The increase in the turnover of the Group was mainly attributable to the increase of 26% in the revenue of the Group's provision of technical support services when compared to the same period of last year, partly offset by decrease in the revenue of the Group's sales of software products. Cost of sales for the nine months ended 30 September 2018 is increased by 95% to approximately RMB37,322,000 (For the nine months ended 30 September 2017: approximately RMB19,155,000). The Group's gross profit ratio is 34% (For the nine months ended 30 September 2017: 58%).

Administrative expenses for the nine months ended 30 September 2018 is decreased by 35% to approximately RMB9,034,000 (For the nine months ended 30 September 2017: approximately RMB13,905,000). The decrease in administrative expenses was mainly due to the decrease in recognition of equity-settled share-based payment during the period when compared to the same period of last year. For the distribution and selling expenses, it is increased by 15% to RMB8,734,000 (For the nine months ended 30 September 2017: approximately RMB7,620,000). The increase in distribution and selling expenses was mainly due to the increase in staff costs. Besides, research and development costs increased by 64% to approximately RMB12,619,000 (For the nine months ended 30 September 2017: approximately RMB7,713,000). The increase in research and development costs was mainly due to the Group allocated more resources on researching the new technology aiming at increasing our market share. Other income mainly included refund of value added tax and interest income; and other gains and losses included exchange differences and fair value changes in investment fund.

Finance costs for the nine months ended 30 September 2018 was increased by 18% to approximately RMB1,734,000 (For the nine months ended 30 September 2017: approximately RMB1,475,000). The Group recorded a loss of approximately RMB14,653,000 for the nine months ended 30 September 2018 (For the nine months ended 30 September 2017: net profit of approximately RMB1,010,000). Change from profit to loss was mainly attributable to significantly increase in staff costs to cope with the needs for business expansion.

During the nine months ended 30 September 2018, the Company recorded equity-settled share-based payment of approximately RMB808,000 (For the nine months ended 30 September 2017: RMB4,742,000). BUSINESS REVIEW

Overall Business of the Group for the Third Quarter of 2018

In 2018, 2019 and 2020, the Group will continue to extend and broaden the implementation of the overall strategy that focuses on a core business and two complementary products. The proven results of the strategy over the past three quarters were highlighted by the 26% year-on-year increase in sales revenue and the total administrative costs decreased by 35%. The increase in cost of sales and research and development costs that led to a loss was inevitable due to the needs of overall strategy development in the next three years. when compared to the same period of last year, the Group changed from profit to loss, which reflected the impact of the strategy.

The discrepancy in economic growth among different cities in China is quite obvious due to its large population. Actively promoted by the banks and our partners, the increasingly diversified payment methods witnessed accelerated growth and the payment products have become mass products. Meanwhile, more online and offline payment methods have emerged. The non-inductive payment method jointly launched by the Group and the China Construction Bank has been adopted by the Home Inns Group. In light of the immense growth potential of the payment market, the Group launched an array of industry-specific payment products. With our in-depth industry knowledge, business transformation and innovative mindset, it is natural for the Group to seize the opportunity to pursue further growth and enter the vertical market.

Driven by the normalised structural reform and the ongoing market correction and improvement of the financial market, the Group continued to strategically expand the merchant service business and offline markets as one of our primary goals. Formerly serving only two provincial branches three years ago, the Group served 13 provincial branches in well-developed provinces like Zhejiang, Jiangsu and Guangdong in the first half of 2018. Therefore, we will further deepen our value added services and strengthen cooperation with banks in initiating projects targeting merchants and cardholders. Formerly independent businesses will be gradually consolidated, and banking outsourcing service products and payment products will be integrated to form a business portfolio.

Looking forward, the People's Bank will continue to strengthen the development and supervision of banking capital products, and to promote the development of this financial market, which had been highly recognised over the last two years. The trend will gradually change the banking sector's profit making model, and will become more obvious in the coming years. Therefore, the Group increased investment in the capital products to fully utilize the Group's resources and those available in the market. Our market share expanded quickly, and a sales model based on a more flexible business portfolio was formed.

In addition, due to our focus on the banking sector, the U.S.-China trade war led to an increase loss compared to last quarter.

OUTLOOK

Payment plus outsourcing service, and business platform evolved from traditional operations remain our main sources of big data. With the help of these products, the Group will consolidate the big data and the online and offline businesses to form a unique OFFLINE TO ONLINE (O2O) model. We also plan to extend the collaborative model with banks to other commercial banks. Meanwhile, the business portfolio will be better aligned to the overall development of the financial environment.

The Group will continue to implement stringent cost control, and strengthen the risk control over the overall operations and individual business in order to achieve a virtuous circle of identifying new revenue streams and lowering the costs.
