## MANAGEMENT DISCUSSION AND ANALYSIS

### *Introduction*

The recovery of global economy will accelerate in 2011. As to the PRC, it is facing the critical moment for a steady recovery after tackling with the international financial crisis. With the medical reform introduced proactively by the government, there will be further efforts in standardization. Medical expenses will also increase accordingly. Together with the trend of aging population, the development of the pharmaceutical industry in the PRC will continue to be promising in 2011.

As a leading modern pharmaceutical enterprise in the PRC, the Company has always insisted on the strategic core competencies of consolidating its capabilities in production, research and development and distribution. Best endeavours were used in the provision of reliable and high value added pharmaceutical products. During the Period, the Company fully leveraged on the opportunities arising from the expansion in the market and invested additional resources in enhancing production capabilities and technologies. Demand from market was fulfilled whilst the research and development in new products were accelerated. At the same time, the Company has been keen on tapping into a broader market in order to increase its market share. This in turn will allow satisfactory growth in both turnover and earnings, building a solid foundation for its sustainable development in future.

### *Business Review*

For the three months ended 31 March 2011, the Group has been consistent in implementing the development strategies as formulated earlier, and continued to enhance its capabilities in research and development, production and distribution. A sound condition in operation has thus been sustained. Hence, the profit attributable to the shareholders of the Group recorded remarkable growth compared to the same period of the last year. There had been strong momentum driving the growth in the Group. The outstanding results were attributable to the support and cooperation of all shareholders, customers, suppliers, business partners and the public, as well as the concerted and unremitting efforts of the management and staff of the Group.

During the Period, the Group continued to implement effective strategies on the seven integral parts of its operation, namely management, culture, business organisation, capital operation, science and technology innovation, and human resources and marketing. This had effectively contributed to the development of the Group and further enhanced its risk mitigating capabilities and overall competencies. The Group was allowed to establish “Shandong Key Lyophilized Powder Injection Pharmaceutical Laboratory”, “Shandong Key Lyophilized Powder Injection Pharmaceutical Engineering Laboratory” and the position of “Taishan Scholar – Pharmaceutical expert consultant”, so as to introduce talent and build a stronger platform of research and development for the Group, which will further strengthen the research and development competencies of the Group.

Leveraging on its strength, the Group has been awarded the “Top Ten Pharmaceutical Enterprises with Growth Potential” in China and has been one of the “Top 100 Pharmaceutical Companies in China” consecutively since 2006. These recognitions demonstrated the growth in our overall corporate strength.

During the Period, the Group received 4 patents of invention in the PRC. It is now applying for 23 patents of invention in the PRC. Four new drugs were approved to produce and register. By capitalizing on the successes already achieved, the Group will further strengthen its research and development and expand its market network to further enhance our brand recognition and competitiveness so as to build up a world-class pharmaceutical brand.

#### *Employees and Remuneration Policy*

The Directors believe that employees' quality is the most important factor in maintaining the sustained development and growth of the Group and in raising its profitability. The Group determines its employees' salaries based on their performance, work experience and the prevailing salaries in the market, while other remuneration and fringe benefits are maintained at an appropriate level.

The Group has established a remuneration committee to make recommendations on the overall strategy for remuneration policy.

### *Prospects*

Looking ahead, since the development of the pharmaceutical industry is one of the focuses of the State's policies in future, the prospect of the pharmaceutical industry is still optimistic. The pharmaceutical industry has already been included as one of the industries that will be supported by the policies in the Twelfth Five-Year Plan published by the PRC central government. It is expected that the central government will allocate more resources to the pharmaceutical and medical equipment industries. A modern and liquid market system for pharmaceutical products will be established during the term of the Twelfth Five-Year Plan so as to enhance the concentration of the industry.

In addition, the Guiding Opinions on Speeding up the Restructuring of the Pharmaceutical Industry (the "Opinions") was jointly published by the Ministry of Information Industry, the Ministry of Health and the State Administration of Food and Drug in November 2010. The aims of the Opinions were to speed up the restructuring of the pharmaceutical industry, to cultivate independent innovation capacity and to enhance the concentration in production. The Opinions are beneficial to the development of innovative enterprises as a whole. This will give more room for competitive enterprises to develop.

In future, the Group will continue to pursue the strategic directions of "Technology-driven enterprise with determination and efforts" under the favourable operating environment. By fully leveraging on the opportunities arising from the integration of pharmaceutical industry, the Group will continue to expand its investment in research and development and enhance the standards in research and development as well as technologies. This will allow the Group to invent and develop more products of higher technology, better quality and higher added value. The Group also aims at cost reduction and expansion of production scale so as to achieve economies of scale, lower cost of production and diversified competition. As the Group has begun the construction of new plants for Yuxin and Hengxin, production capabilities will be increased to satisfy the growing demand for pharmaceutical products in the market. We can also increase the categories of pharmaceutical products, and expand its scope in research and development on new drugs more effectively. This will facilitate a more comprehensive development in business. The Group will also proactively establish a broader sales network so as to enhance the market share of its products. The core competencies in the Group will thus be improved in an ongoing manner.

With the implementation of the strategies above, it is anticipated by the Group that "Luoxin" will be transformed into a brand representing world-class pharmaceutical enterprise. With the rapid growth in production capabilities and the launch of more high value added products, the Group is confident to maintain a steady growth in its business so as to bring satisfactory return to our shareholders.
