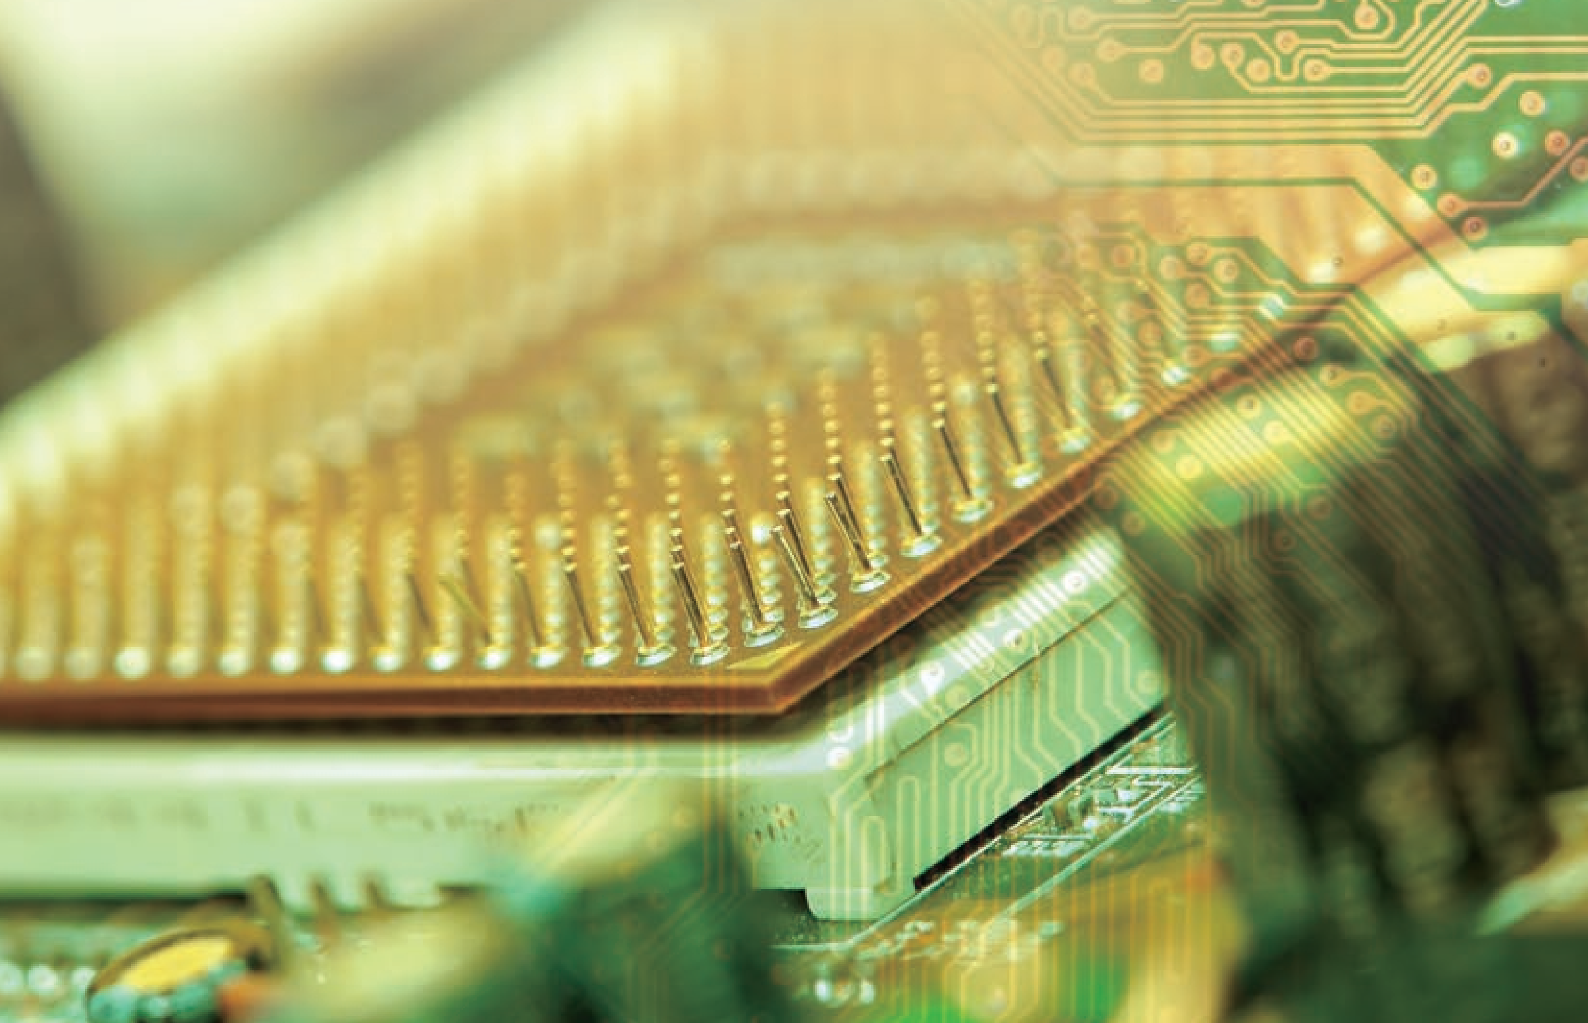
ANNUAL REPORT 2011



Characteristics of the Growth Enterprise Market ("GEM") of the Stock Exchange of Hong Kong Limited (the "Stock Exchange")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and The Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the "Directors") of AKM Industrial Company Limited (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief, the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

CHAIRMAN'S STATEMENT

For and on behalf of the board of Directors (the "Board"), I would like to present the annual report of the Company and its subsidiaries (collectively the "Group") for the year ended 31 December 2011.

RESULT ANALYSIS AND BUSINESS REVIEW

2011 was a year in which we underwent consolidation, development and internationalization. During the year, investment made in Nansha new factory by the Group has begun to produce profit, resulting in an increase in sales volume of approximately 35% as compared with the corresponding period of last year. In accordance with market changes and customer's demand, the Group integrated the business of surface mount for flexible printed circuits ("FPC") of the joint venture company, Shenzhen Smart Electronics Co. Ltd. (深圳思碼特電子有限公司), into the Nansha new factory. Upon the completion of construction and relocation of the new factory in Suzhou, sales volume increased by approximately 19% as compared with the corresponding period of last year. The operation of the Group constantly improved during the year and our core competitiveness has been remarkably enhanced. In addition, our efforts in identifying and developing large international clients had received satisfactory results. The management of the Group believed that, with the stable growth of FPC business and enhanced cooperative relationship with international major clients, the Group will be in a secure position to create satisfactory returns for the shareholders.

The turnover of the Group for the year of 2011 amounted to approximately HK$415.37 million, representing an increase of approximately 20% as compared to that of 2010, while the profit attributable to the owners of the Company amounted to approximately HK$4.57 million, representing an increase of approximately 110% as compared to that of 2010, substantially achieving the expected operation targets.

In 2012, the Group will focus on the following aspects, i.e. identifying and developing large international clients, securing more sales orders, elevating the production capacity of the Suzhou new factory, enhancing the stability of production technology for high-end FPC and optimizing the corporate value chain. Internal management will be strengthened and our profitability will be continually uplifted.

The Group is dedicated to strengthen its core competence and achieve the Company's profit goal, thereby creating greater value for its shareholders, staffs as well as the community. It is the Group's mission to become a major international supplier of FPC and electronic modules and to become an industry leader in the PRC market. Besides, the Group will further explore the electronic modules business and enhance the capability to meet the customers' demands for one stop services with an aim to provide better services to the fast growing electronic market.

CHAIRMAN'S STATEMENT

APPRECIATION

On 13 June 2011, Mr. Lam Sau Yan resigned as the secretary of the Company and on the same day, Ms. Hung Ching Yuen was appointed as the secretary of the Company. On 17 October 2011, Mr. Wu Tak Lung resigned as independent non-executive director and on the same day, Mr. Hung Chi Yuen Andrew was appointed as independent non-executive director. For and on behalf of the Board, I would like to take this opportunity to thank Mr. Lam and Mr. Wu for their valuable contributions to the Company and warmly welcome Ms. Hung and Mr. Hung in joining our company.

In addition, for and on behalf of the Board, I would like to take this opportunity to thank the management and all staff members of the Group for their dedication and invaluable contributions to the Group in the past year. I would also like to thank our clients, suppliers, business partners and shareholders for their continuous support to the Group. The Group will do its best to achieve good results and secure ideal returns for our shareholders.

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW

For the year ended 31 December 2011, the turnover of the Group from continuing and discontinued operations amounted to approximately HK$415.37 million, representing an increase of approximately 20.07% as compared to that of last year. The increase in turnover was mainly attributed to the increase in the sales of FPC and sourcing and sale of electronic components. The gross profit margin for the year increased to approximately 13.17% (year of 2010: 10.90%) due to the increase in gross profit margin for the sales of FPC.

The profit attributable to the owners of the Company from continuing and discontinued operations for 2011 was approximately HK$4.57 million, while the profit was approximately HK$2.17 million for 2010, representing an increase of approximately 110.49%. The increase in profit in last year was attributed to the increase of sales of FPC and a significantly higher production yield ratio.

The other income of the Group from continuing operations for the year ended 31 December 2011 amounted to approximately HK$4.93 million, representing a decrease of approximately HK$1.54 million as compared to that of last year. The decrease in other income was due to a smaller amount of government grants for research and development projects received from the relevant PRC government authority as compared to last year.

The distribution costs of the Group from continuing operations for the year ended 31 December 2011 amounted to approximately HK$8.92 million, representing an increase of approximately 41.27% as compared to that of last year. The increase in distribution costs was mainly due to the increase in write-off of bad debts of HK$3.86 million and the increase in transportation and miscellaneous costs and expenses and postage expenses in line with the expansion of the scale of operation of the principal activities.

The administrative expenses of the Group from continuing operations for the year ended 31 December 2011 amounted to approximately HK$23.71 million, representing an increase of approximately 31.01% as compared to that of last year. The increase in administrative expenses was mainly due to the increase in salary and related expenses, the appreciation of RMB and the increase in foreign exchange losses.

The research and development expenses of the Group from continuing operations for the year ended 31 December 2011 amounted to approximately HK$11.06 million, representing an increase of approximately 13.58% as compared to that of last year. The increase in research and development expenses was due to the increase in research and development projects and activities.

The finance cost of the Group from continuing operations for the year ended 31 December 2011 amounted to approximately HK$5.84 million, representing an increase of approximately 49.29% as compared to that of last year. The increase in finance costs was due to the increase in interest rates of bank borrowings.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW AND OUTLOOK

Business Review

The Group is principally engaged in the manufacture and sale of FPC, which are used in communication, LCD and consumer electronic products such as mobile phones, LCD module, car electronics and cameras. The Group is also engaged in sourcing and sale of electronic components and the encapsulation of Chip On Film (COF) modules.

For the year ended 31 December 2011, the total turnover of the Group from continuing and discontinued operations amounted to approximately HK$415.37 million, representing an increase of approximately 20% as compared to that of 2010. During the year under review, the turnover for sales of FPC, sourcing of electronic components, sales of electronic modules for liquid crystal display module ("LCM") and the encapsulation of COF modules were approximately HK$291.23 million, HK$119.77 million, HK$2.91 million and HK$1.46 million respectively. The turnover for sales of FPC, sourcing of electronic components and sales of electronic modules for LCM during the year ended 31 December 2010 were approximately HK$212.76 million, HK$98.86 million and HK$34.32 million respectively. Due to the worsening market condition and unfavourable prospects for the business of the sale of electronic modules for LCM, the Group discontinued such business in the first quarter of the year. The business of encapsulation of COF module was a new operation for the Group in 2011, and therefore no sales was recorded for the same period of last year. In 2011, the profit attributable to the owners of the Company from continuing and discontinued operations amounted to approximately HK$4.57 million, representing an increase of approximately 110% as compared to that of 2010. The increase in profit was mainly due to the economy of scale brought by the increase in turnover and the benefit of an improved production yield ratio.

During the year under review, the turnover of FPC increased by approximately 36.88% as compared to last year. The gross profit margin of FPC was increased to approximately 17.00% (2010: approximately 14.70%). The turnover for sourcing of electronic components increased by approximately 21.15% as compared to last year, while the gross profit margin decreased to approximately 6.11% (2010: approximately 10.07%). The business of encapsulation of COF modules commenced from the second quarter of 2011 was in the market development stage, and it is expected that the turnover and profitability would improve over time.

During the year under review, the sales of FPC, which is the core business of the Group, achieved a better progress and the equipment acquired in the second half of the year has been making its contribution, resulting in a surge in the sales volume of FPC. Our Group's FPC production was mainly completed in the Nansha Factory and Suzhou Factory. During the year under review, the Group integrated the SMT business of Shenzhen Smart Electronics Co. Ltd., a joint venture of the Group, into the Nansha new factory to cater the changes in the market and the needs of the customers. This production plant has become the Group's manufacturing base of high-end FPC in Southern China.

During the year under review, the Group's wholly-owned subsidiary, AKM Electronic Technology (Suzhou) Company Limited completed the construction and relocation of the new production plant. The FPC business originally operated by AKM (Suzhou) FPC Company Limited, a wholly-owned subsidiary of the Group was transferred to AKM Electronic Technology (Suzhou) Company Limited. The Group is in the process of merging these two companies. After the completion of construction and relocation of the new factory in Suzhou in second quarter of 2011, the sales volume increased by approximately 19% as compared with last year. This production plant has become the Group's manufacturing base of high-end FPC in Eastern China, and it is expected that the market development and production capacity would continue to improve.

MANAGEMENT DISCUSSION AND ANALYSIS

During the year under review, the sale and sourcing of electronic components of the Group achieved a steady growth and sales volume increased in approximately 21.15% as compared with last year. The Group would focus on the steady growth of this business, and would look for a stable sourcing channel with higher efficiency and lower price mainly through improving the business and optimizing the supply chain management of the Group.

During the year under review, the Group restructured the business of New Career Guangzhou Electronics Company Limited, a wholly-owned subsidiary, whereby the subsidiary's business direction was readjusted to the COF modules business.

During the year under review, the Group aimed to cope with the demands of its major international customers in accordance with its corporate development strategy. The Group focused its efforts on developing and securing international clients, improving its technology and production yield ratio, constructing and relocating the Suzhou New Factory as well as the steady growth of the electronic components business. The Group has conducted compliance and internal control effectively, and strengthened the control in receivables and inventories application, in order to minimize the risks in corporate operation. The Group's business has been constantly improving and demonstrating a promising development trend, which shall enhance our profitability.

Outlook

The Group is dedicated to strengthen its core competence and achieve the Company's profit goal, thereby creating greater value for its shareholders, staffs as well as the community. It is the Group's mission to become a major international supplier of FPC and electronic modules and to become an industry leader in the PRC market.

In light of changes in the market competition and the adjustment to the Group's corporate competing strategies, the Group has shifted its focus to serving large international clients with the provision of high density interconnect FPC and rigid-flex FPC products. At present, the Group has become a qualified supplier of a number of globally renowned electronic manufacturers, which demand more complicated techniques to produce their products. For the coming year, the Group will continue to focus on the following aspects, i.e. identifying and developing major international customers, securing more sales orders, elevating the production capacity of the Suzhou new factory, enhancing the stability of production technology for high-end FPC and optimizing the corporate value chain. Internal management will be strengthened and our profitability will be continually uplifted.

Following the commencement of production of the Group's Nansha and Suzhou new production plant, the Group has established two production bases, situated at Southern China and Eastern China respectively. As a result, the Group's production capacity improved significantly while the scale effect started to take shape, and the Group's concept of offering "one-stop service" to customers can be effectively implemented. The Group is confident that its scale of operation will be further expanded and the benefits of economy of scale will also be achieved.

The Board of Directors is of the opinion that, with the completion of production bases located at Southern China and Eastern China and the expansion in electronic modules business, the Group will be capable of providing services to large international clients and fulfill their personalized needs. Despite the intense competition in the industry which is also suffering from a decline and the continuous increase in labour costs, finance costs and other operating costs in the PRC, the Group is confident that it will be able to achieve scale operation, deliver satisfactory results and offer promising returns to its shareholders in the future to come, through effective market development, strengthening the close cooperative relationship with large international clients and uplifting our internal management standards and business synergies.

MANAGEMENT DISCUSSION AND ANALYSIS

LIQUIDITY AND FINANCIAL RESOURCES

The Group financed its operations primarily with internally generated fund from operating activities and banking facilities currently available. It is anticipated that the Group has sufficient working capital for its present funding requirements. As at 31 December 2011, the Group had outstanding bank borrowings amounting to HK$103,257,766, of which approximately HK$1,883,963 and HK$101,373,803 were trust receipts loans and bank borrowings respectively, and had bank overdrafts amounting to HK$4,066,603.

EMPLOYEES

As at 31 December 2011, the Group had a total of 1,442 full-time employees (2010: 1,111 employees) based in Hong Kong and the PRC. The total staff costs of the Group, including the Directors' remunerations, for the year ended 31 December 2011 amounted to HK$53,692,515 (2010: HK$43,567,271). The Group fixes and reviews the emoluments of its directors and staff based on the qualification, experience, performance and the market rates so as to maintain the remunerations of its directors and staff at a competitive level. The Group participates in various defined contribution retirement plans and insurance schemes in compliance with its statutory obligations under the laws and regulations of the PRC and Hong Kong. The Directors believe that employees are one of the most valuable assets of the Group which significantly contributed to the success of the Group. Apart from the basic remuneration and staff benefits, the Company also provides employees with share option schemes so as to reward their contributions to the Group and to enable the Group to recruit and retain high-calibre employees. The Group recognises the importance of staff training and, hence, regular training is provided to the Group's staff to enhance their technical and product knowledge. Majority of the Group's employees are stationed in the PRC.

CAPITAL STRUCTURE

Since 18 August 2004, the shares of the Company have been listed on GEM and there has been no change in the capital structure of the Company. The capital of the Company comprises only ordinary shares.

SIGNIFICANT INVESTMENTS

There were no significant investments held by the Group as at 31 December 2011.

MATERIAL ACQUISITIONS AND DISPOSALS

The Group did not have any material acquisitions or disposals during the year ended 31 December 2011.

MANAGEMENT DISCUSSION AND ANALYSIS

FUTURE PLANS RELATING TO MATERIAL INVESTMENT OR CAPITAL ASSETS

In April 2008, AKM Electronic Technology (Suzhou) Co., Ltd. (安捷利電子科技（蘇州）有限公司) ("AKM ET"), a wholly-owned subsidiary of the Company, entered into an agreement to acquire the land use rights of a piece of land with gross area of approximately 58,786 sq.m. situated at East of Liangang Road, Suzhou City, the PRC (the "Suzhou Land") at a consideration of RMB28,217,660. The Suzhou Land and an adjacent parcel of land ("Adjacent Land") of gross area of approximately 29,611 sq.m. purchased in June 2007 which are both situated at the Suzhou Gaoxin District will be used by the Group for the purpose of the expansion of the business for FPC production. Relevant disclosure in relation to acquisition of land use rights of the Suzhou Land and the Adjacent Land had been made in the announcement of the Company dated 24 April 2008. The construction of a new production plant had completed on the Suzhou Land and the Adjacent Land and the relocation of the production plant of AKM ET had completed and put into production, with a steady expansion in the scale of operation. The capital commitment in relation to the new production plant was funded by the development support fund ("Development Support Fund"). Relevant disclosure in relation to the grant and receipt of Development Support Fund had been made in the announcement of the Company dated 25 September 2008. It is expected that the Group will continue to increase capital expenditure on the Suzhou new factory in order to elevate its production capacity.

Save as disclosed above, the Group had no other future plans for material investments or capital assets as at 31 December 2011.

MANAGEMENT DISCUSSION AND ANALYSIS

EXPOSURE TO FLUCTUATIONS IN EXCHANGE RATES

The income and expenditure of the Group are mainly received and incurred in US$ and RMB and the assets and liabilities of the Group are denominated in HK$ and RMB. The Group is therefore exposed to foreign exchange risk arising from currency exposures, primarily with respect to US$ and RMB. The results of operations and the financial position of the Group may be affected by any changes in the exchanges rates and the Group has not taken any hedging measures in this connection. Further, the conversion of RMB denominated balances into foreign currencies is subject to the rules and regulations of foreign exchange control promulgated by the government of the PRC. However, taking into account the Group's current operational and capital requirements, the Directors do not consider the Group is significantly exposed to any foreign currency exchange risk.

CAPITAL COMMITMENTS

Details of the Company's capital commitments are set out in note 37 to the consolidated financial statements.

TO THE MEMBERS OF AKM INDUSTRIAL COMPANY LIMITED
安捷利實業有限公司
(incorporated in Hong Kong with limited liability)

We have audited the consolidated financial statements of AKM Industrial Company Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") set out on pages 31 to 99, which comprise the consolidated and company's statement of financial position as at 31 December 2011, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

DIRECTORS' RESPONSIBILITY FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these consolidated financial statements based on our audit and to report our opinion solely to you, as a body, in accordance with section 141 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

OPINION

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31 December 2011 and of the Group's profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the Hong Kong Companies Ordinance.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

1. GENERAL

The Company is a public limited company incorporated in Hong Kong with limited liability on 9 December 1993. Its parent is Alpha Luck Industrial Limited ("Alpha Luck") (incorporated in Hong Kong with limited liability) and its ultimate holding company is China North Industries Corporation ("CNIC"), a state-owned enterprise established in the People's Republic of China (the "PRC").

The shares of the Company were listed on the Growth Enterprise Market ("GEM") of The Stock Exchange of Hong Kong Limited (the "Stock Exchange") with effect from 18 August 2004 ("Listing Date"). The registered office of the Company is situated at Rooms 2708-11, 27th Floor, West Tower, Shun Tak Centre, 168-200 Connaught Road Central, Hong Kong, and the principal place of business of the Company is situated at 63 Huan Shi Road South, Information Technology Park, Nansha District, Guangzhou City, the PRC.

The consolidated financial statements are presented in Hong Kong dollars while the functional currency of the Company is Renminbi ("RMB"). The reason for selecting Hong Kong dollars as its presentation currency is because the Company is a public limited company in Hong Kong.

The Company is an investment holding company and is engaged in sourcing of raw materials and equipment for its subsidiaries and trading of flexible printed circuit ("FPC"). Its subsidiaries are principally engaged in manufacture and sale of FPC, sourcing and sale of electronic components and encapsulation of Chip On Film modules ("COF"). The business of LCM has been discontinued during the first quarter of 2011 (see note 35). Certain comparative numbers for prior year have been restated for the presentation of such business as discontinued operation.

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs")

In the current year, the Group has applied the following new and revised HKFRSs issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA").

Amendments to HKFRSs	Improvements to HKFRSs issued in 2010
HKAS 24 (as revised in 2009)	Related party disclosures
Amendments to HKAS 32	Classification of rights issues
Amendments to HK(IFRIC) – INT 14	Prepayments of a minimum funding requirement
HK(IFRIC) – INT 19	Extinguishing financial liabilities with equity instruments

The application of the new and revised HKFRSs in the current year has had no material impact on the Group's financial performance and positions for the current and prior years and/or on the disclosures set out in these consolidated financial statements.

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") *(Continued)*

The Group has not early applied the following new and revised HKFRSs that have been issued but are not yet effective:

Amendments to HKFRS 1	Severe hyperinflation and removal of fixed dates for first-time adopters[1]
Amendments to HKFRS 7	Disclosures – Transfers of financial assets[1]
	Disclosures – Offsetting financial assets and financial liabilities[2]
HKFRS 9 and HKFRS 7 (Amendments)	Mandatory effective date of HKFRS 9 and transition disclosures[3]
HKFRS 9	Financial instruments[3]
HKFRS 10	Consolidated financial statements[2]
HKFRS 11	Joint arrangements[2]
HKFRS 12	Disclosure of interests in other entities[2]
HKFRS 13	Fair value measurement[2]
Amendments to HKAS 1	Presentation of items of other comprehensive income[5]
Amendments to HKAS 12	Deferred tax – Recovery of underlying assets[4]
HKAS 19 (as revised in 2011)	Employee benefits[2]

Amendments to HKAS 32	Offsetting financial assets and financial liabilities[6]
HK(IFRIC) – INT 20	Stripping costs in the production phase of a surface mine[2]

1 Effective for annual periods beginning on or after 1 July 2011.
2 Effective for annual periods beginning on or after 1 January 2013.
3 Effective for annual periods beginning on or after 1 January 2015.
4 Effective for annual periods beginning on or after 1 January 2012.
5 Effective for annual periods beginning on or after 1 July 2012.
6 Effective for annual periods beginning on or after 1 January 2014.

HKFRS 9 Financial instruments

HKFRS 9 issued in 2009 introduces new requirements for the classification and measurement of financial assets. HKFRS 9 amended in 2010 includes the requirements for the classification and measurement of financial liabilities and for derecognition.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

2. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") *(Continued)*

HKFRS 9 Financial instruments *(Continued)*

Key requirements of HKFRS 9 are described as follows:

HKFRS 9 requires all recognised financial assets that are within the scope of HKAS 39 *Financial Instruments: Recognition and Measurement* to be subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. All other debt investments and equity investments are measured at their fair values at the end of subsequent reporting periods. In addition, under HKFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognised in profit or loss.

The most significant effect of HKFRS 9 regarding the classification and measurement of financial liabilities relates to the presentation of changes in the fair value of a financial liability (designated as at fair value through profit or loss) attributable to changes in the credit risk of that liability. Specifically, under HKFRS 9, for financial liabilities that are designated as at fair value through profit or loss, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Previously, under HKAS 39, the entire amount of the change in the fair value of the financial liability designated as at fair value through profit or loss was presented in profit or loss.

HKFRS 9 is effective for annual periods beginning on or after 1 January 2013, with earlier application permitted.

Based on the consolidated statement of financial position of the Group as at 31 December 2011, the directors anticipate that the application of HKFRS 9 is not expected to have a significant impact on the amounts reported in respect of the Group's financial assets and financial liabilities.

The director of the Group anticipate that the application of the other new and revised HKFRSs will have no material impact on the consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

3. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with HKFRSs issued by the HKICPA. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on GEM of the Stock Exchange and by the Hong Kong Companies Ordinance.

The consolidated financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods.

The consolidated financial statements have been prepared on the historical cost basis.

The principal accounting policies are set out below.

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with those used by other members of the Group.

All intra-group transactions, balances, income and expenses are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Group's equity therein.

Allocation of total comprehensive income to non-controlling interests

Total comprehensive income and expense of a subsidiary is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance (effective from 1 January 2010 onwards).

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Joint ventures

Jointly controlled entities

Joint venture arrangements that involve the establishment of a separate entity in which venturers have joint control over the economic activity of the entity are referred to as jointly controlled entities.

The results and assets and liabilities of jointly controlled entities are incorporated in the consolidated financial statements using the equity method of accounting. Under the equity method, investments in jointly controlled entities are initially recognised in the consolidated statement of financial position at cost as adjusted thereafter to recognise the Group's share of profit or loss and other comprehensive income of the jointly controlled entities. When the Group's share of losses of a jointly controlled entity equals or exceeds its interest in that jointly controlled entity (which includes any long-term interests that, in substance, form part of the Group's net investment in the jointly controlled entity), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of that jointly controlled entity.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of a jointly controlled entity recognised at the date of acquisition is recognised as goodwill, which is included within the carrying amount of the investment.

Any excess of the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognised immediately in profit or loss.

The requirements of HKAS 39 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in a jointly controlled entity. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with HKAS 36 "Impairment of assets" as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with HKAS 36 to the extent that the recoverable amount of the investment subsequently increases.

Upon disposal of a jointly controlled entity that results in the Group losing joint control over that jointly controlled entity, any retained investment is measured at fair value at that date and the fair value is regarded as its fair value on initial recognition as a financial asset in accordance with HKAS 39. The difference between the previous carrying amount of the jointly controlled entity attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the jointly controlled entity. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that jointly controlled entity on the same basis as would be required if that jointly controlled entity had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that jointly controlled entity would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when it loses joint control over that jointly controlled entity.

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Joint ventures *(Continued)*

Jointly controlled entities (Continued)

When a group entity transacts with its jointly controlled entity, profits and losses resulting from the transactions with the jointly controlled entity are recognised in the Group's consolidated financial statements only to the extent of interests in the jointly controlled entity that are not related to the Group.

Investments in subsidiaries

Investments in subsidiaries are included in the Company's statement of financial position at cost less any identified impairment loss. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods sold in the normal course of business, net of discounts and sales related taxes.

Revenue from the sale of goods is recognised when all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Property, plant and equipment

Property, plant and equipment including building held for use in the production or supply of goods or services, or for administrative purposes (other than properties under construction as described below) are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and accumulated impairment losses, if any.

Depreciation is recognised so as to write off the cost of items of property, plant and equipment other than construction in progress less their residual values over their estimated useful lives, using the straight line method. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include professional fees and, for qualifying assets or buildings borrowing costs capitalised in accordance with the Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Buildings under development for future owner-occupied purpose

When buildings are in the course of development for production or for administrative purposes, the amortisation of prepaid lease payments provided during the construction period is included as part of costs of buildings under construction. Buildings under construction are carried at cost, less any identified impairment losses. Depreciation of buildings commences when they are available for use (i.e. when they are in the location and condition necessary for them to be capable of operating in the manner intended by management).

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Leasing

Leases are classified as finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised in profit or loss on a straight-line basis over the term of the relevant lease.

The Group as lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis.

Leasehold land and building

When a lease includes both land and building elements, the Group assesses the classification of each element as a finance or an operating lease separately based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Group, unless it is clear that both elements are operating leases in which case the entire lease is classified as an operating lease. Specifically, the minimum lease payments (including any lump-sum upfront payments) are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land element and building element of the lease at the inception of the lease.

To the extent the allocation of the lease payments can be made reliably, interest in leasehold land that is accounted for as an operating lease is presented as "prepaid lease payments" in the consolidated statement of financial position and is amortised over the lease term on a straight-line basis. When the lease payments cannot be allocated reliably between the land and building elements, the entire lease is generally classified as a finance lease and accounted for as property, plant and equipment.

Government grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in the respective functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchange prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss in the period in which they arise.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. Hong Kong dollars) at the rate of exchange prevailing at the end of the reporting period, and their income and expenses are translated at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case, the exchange rates prevailing at the dates of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of translation reserve (attributed to non-controlling interests as appropriate).

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those asset until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Financial instruments

Financial assets and financial liabilities are recognised in the consolidated statement of financial position when a group entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Financial instruments *(Continued)*

Financial assets

The Group's and the Company's financial assets are classified as loans and receivables. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Subsequent to initial recognition, loans and receivables including trade and other receivables, bills receivables, amounts due from subsidiaries, pledged bank deposits and bank balances and cash are carried at amortised cost using the effective interest method, less any identified impairment losses (see accounting policy in respect of impairment of financial assets below).

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Interest income is recognised on an effective interest basis.

Impairment of financial assets

Loans and receivables are assessed for indicators of impairment at the end of the reporting period. Loans and receivables are considered to be impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been affected.

Objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Financial instruments *(Continued)*

Impairment of financial assets *(Continued)*

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the credit period of 30 to 120 days, observable changes in national or local economic conditions that correlate with default on receivables.

An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired, and is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to profit or loss.

If, in a subsequent period, the amount of impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment losses was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Financial liabilities and equity instruments

Financial liabilities and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements entered into and the definitions of a financial liability and equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the group after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Financial instruments *(Continued)*

Financial Liabilities and equity instruments *(Continued)*

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Interest expense is recognised on an effective interest basis.

Financial liabilities

Financial liabilities including trade and other payables, bills payables, amounts due to subsidiaries, amount due to an intermediate holding company, amount due to a fellow subsidiary, loans from an intermediate holding company, amount due to a jointly controlled entity, loan from a non-controlling shareholder of a subsidiary, loan from ultimate holding company, bank borrowings and bank overdrafts are subsequently measured at amortised cost, using the effective interest method.

Derecognition

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group continues to recognise the asset to the extent of its continuing involvement and recognises an associated liability. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Financial instruments *(Continued)*

Derecognition *(Continued)*

On derecognition of a financial asset other than in its entirety, the Group allocates the previous carrying amount of the financial asset between the part it continues to recognise, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

The Group derecognises a financial liability when, and only when, the Group's obligations are discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Impairment loss on tangible assets

At the end of the reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified. Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that they may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is charged to profit or loss in the period in which it is incurred. Subsequent to initial recognition, internally-generated intangible asset is measured at cost less accumulated amortisation and accumulated impairment losses (if any), on the same basis as intangible assets acquired separately.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the weighted average method. Net realisable value is determined as the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated statement of comprehensive income because it excludes items of income and expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's and the Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax base used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary difference to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary differences arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax is recognised in profit or loss, except when it relates to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax is also recognised in other comprehensive income or directly in equity respectively.

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

Share-based payment transactions

Equity-settled share-based payment transactions

Share options granted to directors and employees of the Company

The fair value of services received determined by reference to the fair value of share options granted at the grant date is expensed on a straight-line basis over the vesting period or recognised as an expense in full at the grant date when the share options granted vested immediately, with a corresponding increase in equity (share options reserve).

At the end of the reporting period, the Group revises its estimates of the number of options that are expected to ultimately vest. The impact of the revision of the original estimates during the vesting period, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to share options reserve.

When the share options are exercised, the amount previously recognised in share option reserve will be transferred to share premium. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share option reserve will be transferred to retained profits.

Retirement benefits contributions

Payments to defined contribution retirement benefits schemes and state-managed retirement benefit schemes are recognised as an expenses when employees have rendered service entitling them to the contributions.

4. KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies which are described in note 3, directors of the Company are required to make judgements, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are also discussed below.

Estimation of useful lives and residual values of property, plant and equipment

Management estimates the useful lives and residual values of property, plant and equipment. The estimated useful lives and residual values are based on the expected lifespan of those property, plant and equipment. The useful lives and residual values of property, plant and equipment could change significantly as a result of technical obsolescence. When the actual useful lives and residual values of property, plant and equipment are different from their estimated useful lives and residual values due to the change of commercial and technological environment, such differences will cause an impact on the depreciation charges and the amounts of assets written down for future periods.

The carrying amount of property, plant and equipment for the Group and the Company as at 31 December 2011 are HK$209,428,884 and HK$63,905 (2010: HK$190,535,065 and HK$98,355) respectively.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

4. KEY SOURCES OF ESTIMATION UNCERTAINTY *(Continued)*

Estimated impairment loss recognised in respect of property, plant and equipment

Determining whether property, plant and equipment is impaired requires an estimation of the value in use of the cash-generating units to which the property, plant and equipment has been allocated. The value in use calculation requires the Group to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate the present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

The carrying amount of property, plant and equipment at 31 December 2011 is HK$209,428,884 (2010: HK$190,535,065).

Allowance for doubtful debts

The management regularly reviews the recoverability and aging of the trade and bills receivables. Allowances are applied to trade and bills receivables where events or changes in circumstances indicated that the balances may not be collectible. The identification of bad and doubtful debts requires the use of judgement and estimates. Allowance for doubtful debts is made based on the estimation of the future cash flow discounted at the financial assets original effective interest rate to calculate the present value. Where the actual future cash flows and expectation is different from the original estimate, such difference will cause an impact on carrying amounts of trade and bills receivables and doubtful debts expenses in the year in which such estimate is changed.

The carrying amount of trade and bills receivables at 31 December 2011 for the Group and the Company are HK$131,269,343 (2010: HK$94,610,468), net of allowance for doubtful debts of HK$6,965,322 (2010: HK$4,602,333) and HK$46,648,040 (2010: HK$27,866,137), net of allowance for doubtful debts of HK$508,488 (2010: HK$508,488) respectively.

Allowance for obsolete inventories

The management of the Group reviews an aged analysis at the end of the reporting period, and makes allowance for obsolete and slow-moving inventory items identified that are no longer suitable for use in production. The management estimates the net realisable value for such finished goods and work in progress based primarily on the latest invoice prices and current market conditions. If the net realisable value of inventories is estimated to be less than its carrying amount, the carrying amount of the inventories is reduced to its net realisable value.

The carrying amount of inventories for the Group as at 31 December 2011 is HK$42,885,969 (2010: HK$26,024,069).

5. REVENUE AND SEGMENT INFORMATION

Revenue represents the net amounts received and receivable for the sales of FPC, electronic components for surface mount technology, encapsulation of COF modules and electronic modules for LCM to external customers, net of discounts and sales related taxes.

Segment information

Information reported to the Executive Directors of the Company, being the chief operating decision makers, for the purpose of resource allocation and assessment of segment performance focuses on type of goods delivered.

In 2011, the Group is organised into four operating divisions namely manufacture and sale of FPC, sourcing and sale of electronic components, manufacture and encapsulation of COF modules and manufacture and sale of electronic modules for LCM. The business of manufacture and sale of electronic modules for LCM has been discontinued during the first quarter of 2011. The Group commenced the business of encapsulation of COF modules from the second quarter of 2011 which is a new reportable segment in current year. These divisions are the basis on which the Group reports its segment information.

Principal activities are as follows:

FPC business	–	the manufacture and sale of FPC
Sourcing and sale of electronic components	–	the sourcing and sale of electronic components for surface mount technology and electronic modules
COF modules business	–	encapsulation of COF modules
LCM business	–	the manufacture and sale of electronic modules for LCM (discontinued during first quarter of 2011)

5. REVENUE AND SEGMENT INFORMATION *(Continued)*

Segment revenues and results *(Continued)*

The accounting policies of the reportable segments are the same as the Group's accounting policies described in note 3. Segment profit (loss) represents the profit (loss) earned by each segment without allocation of central administration costs, share of result of a jointly controlled entity, interest income and finance costs. This is the measure reported to the Executive Directors, the Group's chief operating decision makers, for the purposes of resource allocation and performance assessment.

Deferred tax:		
Current year (Note 28)	169,188	(348,426)
	(391,069)	(2,101,443)

Hong Kong Profits Tax is calculated at 16.5% of the estimated assessable profit for both years. The income of the PRC subsidiaries neither arises in, nor is derived from, Hong Kong.

The provision for PRC Enterprise Income Tax is based on the estimated taxable income for each PRC subsidiary and at its applicable tax rate. Under the Law of the People's Republic of China on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate of the PRC subsidiaries is 25% from 1 January 2008 onwards.

Pursuant to the relevant laws and regulation in the PRC, AKM (Suzhou) FPC Company Limited ("AKM (Suzhou)") is exempted from PRC income tax for two years commenced from 1 January 2008, followed by a 50% reduction for the next three years.

Pursuant to the relevant laws and regulations in the PRC, the applicable PRC Enterprise Income Tax rate for AKM Electronics Industrial (Panyu) Ltd. ("AKM Panyu") is 25%. On 16 December 2008, AKM Panyu was awarded the Foreign Invested Advanced-technology Enterprise Certificate. AKM Panyu was entitled for a tax reduction from 25% to 15% for three years commenced from 1 January 2008 and had expired on 31 December 2010. The tax rate for AKM Panyu from 1 January 2011 onwards of 25% (2010: 15%) is used.

(b) Resigned on 17 October 2011.

(c) The performance related incentive payments are determined with reference to the Group's operating results and individual performances.

For the year ended 31 December 2011, Mr. Xiong Zheng Feng and Ms. Li Ying Hong waived their nominal salary of HK$10 (2010: HK$10) and HK$10 (2010: HK$10) respectively. There are no other directors who had waived their remuneration during the years.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

10. DIRECTORS' REMUNERATION AND FIVE HIGHEST PAID INDIVIDUALS

(Continued)

(ii) Employees' remuneration:

Of the five individuals with the highest emoluments in the Group, one (2010: one) was director of the Company whose emoluments are included in the disclosures in Note 10(i) above. The emoluments of remaining four (2010: four) individuals were as follows:

	2011 **HK$**	2010 HK$
Salaries and other benefits	**1,245,846**	1,278,754
Performance related incentive payments	**725,032**	736,864
Retirement benefit scheme contributions costs	**101,500**	12,000
	2,072,378	2,027,618

Remuneration of each of the employees for both years falls within the band of less than HK$1,000,000.

During the year, no remuneration was paid by the Group to the directors or the five highest paid individuals as an inducement to join or upon joining the Group or as compensation for loss of office.

11. DIVIDEND

No dividend was paid or proposed during 2011, nor has any dividend been proposed since the end of the reporting period (2010: nil).

12. EARNINGS PER SHARE

For continuing and discontinued operations

The calculation of the basic and diluted earnings per share attributable to owners of the Company is based on the following data:

	2011 **HK$**	2010 HK$
Earnings		
Earnings for the purposes of basic and diluted earnings per share (profit for the year attributable to owners of the Company)	**4,569,347**	2,170,842

	2011	2010
Number of shares		
Number of ordinary shares for the purposes of basic and diluted earnings (loss) per share	**540,000,000**	540,000,000

The calculation of diluted earnings (loss) per share for both years does not assume the exercise of share options because their respective exercise prices were higher than the average market price of shares of the Company.

For continuing operations

The calculation of the basic and diluted earnings per share from continuing operations attributable to owners of the Company is based on the following data:

	2011	2010
	HK$	HK$
Earnings		
Profit for the year attributable to owners of the Company	**4,569,347**	2,170,842

The principal of loan is RMB4,000,000, (equivalent to HK$4,735,409) and it is repayable on five equal instalments of RMB800,000 (equivalent to HK$966,709) per annum with first instalment due in April 2010. The outstanding balance at 31 December 2011 is RMB2,400,000 (equivalent to HK$2,961,501).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

28. DEFERRED TAXATION

The following deferred tax liability mainly arises from withholding tax on the undistributed profits of the PRC subsidiaries and the PRC jointly controlled entity for the year ended 31 December 2011 and movement thereon during current and prior years:

	HK$
At 1 January 2010	294,788
Charged to profit or loss	348,426
Currency realignment	15,120
At 31 December 2010	658,334
Credited to profit or loss	(169,188)
Currency realignment	23,455
At 31 December 2011	512,601

At 31 December 2011, the Group has credited HK$224,847 (2010: HK$8,213) to profit or loss due to losses incurred for the year which have reduced the undistributed profits of the PRC jointly controlled entity respectively. In addition, the Group has recognised a deferred tax expense of HK$55,659 (2010: HK$356,639) which is arisen from the undistributed profits of PRC subsidiaries.

At 31 December 2011 and 2010, the deductibility of the allowance for doubtful debts, allowance for obsolete inventories and impairment loss in respect of property, plant and equipment for taxation purpose have not been agreed with local tax bureau in the PRC. Since it is not probable that the deductible temporary differences and unused tax losses can be utilised in the foreseeable future, deferred tax assets in respect of accumulated allowance for doubtful debts, accumulated allowance for obsolete inventories, impairment loss in respect of property, plant and equipment and unused tax losses of approximately HK$6,965,000 (2010: HK$4,602,000), HK$6,819,000 (2010: HK$9,681,000), HK$3,873,000 (2010: HK$3,873,000) and HK$39,449,134 (2010: HK$47,388,000) respectively have not been recognised in the consolidated financial statements.

30. SHARE OPTIONS

Pursuant to written resolutions of the then shareholders of the Company on 6 August 2004, the Company adopted both a Pre-IPO share option scheme (the "Pre-IPO Scheme") and a share option scheme (the "Scheme").

(a) Pre-IPO Scheme

The purpose of the Pre-IPO Scheme is to, amongst others, give the participants an opportunity to have a personal stake in the Company and help motivate the participants to optimise their performance and efficiency and retain the participants whose contributions are important to the long-term growth and profitability of the Group.

The HK$0.40 exercise price per share of the above share options granted under the Pre-IPO Scheme is the same as the initial public offering price of the Company's shares. No share options under the Pre-IPO Scheme were exercised since the date of grant and during the year ended 31 December 2011, there were 2,500,000 (2010: 500,000) share options lapsed during this year.

No further share options have been offered or granted under the Pre-IPO Scheme upon the commencement of listing of the Company's shares.

These grants under the Pre-IPO Scheme are exercisable, starting from the first anniversary of the Listing Date at stepped annual increments of 25% of the total options granted, for a period of not later than 10 years from the date of grant on the condition that the participants are still under employment of the Company.

The total number of shares in respect of which share options are issuable under the Pre-IPO Scheme shall not in aggregate exceed 5% of the number of issued shares.

As at 31 December 2011, the total number of shares in respect of which share options are issuable under this scheme is 8,400,000 (2010: 10,900,000) representing approximately 1.56% (2010: 2.02%) of the issued share capital of the Company.

Details of the movements in the number of share options during the year under the Pre-IPO Scheme are as follows:

Type of participants	Date of grant	Exercisable period	Exercise price per share	Outstanding at 1.1.2010	Lapsed during the year	Outstanding at 1.1.2011	Lapsed during the year	Outstanding at 31.12.2011
			HK$					
Directors	6 August 2004	18 August 2005 to 6 August 2014	0.40	5,400,000	–	5,400,000	–	5,400,000

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

30. SHARE OPTIONS *(Continued)*

(b) Scheme

The purpose of the Scheme is to provide incentives or rewards to Participants (as defined below) thereunder for their contribution to the Group and/or to enable the Group to recruit and retain high-calibre employees and attract human resources that are valuable to the Group and any entity in which the Company or any of its subsidiaries holds any equity interest (the "Invested Entity").

The directors may, at their discretion, invite any participant (the "Participant") being any executive director, non-executive director or employee (whether full time or part time), shareholder, supplier, customer, consultant, adviser, other service provider, any joint venture partner, business or strategic alliance partner, in each case, of the Company, any subsidiary of the Company or any Invested Entity or any discretionary trust whose discretionary objects may be any executive director, non-executive director or employee (whether full time or part time), shareholder, supplier, customer, consultant, adviser, other service provider, any joint venture partner, business or strategic alliance partner, in each case, of the Company, any subsidiary of the Company or any Invested Entity to take up options to subscribe for shares in the Company.

The Scheme commenced on 18 August 2004, being the date on which the Scheme becomes unconditional, and continues in force until the tenth anniversary of such date.

The total number of shares which may be issued upon exercise of all outstanding options granted and yet to be exercised under the Scheme and any other share option schemes of the Company must not in aggregate exceed 30% of the shares in issue from time to time (the "Scheme Limit").

In addition to the Scheme Limit, and subject to the following, the total number of shares which may be issued upon exercise of all options granted under the Scheme and any other share option schemes of the Company must not in aggregate exceed 10% of the Company's shares in issue as at the Listing Date (excluding any options which have lapsed) (the "Scheme Mandate Limit"). The initial number of shares issuable under the Scheme Mandate Limit will be 54,000,000 shares, representing 10% of the issued share capital of the Company.

Unless approved by shareholders, the total number of securities issued and to be issued upon exercise of the options granted to each Participant (including both exercised and outstanding options) in any 12-month period must not exceed 1% of the Company's shares in issue. Where any further grant of options to a Participant would result in the Company's shares issued and to be issued upon exercise of all options granted and to be granted to such person (including exercised, cancelled and outstanding options) in the 12-month period up to and including the date of such further grant representing in aggregate over 1% of the relevant class of securities in issue, such further grant must be separately approved by the Company's shareholders in general meeting with such Participant and his associates abstaining from voting.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2011

30. SHARE OPTIONS *(Continued)*

(b) Scheme *(Continued)*

The exercise price must be at least the highest of: (a) the nominal value of the Company's share on the date of grant; (b) the closing price of the Company's share as stated in the daily quotations sheet of the Stock Exchange on the date of grant, which must be a business day; and (c) the average closing price of a share as stated in the Stock Exchange's daily quotations sheets for the five business days immediately preceding the date of grant.

A nominal consideration of HK$10 is payable by the grantee upon acceptance of an option.

Share options are vested immediately on the date of grant.

An option may be exercised in accordance with the terms of the Scheme at any time during a period to be determined and notified by the Directors of the Company to each grantee of the option which period may commence on a day after the date upon which the option is granted but shall and in any event be not later than ten years from the date of grant. Unless otherwise determined by the Directors of the Company at their sole discretion, there is no requirement of a minimum period for which a share option must be held.

As at 31 December 2011, the total number of shares in respect of which share options are issuable under this scheme is 18,400,000 (2010: 20,900,000) representing approximately 3.41% (2010: 3.87%) of the issued share capital of the Company.

Details of the movements in the number of share options during the year under the Scheme are as follows:

Type of participants	Date of grant	Exercisable period	Exercise price per share HK$	Outstanding at 1.1.2010	Lapsed during the year	Outstanding at 1.1.2011	Lapsed during the year	Outstanding at 31.12.2011

32. FINANCIAL INSTRUMENTS *(Continued)*

Financial risk management objectives

The financial instruments are fundamental to the Group's and the Company's daily operations. The Group's major financial instruments include trade and other receivables, bills receivables, amount due to a jointly controlled entity, pledged bank deposits, bank balances and cash, trade and other payables, bills payables, amount due to a fellow subsidiary, amount due to an intermediate holding company, loans from an intermediate holding company, loan from a non-controlling shareholder of a subsidiary, loan from ultimate holding company, bank borrowings and bank overdrafts. The Company's major financial instruments include trade and other receivables, amount due from (to) subsidiaries, pledged bank deposits, bank balances, trade and other payables, loans from and amount due to an intermediate holding company, bank borrowings and bank overdrafts. Details of these financial instruments are disclosed on the respective notes. The risks associated with the financial instruments and the policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Market risk

Foreign currency risk management

Certain trade and other receivables, trade and other payables, loans from an intermediate holding company, borrowings, bank overdrafts and bank balances and cash of the Group and the Company are denominated in US$, other than the functional currency of the relevant group entities, which expose the Group and the Company to foreign currency risk. The Group and the Company have not used any financial instruments to hedge against currency risk. However, the management monitors foreign currency risk exposure and will consider hedging significant foreign currency exposure should the need arise.

The carrying amounts of the Group's and the Company's foreign currency denominated monetary assets and monetary liabilities at the reporting date are as follows:

	THE GROUP

Foreign currency sensitivity

The following table details the Group's and the Company's sensitivity to a 5% increase and decrease in RMB against US$. 5% represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the year end for a 5% change in foreign currency rates. The sensitivity analysis represents the trade and other receivables, trade and other payables, loans from an intermediate holding company, borrowings, bank overdrafts and bank balances and cash where the denomination are in US$, the major foreign currency risk. A positive number indicates an increase in post-tax profit for the year where RMB strengthens against US$. For a 5% weakening of RMB against US$, there would be an equal and opposite impact on the post-tax profit for the year, and the balances below would be negative.

	THE GROUP		**THE COMPANY**	
	2011	2010	**2011**	2010
	HK$	HK$	**HK$**	HK$
Increase/decrease in post-tax profit for the year	**2,948,833**	1,145,235	**1,602,254**	1,275,908

Interest rate risk management

The Group's and the Company's cash flow interest rate risk relates primarily to variable-rate bank balances and cash, bank borrowings and bank overdrafts. The Group and the Company currently do not have an interest rate hedging policy. However, the management monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arise. The management considers the cash flow interest rate risk is insignificant.

The Group and the Company are also exposed to fair value interest rate risk in relation to the fixed-rate bank borrowings and loans from an intermediate holding company. However, the management considers the fair value interest rate risk on the fixed-rate bank borrowings and loans from an intermediate holding company are insignificant as the bank borrowings are relatively short-term and the interest rate of loans from an intermediate holding company is low. The management monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arise.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2011

32. FINANCIAL INSTRUMENTS *(Continued)*

Financial risk management objectives *(Continued)*

Credit risk

The Group's and the Company's maximum exposure to credit risk in the event of the counterparties' failure to perform their obligations as at 31 December 2011 and 2010 in relation to each class of recognised financial assets is the carrying amount of those assets as stated in the consolidated statement of financial position and statement of financial position. In order to minimise the credit risk, the management has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group and the Company review regularly the recoverable amount of each individual trade receivable to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the management consider that the Group's and the Company's credit risk is significantly reduced.

The Group has concentrations of credit risk on trade receivables as 11% (2010: 26%) and 49% (2010: 45%) of the total trade receivables was due from the Group's largest customer and the five largest customers (including the largest customer) respectively within the "FPC business" and "sourcing and sale of electronic components" operating segment in the PRC. The management considers, based on the strong financial background and good credibility of those debtors, there are no significant credit risk.

The credit risk in relation to pledged bank deposits and bank balances and cash is limited because the majority of the counterparties are state-owned banks with good reputation in the PRC.

Liquidity risk

Liquidity risk reflects the risk that the Group and the Company will have insufficient resources to meet its financial liabilities as they fall due. The Group's and the Company's strategy to manage liquidity risk is to ensure that the Group and the Company have sufficient funds to meet all its potential liabilities as they fall due.

In the management of the liquidity risk, the Group and the Company monitor and maintain a level of cash and cash equivalents deemed adequate by the management to finance the Group's and the Company's operations and mitigate the effects of fluctuations in cash flows. The management also monitors the utilisation of borrowings and ensures compliance with loan covenants.

Liquidity forecasts are produced on a weekly basis, to ensure the utilisation of current facilities is optimised; on a monthly basis to ensure that covenant compliance targets and medium-term liquidity is maintained; and on a long-term projection basis, for the purpose of identifying long term strategic funding requirements. The directors also continually assess the balance of capital and debt funding of the Group and the Company.

The Group and the Company rely on borrowings as one of the source of liquidity. As at 31 December 2011, the Group and the Company had available unutilised short-term loan facilities of approximately HK$47 million (2010: HK$27 million) and HK$13.5 million (2010: HK$5.7 million) respectively.

Liquidity tables

The following table details the Group's and the Company's remaining contractual maturity for its non-derivative financial liabilities based on the agreed repayment terms. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group and the Company can be required to pay.

The table includes both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curve at the end of the reporting period.

32. FINANCIAL INSTRUMENTS *(Continued)*

Fair value of financial instruments

The fair value of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

The directors of the Company consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the consolidated financial statements approximate their fair values at the end of the reporting period.

No analysis of fair value measurements is presented as the Group and the Company do not have financial instruments that are measured subsequent to initial recognition at fair value in the consolidated financial statement.

Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial assets, financial liabilities and equity instrument are disclosed in note 3.

33. CAPITAL RISK MANAGEMENT

The Group and the Company manage their capital to ensure that entities in the Group and the Company will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance. The Group's and the Company's overall strategy remain unchanged from prior year.

The capital structure of the Group and the Company consist of bank borrowings disclosed in note 25, loans from an intermediate holding company disclosed in note 23, loan from a non-controlling shareholder of a subsidiary disclosed in note 26, loan from ultimate holding company disclosed in note 27, net of cash and cash equivalents and equity attributable to owners of the Company, comprising issued share capital, reserves and retained earnings.

The management of the Group and the Company review the capital structure on a continuous basis. The Group and the Company consider the cost of capital and the risks associated with each class of capital, and will balance its overall capital structure through the raise of bank borrowings and the redemption of existing debt.

Cost of inventories recognised as an expense (includes allowance for obsolete inventories of HK$204,928 (2010: nil))	**3,909,214**	35,773,419

During the year, the LCM business generated net cash inflows of HK$5,738,865 (2010: net cash outflows of HK$5,660,963) in respect of the Group's operating activities, net cash outflows of HK$nil (2010: HK$136,870) in respect of investing activities and net cash outflows of HK$3,464,641 (2010: net cash inflows of HK$6,107,098) in respect of financing activities.

No provision for taxation is made for the discontinued operation as the LCM business incurred tax losses in both years. At 31 December 2011 and 2010, deferred tax assets in respect of unused tax losses of approximately HK$8,187,000 (2010: HK$5,323,000) have not been recognised in the consolidated financial statements due to the unpredictability of future profit streams.

36. OPERATING LEASE COMMITMENTS

The Group as lessee

At the end of the reporting period, the Group and the Company had outstanding commitments for future minimum lease payments under non-cancellable operating leases in respect of land and buildings which fall due as follows:

	THE GROUP		THE COMPANY

38. RETIREMENT BENEFITS SCHEMES

The Group operates a Mandatory Provident Fund (the "MPF") for all qualifying employees in Hong Kong. The retirement benefits scheme contributions charged to consolidated statement of comprehensive income of HK$13,533 (2010: HK$19,232) represent contributions payable to the MPF scheme by the Group, which contribution is matched by employees.

The employees employed in the Group's PRC subsidiaries are members of the state-managed retirement benefits scheme operated by the PRC government. The Group is required to contribute a certain percentage of their payroll to the retirement benefits scheme to fund the benefits. The state-managed retirement benefits scheme contributions charged to the consolidated statement of comprehensive income amounted to HK$2,522,448 (2010: HK$1,600,620). The only obligation of the Group with respect to the retirement benefits scheme is to make the required contributions under the scheme.

No forfeited contributions are available to reduce the contribution payable in future years.

39. RELATED PARTY TRANSACTIONS

In addition to the balances set out in notes 15, 23, 24, 26 and 27, the Group and the Company entered into the following transactions with related parties during the year:

39. RELATED PARTY TRANSACTIONS *(Continued)*

THE GROUP *(Continued)*

(ii) Transactions/balances with other state-controlled entities in the PRC

The Group operates in an economic environment currently predominated by entities directly or indirectly owned or controlled by the PRC government ("state-controlled entities"). In addition, the Group itself is part of a larger group of companies under CNIC which is controlled by the PRC government.

The Group also conducts business with other state-controlled entities. The directors consider those state-controlled entities to be third parties so far as the Group's business with them are concerned.

In addition, the Group has entered into various transactions, including deposits placements, borrowings and other general banking facilities, with certain banks which are stated-controlled entities in its ordinary course of business.

The directors are of the opinion that the transactions with other state-controlled entities are not significant to the Group's operations.

(iii) Compensation of key management personnel

The remuneration of key management during the year represented remuneration paid to directors as disclosed in note 10 to the consolidated financial statements.

The remuneration of key management personnel is determined by the Remuneration Committee having regard to the performance of individuals and market trends.
