

CHARACTERISTICS OF THE GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Biosino Bio-Technology and Science Incorporation (the “Company”, together with its subsidiaries, the “Group”) collectively and individually accept full responsibilities, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (1) the information contained in this report is accurate and complete in all material respects and not misleading or deceptive; and (2) there are no other matters the omission of which would make any statement herein or this report misleading.*

NOTES

1. CORPORATE INFORMATION

The Company is a limited liability company established in the People's Republic of China (the "PRC"). The registered office of the Company is located at No. 27, Chaoqian Road, Science and Technology Industrial Park, Changping District, Beijing, the PRC.

During the period, the Group principally engaged in the manufacture, sale and distribution of in-vitro diagnostic reagents.

2. BASIS OF PREPARATION

The unaudited condensed consolidated statement of profit or loss and statement of comprehensive income have been prepared in accordance with Hong Kong Financial Reporting Standards (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants, accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance. The accounting policies and basis of preparation used in the preparation of the unaudited condensed consolidated statement of profit or loss and statement of comprehensive income are consistent with those used in the Company's audited financial statements for the year ended 31 December 2018.

3. REVENUE

Revenue represents the net invoiced value of goods sold, net of tax and surcharges, and after allowances for returns and trade discounts during the period.

An analysis of the Group's revenue is as follows:

| | Three months ended 31 March | |
|--|--------------------------------|------------------------------|
| | 2019 Unaudited RMB'000 | 2018 Unaudited RMB'000 |
| Sale of in-vitro diagnostic reagent products | 112,164 | 73,401 |
| | 112,164 | 73,401 |

NOTES

4. INCOME TAX EXPENSE

Taxes on profits assessable in the PRC, where the Group operates, have been calculated at the rate of tax prevailing in the PRC. Under the PRC income tax laws, enterprises are subject to corporate income tax ("CIT") at a rate of 25%.

The Company and Beijing Zhongsheng Jinyu Diagnostic Technology Co., Ltd., a subsidiary of the Company, are subject to a preferential rate of 15% under the PRC income tax law for a period of three years commencing from 1 January 2017 as they are accredited by relevant government authorities as High and New Technology Enterprises.

No Hong Kong profits tax has been provided because the Group did not generate any assessable profits in Hong Kong during the period.

|---------------|--------------------------------|------------------------------|
| | 2019 Unaudited RMB'000 | 2018 Unaudited RMB'000 |
| Current – PRC | 1,476 | 52 |

5. EARNINGS/(LOSS) PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE PARENT

The calculation of the basic earnings per share amount is based on the unaudited profit attributable to ordinary equity holders of the parent for the period and the weighted average of 144,707,176 (2018: 144,707,176) ordinary shares in issue during the period.

No adjustment has been made to the basic earnings per share amounts presented for the periods ended 31 March 2019 and 2018 as the Group had no potentially dilutive ordinary shares in issue during those periods.

6. RESERVES

The movements of reserves attributable to ordinary equity holders of the parent for the three months ended 31 March 2019 and 2018 are as follows:

[#] The capital reserve of the Group include non-distributable reserve of the Company and its subsidiaries created in accordance with accounting and financial regulations of the PRC.

7. INTERIM DIVIDEND

The Board does not recommend the payment of an interim dividend for the three months ended 31 March 2019 (2018: Nil).

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW FOR THE THREE MONTHS ENDED 31 MARCH 2019

The Group's revenue for the three months ended 31 March 2019 amounted to RMB112.1 million, representing an increase of 52.8% as compared with RMB73.4 million for the corresponding period last year.

Profit attributable to the shareholders of the Company for the three months ended 31 March 2019 was RMB2.31 million, representing an increase of 159% as compared with RMB3.94 million loss for the corresponding period last year. The increase of profit was mainly due to the increase in revenue as a result of the Group actively expanded in new areas and customers.

OUTLOOK AND FUTURE PROSPECTS

As people is more and more conscious on health concern, the population aging process accelerates and the number of people with chronic illness continues to increase. With the support of the government on hierarchical medical system and the "early prevention and early diagnosis and treatment" policy for disease, it is expected that total medical visits will maintain at a growth rate of over 5% in the next five years. It is also expected that medical expenditure per capita will maintain a growth rate of 5%-7%. The clinical value of IVD products is also of particular significance, and currently 80% of clinical diagnostic information is generated from IVD. Under the overall background of citizens' increasing awareness in disease prevention and health consciousness, as well as drug price reduction and removal of medicine markup policies, the medical treatment service will become the main income source for hospitals. In the next decade or even a longer time period, China's IVD industry will still enjoy a golden period of rapid development.

At present, the biochemical diagnostic reagent has become the most developed segment in IVD industry in the PRC. Under the combined influence of the medical insurance expense control policy and the need of hospital inspection fee adjustment and a decrease on reagent consumables cost, as well as the implementation of centralized procurement policy for medical consumables (including tender procurement, network procurement, negotiation procurement and joint procurement), hospitals (especially those at the county level and below) will tend to use more domestic reagents, especially the biochemical diagnosis with relatively high price-performance, which will be beneficial to domestic reagent and instruments enterprises.

MANAGEMENT DISCUSSION AND ANALYSIS

It is expected that as driven by social capital, the medical service market, in particular the basic level medical market and high-end medical service, will increase substantially. The demand for diagnostic reagents and general consumables will continue to increase, which are beneficial to the continuous growth of the size of our business and will increase the sales of our products.

The Company will establish its own core competitiveness by consolidating its business base, increasing its investment in technology and product development and adjusting its business strategy, and strive to become a larger and stronger enterprise through capital integration to ensure the interest of shareholders.

For research and development costs, in the first quarter of 2019, the Company completed the renewal registration of 11 products and obtained two filing certificates for Class I products, namely the whole blood nucleic acid extraction reagent (全血核酸提取試劑) and bacterial nucleic acid extraction reagent (細菌核酸提取試劑).
