## CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

## MANAGEMENT DISCUSSION AND ANALYSIS

### BUSINESS REVIEW

During the Reporting Period, the Group continued to devote greater effort to explore the overseas market and had managed to establish a business relationship with a large-scale papermaking enterprise in Singapore, laying a foundation for further penetration into the Southeast Asia market.

The Group attaches great importance to investment in research and development of new products. During the Reporting Period, the research and development expenditure of the Group amounted to approximately RMB844,000. Moreover, the Group had introduced three professors from Nanjing University and built a leading innovative team, which was listed in the “South Taihu Elite Program” in Huzhou.

During the Reporting Period, the Group had put the newly constructed organic bentonite production line with annual output of 10,000 tons in Yangyuan, Hebei, into operation successfully; and set up the sales branches in Shanghai to conduct marketing promotion. The products from this project will be used in paint and coating, agricultural chemicals and oil fields.

The plants construction for the water treatment project with annual capacity of 10,000 tons located in the head quarter of the Group in Changxing, Zhejiang, had been fully completed during the Reporting Period. In the next step, we will carry out the work of installation and testing for production facilities, which is on the track.

## Financial Review

Revenue of the Group for the three months ended 31 March 2017 amounted to approximately RMB17,316,000, representing a decrease of approximately RMB666,000 or 3.7% compared to approximately RMB17,982,000 for the three months ended 31 March 2016. The decrease in sales was mainly due to the decrease in sales of papermaking chemicals series during the Reporting Period.

Gross profit of the Group for the three months ended 31 March 2017 amounted to approximately RMB7,978,000, representing a decrease of approximately RMB1,818,000 or 18.6% compared to approximately RMB9,796,000 for the three months ended 31 March 2016.

The distribution cost, mainly including transportation expenses, salaries and benefits, and travelling expenses, amounted to approximately RMB2,440,000 for the three months ended 31 March 2017, representing a decrease of approximately RMB799,000 or 24.7% as compared to RMB3,239,000 for the three months ended 31 March 2016. The profit for the three months ended 31 March 2017 was approximately RMB66,000, representing a decrease of RMB176,000 or 72.7% as compared to approximately RMB242,000 in the corresponding period of 2016. The decrease was mainly due to the decrease in gross profit during the Reporting Period.

## PROSPECTS

With the slowing down of macro economy growth and transformation and upgrading the industrial structure, the chemical industry where the Group operates in is affected by rising labor costs and insufficient consumer motivations in the downstream. Meanwhile, the increased competitions among the industry shrink the profitability of the Company each year. As a result, the Group will adjust our development strategies according to new situations and formulate and implement the following strategies:

- 1) The Group is going to establish a customer relationship management department for major clients to further optimize the management of major quality clients; and will gradually fade out relatively small-scale clients with outdated facilities to reduce risks, and thus ensuring safe operation of the Group.
- 2) The Group will pay more effort to explore the overseas market. It is expected to set up sales branches in Southeast Asia in 2017 to carry out marketing promotion in this region.
- 3) The Group will rely on its Shanghai sales branches as a platform to promote organic soil products, developing new business and enhancing its profitability.
- 4) Rided on the “South Taihu Elite Program”, the Group will conduct cooperation with colleges and universities to develop new products in the field of water treatment.
