recognised to write the assets down to its recoverable amount.

4. 估算及不確定性之主要來源 -續

(c) 物業、廠房及設備之可使用年期 根據香港會計準則第16號,本集團 估計物業、廠房及設備之可使用年 期,從而釐定須予記錄之折舊開支 金額。可使用年期乃於收購資產當 時根據過往經驗、資產之預期用途 及耗損,以及由資產之市場須爾用 所產生之服務變更所引致之技術折 舊釐定。本集團亦就對可使用年期 作出之假設是否繼續有效進行每年 審閱。

(d) 非流動資產之減值

倘發生觸發事件指出資產賬面值可 能未能收回,將對該資產之賬面值 進行評估。觸發事件包括資產市值 之重大不利變動、業務或監管環境 變動或若干法律事件。該等事件需 要管理層就有否發生該等事件之判 斷而詮釋。當發生觸發事件時,非流 動資產之賬面值乃被審閱,以評估 彼等之可收回金額是否已下降至低 於彼等之賬面值。可收回金額為本 集團預期於未來使用該資產所產生 之估計未來現金流量淨額之現值, 加上該資產出售時之剩餘價值。倘 非流動資產之可收回金額低於其賬 面值,則確認減值虧損以將該資產 撇減至其可收回金額。

31 March 2009 二零零九年三月三十一日

4. KEY SOURCES OF ESTIMATION UNCERTAINTY – continued

(e) Income taxes and deferred taxation

The Group is subject to income taxes in different jurisdictions. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Deferred tax assets relating to certain temporary differences and tax losses are recognised when management considers to be probable that future taxable profit will be available against which the temporary differences or tax losses can be utilised. The outcome of their actual utilisation may be different.

(f) Measurement of convertible notes

On issuance of convertible notes, the fair value of the liability component is determined using a market rate for an equivalent non-convertible note; and this amount is carried as a long term liability on the amortised cost basis until extinguished on conversion or redemption. The remainder of the proceeds is allocated to the conversion option that is recognised and included in the convertible notes reserve, net of transaction costs. The splitting of the liability and equity components requires an estimation of the market interest rate.

4. 估算及不確定性之主要來源 -續

(e) 所得税及遞延税項

本集團須支付不同司法權區的所得 税。於釐訂所得稅撥備金額之時,需 要作出重大判斷。於日常業務過程 中,可能出現多項涉及未能確切釐 訂最終稅項的交易及計算。倘該等 事項的最終稅務結果與最初記錄者 不同,有關差異將影響作出決定的 期間的所得稅及遞延稅項撥備。

當管理層認為可能有臨時差額或稅 務損失而可用以抵銷未來的應課稅 利潤時,則會確認與該等臨時差額 及稅務損失相關的遞延稅項資產。 實際應用的結果或有不同。

(f) 可換股票據之計量

發行可換股票據時,負債部分的公 平值乃根據同等不可換股票據的市 場利率而釐定,而該數額按攤銷成 本列作長期負債,直至票據獲兑換 或贖回時耗盡為止。款項餘額於扣 除交易成本後,將分配至已確認並 計入可換股票據儲備的換股權轉 換。分辦負債及股權部份需要運用 對市場利率之估計。

4. KEY SOURCES OF ESTIMATION UNCERTAINTY – continued

(g) Measurement of fair value of equity-settled transactions

The Company operates share option schemes under which employees (including directors) of the Group receive remuneration in the form of share-based payment transactions. The cost of these equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted, using assumptions including expected volatility and risk free interest rate. Such cost is recognised, together with a corresponding increase in equity, over the period in which the service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at each balance sheet date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest.

The recoverable amount of this CGU is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by management covering a five year period, and a discount rate of 13.29% per annum. Management believes that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of this CGU. Management determined the budgeted gross margin based on past performance and its expectations for the market development.

21. SHARE OPTION SCHEME - continued

(b) Post-listing share options – continued Notes:

- (i) The Group recognises the fair value of share options granted as an expense in the consolidated income statement when they were granted with a corresponding increase being recognised in share-based payment reserve. The employee share-based payment reserve is transferred to share capital and share premium, together with the exercise price, when the option holder exercises its rights. As a transitional provision, the cost of share option granted after 7 November 2002 and had not yet vested on 1 January 2005 were expensed retrospectively in the income statement of the respective periods.
- (ii) Share options granted under the pre-listing share options scheme are not expensed as the options were all granted and vested before 7 November 2002 and not subject to requirements of HKFRS 2.
- (iii) The estimated fair value of each option granted on 7 July 2005, 13 July 2006, 24 July 2006, 21 March 2008 and 30 March 2009 are approximately HK\$0.0299, HK\$0.0226, HK\$0.0188, HK\$0.0384 and range from HK\$0.123 to HK\$0.021 respectively.

The fair values were calculated using the Binomial Option pricing model. The inputs into the model were as follows:

30. LOSS PER SHARE - continued

From continuing operations

The calculation of the basic and diluted loss per share from continuing operations attributable to the equity holders of the Company is based on the following data:

30. 每股虧損-續 來自持續經營業務

本公司股本持有人應佔來自持續經營業 務之每股基本及攤薄虧損乃根據以下數 據計算:

The denominators used are the same as those detailed above for both basic and diluted earnings per share.

所採用之分母與上文載述用以計算每股 基本及攤薄盈利之分母相同。

31 March 2009 二零零九年三月三十一日

30. LOSS PER SHARE - continued

From discontinued operations

For the year ended 31 March 2008, basic earnings per share for the discontinued operations is HK0.19 cents per share and diluted earnings per share for the discontinued operations is HK0.19 cents per share, based on the profit for the year from the discontinued operations of approximately HK\$3,157,000 and the denominators detailed above for both basic and diluted loss per shares.

The calculation of diluted loss per share for both continuing and discontinued operations did not assume the exercise of the convertible notes and share options existed at 31 March 2009 and 2008 as the exercise of convertible notes and share options would reduce loss per share, therefore anti-dilutive.

31. DIVIDENDS

The directors do not recommend the payment of any dividend in respect of the year ended 31 March 2009 (2008: Nil).

32. PLEDGED ASSETS

At 31 March 2009 and 31 March 2008, certain bank deposits of the Group were pledged as collateral for certain banking facilities. The Company had not pledged any assets at the balance sheet date.

30. 每股虧損-續

來自終止經營業務

截至二零零八年三月三十一日止年度,根據終止經營業務年度溢利約3,157,000港元及上文載述用作計算每股基本及攤薄虧損之分母計算,終止經營業務之每股基本盈利為每股0.19港仙,而終止經營業務之每股攤薄盈利為每股0.19港仙。

計算持續經營及終止經營業務之每股攤 薄虧損時乃假設於二零零九年及二零零 八年三月三十一日存有之可換股票據及 購股權並未行使,此乃由於行使可換股票 據及購股權會減少每股虧損,因而具反攤 薄作用。

31. 股息

董事不建議就截至二零零九年三月三十一 日止年度派付任何股息(二零零八年: 無)。

32. 資產抵押

於二零零九年三月三十一日及二零零八年三月三十一日,本集團若干銀行存款已作抵押,作為取得銀行貸款之抵押品。本公司於結算日並無抵押任何資產。

33. ACQUISITION OF SUBSIDIARIES continued

- (a) continued Notes:
 - If the acquisition had been completed on 1 April 2008, total Group turnover for the year would have been approximately HK\$179,960,000, and loss for the year would have been approximately HK\$195,374,000. The pro forma information is for illustrative purposes only and is not necessarily an indication of turnover and results of the Group that actually would have been achieved had the acquisition been completed on 1 April 2008, nor is it intended to be a projection of future results.
 - The subsidiaries acquired during the year contributed approximately HK\$1,186,000 to the Group's turnover and loss after tax of approximately HK\$1,531,000 for the year.
 - Goodwill arose in the business combination because the cost of the combination included a control premium paid to acquire United First Investment Limited. In addition, the Consideration paid for the combination effectively included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce of United First Investment Limited. These benefits are not recognised separately from goodwill as the future economic benefits arising from them cannot be reliably measured.
- On 26 February 2008, a wholly owned subsidiary of the Company, Ally Health International Limited, entered into an agreement with an independent third party (the "Vendor 2") to acquire the entire issued share capital of Large Forever Group Limited for a cash consideration of HK\$65,200,000. The acquisition was completed on 5 May 2008. The aggregate amount of goodwill arising as a result of the acquisition is approximately HK\$65,492,000.

In the opinion of the Company's legal advisor, the Group has a strong defense as the Property in Dispute which is legally registered under the name of Jiaxing City Xin Kai Yuan and that there had been a legally binding tenancy agreement entered into between Jiaxing Shuguang Hospital and Jiaxing City Xin Kai Yuan, which was made in compliance with the relevant PRC law that leasing of property shall be made by way of written agreement, as contrasted with the alleged verbal agreement between Jiaxing Shuguang Hospital and Jiaxing City Triumph Electric.

In the opinion of the directors, the Group has valid grounds to defence the actions and as such, no provision is made in the financial statements of the Group for its exposure to the Shuguang Dispute.

Sensitivity analysis

The Group is mainly exposed to the effects of fluctuation in RMB.

The following table details the Group's sensitivity to a 5% increase and decrease in the Hong Kong dollars against the relevant foreign currencies. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes outstanding foreign currency denominated monetary items and foreign currency forward contracts, and adjusts their translation at the period end for a 5% change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the currency of the lender or the borrower. A positive number below indicates an increase in profit and other equity where the Hong Kong dollars strengthen 5% against the relevant currency. For a 5% weakening of the Hong Kong dollars against the relevant currency, there would be an equal and opposite impact on the profit and other equity, and the balances below would be negative.

This is mainly attributable to the exposure outstanding on receivables and payables denominated in respective currencies at the year end.

Interest rate risk management

The Group's cash flow interest rate risk relates primarily to variable-rate borrowings. It is the Group's policy to keep its borrowings at floating rate of interests so as to minimise the fair value interest rate risk. As at 31 March 2009, the Group did no have borrowings at floating rate of interests.

The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note. The Group's cash flow interest rate risk is mainly concentrated on the fluctuation of HIBOR arising from the Group's Hong Kong dollar denominated borrowings.

附註:

此乃主要由於在年結時以相關貨幣計 值之應收款項及應付款項所承受之風 險所致。

利率風險管理

本集團之現金流利率風險主 要與浮息借貸相關。本集團之 政策為維持借貸以浮動利率 計息,藉以減少公平值利率風 險。於二零零九年三月三十一 日,本集團並無任何浮息借 貸。

本集團就財務資產及財務負債 所承受之利率風險詳情列於本 附註流動資金風險管理一節。 本集團之現金流利率風險主要 集中於本集團以港元計值之借 貸因香港銀行同業拆息波動所 產生之風險。

Sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the balance sheet date. For variable-rate borrowings, the analysis is prepared assuming the amount of liability outstanding at the balance sheet date was outstanding for the whole year. A 50 basis point increase or decrease in HIBOR is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/ lower and all other variables were held constant, the Group's profit for the year ended 31 March 2009 would decrease/increase by approximately HK\$12,000. This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings during the year ended 31 March 2009.

The Group's sensitivity to interest rates has decreased during the current period mainly due to the reduction in variable rate borrowings.

敏感度分析

下文之敏感度分析乃根據衍生 工具及非衍生工具於結算日所 承受之利率風險釐訂。就浮息 借貸而言,其分析乃假設於結 算日尚未償還之負債金額於整 個年度內均未償還。於向內時 主要管理人員報告利率風時乃 採用香港銀行同業拆息加減50 基點,其為管理層所評估可能 合理出現之利率變動。

倘利率上升/下降50點子,而 所有其他變動維持不變,本集 團截至二零零九年三月三十一 日止年度之溢利將減少/增加 約12,000港元。此乃主要來自 本集團於截至二零零九年三月 三十一日止年度內就浮息借貸 所承受之利率風險。

本集團對利率之敏感度於本期 間有所下降,至乃主要由於浮 息借貸減少。

(ii) Credit risk

As at 31 March 2009, the Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties and financial guarantees provided by the Group is arising from:

- the carrying amount of the respective recognised financial assets as stated in the consolidated balance sheet: and
- the amount of contingent liabilities in relation to the financial guarantees provided by the Group as disclosed in Note 41.

In order to minimise the credit risk, the management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt and debt investments at each balance sheet date to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced

The credit risk on liquid funds is limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies.

(ii) 信貸風險

於二零零九年三月三十一日, 本集團因對手方未能履行責任 及本集團所提供之財務擔保所 承受,並可令本集團蒙受財務 損失之最高信貸風險乃來自:

- 綜合資產負債表所載各 項已確認財務資產之賬 面值;及
- 與本集團提供財務擔保 (詳情載於附註41)相關 之或然負債金額。

為使信貸風險降至最低,本集 團管理層已指派一個團隊負責 釐訂信貸限額、信貸批准及其 他監察程序,以確保採取跟進 行動收回過期債項。此外,本 集團會於各結算日審閱個別貿 易債項及債務投資之可收回金 額,並確保就未能收回之金額 作出充足之減值虧損。就此而 言,本公司董事認為,本集團 之信貸風險已大幅減少。

由於對手方均為獲國際評級機 構授予高信貸評級之銀行,故 流動資金之信貸風險有限。

(ii) Credit risk - continued

Other than concentration of credit risk on liquid funds which are deposited with several banks with high credit ratings, the Group does not have any other significant concentration of credit risk. Trade and other receivables consist of a large number of customers, spread across diverse industries and geographical areas.

(iii) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has built an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

As at 31 March 2009, the Group has available unutilised overdrafts and short and medium term bank loan facilities of approximately HK\$2,000,000 (2008: HK\$2,000,000) and HK\$8,000,000 (2008: HK\$8,000,000) respectively.

For non-derivative financial assets, the tables have been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets except where the Group anticipates that the cash flow will occur in a different period. For non-derivative financial liabilities, the tables reflect the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay.
