## Third Quarterly Report

## **CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)**

**GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.**

**Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the main board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.**

**The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.**

*Hong Kong Exchanges and Clearing Limited and the Stock Exchange takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.*

*This report, for which the directors (the “Directors”) of Shenzhen Mingwah Aohan High Technology Corporation Limited (the “Company”, together with its subsidiaries, the “Group”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors of the Company, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this report is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this report misleading; and (iii) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.*

## MANAGEMENT DISCUSSION AND ANALYSIS

### Business Review

The Group's revenue is derived from the businesses of design, development and manufacture of IC cards, magnetic cards, related equipment and application systems in the PRC and has shown a downtrend for years. 2014 was a very challenging year for the Group. The Group's principal business is facing gradually fierce competition and hence has smaller room for development. The Group has no competitive edges in such mature products and saturated market like the mainland China. Therefore, the gradual wilting of the Group's principal business becomes an inevitable tendency. As such, the Board will continue to put effort in developing new business of high end products.

### Financial Review

The Group's revenue for the nine months ended 30 September 2014 was approximately RMB17,223,000, representing a slight increase of approximately 0.3% as compared to the corresponding period last year (2013: RMB17,171,000).

For the nine months ended 30 September 2014, the Group's cost of sales decreased to approximately RMB14,074,000 (2013: RMB13,675,000). The gross profit for the nine months ended 30 September 2014 was approximately RMB3,149,000 (2013: RMB3,496,000). The gross profit margin decreased from approximately 20.4% to 18.3% as compared to the corresponding period in 2013. The underlying reason of such decrease was mainly attributable to due to increase in material costs.

When compared to the corresponding period last year, the distribution and selling expenses was decreased by 20.8% to approximately RMB1,471,000 (2013: approximately RMB1,858,000) mainly due to the tight cost control implemented. The general and administrative expenses were slight increased by 1.9% to approximately RMB5,539,000 (2013: RMB5,438,000).

The finance costs for the period increased to approximately RMB360,000, representing an increase of approximately 3172.7% from approximately RMB11,000 in the corresponding period in 2013. The reason for such increase was mainly due to the under-provision of interest charge on the loan from a former minority shareholder made in the nine months ended 30 September 2013.

For the nine months ended 30 September 2014, the Group's loss attributable to the owners of the Company was approximately RMB3,834,000 (2013: RMB2,372,000).

### Prospect

The Board is now putting extensive effort in developing new business which is expected to bring growth potential for turnover to the Group and returns to the shareholders.
