CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

The decrease in turnover was mainly due to the decline in our materials procurement business as compared to the corresponding period last year.

The decrease in the net profit attributable to the equity holders was mainly because no subsidy income was received at the end of the reporting period while the Group had received subsidy income of RMB8,073,000 granted by the Finance Bureau of Tianjin Economic and Technological Development Area in the first quarter last year.

During the period under review, the Company did not purchase any derivative instrument for investment or other purpose.

Business Review

The principal businesses of the Group are logistics and supply chain services for finished automobiles and components, logistics and supply chain services for electronic components, materials procurement and related logistics services, and other services such as bonded warehouse, supervision and agency services. During the reporting period, our logistics and supply chain services for finished automobiles and components, logistics and supply chain services for electronic components and other services such as bonded warehouse, supervision and agency services grew steadily, with the turnover and operating profits from these businesses increased by different levels as compared to the corresponding period last year. Being affected by the domestic macro economic environment and monetary policy and the Group's further enhancement of risk control, the materials procurement and related logistics services business declined, with its turnover and operating profits recorded moderate decreases as compared to the corresponding period last year.

As to the logistics infrastructure construction, the refrigeration storage project of Tedahang Cold Chain Logistics Co., Ltd. (泰達行(天津)冷鏈物流公司), a wholly-owned subsidiary of the Group, proceeded steadily as scheduled and is expected to be completed and start operation within the year.

In consolidating the traditional logistics businesses, the Group has actively expanded new areas of the logistics businesses, and acquired quality infrastructure logistics resources to achieve steady but yet rapid growth.

Prospects

The global environment was complicated and challenging in the first quarter of the year, while the domestic economic growth and growth of demand had slowed down. The overall performance of the domestic logistics industry remained stable, with the social logistics demand showing a modestly-slowdown-to-stabilizing trend. Being affected by various negative factors such as rising costs, slowdown of logistics demand, capital strains and lower price of logistics services, the profitability remained at a low level.

During the reporting period, the operating result of the Group recorded a decrease as compared to that of the corresponding period last year. The decrease was mainly due to the decline in our materials procurement and related logistics service businesses, which resulted in certain degree of decrease in its turnover and operating profits as compared to the corresponding period last year. Meanwhile, our logistics and supply chain services for finished automobiles and components, logistics and supply chain services for electronic components and other services such as bonded warehouse, supervision and agency services grew steadily, with the turnover and operating profits from these businesses increased by different levels as compared to the corresponding period last year.

The Company will actively develop operation concepts and keep on optimizing its business structure to enhance operation and management standard, taking proactive measures to cope with the fierce market competition and impacts of various negative factors both at home and abroad. Furthermore, the Company will speed up the construction of the Cold Chain Logistics Centre at Tianjin Port and vigorously exploit new businesses in the cold chain logistics and other logistics fields, with an aim to consolidate and foster our competitive position and advantage in the industry.
