CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and The Stock Exchange of Hong Kong Limited take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Thiz Technology Group Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited (the “GEM Listing Rules”) for the purpose of giving information with regard to Thiz Technology Group Limited. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: 1. the information contained in this report is accurate and complete in all material respects and not misleading; 2. there are no other matters the omission of which would make any statement in this report misleading; and 3. all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

BUSINESS REVIEW

Affected by the European Debt Crisis and the sluggish recovery of the U.S. economy, the economic growth of China and other emerging markets also showed signs of slowdown. The International Monetary Fund earlier made downward adjustment to the economic growth forecasts of China for this year and next year.

Given the gradual slowing down of the global economic growth, the Chinese government, in an effort to implement the strategy for sustainable economic development, is giving more support to the construction of infrastructure and concern on people's livelihood and welfare, reducing the excessive reliance on exports in the economy, uplifting per-capita purchasing power so as to stimulate the growth of domestic demand and consumption.

In the first half of the year, the Group encountered certain difficulties in advancing its businesses, some businesses developed earlier could not survive the general condition of the whole industry while the operating costs of certain businesses were elevated due to the launch of new regulations. These caused a decline in operating income as compared with the same period last year and hence more losses were incurred as compared with the same period of last year.

PROSPECTS

Though it may take years for the global economy to recover, the Group will continue to pay close attention to the market development trend, especially the Chinese market. We hope to seek business opportunities with diversified development philosophy, prudent management principles and innovative thinking. Meanwhile, for the existing operations, the Group will continue to optimize its flows, tighten cost control and adjust in a timely manner according to market changes in order to improve the acceptance and popularity of products, achieve a higher turnover rate and hence its operating income.
