**INTERIM REPORT
FOR THE SIX MONTHS ENDED
30 JUNE 2019**

CHARACTERISTICS OF THE GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

This report, for which the directors (the “Directors” and each, a “Director”) of SuperRobotics Limited (the “Company”, together with its subsidiaries, the “Group”) collectively and individually accept responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquires, confirm that to the best of their knowledge and belief the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

This report, containing the full text of the 2019 Interim Report of the Company, complies with the relevant requirements of the GEM Listing Rules in relation to information to accompany preliminary announcement of interim results. Printed version of the Company’s 2019 Interim Report will be delivered to the shareholders of the Company and available for viewing on the GEM website at <http://www.hkgem.com> and the Company’s website at <http://www.superrobotics.com.hk> on 14 August 2019.

MANAGEMENT DISCUSSION AND ANALYSIS

Business review

The Group is principally engaged in the sale of beauty products and provision of therapy services (collectively, the “**Beauty Business**”), as well as the provision of engineering products and related services (the “**Engineering Business**”). For the sale of beauty products, the Group offers a variety of beauty products under the brand name “Evidens de Beauté”, and a variety of medical skincare products, including the brand “Activa”. For the provision of therapy services, the Group operates a medical skincare centre at Soundwill Plaza in Causeway Bay.

For the engineering products, the Group offers WLAN and WIFI systems, and robotic products. For the provision of engineering related services, the Group provides equipment installation, support and maintenance services for WLAN and WIFI systems as well as robotics and automation systems.

Despite facing increased competition in the Hong Kong market, the performance of the Beauty Business as a whole has met the expectation of the Board. The revenue derived from the sale of beauty products and the provision of therapy services rendered has reduced by approximately 25.8% and has increased by approximately 13.7% to approximately HK\$1.5 million and approximately HK\$27.3 million, respectively for the six months ended 30 June 2019.

For the Engineering Business, during the six months ended 30 June 2019, the Group continued to develop and perfect its robotic products. The Group has also driven the commercialization of its products at steady pace through domestic platforms, upon which large-scale of civil application can be expected. In respect of police use, with its outstanding products and technology, the Group has been admitted as supply items of the “police equipment procurement centre agreement” of the Ministry of Public Security for 2018 to 2019, indicating the high recognition of its products, which further increased the influence of the Group’s products in the market. For the period under review the revenue of the Engineering Business has increased by approximately 37.4% and contributed a total revenue of approximately HK\$6.9 million to the total turnover of the Group.

Financial review

During the period under review, the Group recorded a turnover of approximately HK\$35.6 million, representing an increase of approximately 15.1% as compared with the corresponding period in 2018, of which approximately HK\$1.5 million (2018: approximately HK\$2.0 million), approximately HK\$27.2 million (2018: approximately HK\$24.0 million) and approximately HK\$6.9 million (2018: HK\$5.0 million) were generated from the sale of beauty products, provision of therapy services and sale of robotic products respectively.

The positive gross margin was approximately 49.7% (2018: positive gross margin of approximately 17.8%). The improvement in gross margin is mainly due to improvement in the gross margin of the Beauty Business, which has increased to 51.6% for the six months ended 30 June 2019 from 46% for the corresponding period in 2018 as well as improvement in the gross margin of the Engineering Business, which has increased from a negative gross margin for the six months end 30 June 2018 to 43.9% for the six months ended 30 June 2019.

Other income of approximately HK\$0.8 million (2018: approximately HK\$1.3 million) was mainly contributed by interest income from bank deposits and government subsidies.

Selling and distribution costs were approximately HK\$7.9 million for the six months ended 30 June 2019 (2018: approximately HK\$6.6 million), representing an increase of 19.7% compared with the corresponding period in 2018. Such increase was mainly attributed to the advertising and promotion expenses of approximately HK\$2.3 million (2018: approximately HK\$4.0 million) and approximately HK\$5.6 million (2018: approximately HK\$2.6 million) incurred by the Beauty Business and the Engineering Business respectively during the period under review. During the current financial period, the Group has stepped up its marketing efforts to promote its robotics products.

Administrative expenses were approximately HK\$60.4 million for the six months ended 30 June 2019 (2018: approximately HK\$45.9 million), representing an increase of 31.6% over the last corresponding period. Such increase was mainly attributed to the increase in research and development expense of HK\$15.6 million. The increase in administration expense is partially offset by a decrease in amortization of equity-settled share-based payment of HK\$1.1 million.

Consolidated loss attributable to owners of the Company amounted to approximately HK\$55.5 million for the six months ended 30 June 2019 (2018: approximately HK\$47.4 million). The increase in consolidated loss was mainly due to the increase in research and development cost incurred by the Engineering Business.

The robust development of the robotic industry in China represents enormous potential for market expansion for the Group in the future. The construction of intelligent cities has been in full swing based upon artificial intelligent technology. The wide application of intelligent robotics covers from police use to various aspects such as services and security. The overall global penetration rate of civil security is around 10% at present, while the penetration rate of civil security in the U.S. reaches 50%. The market penetration rate of civil security in China is only 11%, reflecting the larger potentials of civil security robotics market, which is likely to be the next hot sector where rapid industrialization will take place. Data suggests that the global investments in robotics and related services by 2019 are expected to be almost doubled as compared to 2015. In view of the growth rate of domestic security industry which will remain at above 10%, the market will continue to expand. The value of domestic security industry in 2018 amounted to over 600 billion. The Group's security robotics has the potential to become the major replenishment for security systems and expand into civil market for the realization of large-scale expansion.

The Group will continue to focus on three robotic production lines: police use, commercial use and civilian use, in accordance with market conditions and the status of product development. The Group will also incorporate its experience in diversified robotic technology so as to commit itself to producing customised robots and providing total mechatronic solutions for customers across various industries.
