Report

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the "Directors") of Ningbo Yidong Electronic Company Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the "GEM Listing Rules") for the purpose of giving information with regard to Ningbo Yidong Electronic Company Limited. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this report is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this document misleading; and (iii) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

For the three months ended 31 March 2011, the Group's turnover was approximately RMB1,173,000, representing an increase of 25.7% as compared to the corresponding period in previous year (2010: RMB933,000), whilst there was loss attributable to shareholders of approximately RMB6,486,000, representing a decrease of 26.9% as compared to the same corresponding period (2010: RMB8,868,000).

Business Review

The sale of mobile phones was low due to high competition. Tight cashflow had limited the resources invested in operation and the management was identifying profitable opportunities before feeding fund for worthy expansion.

For the three months ended 31 March 2011, the Group recorded an unaudited gross profit of approximately RMB58,000, as compared to the unaudited gross loss of approximately RMB932,000 for the corresponding period in 2010. The increase in the gross profit margin was mainly due to improvement in cost control.

The overheads showed an overall decrease as compared to the corresponding period in 2010. Selling expenses increased to approximately RMB162,000 from RMB122,000 in the corresponding period last year, administrative expenses decreased by approximately RMB2,064,000 to RMB7,823,000 from RMB9,887,000 in the corresponding period last year (as stated in note 5), and finance costs decreased to approximately RMB686,000 from RMB1,956,000 in the corresponding period last year.

Prospect

The Group will diversify its production to reduce risks in individual segments. e.g. mobile phone, maintain and continue profitable operation as far as possible, and identify strategic partners. The strategies place investor return maximisation in the first place and keep risk-free progressing at all times. We expect a good year to come despite a loss is reported for the first quarter.
