## CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

### **BUSINESS REVIEW**

During the year ended 31 March 2018, the Group recorded a revenue of approximately HK\$390.4 million, representing a decrease of approximately 9.2% as compared to the amount of approximately HK\$430.1 million for the year ended 31 March 2017. The gross profit margin of the Group increased slightly to 16.5% for the year ended 31 March 2018 from 15.6% for the preceding year. The slight increase in gross profit margin was mainly attributable to the increase in the gross profit margin of menswear for the year ended 31 March 2018, due to the decrease in purchase orders of menswear products with lower gross profit margins from a major customer. The Group's profit and total comprehensive income attributable to owners of the Company increased by approximately 136.7% or HK\$8.2 million from approximately HK\$6.0 million for the year ended 31 March 2017 to approximately HK\$14.2 million for the year ended 31 March 2018. Such increase was mainly attributable to a significant decrease in non-recurring listing expenses incurred for the year ended 31 March 2018 to approximately HK\$11.4 million for the year ended 31 March 2017. During the year ended 31 March 2018, the Group's revenue and profit was affected by the combination of (i) the decrease in demand from the existing customers despite there was a slow economic growth in Japan and (ii) the Group accepted purchase orders from the customers with relatively higher gross profit margin to enhance the utilisation of the Group's resources.

The Group incorporated a subsidiary in Japan to set up a showroom and an office for a design team and an account servicing team. By setting up a showroom in Japan, the Group will be able to display and promote more sample products to customers and to facilitate the demands from the local customers more efficiently which in turn may create more business opportunities and further strengthen the corporate image to the customers.

The shares of the Company (the "Share(s)") were successfully listed on GEM of the Stock Exchange on 31 May 2017 (the "Listing Date") by way of share offer (the "Share Offer"). The Group raised the net proceeds from the Share Offer of approximately HK\$35.9 million after deducting all the relevant commission and expenses in relation to the Listing (the "Net Proceeds"). The Net Proceeds are intended to be used in accordance with the proposed implementation plans as disclosed under the section headed "Statement of Business Objectives and Use of Proceeds" of the prospectus of the Company dated 16 May 2017 (the "Prospectus").

The selling price of each of the product categories depends primarily on, among other thing, (i) the complexity of the product design; (ii) the size of an order; (iii) the delivery schedule set out by customers; (iv) the costs of raw materials; and (v) the production costs as quoted by the third-party manufacturers. Accordingly, the selling price of the Group's products may differ considerably in different purchase orders by different customers. Set out below are the average selling prices per unit of finished product sold by the Group by category for each of the two years ended 31 March 2018:

The decrease in revenue was mainly attributable to the decrease in sales volume of the knitwear products coupled with the decrease in overall average selling price for the year ended 31 March 2018.

#### Womenswear

During the year ended 31 March 2018, the Group's revenue was mainly derived from the sales of womenswear. Revenue derived from the sales of womenswear decreased by approximately HK\$21.7 million or 6.2% from approximately HK\$348.9 million for the year ended 31 March 2017 to approximately HK\$327.2 million for the year ended 31 March 2018. Such decrease was mainly attributable to the decrease in average selling price from approximately HK\$57.1 for the year ended 31 March 2017 to approximately HK\$54.0 for the year ended 31 March 2018.

#### Menswear

The Group's revenue derived from the sales of menswear decreased significantly by approximately HK\$18.0 million or 22.2% from approximately HK\$81.2 million for the year ended 31 March 2017 to approximately HK\$63.2 million for the year ended 31 March 2018. Such decrease was mainly attributable to the substantial decrease in sales volume from approximately 1.4 million pieces for the year ended 31 March 2017 to approximately 1.0 million pieces for the year ended 31 March 2018, which outweighs the increase in average selling price from approximately HK\$59.2 for the year ended 31 March 2017 to approximately HK\$63.1 for the year ended 31 March 2018.

### Gross profit and gross profit margin

. . . . . . . . . . .

 $\bullet \bullet$ 

The Group's gross profit decreased relatively slightly to approximately HK\$64.5 million for the year ended 31 March 2018 from approximately HK\$67.2 million for the year ended 31 March 2017, representing a decrease of approximately 4.0%. The decrease was mainly attributable to the decrease in sales volume of the Group's knitwear products coupled with the decrease in overall average selling price for the year ended 31 March 2018. The Group's gross profit margin slightly increased to approximately 16.5% for the year ended 31 March 2018 from approximately 15.6% for the year ended 31 March 2017. Such increase in the Group's gross profit margin was mainly attributable to the result of decrease in purchase orders of menswear products with lower gross profit margin from a major customer which in turn increased in the gross profit margin of menswear products. Despite facing the challenging trading environment during the year ended 31 March 2018, the Group endeavoured to maintain the gross profit margin while offering satisfactory supply chain management solutions to its customers.

### LIQUIDITY AND FINANCIAL RESOURCES

....

During the year ended 31 March 2018, the Group's operations were generally financed through an internally generated cash flows, proceeds from the Share Offer and borrowings from banks. The Directors believe that in the long term, the Group's operations will be funded by a combination of internally generated cash flows and bank borrowings and, if necessary, additional equity financing.

As at 31 March 2018 and 2017, the Group had net current assets of approximately HK\$90.9 million and HK\$24.2 million respectively, including bank and cash balances of approximately HK\$83.4 million and HK\$38.5 million, respectively. The Group's current ratio increased from approximately 1.6 as at 31 March 2017 to approximately 4.3 as at 31 March 2018. Such an increase was mainly as a result of the full repayment of bank borrowings and a substantial increase in bank and cash balances during the year ended 31 March 2018 benefited from the Listing.

Gearing ratio is calculated based on the total loans and borrowings (including bank borrowings due within one year and finance lease payable) divided by total equity at the respective reporting date. As at 31 March 2018, the Group's gearing ratio was nil whilst it was 0.8 times as at 31 March 2017 which mainly due to the full repayment of bank borrowings and the amount of finance lease payable is relatively insignificant during the year ended 31 March 2018. The Group's borrowings have not been hedged by any interest rate financial instruments. The Group's financial position is sound and strong. With available bank and cash balances, and banking facilities, the Group has sufficient liquidity to satisfy its funding requirements.

### **TREASURY POLICIES**

The Group adopts prudent treasury policies. The Group's credit risk is primarily attributable to its trade and bills receivables. In order to minimise its credit risk, the management of the Group has delegated a team to perform ongoing credit evaluation of the financial conditions of the customers including but not limited to the determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts and reduce the Group's exposure to credit risk. In addition, the Group reviews the recoverable amount of each individual debt at the end of the reporting period to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the Directors consider that the Group's credit risk is significantly reduced.

In management of the liquidity risk, the Board closely monitors and maintains levels of cash and cash equivalents deemed adequate by the management to finance the Group's operations and mitigate the effects of fluctuations in cash flows.

Since Firenze is owned as to 100% by Mr. Chan, being an executive Director, the chief executive officer of the Company and a substantial Shareholder, Firenze is considered as a connected person of the Company under the GEM Listing Rules. As such, the leasing of the Property by the Company from Firenze under the Tenancy Agreement was constituted a continuing connected transaction of the Company under Chapter 20 of the GEM Listing Rules. Since the aggregate annual consideration is less than HK\$3,000,000, the transactions under the Tenancy Agreement fall within the de minimis threshold and constitute de minimis continuing connected transactions of the Company under Rule 20.74(1)(c) of the GEM Listing Rules. Accordingly, the Tenancy Agreement and the transactions contemplated thereunder will be exempted from the reporting, annual review, announcement, circular and independent Shareholders' approval requirements under Chapter 20 of the GEM Listing Rules.

The continuing connected transaction mentioned above has been reviewed by the independent non-executive Directors as they consider that the Tenancy Agreement has been entered into in the ordinary and usual course of business and on normal commercial terms, and the terms of and transactions contemplated under the Tenancy Agreement and the annual caps set out above are fair and reasonable, on normal commercial terms and in the interests of the Group and the Shareholders as a whole.

Save as disclosed above, the Group has not entered into any connected transaction or continuing connected transaction during the year which should be disclosed pursuant to the requirements under the GEM Listing Rules.

#### MANAGEMENT CONTRACTS

# **INDEPENDENT AUDITOR'S REPORT**

#### TO THE SHAREHOLDERS OF SPEED APPAREL HOLDING LIMITED

(Incorporated in the Cayman Islands with limited liability)

## **OPINION**

We have audited the consolidated financial statements of Speed Apparel Holding Limited (the **"Company**") and its subsidiaries (collectively referred to as the **"Group**") set out on pages 49 to 85, which comprise the consolidated statement of financial position as at 31 March 2018, and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 March 2018, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("**HKFRSs**") issued by the Hong Kong Institute of Certified Public Accountants (the "**HKICPA**") and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

### **BASIS FOR OPINION**

We conducted our audit in accordance with Hong Kong Standards on Auditing ("**HKSAs**") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "**Code**"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **KEY AUDIT MATTERS**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### Inventories

Refer to Note 18 to the consolidated financial statements

The Group tested the amount of inventories for impairment. This impairment test is significant to our audit because the balance of inventories of approximately HK\$5,767,000 as at 31 March 2018 is material to the consolidated financial statements. In addition, the Group's impairment test involves application of judgement and is based on estimates.

Our audit procedures included, among others:

# INDEPENDENT AUDITOR'S REPORT

- Assessing the Group's procedures on ordering and holding of inventories;
- Evaluating the Group's impairment assessment;
- Assessing the marketability of the inventories;
- Assessing the ageing of the inventories;
- Assessing the net realisable values of the inventories; and
- Checking subsequent sales and usage of the inventories.

We consider that the Group's impairment test for inventories is supported by the available evidence.

#### Trade and bills receivables

Refer to Note 19 to the consolidated financial statements

The Group tested the amount of trade and bills receivables for impairment. This impairment test is significant to our audit because the balance of trade and bills receivables of approximately HK\$9,219,000 as at 31 March 2018 is material to the consolidated financial statements. In addition, the Group's impairment test involves application of judgement and is based on estimates.

Our audit procedures included, among others:

- Assessing the Group's procedures on granting credit limits and credit periods to customers;
- Assessing the Group's relationship and transaction history with the customers;
- Evaluating the Group's impairment assessment;
- Assessing ageing of the debts;
- Assessing creditworthiness of the customers;
- Checking subsequent settlements from the customers; and
- Assessing the disclosure of the Group's exposure to credit risk in the consolidated financial statements.

We consider that the Group's impairment test for trade and bills receivables is supported by the available evidence.

## **OTHER INFORMATION**

The Directors are responsible for the other information. The other information comprises all the information in the Company's annual report, but does not include the consolidated financial statements and our auditor's report thereon. The other information is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information

# **INDEPENDENT AUDITOR'S REPORT**

identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

# **RESPONSIBILITIES OF DIRECTORS FOR THE CONSOLIDATED FINANCIAL STATEMENTS**

The Directors are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the Directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

# AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

A further description of our responsibilities for the audit of the consolidated financial statements is located at the HKICPA's website at: http://www.hkicpa.org.hk/en/standards-and-regulations/standards/auditing-assurance/auditre/

This description forms part of our auditor's report.

The Group has already commenced an assessment of the impact of these new HKFRSs but is not yet in a position to state whether these new HKFRSs would have a material impact on its results of operations and financial position.

# SIGNIFICANT ACCOUNTING POLICIES

These consolidated financial statements have been prepared in accordance with HKFRSs, the applicable disclosures required by the Rules Governing the Listing of Securities on GEM of the Stock Exchange and by the Hong Kong Companies Ordinance.

These consolidated financial statements have been prepared under the historical cost convention.

The preparation of consolidated financial statements in conformity with HKFRSs requires the use of certain key assumptions and estimates. It also requires the Directors to exercise its judgements in the process of applying the accounting policies. The areas involving critical judgements and areas where assumptions and estimates are significant to these consolidated financial statements, are disclosed in note 5 to the consolidated financial statements.

The significant accounting policies applied in the preparation of these consolidated financial statements are set out below.

#### Consolidation

4.

The consolidated financial statements include the financial statements of the Company and its subsidiaries made up to 31 March. Subsidiaries are entities over which the Group has control. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Group has power over an entity when the Group has existing rights that give it the current ability to direct the relevant activities, i.e. activities that significantly affect the entity's returns.

When assessing control, the Group considers its potential voting rights as well as potential voting rights held by other parties, to determine whether it has control. A potential voting right is considered only if the holder has the practical ability to exercise that right.

Subsidiaries are consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date the control ceases.

The gain or loss on the disposal of a subsidiary that results in a loss of control represents the difference between (i) the fair value of the consideration of the sale plus the fair value of any investment retained in that subsidiary and (ii) the Company's share of the net assets of that subsidiary plus any remaining goodwill relating to that subsidiary and any related accumulated foreign currency translation reserve.

FOR THE YEAR ENDED 31 MARCH 2018

# SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Intragroup transactions, balances and unrealised profits are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

#### Foreign currency translation

#### (a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "**Functional Currency**"). The consolidated financial statements are presented in Hong Kong dollars ("**HK\$**"), which is the Company's presentation currency. The Functional Currency of the Company is United States dollars (the "**US\$**"). The Directors consider that choosing HK\$ as the presentation currency best suits the needs of the shareholders and investors.

#### (b) Transactions and balances in each entity's financial statements

Transactions in foreign currencies are translated into the functional currency on initial recognition using the exchange rates prevailing on the transaction dates. Monetary assets and liabilities in foreign currencies are translated at the exchange rates at the end of each reporting period. Gains and losses resulting from this translation policy are recognised in profit or loss.

#### (c) Translation on consolidation

The results and financial position of all the Group entities that have a functional currency different from the Company's presentation currency are translated into the Company's presentation currency as follows:

- Assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- Income and expenses are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the exchange rates on the transaction dates); and
- All resulting exchange differences are recognised in the exchange reserve.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities and of borrowings are recognised in the exchange reserve. When a foreign operation is sold, such exchange differences are recognised in consolidated profit or loss as part of the gain or loss on disposal.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

FOR THE YEAR ENDED 31 MARCH 2018

## 4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.

Depreciation of property, plant and equipment is calculated at rates sufficient to write off their cost less their residual values over the estimated useful lives on a straight-line basis. The principal annual rates or useful lives are as follows:

| Leasehold improvement          | Over the period of the relevant lease or 5 years, whichever is shorter |
|--------------------------------|--|
| Furniture and office equipment | 20% per annum  |
| Motor vehicle                  | 30% per annum  |

The residual values, useful lives and depreciation method are reviewed and adjusted, if appropriate, at the end of each reporting period.

The gain or loss on disposal of property, plant and equipment is the difference between the net sales proceeds and the carrying amount of the relevant asset, and is recognised in profit or loss.

#### Leases

#### The Group as lessee

(a) Operating leases

Leases that do not substantially transfer to the Group all the risks and rewards of ownership of assets are accounted for as operating leases. Lease payments (net of any incentives received from the lessor) are recognised as an expense on a straight-line basis over the lease term.

(b) Finance leases

Leases that substantially transfer to the Group all the risks and rewards of ownership of assets are accounted for as finance leases. At the commencement of the lease term, a finance lease is capitalised at the lower of the fair value of the leased asset and the present value of the minimum lease payments, each determined at the inception of the lease.

FOR THE YEAR ENDED 31 MARCH 2018

## SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Leases (Continued)

#### The Group as lessee (Continued)

(b) Finance leases (Continued)

The corresponding liability to the lessor is included in the consolidated statement of financial position as finance lease payable. Lease payments are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Assets under finance leases are depreciated the same as owned assets.

#### Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the first-in, first-out basis. The cost of finished goods and work in progress comprises raw materials, direct labour and an appropriate proportion of all production overhead expenditure, and where appropriate, subcontracting charges. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

#### **Recognition and derecognition of financial instruments**

Financial assets and financial liabilities are recognised in the consolidated statement of financial position when the Group becomes a party to the contractual provisions of the instruments.

Financial assets are derecognised when the contractual rights to receive cash flows from the assets expire; the Group transfers substantially all the risks and rewards of ownership of the assets; or the Group neither transfers nor retains substantially all the risks and rewards of ownership of the assets but has not retained control on the assets. On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received is recognised in profit or loss.

Financial liabilities are derecognised when the obligation specified in the relevant contract is discharged, cancelled or expires. The difference between the carrying amount of the financial liability derecognised and the consideration paid is recognised in profit or loss.

## Trade and other receivables

Trade and other receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less allowance for impairment. An allowance for impairment of trade and other receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the allowance is the difference between the carrying amount of the receivables and the present value of estimated future cash flows, discounted at the effective interest rate computed at initial recognition. The amount of the allowance is recognised in profit or loss.

FOR THE YEAR ENDED 31 MARCH 2018

## 4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Trade and other receivables (Continued)

Impairment losses are reversed in subsequent periods and recognised in profit or loss when an increase in the recoverable amount of the receivables can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the receivables at the date the impairment is reversed shall not exceed what the amortised cost would have been had the impairment not been recognised.

#### Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents represent cash at bank and on hand, demand deposits with banks and other financial institutions, and short-term highly liquid investments which are readily convertible into known amounts of cash and subject to an insignificant risk of change in value. Bank overdrafts which are repayable on demand and form an integral part of the Group's cash management are also included as a component of cash and cash equivalents.

#### Financial liabilities and equity instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument under HKFRSs. An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. The accounting policies adopted for specific financial liabilities and equity instruments are set out below.

#### Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred, and subsequently measured at amortised cost using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

#### Trade and other payables

Trade and other payables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method unless the effect of discounting would be immaterial, in which case they are stated at cost.

#### **Equity instruments**

Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

#### **Revenue recognition**

Revenue is measured at the fair value of the consideration received or receivable and is recognised when it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably.

FOR THE YEAR ENDED 31 MARCH 2018

## SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Revenue recognition (Continued)

Revenues from the sales of goods are recognised on the transfer of significant risks and rewards of the goods has been transferred to the customers, which generally coincides with the time when the goods are delivered and the title has passed to the customers.

Interest income is recognised on a time-proportion basis using the effective interest method.

#### **Employee benefits**

#### (a) Employee leave entitlements

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave and long service leave as a result of services rendered by employees up to the end of the reporting period.

Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

#### (b) Pension obligations

The Group contributes to defined contribution retirement schemes which are available to all employees. Contributions to the schemes by the Group and employees are calculated as a percentage of employees' basic salaries. The retirement benefit scheme cost charged to profit or loss represents contributions payable by the Group to the funds.

#### (c) Termination benefits

Termination benefits are recognised at the earlier of the dates when the Group can no longer withdraw the offer of those benefits and when the Group recognises restructuring costs and involves the payment of termination benefits.

#### **Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

To the extent that funds are borrowed generally and used for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalisation is determined by applying a capitalisation rate to the expenditures on that asset. The capitalisation rate is the weighted average of the borrowing costs applicable to the borrowings of the Group that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

FOR THE YEAR ENDED 31 MARCH 2018

# 4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Taxation

Income tax represents the sum of the current tax and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit recognised in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences, unused tax losses or unused tax credits can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised, based on tax rates that have been enacted or substantively enacted by the end of the reporting period. Deferred tax is recognised in profit or loss, except when it relates to items recognised in other comprehensive income or directly in equity, in which case the deferred tax is also recognised in other comprehensive income or directly in equity.

The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

## SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### **Related parties**

A related party is a person or entity that is related to the Group.

- (A) A person or a close member of that person's family is related to the Group if that person:
  - i) has control or joint control over the Group;
  - (ii) has significant influence over the Group; or
  - (iii) is a member of the key management personnel of the Company or of a parent of the Company.
- (B) An entity is related to the Group if any of the following conditions applies:
  - (i) The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
  - (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
  - (iii) Both entities are joint ventures of the same third party.
  - (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
  - (v) The entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group. If the Group is itself such a plan, the sponsoring employers are also related to the Group.
  - (vi) The entity is controlled or jointly controlled by a person identified in (A).
  - (vii) A person identified in (A)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
  - (viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Company or to a parent of the Company.

#### Segment reporting

Operating segments and the amounts of each segment item reported in the consolidated financial statements are identified from the financial information provided regularly to the Group's most senior executive management for the purpose of allocating resources and assessing the performance of the Group's various lines of business.

FOR THE YEAR ENDED 31 MARCH 2018

## 4. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Segment reporting (Continued)

Individually material operating segments are not aggregated for financial reporting purposes unless the segments have similar economic characteristics and are similar in respect of the nature of products and services, the nature of productions processes, the type or class of customers, the methods used to distribute the products or provide the services, and the nature of the regulatory environment. Operating segments which are not individually material may be aggregated if they share a majority of these criteria.

#### Impairment of assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of any impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

#### Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group has a present legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditures expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow is remote.

FOR THE YEAR ENDED 31 MARCH 2018

## SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Events after the reporting period

Events after the reporting period that provide additional information about the Group's position at the end of the reporting period or those that indicate the going concern assumption is not appropriate are adjusting events and are reflected in the consolidated financial statements. Events after the reporting period that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

## 5. CRITICAL JUDGEMENTS AND KEY ESTIMATES

#### Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

#### (a) Impairment of trade receivables

The Group makes impairment for trade receivables based on assessments of the recoverability of the trade receivables, including the current creditworthiness and the past collection history of each debtor. Impairments arise where events or changes in circumstances indicate that the balances may not be collectible. The identification of bad and doubtful debts requires the use of judgement and estimates. Where the actual result is different from the original estimate, such difference will impact the carrying value of the trade receivables and doubtful debt expenses in the year in which such estimate has been changed.

#### (b) Allowance for slow-moving inventories and net realisable value of inventories

Allowance for slow-moving inventories is made based on the ageing and estimated net realisable value of inventories. The assessment of the allowance amount involves judgement and estimates. Where the actual outcome in future is different from the original estimate, such difference will impact the carrying value of inventories and allowance charge/write-back in the year in which such estimate has been changed.

Net realisable value of inventories is the estimated selling price in the ordinary course of business, less estimated costs of completion and selling expense. These estimates are based on the current market condition and the historical experience of manufacturing and selling products of similar nature. It could change significantly as a result of changes in customer taste and competitor actions in response to severe industry cycles. The Group will reassess the estimates by the end of each reporting period.

The carrying amount of the Group's inventories as at 31 March 2018 amounted to approximately HK\$5,767,000 (2017: HK\$7,137,000). No provision for inventories had been recognised in profit or loss during the years ended 31 March 2018 and 2017 and no balance of provision for inventories had been recognised as at 31 March 2018 and 2017.

FOR THE YEAR ENDED 31 MARCH 2018

# 6. FINANCIAL RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks: foreign currency risk, credit risk, liquidity risk and interest rate risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

#### (a) Foreign currency risk

The Group has minimal exposure to foreign currency risk as most of its business transactions, assets and liabilities are principally denominated in the functional currencies of the Group entities. The Group currently does not have a foreign currency hedging policy in respect of foreign currency transactions, assets and liabilities. The Group will monitor its foreign currency exposure closely and will consider hedging significant foreign currency exposure should the need arise.

Since HK\$ is pegged to US\$, the risk of volatility between US\$ and HK\$ is limited and the directors of the Company consider that the currency risk is minimal. Accordingly, no sensitivity analysis for the currency risk of HK\$ is presented.

#### (b) Credit risk

The carrying amount of the trade and bills receivables, deposit and other receivables, pledged bank deposits and bank and cash balances included in the consolidated statement of financial position represents the Group's maximum exposure to credit risk in relation to the Group's financial assets.

The Group has policies in place to ensure that sales are made to customers with an appropriate credit history.

The credit risk on bank balances and pledged bank deposits are limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

At the end of reporting period, the Group had concentration of credit risk as approximately 52% (2017: 68%) of the total trade and bills receivables were due from the Group's five largest customers. The Group normally grants an average credit period of 30 to 90 days to these customers. Most of these counterparties are either owners or sourcing agents of apparel retail brands based in Japan arising from the Group's trading of garment business. The management of the Group considered that the credit risk on amounts due from these customers is insignificant after considering their historical settlement records, credit qualities and financial positions of the counterparties.

#### (c) Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its current obligations when they fall due.

The Group's policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

### (d) Interest rate risk

Except for pledged bank deposits and bank balances, the Group has no significant interest-bearing assets. The Group's income and operating cash flows are substantially independent of changes in market interest rates. Management does not anticipate significant impact resulted from changes in interest rates on interest bearing assets.

If interest rates on floating-rate interest-bearing financial liabilities at that date had been 100 basis points higher/ lower with all other variables held constant, consolidated profit after tax for the year would have been HK\$nil (2017: HK\$170,000) lower/higher, arising mainly as a result of higher/lower interest expense on borrowings.

For the floating-rate interest-bearing financial assets, based on the sensitivity analysis, the directors of the Company consider that the impact on post-tax profit from changes in interest rates is insignificant for both years.

According to the EIT Law of the PRC, starting from 1 January 2008, a 10% withholding tax will be levied on the immediate holding company established out of the PRC when their PRC subsidiary declares dividends out of their profits earned after 1 January 2008. A lower withholding tax rate of 5% may be applied if there is a tax treaty arrangement between the PRC and the jurisdiction of the foreign immediate holding company.

No provision for Japan corporate income tax has been made for the year ended 31 March 2018 as the Group did not generate any assessable profits during the year.
