Third Quarterly Report
2016

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Director(s)”) of Directel Holdings Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. Accordingly, they are subject to tax on an entity basis on income arising in or derived from Hong Kong. No Hong Kong Profits Tax has been provided as there was no assessable profit for the three months and nine months ended 30 September 2016 (three months and nine months ended 30 September 2015: Nil).

8. LOSS PER SHARE

(a) Basic loss per share

The calculation of basic loss per share for the three months and nine months ended 30 September 2016 is based on the unaudited loss attributable to ordinary equity shareholders of the Company of approximately HK\$7,130,000 and HK\$22,265,000 respectively (three months and nine months ended 30 September 2015: approximately HK\$10,272,000 and HK\$23,968,000 respectively) and the weighted average number of 3,112,500,000 ordinary shares in issue during the three months and nine months ended 30 September 2016 (three months and nine months ended 30 September 2015: 3,112,500,000 ordinary shares).

(b) Diluted loss per share

As the Company's outstanding unlisted warrants have anti-dilutive effects to the basic loss per share calculation for the current and prior periods, the conversion of the above potential dilutive shares is not assumed in the computation of diluted loss per share amounts. Therefore, the basic and diluted loss amounts per share calculations for the respective periods are equal.

	6,580	13,504

10. RECEIVABLES, DEPOSITS AND PREPAYMENTS *(Continued)*

(b) Impairment of trade receivables

Impairment losses in respect of trade receivables are recorded using an allowance account unless the Group is satisfied that recovery of the amount is remote, in which case the impairment loss is written off against trade receivables directly.

The movements in the allowance for doubtful debts during the end of the reporting period are as follows:

	As at 30 September 2016 HK\$'000 (Unaudited)	As at 31 December 2015 HK\$'000 (Audited)
At 1 January	25,934	14,360
Impairment loss recognised	6,100	11,591
Reversal of impairment loss	(138)	(17)
At end of the reporting period	31,896	25,934

At 30 September 2016, the Group's trade receivables of approximately HK\$31,896,000 (31 December 2015: approximately HK\$25,934,000) were individually determined to be impaired. The individually impaired receivables related to invoices that were default in payment and management assessed that the receivables are not expected to be recovered. Consequently, specific allowances for doubtful debts of approximately HK\$31,896,000 (31 December 2015: approximately HK\$25,934,000) were recognised. The Group does not hold any collateral over these balances.

In particular, the trade receivables (before provision) as at 30 September 2016 included amounts due from a mobile network operator in China ("that MNO") which is a subsidiary of a company listed on the Main Board of the Stock Exchange and the New York Stock Exchange and the outstanding amount was approximately HK\$37,762,000, of which HK\$3,813,000, HK\$2,053,000 and HK\$31,896,000 fell into "More than 3 months but less than 12 months past due", "More than 12 months but less than 18 months past due" and "More than 18 months past due", respectively. The credit terms of 30 days were granted by the Group to that MNO as it is in line with the credit policy of the Group whilst the delay in settlement by that MNO renders the actual credit period longer than the contractual credit period. Taking into account of the above and in accordance with the Group's provisioning for doubtful debts on trade receivables, the Group made a provision for impairment loss on trade receivables of approximately HK\$1,062,000 and HK\$6,099,000 respectively for the three months and nine months ended 30 September 2016 (Year ended 31 December 2015: approximately HK\$11,578,000).

10. RECEIVABLES, DEPOSITS AND PREPAYMENTS *(Continued)*

(c) Trade receivables that are not impaired

The ageing analysis of trade receivables by due date that are neither individually nor collectively considered to be impaired are as follows:

	As at 30 September 2016 HK\$'000 (Unaudited)	As at 31 December 2015 HK\$'000 (Audited)
Neither past due nor impaired	124	32
Less than 1 month past due	162	71
1 to 3 months past due	427	346
More than 3 months but less than 12 months past due	1	95
	590	512
	714	544

Trade receivables that were neither past due nor impaired relate to customers for whom there was no recent history of default. Trade receivables that were past due but not impaired relate to a number of independent customers that have a good repayment track record with the Group. Based on past experience, management believes that no impairment allowance is necessary in respect of these balances as there has not been a significant change in credit quality and the balances are still considered fully recoverable. The Group does not hold any collateral over these balances.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group is a mobile virtual network operator (“MVNO”) which is principally engaged in the provision of mobile phone services. The Group does not have its own telecommunications network infrastructure and its business mainly involves the trading of the airtime sourced from several mobile network operators (“MNOs”) in and outside Hong Kong and subsequently sold the airtime through different channels and in various forms to users, dealers or MNOs. The Group’s mobile phone services include “One Card Multiple Number” service and Hong Kong local mobile phone services. The Group also provides telesales dealership services and other services.

The performance of the Group worsened for the nine months ended 30 September 2016 compared to the corresponding period in 2015. The monthly average number of activated phone numbers decreased by approximately 42.6% to 57,266 in the nine months ended 30 September 2016 when compared to the corresponding period in 2015 and the total number of activated phone numbers decreased by approximately 18.6% to 56,842 as of 30 September 2016 compared to 69,858 as of 31 December 2015.

The Group continues to face difficulties in the highly competitive mobile services industry particularly in the data access services and mobile communications applications. The increased popularity of smart mobile devices also led to a rapid growth of alternative means of communications (e.g. social networking applications) which had reduced the usage for traditional voice and short message services. The competitiveness of the Group’s business has been adversely affected and the average revenue per user (“ARPU”) of the Group showed a decreasing trend and the ARPU of the Group was approximately HK\$10.2 for the nine months ended 30 September 2016, lower than approximately HK\$15.5 for the same period last year.

The volume of the Group’s airtime sold decreased from approximately 60.5 million minutes for the nine months ended 30 September 2015 to approximately 38.9 million minutes for the nine months ended 30 September 2016. The revenue derived from the provision of “One Card Multiple Number” service, Hong Kong local mobile phone services and resale of airtime to MNOs decreased from approximately HK\$10.3 million to approximately HK\$5.2 million during the same period. The Group’s revenue per minute of airtime sold decreased from approximately HK\$0.18 for the nine months ended 30 September 2015 to approximately HK\$0.14 for the nine months ended 30 September 2016.

FINANCIAL REVIEW

For the nine months ended 30 September 2016, the revenue of the Group decreased to approximately HK\$5,244,000 compared to approximately HK\$10,348,000 for the corresponding period last year, representing a decrease of approximately 49.3%. The decrease in revenue was mainly attributable to the decrease in the monthly average number of activated phone numbers and decrease of airtime usage by users.

The Group's cost of sales decreased by approximately 32.7% to approximately HK\$10,006,000 for the nine months ended 30 September 2016 compared to approximately HK\$14,875,000 for the corresponding period last year. The decrease was mainly attributable to the decrease of airtime usage by users.

The gross loss of the Group for the nine months ended 30 September 2016 increased by approximately 5.2% to approximately HK\$4,762,000 when compared to approximately HK\$4,527,000 for the corresponding period last year. The increase was mainly attributable to the decrease of airtime usage by users and the increase of average unit cost of Hong Kong airtime resulting from the requirement to satisfy the minimum monthly airtime purchase amount adopted by two MNOs.

The Group's other income for the nine months ended 30 September 2016 decreased by approximately 42.1% to approximately HK\$1,063,000 when compared to approximately HK\$1,836,000 for the corresponding period last year. The decrease was mainly attributable to the decrease of interest income from bank deposits.

The Group's other net loss for the nine months ended 30 September 2016 decreased by approximately 33.0% to approximately HK\$2,894,000 when compared to approximately HK\$4,319,000 for the corresponding period last year. The decrease was mainly due to the decrease of foreign exchange loss arising from the movements in the exchange rate between Hong Kong dollars and Renminbi during the period.

The Group's administrative and other operating expenses for the nine months ended 30 September 2016 increased slightly by approximately 2.6% to approximately HK\$9,710,000 when compared to approximately HK\$9,462,000 for the corresponding period last year.

During the nine months ended 30 September 2016, the Group has made a provision for impairment loss on trade receivables of approximately HK\$5,962,000 in accordance with the Group's policy in provision for doubtful debts. Details are set out in note 10 to the financial statements.

No income tax has been provided for the nine months ended 30 September 2015 and 2016 respectively as the Group had no assessable profits for the period.

The Group recorded a loss attributable to equity shareholders of the Company for the nine months ended 30 September 2016 of approximately HK\$22,265,000, representing a decrease of approximately 7.1% when compared to approximately HK\$23,968,000 for the corresponding period in last year. Such decrease was mainly due to the decrease of foreign exchange loss and the decrease in provision for impairment loss on trade receivables.

BUSINESS OUTLOOK

As disclosed in the announcements of the Company dated 29 April 2016 and 3 May 2016, the Group entered into an agreement with a Hong Kong based telecommunication service provider and a Singapore-based telecommunication service provider (the “Service Providers”) respectively, in respect of the establishment of strategic cooperation relationship concerning the provision of airtime and mobile data services in the PRC, Singapore and other regions, including but not limited to Japan, Taiwan and Macau (the “Covered Regions”) to the Group. The Board believes that the cooperation with the Service Providers will enable the Group to broaden its mobile roaming coverage to the Covered Regions, and to create new roaming platforms for providing airtime and mobile data services in the Covered Regions to the users from different countries all over the world. Thereafter, the users would be able to enjoy the mobile data service in addition to the airtime service that the Group has been providing. The Board considers that the entering into of the agreements is a furtherance of the principal business of the Group which is in the interest of the Company and its shareholders as a whole.

In response to the changes in the traditional voice and SMS business in the mobile telecommunications market, we need to adjust our way of thinking and deliver innovative services, so that we could transform the challenges in driving force and provide customers with services that better fulfill their practical needs. Going forward in the fourth quarter of 2016, we intend to launch several new mobile and roaming services to align with the developing trends of mobile internet and promote strategic transformation and reform and innovation.

1. OTA Card

OTA Card is a new generation of “3Gmate” telecommunication service provided by the Group. Through the two core technologies of air-issuing and APP writing, users will not need to buy extra SIM cards. A single CA-SIM card can load with multiple phone numbers, enjoying the favorable local call charging and traffic rate. With the value-added service platform, users can travel around and connect to the world. Users can receive free traffic, credits and coupons etc. The authentication and encryption functions of CA-SIM card can provide to the outbound traveling users better value-added services like Mzone network, O2O business in their destinations and ticket booking service etc.

With the APP application and the CA-SIM authenticated identity, users can have access to the local telecommunication service, saving the tedious account opening procedure and making communication more convenient. The multiple number function of the APP includes account opening, card re-issuing and number switching. And through the APP, users can check their account, pay for the phone bill or charge their account.

2. New Service Named “Directel”

The “Directel” is an innovated integration of mobile Internet and traditional PSTN network, using the APP on the mobile phone end to accomplish the basic telephone function and meet the customized requirements of mobile Internet telecommunication for the users. It can promote different telecommunication service providers to integrate their services (not only includes HK service providers, but also can provide access to overseas telecommunication service providers to achieve non-standard cross border telecommunication service), so as to realize one APP with multiple affiliated phone numbers, saving money for the user and bring new telecom experience.

3. Private Phonebook

Private phonebook is a personal communication management software with CA core technology (including CA-SIM card's hardware certificate and software certificate), mainly helping you to accomplish all functions that are based on security factors, such as the business card/phonebook management, the encrypted local/cloud storage of phonebook, prevention of malwares' access to the phonebook, encryption of the telephone communication and so on.

Apart from the above, the Group will continue to look for potential opportunities to diversify its business scope and we believe that the new business will make a positive contribution to the results of the Group in the future.
