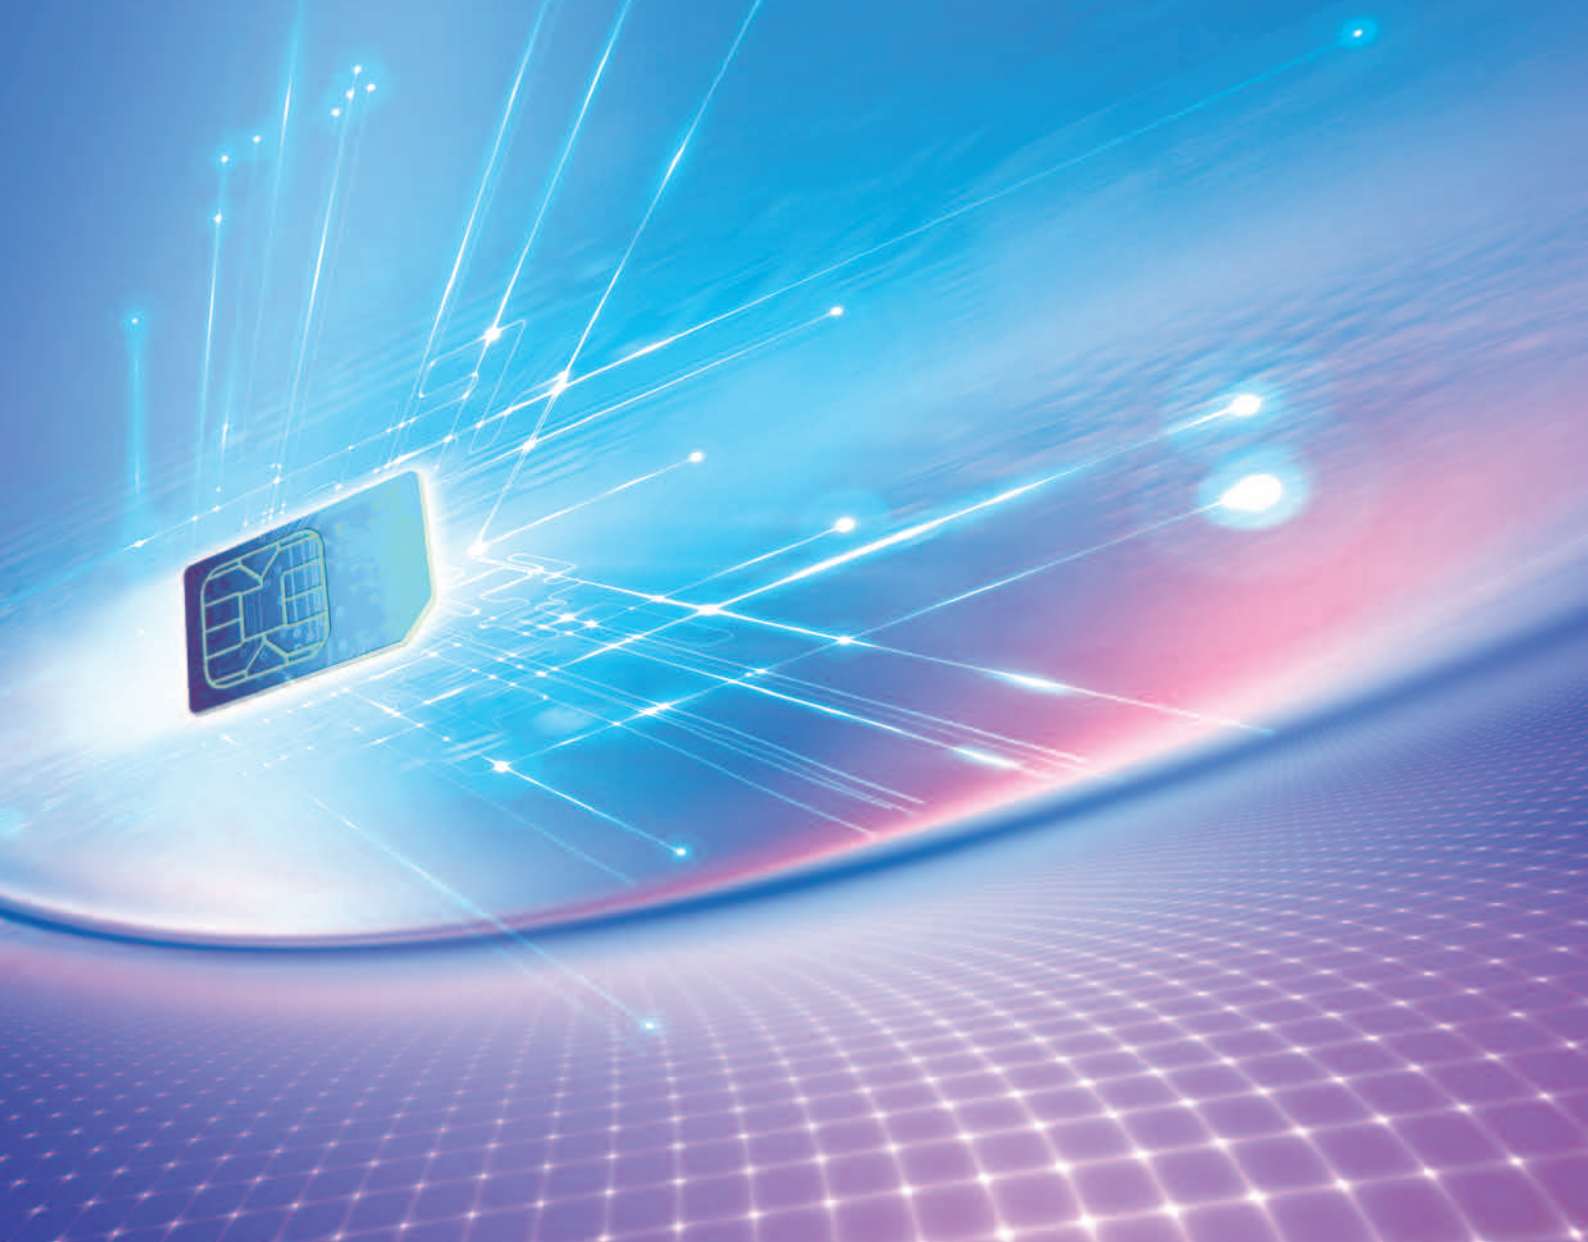
Annual Report 2011



CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

CHAIRMAN'S STATEMENT

To all shareholders,

On behalf of the Board of Directors (the "Board") of Directel Holdings Limited (the "Company"), I am pleased to present the annual results of the Company and its subsidiaries (collectively referred to as the "Group") for the year ended 31 December 2011 to all the shareholders.

RESULTS OF THE YEAR

For the year ended 31 December 2011, the Group recorded revenue of approximately HK$72,270,000, representing an increase of 5.1% as compared with last year. Profit for the year attributable to equity shareholders of the Company in 2011 amounted to approximately HK$23,018,000, representing a 10.6% increase from the year of 2010. Basic and diluted earnings per ordinary share fell 4.3% to HK2.2 cents for 2011 as compared with HK2.3 cents for 2010.

The Board of Directors do not recommend the payment of a final dividend for the year ended 31 December 2011 (2010: HK0.5 cents per share).

REVIEW FOR THE YEAR

Along with the bounce-back of Hong Kong's economy and strong growth in China's mainland, the Group's performance was fairly strong for the year of 2011 compared to 2010. The monthly average number of activated phone numbers increased by approximately 19.8% to 222,796 in the year of 2011 when compared to 2010. The volume of the Group's airtime sold increased from approximately 184.6 million minutes for the year of 2010 to approximately 206.5 million minutes for the year of 2011.

FUTURE PROSPECTS

In view of new challenges and fierce competitions, the Group will continuously to expand the geographical coverage of mobile phone services through development and expansion in Asia Pacific. Also the Group will provide a wider variety of value-added services for its users to increase the revenue through upgrading the Group's telecommunications equipment to be compatible with the 3G mobile networks of operators in Hong Kong and the PRC enabling the Group's users to enjoy 3G mobile data services which is expected to be launched in the first quarter of 2012, and introducing RF-SIM in Hong Kong and Macau to broaden the customer base of the Group. I believe these plans, especially the introduction of RF-SIM, will enhance the Group's overall competitiveness, differentiate the Group from other competitors and assist the Group in capturing a larger share of the market.

I would like to take this opportunity to thank the shareholders, customers and business partners for their trust in, understanding of and support to the Group over the years. Moreover, I would also like to thank all staff for their tremendous effort and contribution. With a focused senior management and professional team, I believe the Group will succeed in achieving our business goals and create significant value for our shareholders in the forthcoming years.

On behalf of the Board

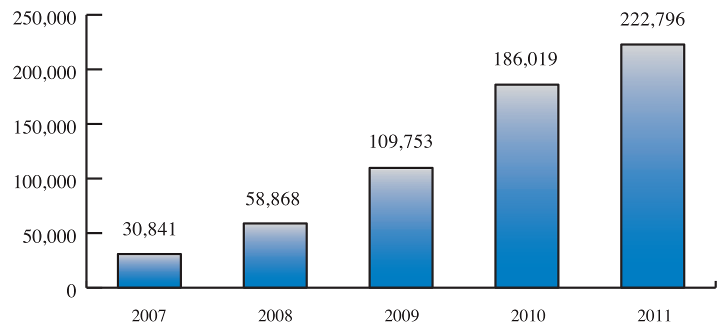
Li Kin Shing
Chairman

Hong Kong, 23 March 2012

BUSINESS REVIEW

The Group is a mobile virtual network operator ("MVNO") which is principally engaged in the provision of mobile phone services. The Group does not have its own telecommunications network infrastructure and its business mainly involves the trading of the airtime sourced from two mobile network operators ("MNOs") in Hong Kong and one MNO in the People's Republic of China ("the PRC"), and subsequently sold the airtime through different channels and in various forms to users, dealers or MNOs. The Group's mobile phone services include "One Card Multiple Number" service and Hong Kong local mobile phone services. The Group also provides services of resale of airtime to MNOs, telesales dealership services and other services.

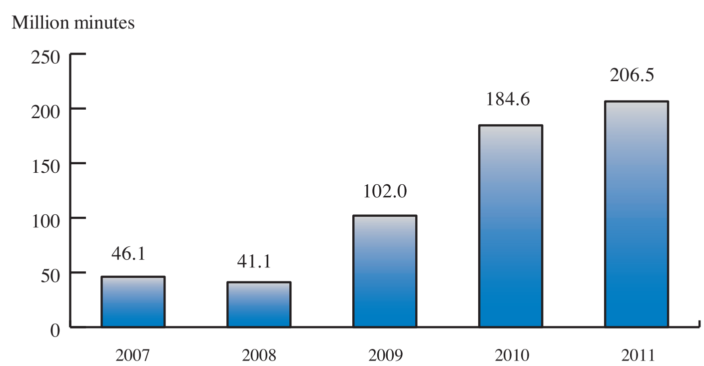
The Group's performance kept improving for the year ended 31 December 2011 compared to 2010. Total number of activated phone numbers increased by approximately 3.8% to 240,041 as of 31 December 2011 compared to 231,166 as of 31 December 2010. The monthly average number of activated phone numbers increased by approximately 19.8% to 222,796 in the year of 2011 when compared to 2010.



Monthly average number of activated phone numbers

Owing to the fierce competition in the mobile services industry in Hong Kong and the greater popularity of mobile phone usage, the competitiveness of the Group's business has been adversely affected and the average revenue per user ("ARPU") of the Group showed a decreasing trend. The ARPU of the Group was approximately HK$25.4 for the year ended 31 December 2011, lower than approximately HK$27.5 for the last year.

The volume of the Group's airtime sold increased from approximately 184.6 million minutes for the year of 2010 to approximately 206.5 million minutes for the year of 2011; and the revenue derived from "One Card Multiple Number" service, Hong Kong local mobile phone services and resale of airtime to MNOs increased from approximately HK$64.9 million to approximately HK$70.4 million during the same period. The Group's revenue per minute of airtime sold decreased from approximately HK$0.35 for the year of 2010 to approximately HK$0.34 for the year of 2011. Such decrease was mainly attributable to the relatively lower ARPU of most newly activated mobile phone numbers which belong to Hong Kong local mobile phone services plans.

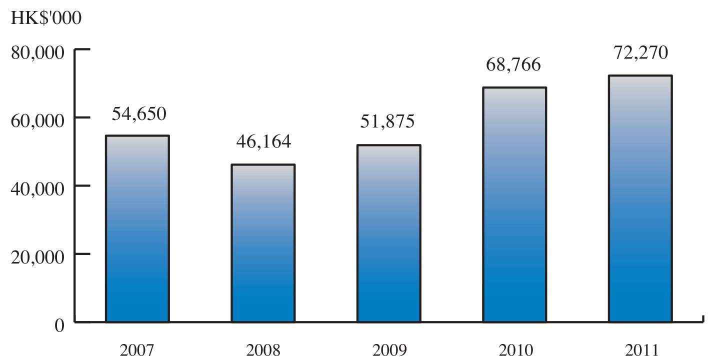


Volume of airtime sold

FINANCIAL REVIEW

Revenue

For the year ended 31 December 2011, the turnover of the Group increased to approximately HK$72,270,000 compared to approximately HK$68,766,000 for the last year, represented an increase of approximately 5.1%. The increase in turnover was mainly attributable to the increase in the monthly average number of activated phone numbers which overweighed the effect of the decrease in the Group's ARPU.



Revenue

Cost of Sales

The Group's cost of sales increased by approximately 2.6% to approximately HK$28,415,000 for the year ended 31 December 2011 compared to approximately HK$27,683,000 for the last year, in which the cost of sales in respect of the provision of mobile phone services and resale of airtime to MNOs increased by approximately 13.5% when compared to last year. Such increase was mainly due to the increase in airtime usage by users, increased unit charges for IDD services by telecommunications services providers and additional interconnection fees for cross-border networks charged by an affiliate of MNO. The cost of sales in respect of the provision of telesales dealership services decreased by approximately 56.3% when compared to last year, which was in line with the decrease in the revenue derived from the provision of telesales dealership services.

Gross Profit

The gross profit of the Group for the year ended 31 December 2011 increased to approximately HK$43,855,000 when compared to approximately HK$41,083,000 for the last year due to an improvement in gross profit margin to 60.7% for the year ended 31 December 2011 from 59.7% for the last year. The improvement in gross profit and gross profit margin was mainly attributable to the decrease of average unit cost of Hong Kong airtime resulting from mass purchase and then satisfying the minimum monthly airtime purchase amount adopted by two MNOs.

Administrative Expenses

The Group's administrative expenses for the year ended 31 December 2011 increased by approximately 3.9% to approximately HK$18,311,000 compared to approximately HK$17,617,000 for the last year. The increase was mainly attributable to the licence fee of approximately HK$2,809,000 incurred in the year of 2011 while such expenses was approximately HK$1,710,000 in the year of 2010.

Finance Income

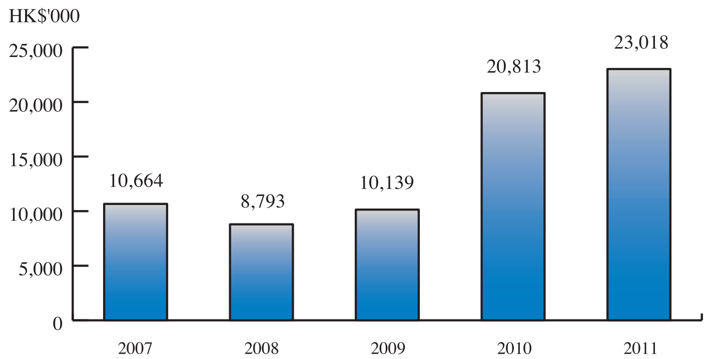
The Group's finance income for the year ended 31 December 2011 increased by approximately 64.0% to approximately HK$1,922,000 when compared to approximately HK$1,172,000 for the last year. The increase was mainly due to the increase of foreign exchange gain arising from the movements in the exchange rate between Hong Kong dollars and Renminbi during the year.

Income Tax

The Group's income tax expense for the year ended 31 December 2011 decreased by approximately 1.0% to approximately HK$4,477,000 when compared to approximately HK$4,523,000 for the last year. The decrease was mainly attributed to the listing fee incurred in the year of 2010 which was not tax deductible, while no such expense was incurred in the year of 2011.

Profit Attributable to Shareholders

The Group's profit attributable to equity shareholders of the Company for the year ended 31 December 2011 increased by approximately 10.6% to approximately HK$23,018,000 compared to approximately HK$20,813,000 for the last year. The increase was mainly due to improvement of gross profit and no more one-off listing expenses incurred in the year of 2011, while there was an one-off listing expenses of approximately HK$2,780,000 in the year of 2010.



Profit attributable to shareholders

BUSINESS OUTLOOK

Following the recovery of the global economy since the fourth quarter of 2009, the Group is optimistic and sees enormous opportunities and challenges in the market. Going forward in the year of 2012, the Group will continue to seek opportunities in existing business to broaden the Group's customer base and expand the Group's operations by means of strengthening relationship with existing dealers, exploring new qualifying dealers and maintaining its low cost strategy for its marketing activities. Also, the Group will execute its business plan continuously to expand the geographical coverage of mobile phone services provided by the Group through development and expansion of such services in Asia Pacific and the Group will provide a wider variety of value-added services for its users to increase the revenue derived from users' airtime usage through (i) upgrading the Group's telecommunications equipment to be compatible with the 3G mobile networks operated by the Group's service operators in Hong Kong and the PRC as a MVNO enabling its users to enjoy 3G mobile data services, providing its users more value-added data communication services; and (ii) introducing RF-SIM in Hong Kong and Macau, to enhance the Group's overall competitiveness.

1. BACKGROUND OF THE COMPANY

Directel Holdings Limited ("the Company") was incorporated in the Cayman Islands on 28 July 2009 as an exempted company with limited liability under the Companies Law, Chapter 22 (Law 3 of 1961, as consolidated and revised) of the Cayman Islands. The Company has established a place of business in Hong Kong and was registered in Hong Kong under Part XI of the Companies Ordinance as a non-Hong Kong company on 25 September 2009. On 2 June 2010, the Company listed its shares with a par value of HK$0.01 each on the Growth Enterprise Market ("GEM") of The Stock Exchange of Hong Kong Limited ("the Stock Exchange") (the "Listing").

The Company and its subsidiaries (together referred to as "the Group") are principally engaged in provision of telecommunications services.

2 SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of compliance

These financial statements have been prepared in accordance with all applicable International Financial Reporting Standards ("IFRSs"), which collective term includes all applicable individual International Financial Reporting Standards, International Accounting Standards ("IAS") and Interpretations, issued by the International Accounting Standards Board ("IASB").

These financial statements also comply with the disclosure requirements of the Hong Kong Companies Ordinance and the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited. A summary of the significant accounting policies adopted by the Group is set out below.

The IASB has issued certain new and revised IFRSs that are first effective or available for early adoption for the current accounting period of the Group and the Company. Note 2(c) provides information on any changes in accounting policies resulting from initial application of these developments to the extent that they are relevant to the Group for the current and prior accounting periods reflected in these financial statements.

2 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

(b) Basis of preparation of financial statements

The consolidated financial statements for the year ended 31 December 2011 comprise the Company and its subsidiaries (together referred to as "the Group").

The measurement basis used in the preparation of the financial statements is the historical cost basis.

The preparation of financial statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRSs that have significant effect on the financial statements and major sources of estimation uncertainty are discussed in note 23.

(c) Changes in accounting policies

The IASB has issued a number of amendments to IFRSs and one new Interpretation that are first effective for the current accounting period of the Group and the Company. Of these, the following developments are relevant to the Group's financial statements:

- IAS 24 (revised 2009), Related party disclosures
- Improvements to IFRSs (2010)

The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period. The impacts of the relevant developments are discussed below:

- IAS 24 (revised 2009) revises the definition of a related party. As a result, the Group has re-assessed the identification of related parties and concluded that the revised definition does not have any material impact on the Group's related party disclosures in the current and previous period. IAS 24 (revised 2009) also introduces modified disclosure requirements for government-related entities. This does not impact the Group because the Group is not a government-related entity.
- Improvements to IFRSs (2010) omnibus standard introduces a number of amendments to the disclosure requirements in IFRS 7, Financial instruments: Disclosures. The disclosures about the Group's financial instruments in note 19 have been conformed to the amended disclosure requirements. These amendments do not have any material impact on the classification, recognition and measurements of the amounts recognised in the financial statements in the current and previous periods.

2 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

(d) Subsidiaries

Subsidiaries are entities controlled by the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable are taken into account.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date the control ceases. Merger accounting is adopted for common control combinations in which all of the combining entities or businesses are ultimately controlled by the same party or parties before and after the business combination, and that control is not transitory.

Intra-group balances and transactions and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

In the Company's balance sheet, investments in subsidiaries are stated at cost less impairment losses (note 2(g)(ii)).

(e) Property, plant and equipment

Property, plant and equipment are stated in the balance sheet at cost less accumulated depreciation and impairment losses (note 2(g)(ii)).

Cost includes expenditures that are directly attributable to the acquisition of an asset.

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal.

Depreciation is calculated to write off the cost of items of property, plant and equipment, less their estimated residual value, if any, using the straight line method over their estimated useful lives as follows:

• Furniture and fixtures	5 years
• Facilities equipment	5 - 8 years
• Office equipment	5 years

Both the useful life of an asset and its residual value, if any, are reviewed annually.

(f) Operating lease charges

Leases of assets under which the lessor has not transferred substantially all the risks and rewards of ownership are classified as operating leases.

Where the Group has the use of assets under operating leases, payments made under the leases are charged to profit or loss in equal instalments over the accounting periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the leased asset. Lease incentives received are recognised in profit or loss as an integral part of the aggregate net lease payments made.

2 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

(g) Impairment of assets

(i) Impairment of trade and other receivables

Trade and other receivables that are stated at amortised cost are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. Objective evidence of impairment includes observable data that comes to the attention of the Group about one or more of the following loss events:

- significant financial difficulty of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the debtor will enter bankruptcy or other financial reorganisation; and
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor.

If any such evidence exists, any impairment loss is determined and recognised as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of these assets), where the effect of discounting is material. This assessment is made collectively where financial assets carried at amortised cost share similar risk characteristics, such as similar past due status, and have not been individually assessed as impaired. Future cash flows for financial assets which are assessed for impairment collectively are based on historical loss experience for assets with credit risk characteristics similar to the collective group.

If in a subsequent period the amount of an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. A reversal of an impairment loss shall not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

Impairment losses are written off against the corresponding assets directly, except for impairment losses recognised in respect of trade debtors included within trade and other receivables, whose recovery is considered doubtful but not remote. In this case, the impairment losses for doubtful debts are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off against trade debtors directly and any amounts held in the allowance account relating to that debt are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

2 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

(g) Impairment of assets *(Continued)*

(ii) Impairment of other assets

Internal and external sources of information are reviewed at each balance sheet date to identify indications that the following assets may be impaired or an impairment loss previously recognised no longer exists or may have decreased:

— Property, plant and equipment; and

— Investments in subsidiaries.

If any such indication exists, the asset's recoverable amount is estimated.

— Calculation of recoverable amount

The recoverable amount of an asset is the greater of its fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

— Recognition of impairment losses

An impairment loss is recognised in profit or loss if the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amount of the other assets in the cash-generating unit (or group of units) on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs to sell, or value in use, if determinable.

— Reversals of impairment losses

An impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

2 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

(h) Inventories

Inventories are carried at the lower of cost and net realisable value.

Cost is calculated using the first-in, first-out formula and comprises all costs of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

(i) Trade and other receivables

Trade and other receivables are initially recognised at fair value and thereafter stated at amortised cost less allowance for impairment of doubtful debts (note 2(g)(i)), except where the receivables are interest-free loans made to related parties without any fixed repayment terms or the effect of discounting would be immaterial. In such cases, the receivables are stated at cost less allowance for impairment of doubtful debts.

(j) Trade and other payables

Trade and other payables are initially recognised at fair value and thereafter stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at cost.

(k) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions, and short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition.

(l) Employee benefits

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

2 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

(m) Income tax

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or directly in equity, respectively.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

Apart from certain limited exceptions, all deferred tax liabilities, and all deferred tax assets to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

The limited exceptions to recognition of deferred tax assets and liabilities are those temporary differences arising from the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the Group controls the timing of the reversal and it is probable that the differences will not reverse in the foreseeable future, or in the case of deductible differences, unless it is probable that they will reverse in the future.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. Deferred tax assets and liabilities are not discounted.

The carrying amount of a deferred tax asset is reviewed at each balance sheet date and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

2 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

(m) Income tax *(Continued)*

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities, if the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

— in the case of current tax assets and liabilities, the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or

— in the case of deferred tax assets and liabilities, if they relate to income taxes levied by the same taxation authority on either:

  — the same taxable entity; or

  — different taxable entities, which, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered, intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

(n) Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group has a legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

(o) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Provided it is probable that the economic benefits will flow to the Group and the revenue and costs, if applicable, can be measured reliably, revenue is recognised in profit or loss as follows:

(i) Revenue from the provision of telecommunications services is recognised when the services have been rendered.

(ii) Revenue from the provision of telesales dealership services is recognised when the ser vices have been rendered and the Group has obtained the rights to demand payment for the services rendered.

(iii) Interest income is recognised as it accrues using the effective interest method.

2 SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

(p) Translation of foreign currencies

Foreign currency transactions during the year are translated at the exchange rates ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated at the exchange rates ruling at the balance sheet date. Exchange gains and losses are recognised in profit or loss.

Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rates ruling at the transaction dates.

(q) Related parties

(i) A person, or a close member of that person's family, is related to the Group if that person:

(1) has control or joint control over the Group;

(2) has significant influence over the Group; or

(3) is a member of the key management personnel of the Group.

(ii) An entity is related to the Group if any of the following conditions applies:

(1) The entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

(2) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

(3) Both entities are joint ventures of the same third party.

(4) One entity is a joint venture of a third party and the other entity is an associate of the third party.

(5) The entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group.

(6) The entity is controlled or jointly-controlled by a person identified in (i).

(7) A person identified in (i)(1) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

(r) Segment reporting

IFRS 8 introduces a "management approach" to segment reporting, i.e. the identification of segments and the preparation of segment information must be based on the internal reports that the entity's chief operating decision maker reviews regularly in allocating resources to segments and in assessing their performance.

The financial information provided to the chief operating decision maker does not contain profit or loss information of each ser vice line and the chief operating decision maker reviews the operating results of the Group as a whole. Therefore, the operations of the Group constitute one single reportable segment.

3 TURNOVER

The principal activities of the Group are the provision of telecommunications services. Turnover represents the sales value of services rendered to customers. The amount of each significant category of revenue recognised in turnover during the year is as follows:

	2011 *HK$'000*	2010 *HK$'000*
Provision of telecommunications services	70,402	64,900

The MPF Scheme is a defined contribution retirement plan administered by an independent trustee. Under the MPF Scheme, the employer and its employees are each required to make contributions to the plan at 5% of the employees' relevant income, subject to a cap of monthly relevant income of HK$20,000. Contributions to the plan vest immediately.

Subject to negotiations, credit terms could be extended to two to four months for certain customers with well-established trading and payment records on a case-by-case basis. Provision of mobile phone services to the Group's pre-paid users are made in payment in advance, whereas post-paid users are made in an open account with credit terms up to 12 days after the date of invoice. Payments of provision of telesales dealership services are made in bullet payments within one to five months after the date of services rendered. The Group's credit policy is set out in note 19(a).

The amounts due from subsidiaries are unsecured, interest free and repayable on demand.

14 TRADE AND OTHER RECEIVABLES *(Continued)*

(a) Ageing analysis

Included in trade receivables are trade debtors (net of allowance for doubtful debts) with the following ageing analysis by billing date as of the balance sheet date:

	The Group	
	2011 *HK$'000*	2010 *HK$'000*
Within 1 month	7,416	6,070
Over 1 month but less than 3 months	10,036	7,089

Included in trade receivables are trade debtors with the following ageing analysis by due date as of the balance sheet date:

14 TRADE AND OTHER RECEIVABLES *(Continued)*

(b) Impairment of trade receivables

Impairment losses in respect of trade receivables are recorded using an allowance account unless the Group is satisfied that recovery of the amount is remote, in which case the impairment loss is written off against trade receivables directly (see note 2(g)(i)).

The movements in the allowance for doubtful debts during the current and prior years are as follows:

	The Group	
	2011	2010
	HK$'000	*HK$'000*
At 1 January	**123**	302
Impairment loss recognised	**11**	59
Uncollectible amounts written off	**(44)**	(238)
At 31 December	**90**	123

At 31 December 2011, the Group's trade debtors of approximately HK$90,000 (2010: approximately HK$123,000) were individually determined to be impaired. The individually impaired receivables related to invoices that were default in payment and management assessed that the receivables are not expected to be recovered. Consequently, specific allowances for doubtful debts of approximately HK$90,000 (2010: approximately HK$123,000) were recognised. The Group does not hold any collateral over these balances.

14 TRADE AND OTHER RECEIVABLES *(Continued)*

(c) Trade receivables that are not impaired

The ageing analysis of trade receivables that are neither individually nor collectively considered to be impaired are as follows:

	The Group	
	2011 *HK$'000*	2010 *HK$'000*
Neither past due nor impaired	7,416	6,070
Less than 1 month past due	7,018	6,679

More than 3 months but less than 12 months past due	9,136	8,653
More than 12 months past due	8,562	10,204
	34,466	30,108
	41,882	36,178

Trade receivables that were neither past due nor impaired relate to a wide range of customers for whom there was no recent history of default.

Trade receivables that were past due but not impaired relate to a number of independent customers that have a good track record with the Group. Based on past experience, management believes that no impairment allowance is necessary in respect of these balances as there has not been a significant change in credit quality and the balances are still considered fully recoverable. In particular, the trade receivables as at 31 December 2011 included amounts due from a mobile network operator in China amounting to HK$24,998,000, of which HK$8,718,000 and HK$8,494,000 fell into "More than 3 months but less than 12 months past due" and "More than 12 months past due" respectively. The directors consider (i) that mobile network operator is a reputable company in the PRC; (ii) the Group has established long-term business relationship with that mobile network operator; and (iii) that mobile network operator has maintained a good repayment track record with the Group, the directors are willing to extend credit terms to that mobile network operator generally. As a result, the directors consider other than the write off and impairment loss being made during the year, no impairment allowance is considered necessary in respect of trade receivables as at 31 December 2011.

The Group does not hold any collateral over these balances.

The application of the share premium account of the Company is governed by the Companies Law (Revised) of the Cayman Islands, under which the balance of share premium account of the Company can be distributed as dividends provided that immediately following the date on which dividend is proposed to be distributed, the Company would be in a position to pay off its debts as they fall due in the ordinary course of business.

18 CAPITAL AND RESERVES *(Continued)*

(d) Nature and purpose of reserves *(Continued)*

(ii) Other reserve

Pursuant to the group reorganisation to rationalise the Group's structure in the preparation of the Listing (the "Reorganisation"), the Company allotted and issued 100 shares of HK$0.01 each to New Everich Holdings Limited pursuant to a share swap agreement entered into among the Company, Mr. Li Kin Shing, Ms. Kwok King Wa and Elitel Limited on 7 September 2009. Since then, the Company became the holding company of the Group.

As the companies that took part in the Reorganisation were controlled by the same group of ultimate shareholders, Mr. Li Kin Shing and Ms. Kwok King Wa (referred to as the "Controlling Shareholders"), before and after the Reorganisation and, consequently, there was a continuation of the risks and benefits to the controlling shareholders and therefore the Reorganisation is considered as a business combination under common control and merger accounting has been applied in the accounting of the Reorganisation. The consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated cash flow statement of the Group include the results of operations of the Group as if the Reorganisation had been in existence and remained unchanged throughout the entire periods presented.

The difference between the nominal value of entire issued share capital of Elitel Limited of US$2 (equivalent to HK$16) and the nominal value of the 100 shares allotted and issued by the Company was treated as an equity movement and recorded in "Other reserve" amounting to HK$15.

(e) Distributability of reserves

At 31 December 2011, the aggregate amount of reserves available for distribution to the equity shareholders of the Company was approximately HK$53,803,000 (2010: HK$58,567,000).

19 FINANCIAL RISK MANAGEMENT AND FAIR VALUES

Exposure to credit, liquidity and currency risks arises in the normal course of the Group's business. The Group's financial assets include cash at bank and on hand, trade and other receivables. The Group's financial liabilities include trade and other payables.

The Group's exposure to these risks and the financial risk management policies and practices used by the Group to manage these risks are described below.

(a) Credit risk

The Group's credit risk is primarily attributable to trade and other receivables. Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis.

Credit evaluations are performed on all customers requiring credit over a certain amount. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer. Normally, the Group does not obtain collateral from customers.

At 31 December 2011, the Group had a concentration of credit risk of 98% (2010: 91%) of the total trade receivables respectively was due from the Group's five largest individual debtors, and 60% (2010: 69%) of the total trade receivables respectively was due from the Group's largest debtor.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the consolidated balance sheet. The Group does not provide any guarantees which would expose the Group to credit risk.

Further quantitative disclosures in respect of the Group's exposure to credit risk arising from trade and other receivables are set out in note 14.

(b) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's policy to managing liquidity risk is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

All financial liabilities as disclosed in the balance sheets are required to be settled within one year or on demand and the total contractual undiscounted cash flow of these financial liabilities equal their carrying amounts in the balance sheets.

19 FINANCIAL RISK MANAGEMENT AND FAIR VALUES *(Continued)*

(c) Currency risk

The Group is exposed to currency risk primarily through sales and purchases which give rise to receivables, payables and cash balances that are denominated in a foreign currency, i.e. a currency other than the functional currency of the operations to which the transactions relate. The currencies giving rise to this risk are primarily Renminbi ("RMB") and United States dollars ("US$"). The Group currently does not have hedging policy in respect of the foreign currency risk. However, management monitors the related foreign currency risk exposure closely and will consider hedging significant foreign currency risk exposure should the need arise.

The following table details the Group's exposure at the balance sheet date to currency risk arising from recognised assets or liabilities denominated in a currency other than the functional currency of the entity to which they relate. For presentation purposes, the amounts of the exposure are shown in Hong Kong dollars ("HK$"), translated using the spot rate at the year end date.

The Group — **Exposures to foreign currencies** *(expressed in HK$'000)*

	2011		2010	
	US$	*RMB*	*US$*	*RMB*

Sensitivity analysis

The following table indicates the instantaneous change in the Group's profit after tax (and retained profits) and other components of consolidated equity that would arise if foreign exchange rates to which the Group has significant exposure at the end of the reporting period had changed at that date, assuming all other risk variables remained constant. In this respect, it is assumed that the pegged rate between the Hong Kong dollar and the United States dollar would be materially unaffected by any changes in movement in value of the United States dollar against other currencies.

	2011		2010	
	Increase/ (decrease) in foreign exchange rates	Effect on profit after tax *HK$'000*	Increase/ (decrease) in foreign exchange rates	Effect on profit after tax *HK$'000*
RMB	5%	1,407	5%	1,195
	(5)%	(1,407)	(5)%	(1,195)

The sensitivity analysis assumes that the changes in foreign exchange rates had been applied to re-measure those financial instruments held by the Group which expose the Group to foreign currency risk at the balance sheet date.

(d) Capital management

The Group's primary objectives when managing capital are to safeguard the Group's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, by pricing products and services commensurate with the level of risk.

The Group actively and regularly reviews and manages its capital structure, monitors the return on capital, and makes adjustments to the capital structure in light of changes in economic conditions.

There were no changes in the Group's approach to capital management during the current and prior years. Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements.

(e) Fair values

The fair values of the Group's financial instruments are not materially different from their carrying amounts. Fair value estimates are made at a specific point in time and are based on relevant market information and information about the financial assets and liabilities. These estimates are subjective in nature, involve uncertainties and matters of significant judgement and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

22 CONTINGENT LIABILITIES

Elitel Limited, a wholly owned subsidiary of the Company, failed to register as a non-Hong Kong company within the prescribed time limit under Part XI of the Hong Kong Companies Ordinance, which shall be within one month of the establishment of the place of business in Hong Kong in November 2002.

As at the date of this report, the Companies Registry may take action against Elitel Limited in relation to its possible breaches of the Hong Kong Companies Ordinance in respect of its failure to register promptly under Part XI of the Hong Kong Companies Ordinance and Elitel Limited may be subject to certain penalty in this respect.

The Group did not recognise any provision in respect of the abovementioned issue as the amount of the obligation cannot be measured with sufficient reliability.

During the current and prior years, no claims had been made against the Group by the Companies Registry in respect of Elitel Limited's failure to register as a non-Hong Kong company under Part XI of the Hong Kong Companies Ordinance.

23 SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The selection of critical accounting policies, the judgements and other uncertainties affecting application of those policies and the sensitivity of reported results to changes in conditions and assumptions are factors to be considered when reviewing the financial statements. The following principal accounting policies involve the most significant judgements and estimates used in the preparation of the financial statements.

(a) Depreciation

Property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives. The Group reviews annually the useful life of an asset. The depreciation expense for future periods is adjusted if there are significant changes from previous estimation.

(b) Impairments

In considering the impairment loss that may be required for certain property, plant and equipment of the Group, recoverable amount of these assets needs to be determined. The recoverable amount is the greater of the fair value less costs to sell and the value in use. It is difficult to precisely estimate selling price because quoted market prices for these assets may not be readily available. In determining the value in use, expected cash flows generated by the asset are discounted to their present value, which requires significant judgement relating to items such as level of turnover and amount of operating costs. The Group uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions and projections of items such as turnover and operating costs.

Impairment loss for bad and doubtful debts is assessed and provided based on the directors' regular review of ageing analysis and evaluation of collectability. A considerable level of judgement is exercised by the directors when assessing the credit worthiness and past collection history of each individual customer.

An increase or decrease in the above impairment loss would affect the net profit in future years.

(c) Recognition of deferred tax assets

Deferred tax assets are recognised in respect of unused tax losses and deductible temporary differences and can only be recognised to the extent that it is probable that future taxable profits will be available against which the unused tax losses and deductible temporary differences can be utilised. Management's judgement is required to assess the probability of future taxable profits. Management's assessment is constantly reviewed and additional deferred tax assets are recognised if it becomes probable that future taxable profits will allow the deferred tax assets to be recovered.

24 IMMEDIATE AND ULTIMATE CONTROLLING PARTIES

At 31 December 2011, the directors consider the immediate parent and ultimate controlling parties of the Group to be New Everich Holdings Limited and the Controlling Shareholders as mentioned in note 21(a)(i) respectively.

25 POSSIBLE IMPACT OF AMENDMENTS, NEW STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE FOR THE YEAR ENDED 31 DECEMBER 2011

Up to the date of issue of these financial statements, the IASB has issued a number of amendments and five new standards which are not yet effective for the year ended 31 December 2011 and which have not been adopted in these financial statements. These include the following which may be relevant to the Group.

	Effective for accounting periods beginning on or after

– Transfers of financial assets	1 July 2011
Amendments to IAS 12, Income taxes	
– Deferred tax: Recovery of underlying assets	1 January 2012

IFRS 10, Consolidated financial statements	1 January 2013
