**FIRST QUARTERLY REPORT
2009**

For the three months ended

* For identification purpose only

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this document, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this document.

This document, for which the directors of Big Media Group Limited (the “Directors”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief:—

1. the information contained in this document is accurate and complete in all material respects and not misleading;
2. there are no other matters the omission of which would make any statement in this document misleading; and

Business Outlook and Prospect

The business and economic condition in China remain robust and active. The GDP for the third quarter of 2009 recorded remains strong and accelerates to 8.9%. The government has launched massive stimulus program to create internal demand in order to compensate for the loss of export. The world financial crises caused by the US subprime loan which is experienced by many nations in the early of this year has eased. We expect the business environment for the Company in Guangzhou or Southern area will be good and positive.

We expect the growth in the telecommunication and internet related business will achieve the needed growth due to the conducive economy and business environment. The Company is expected to increase more business sales volume in the internet related business in order to capture the upturn condition of the economy.

The management of the Company will also monitor the operating cost in order to keep in within the reasonable increase due to the inflation caused by the good economy situation and also expansion activities of the Company.
