

QUARTERLY REPORT

for the quarter ended
31 December 2014

Characteristics of The Growth Enterprise Market (“GEM”) of The Stock Exchange of Hong Kong Limited (“Stock Exchange”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Management Discussion and Analysis

About the Group

The Group is principally engaged in two business lines, namely (i) the provision of computer consultancy and software maintenance services, software development, sales of computer hardware and software and e-Commerce services (hereinafter collectively referred to as the “Computer Hardware and Software Business”); and (ii) the exploration and exploitation of mines (hereinafter collectively referred to as the “Mining Business”).

Business Review and Outlook

Computer Hardware and Software Business

The global economic outlook remains uncertain, signs of recovery flickered convulsively. U.S. ends its quantitative easing measures boosting a stronger dollar, whereas global currency markets take the blow and continue to suffer.

As for China Market where the Group roots, thanks to the support provided by the Central Government’s policy of long term healthy and sustainable growth, Chinese domestic economy continues on with moderate growth. Thus, for the current period under review, the Group continues on received support from strategic partners.

Hence, looking forward, the Group’s strategic framework shall continue on, enabling the Group to be ready to seize any opportunity and face current challenges.

The business diversification of strategic investment projects shall help the Group to reduce dependence on individual industries.

The Board maintains a cautiously optimistic outlook for the Group’s business and will implement its long-term strategy of prudent and positive, strive for investment opportunities in order to bring long-term value for shareholders.

Mining Business

Review

The Mining Business mainly includes the exploration, mining, processing and sale of gold dores and nickel ores in the PRC. For the nine months ended 31 December 2014, gold dores were the major product of the Mining Business.

For the nine months ended 31 December 2014, the Mining Business had gold dores sale of approximately 255.4 kg, representing an increase of 0.6% when compared to the correspondence period in 2013. The average gold market price decreased by 6.0% from US\$1,337 per ounce for the nine months ended 31 December 2013 to US\$1,257 per ounce for the nine months ended 31 December 2014. The turnover from gold dores sale for the nine months ended 31 December 2014 therefore has recorded a decrease of 2.8% as compared to the correspondence period in 2013. During the underground development of Baishiquan Nickel-copper Mine, certain high grade nickel ores were extracted, of which approximately 6,000 tonnes were sold at an average grade of above 3.5% after crashing and dry magnetic separation in December 2014.

The gold ores extracted and processed were approximately 36,810 tonnes and 54,739 tonnes respectively, representing an increase of 16.8% and a decrease of 5.1% respectively. The increase in gold ores extraction was due to the resumption of the mining activities after completion of the development work of Hongshannan Gold Mine in March 2014. The ores extraction of the Hongshannan Gold Mine has been gradually returned to normal since June 2014.

Management Discussion and Analysis (Continued)

Business Review and Outlook (Continued)

Mining Business (Continued)

Outlook

As at 31 December 2014, the gold market price was US\$1,184 per ounce which slightly decreased by 1.5% compared with the gold price of US\$1,202 as at 31 December 2013. If the decreasing trend of gold market price continues, the profit of the Group from the gold mining will be adversely affected. On the other hand, the nickel price has been gradually picking up the increasing trend and stayed above the level of US\$15,000 throughout the nine months ended 31 December 2014. If the increasing trend of nickel price continues, this can partially offset the adverse effect induced by the decreasing gold price.

The management will closely monitor the development plan of the Baishiquan Nickel-copper Mine, targeting to commence the commercial production and finalise the plan on acquisition or construction of the floatation plant in 2015. During the underground development, the Company observed that certain ore body of Baishiquan Nickel-copper Mine carries more ores with a higher grade of metal contents than the previous estimates. The grade of the ores extracted from Baishiquan Nickel-copper Mine during development fitted our observation. The management is optimistic that the sale of the nickel ores, being the main outputs of the Baishiquan Nickel-copper Mine, will become a major source of revenue of the Mining Business after the commencement of the commercial production. The Group will extend the exploration work for the Baishiquan Nickel-copper Mine in 2015 and intended to engage qualified person to prepare an update of the resources estimates thereafter.
