

INTERIM REPORT

for the six months ended
30 September 2014

Characteristics of The Growth Enterprise Market (“GEM”) of The Stock Exchange of Hong Kong Limited (“Stock Exchange”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Notes to the Condensed Consolidated Financial Statements

For the three months and six months ended 30 September 2014

1. Basis of Preparation and Accounting Policies

The condensed consolidated financial statements have been prepared in accordance with the Hong Kong Accounting Standard 34 (HKAS 34) Interim Financial Reporting issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”) as well as with the applicable disclosure requirements of Chapter 18 of the Rules Governing the Listing of Securities on the Growth Enterprise Market of the Stock Exchange of Hong Kong Limited (the “GEM Listing Rules”).

The condensed consolidated financial statements have been prepared on the historical cost basis except for investment properties and certain financial instruments, which are measured at fair values, as appropriate.

The accounting policies and method of computation used in the preparation of these results are consistent with those used in annual financial statements for the year ended 31 March 2014. The Group has adopted new or revised standards, amendments to standards and interpretations of Hong Kong Financial Reporting Standards which are effective for accounting periods commencing on or after 1 April 2014. The adoption of such new or revised standards, amendments to standards and interpretations does not have material impact on the condensed consolidated financial statements and does not result in substantial changes to the Group’s accounting policies.

In addition, the preparation of interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In the preparation of these condensed consolidated interim financial statements, the significant judgements made by management in applying the Group’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the annual financial statements for the year ended 31 March 2014.

Promissory Note

On 11 May 2012, the Group issued Promissory Note in the principal amount of HK\$63 million to Starmax Holdings Limited as part of the consideration of acquisition of the Mining Business. After the repayment of HK\$3 million in August 2012, the outstanding aggregate principle amount of HK\$60 million is repayable in six equal instalments on each anniversary of the date of issue. The repayment of the first and the second instalments in the principal sum of HK\$20 million due on 11 May 2014 were extended to 11 May 2015 according to the mutual agreement between Starmax Holdings Limited and the Group on 9 May 2014. The interest shall continue to accrue on the overdue instalments at 7% per annum according to the terms of the Promissory Note until the abovementioned instalments are fully paid by the Group.

Outlook

The gold market price is in a decreasing trend. It decreased by 10.2% from the highest of US\$1,345.17 per ounce on 10 July 2014 to US\$1,208.15 on 30 September 2014. If the decreasing trend of gold market price continues, the profit of the Group from the gold mining will be adversely affected.

For the Nickel market, Nickel price picked a record high of USD51,800 per tonne in 2007. With the impact of Lehman incidence to financial market, Nickel corrected and hit a low of USD8,850 per tonne at the end of 2008. Since then, market corrected itself and visited USD29,425 per tonne in 2011, but was then faced with supply of Nickel laterite and Chinese Nickel Pig Iron production to bring Nickel down to USD13,205 per tonne in 2013. Started from January 2014, Indonesia banded Nickel ore exports and helped Nickel to gradually recover. Currently, Nickel is trading at above USD15,000 per tonne. The management is of the opinion that the impact of the Nickel ore export band has caused China to lose 300,000 tonnes of Nickel content in Nickel Pig Iron production capacity. This shortage will be reflected from 2015 onwards. Therefore, we are bullish on the Nickel price and also confident in the Company's potential earnings from Nickel mining operation.

The management will closely monitor the development plan of the Baishiquan Nickel-copper Mine, targeting to commence the commercial production and finalise the plan on acquisition or construction of the floatation plant in 2015. During the underground development, the Company discovered that certain ore body of Baishiquan Nickel-copper Mine runs a higher grade of metal contents than the previous estimates. Testing done on the ore extracted from Baishiquan Nickel-copper Mine during development further confirmed this estimation. Subsequent to the period under review, the Company has started to deliver and sell such higher grade ore to buyers, which will contribute to the revenue of the Group for the year. The management is optimistic that the sale of the nickel ores, being the main outputs of the Baishiquan Nickel-copper Mine, will become another major source of the income of the Mining Business after the commencement of the commercial production.

Facing the volatile market conditions, the management will timely adjust its operating strategies so as to minimise the adverse impact on the Group from the drop of the metal market price.
