HK(IFRIC) – Int 23	Uncertainty over Income Tax Treatments
Amendments to HKFRS 9	Prepayment Features with Negative Compensation

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three months ended 31 March 2019

3.1 Changes in accounting policies

The Group applied HKFRS 16 with a date of initial application on 1 January 2019. As a result, the Group has changed its accounting policy for lease contracts as detailed below. The Group has adopted HKFRS 16 retrospectively from 1 January 2019, but has not restated comparatives for the 2018 reporting period, as permitted under the specific transitional provisions in the standard. The reclassifications and the adjustments arising from the new and amended requirements with respect to lease accounting are therefore recognised in the opening statement of financial position on 1 January 2019.

(a) *Adjustments recognised on adoption of HKFRS 16*

Before the adoption of HKFRS 16, commitments under operating leases for future periods were not recognised by the Group as liabilities. Operating lease rental expenses were recognised in the consolidated statement of profit or loss over the lease period on a straight-line basis. On adoption of HKFRS 16, the Group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of HKAS 17 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the Group's incremental borrowing rate as of 1 January 2019. The difference between the present value and the total remaining lease payments represents the cost of financing. Such finance cost will be charged to the consolidated statement of profit or loss in the period in which it is incurred using effective interest method.

The associated right-of-use assets were measured at the amount equal to the initial measurement of lease liabilities, adjusted by certain items as set out in note 3.1(b). The right-of-use assets were recognised in the consolidated statement of financial position. Depreciation was charged on a straight-line basis over the shorter of the asset's useful life or the lease term.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three months ended 31 March 2019

(b) Accounting policies adopted since 1 January 2019

Until the year ended 31 December 2018, payments made under operating leases were recognised as an expense on a straight-line basis over the lease term. From 1 January 2019 onwards, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payment that are based on an index or a rate;
- amounts expected to be payable by the lessee under residual value guarantees;
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three months ended 31 March 2019

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;
- any initial direct costs; and
- restoration costs.

Payments associated with short-term leases is recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

MANAGEMENT DISCUSSION AND ANALYSIS

SEGMENT INFORMATION

Segment information for the Group is presented as disclosed on note 4 to the condensed consolidated financial information.

FUTURE STRATEGIES AND PROSPECTS

Looking ahead, the Directors expect the semiconductor industry to experience an upward trend continuously, with various business opportunities emerging for the Group's future development. In particular, in the PRC market, the continuing support from the government, together with the emerging markets of the internet, smart cars, artificial intelligence and intelligent factories in the next few years are expected to bring new opportunities to the semiconductor packaging materials industry. According to the Frost & Sullivan Report, substantial demand for semiconductor packaging materials, especially for some new materials, will promote the market size of China's semiconductor packaging materials industry to reach approximately RMB109.9 billion in 2022, at a CAGR of approximately 16.6% from 2018 to 2022.

To meet the rising demand from the market, the Group will strive to improve its production capability by acquiring the necessary machinery and equipment for the expansion according to its strategic business plans. Besides, following the trial run of the Group's second encapsulant production line, its production capacity is expected to be enhanced, which would benefit the Group's business performance. The Group will also continuously devote R&D resources on new products and applications, raw materials and production technologies, particularly in relation to encapsulant. In light of the positive industry outlook and market potential, the Group will continue to focus on LED epoxy and silicone encapsulant, especially in the packaging of LED products for various applications. With over twelve years of experience in application knowhow and field engineering, the Group will always remain flexible and sensitive to the changing needs of the customers and to develop the best products for them.
