The Group is subject to income tax on an entity basis on profits arising in or derived from the jurisdictions in which members of the Group are domiciled and operated.

Hong Kong Profits Tax is calculated at 16.5% (2016: 16.5%) on the estimated assessable profits for the period. No provision for Hong Kong Profits Tax has been made as the Group did not have assessable profits during the nine months ended 30 September 2017 (2016: nil).

Enterprise Income Tax (“EIT”) arising from the PRC for the period was calculated at 25.0% (2016: 25.0%) of the estimated assessable profits during the period. According to the Law of the PRC on EIT, the taxable income of an enterprise shall be the total revenue of such enterprise, deducted by any non-assessable revenue, exempted revenue, other deductions and amount of offsetting any accumulated losses.

7. DIVIDEND

The Board does not declare the payment of an interim dividend for the three months ended 30 September 2017 (2016: nil).

On 14 August 2017, the Board had resolved to declare an interim dividend of HK\$0.01 per Share for the six months ended 30 June 2017. The interim dividend was paid to shareholders of the Company on 29 September 2017.

8. EARNINGS PER SHARE

(a) Basic earnings per share

The calculation of basic earnings per share for the nine months ended 30 September 2017 is based on the profit attributable to owners of the Company of approximately RMB104,790,000 (2016: approximately RMB90,060,000) and the weighted average number of approximately 1,731,433,000 (2016: approximately 1,613,106,000) ordinary shares during the nine months ended 30 September 2017.

(b) Diluted earnings per share

The Company has two categories of dilutive potential ordinary shares: convertible bonds and share options. For the purposes of calculation of the diluted earnings per share, the convertible bonds are assumed to have been fully converted into ordinary shares, and the net profit is adjusted to eliminate the interest expense less the tax effect. For the share options, the number of shares that would have been issued assuming the full exercise of the share options less the number of shares that could have been issued at fair value (determined as the average market price per share for the period) for the same total proceeds is the number of shares issued for no consideration. The resulting number of shares issued for no consideration is included in the weighted average number of ordinary shares as the denominator for calculating diluted earnings per share.

The actual computation of diluted earnings per share has not taken into account the conversion of the Company's outstanding convertible bonds since to do so would result in an increase in earnings per share. The diluted earnings per share is the same as basic earnings per share for the nine months ended 30 September 2017 and 2016 as the shares issuable in respect of the outstanding share options have an anti-dilutive effect on the basic earnings per share.
