CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

MANAGEMENT DISCUSSION AND ANALYSIS

Business Review and Prospects

Revenue for the three months ended 30 June 2018 (“**Three-Month Period**”) was approximately HK\$14.78 million, representing an increase of approximately 79.20% when compared with the corresponding period in 2017. Loss attributable to owners of the Company for the Three-Month Period was approximately HK\$2.98 million whilst for the corresponding period in 2017, the loss attributable to owners of the Company was approximately HK\$2.07 million.

Given the slow pace of economic recovery along with the continued slackness in the U.S. and European markets, the sales of electronic products have become increasingly challenging. Notwithstanding the challenging market conditions during the Three-Month Period, the Group continues to provide electronics products and subcontracting services on PCB assemblies and manufacturing of electronic products to customers in its principal markets, i.e. the U.S.A. and the European countries including Belgium, Bulgaria, Denmark, Germany, Italy, Russia, Slovakia, Sweden, Switzerland and United Kingdom.

In view of the challenging market conditions as mentioned above, while the Group will continue to focus on its core business of the sales of electronic products, it will explore new business opportunities with an aim of broadening its source of income and maximizing profit and return for the Group and the shareholders of the Company in the long run. The Group will also endeavour to increase its market share and attract new customers to enlarge its client base through conducting more promotional and marketing activities and designing and developing new electronic products.

Sales of Electronic Products

Revenue from this segment during the Three-Month Period was approximately HK\$13.51 million, representing an increase of approximately 67.61% when compared with the corresponding period in 2017. Increase in sales of electronics products was mainly due to the increase in the revenue from indent trading of electronic products and manufacturing and trading of electronic products and accessories by approximately HK\$0.62 million and HK\$4.65 million respectively as compared with the corresponding period in 2017. The increase in the revenue from indent trading of electronic products is mainly attributable to the increasing purchase orders from the Group’s customers. Such increase was mainly due to the increase in sales of fishing indicator and charger board for the Three-Month Period by approximately HK\$3.19 million and HK\$2.54 million respectively as compared with the corresponding period in 2017. Increase in the sales of fishing indicator and charger board was a result of increase in volume sold, which mainly led to the increase in the revenue from manufacturing and trading of electronic products and accessories for the Three-Month Period.

Subcontracting income

No revenue from this segment during the Three-Month Period in 2018, representing a decrease of approximately 100% when compared with the corresponding period in 2017. The said decrease was mainly due to the decrease in orders from providing subcontracting services in the PRC.

Financial review

The Group's revenue for the Three-Month Period was approximately HK\$14.78 million, representing an increase of approximately 79.20% from approximately HK\$8.25 million of the corresponding period in 2017. Such increase was mainly due to the increase in sales of electronic products by approximately HK\$5.45 million.

The overall gross profit margin of the Group decreased from approximately 39.86% for the three months ended 30 June 2017 to 33.77% for the three months ended 30 June 2018. The decrease in the Group's gross profit margin for the three months ended 30 June 2018 was primarily due to the decrease of sales in the higher margin products, namely fire alarm.

Administrative and other expenses for the three months ended 30 June 2018 were approximately HK\$7.86 million (approximately HK\$4.94 million for the three months ended 30 June 2017), representing an increase of approximately 59.03%. Such increase was mainly due to the increase in the staff costs by approximately HK\$1.58 million.

Loss attributable to the owners of the Company for the three months ended 30 June 2018 amounted to approximately HK\$2.98 million (approximately HK\$2.07 million for the three months ended 30 June 2017). Loss per share attributable to owners of the Company was approximately HK0.31 cents for the three months ended 30 June 2018 (approximately HK0.26 cents for the three months ended 30 June 2017).
