

# CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the "Directors") of China Demeter Investments Limited (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange Hong Kong Limited (the "GEM Listing Rules") for the purpose of giving information with regard to the Company.

The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

#### 21. FINANCIAL INSTRUMENTS

#### Fair value measurements

#### Fair value hierarchy

The following table presents the fair value of the Group's financial instruments measured at the end of the reporting period on a recurring basis, categorised into the three-level fair value hierarchy as defined in HKFRS 13, Fair value measurement. The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: Fair value measured using only Level 1 inputs i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date.
- Level 2 valuations: Fair value measured using Level 2 inputs i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available.
- Level 3 valuations: Fair value measured using significant unobservable inputs.

#### Financial assets measured at fair value

	30 June 2016 <i>HK\$'000</i> (Unaudited)	31 December 2015 <i>HK\$'000</i> (Audited)
Financial assets included in Level 1 Financial assets at fair value through profit or loss (Note 18)	186,383	90,428
Financial assets included in level 2 Available-for-sale investment (Note 16)	6,769	7,300
Financial assets included in level 3 Available-for-sale investment (Note 16)	1,073	1,073

During the period ended 30 June 2016, there were no transfers between Level 1, 2 and 3.

#### 21. FINANCIAL INSTRUMENTS (CONT'D)

Fair value measurements (Cont'd)

#### Fair value of financial assets carried at other than fair value

The directors consider that the carrying amounts of the Group's financial assets and liabilities carried at cost or amortised cost are not materially different from their fair values as at 30 June 2016 and 31 December 2015.

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the quoted market bid price. These instruments are included in level 1.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximise the use-of observable market data where it is available and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

During the reporting period, there was no change in the valuation techniques and there was no movement in the change of the Level 3 fair value. The assumptions of the unobservable inputs used in Level 3 fair value measurements at the end of the reporting period were not significantly different from those used in the 2015 consolidated financial statements. The Directors consider that the impact of changes in key unobservable inputs in Level 3 fair value measurements in the current period will have no significant difference as compared to those in the 2015 consolidated annual financial statements.
