Third Quarterly Report 2010

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

1. BASIS OF PREPARATION

The Group's unaudited condensed consolidated interim financial statements have been prepared in accordance with the applicable disclosure requirements set out in Chapter 18 of the GEM Listing Rules and Hong Kong Financial Reporting Standards ("HKFRS") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA").

The HKICPA has issued a number of new and revised HKFRSs and interpretations that are first effective or available for early adoption for the current accounting period of the company. There have been no significant changes to the accounting policies applied in these financial statements for the current and prior accounting periods presented as a result of these developments.

The unaudited condensed consolidated interim financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, financial assets and financial liabilities at fair value through profit or loss.

The preparation of financial statements in conformity with the HKFRS requires the use of certain critical accounting estimates. It also requires management to exercise their judgements in the process of applying the Group's accounting policies.

The accounting policies adopted in preparing the unaudited condensed consolidated interim financial statements were consistent with those applied for the financial statements of the Group for the year ended 31 December 2009.

These unaudited condensed consolidated interim financial statements are presented in Hong Kong dollars and all values are rounded to the nearest thousand (HK\$'000), unless otherwise stated.

The condensed consolidated accounts have not been audited by the Company's auditors but have been reviewed by the Company's audit committee.

Management Discussion and Analysis

BUSINESS REVIEW

For the nine months ended 30 September 2010, the turnover of the Group amounted to approximately HK\$5.79 million, representing an increase of approximately 8.63% as compared with the corresponding period in 2009. The increase was mainly attributed to the growth in our advisory activities as some of our clients reactivate their postponed projects during the year. Benefited from local economy recovery, the management believes that the growth in China will continue to present opportunities and the business results of the Group could gradually be improved.

OUTLOOK

In the coming year, the Group will continue to focus on its principal business in relation to the provision of corporate finance advisory services in Hong Kong and pay close attention to opportunities in China by seeking for strategic alliances and raising public awareness of the Group's services in the market. As the regional and local economies may continue to be volatile and unpredictable, the Group will be more proactive in seeking for new opportunities in the provision of other financial services so as to diversify its businesses for more sources of revenue. As a result, the Board believes its operating and financial performance will improve in the near future.
