FIRST QUARTERLY REPORT 2018

CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the "Directors") of Yu Tak International Holdings Limited (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

OPERATION REVIEW

The gold price gained more than 3 percent in Q1 2018. A weaker US Dollar and inflation supported gold price despite its volatility over the period. It was generally believed that gold price would continue its upward trend in 2018.

Jewellery demand in China grew 7% in Q1 to a three-year high of 187.8 tonnes. Growth was buoyed by holiday spending and expectation of upwards price trend. 18-carat Gold and 3D hard gold jewellery continued to gain market share. Consumers were increasingly tempted by the innovative, fashionable, non-traditional designs offered in these categories.

Sales of Jewellery products of the Group during the period amounted to HK\$4.9 million which was 78% of sales of the same period of 2017. The Group had been adjusting its sales and marketing strategies to catch up with the trend and latest development of the market. It was expected that results would become more obvious towards the second half of 2018.

FUTURE PROSPECTS

The gold and jewellery market in China showed an annual growth of 3% in 2017 that it was the first yearly increase since 2013. It is believed that the trend of demand for lower-weight, better designed, higher-margin 'premium' gold jewellery products will continue to pick up momentum although 24-Karat gold will continue to dominate the market. The Group will stay exploring 18 carat, 22 carat and 3D hard products markets of the retailer.

The Company has raised approximately HK\$57 million share capital by Right issues during the period ended 31 March 2018. The fund will be applied for expansion and development of the Group's sales of gold and jewellery products businesses.

In 2018, the Group will look for new investments aggressively in its sales of gold and jewellery businesses. Sales in the business segment will be further improved through efforts in development of new products tapping in the market trend and effective franchisee management. With a clear market trend, a bold recovery of the gold and jewellery market and expecting stable growth of China economy in 2018 onwards, the Management believes that decisive investments for enlarging the Group's share in the market will be justified.
