More details on the Placement had been disclosed in the relevant announcement of the Company dated 8 December 2015 and the circular dated 18 March 2016. The Placement had been completed on 9 May 2016. As at 30 June 2019, the use of net proceeds from the Placement was as follows:– (1) approximately HK\$73 million for refurbishment and other expenses relating to the PRC Properties; (2) approximately HK\$51.9 million for investment in Macro China Holding Limited (“Macro”), business development under DataCube Research Centre Limited (“DataCube Research Centre” or “DataCube”), IT business in Japan and a data center in the PRC; (3) as a result of the loss in book value of the listed securities held by the Group, the Group has not realised those listed securities to settle part of the consideration for the PRC Properties as was planned. Instead, approximately HK\$36.1 million had been applied to settle the consideration for the PRC Properties; and (4) approximately HK\$69 million for administrative expenses and other expenses incurred by the Group.

During the six months ended 30 June 2019, the Company has continued to refine our business structure. On 15 January 2019, the Company entered into a non-legally binding memorandum of understanding (the “MOU”) with an independent third party in relation to the possible acquisition of certain land and buildings with a data centre located in Nansha District, Guangzhou, the People’s Republic of China. The Company has to pay a refundable deposit of RMB20 million in cash to the independent third party upon signing of the MOU. As no formal agreement had been entered into between the Group and the Vendor on or before the date falling 180 days from the date (“PRC”) of execution of the MOU (i.e. 15 July 2019) nor there be an agreement reached in extending the date of entering into the formal agreement in relations thereto, the MOU had automatically lapsed and ceased to have any effect. The Group did not pay any deposit in relation to the MOU. Details of the MOU and the lapse of MOU are set out in the announcements dated 15 January 2019 and 22 July 2019 respectively.

Meanwhile, the Group had made various changes with the vision to equip and strengthen ourselves for the up-coming business developments.

NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. Accounting policies

These unaudited condensed consolidated interim financial statements for the six months ended 30 June 2019 have been prepared in accordance with Hong Kong Accounting Standard (“HKAS”) 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”) and applicable disclosure requirements of the Rules Governing the Listing of Securities on the GEM of The Stock Exchange of Hong Kong Limited.

These unaudited condensed consolidated interim financial statements should be read in conjunction with the annual consolidated financial statements for the year ended 31 December 2018, which have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”). The accounting policies and methods of computation used in the preparation of these unaudited condensed interim financial statements are consistent with those used in the annual consolidated financial statements for the year ended 31 December 2018 except as stated below.

Leases

The Group as lessee

Leases are recognised as right-of-use assets and corresponding lease liabilities when the leased assets are available for use by the Group. Right-of-use assets are stated at cost less accumulated depreciation and impairment losses. Depreciation of right-of-use assets is calculated at rates to write off their cost over the shorter of the asset’s useful life and the lease term on a straight-line basis. The principal annual rates are as follows:

Land and buildings	Over the lease terms
--------------------	----------------------

Right-of-use assets are measured at cost comprising the amount of the initial measurement of the lease liabilities, lease payments prepaid, initial direct costs and the restoration costs. Lease liabilities include the net present value of the lease payments discounted using the interest rate implicit in the lease if that rate can be determined, or otherwise the Group’s incremental borrowing rate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the lease liability.

Payments associated with short-term leases and leases of low-value assets are recognised as expenses in profit or loss on a straight-line basis over the lease terms. Short-term leases are leases with an initial lease term of 12 months or less. Low-value assets are assets of value below HK\$5,000.

2. Adoption of new and revised Hong Kong financial reporting standards

In the current period, the Group has adopted all the new and revised HKFRSs issued by the HKICPA that are relevant to its operations and effective for its accounting year beginning on 1 January 2019. HKFRSs comprise Hong Kong Financial Reporting Standards (“HKFRS”); HKAS and Interpretations. The adoption of these new and revised HKFRSs did not result in significant changes to the Group’s accounting policies, presentation of the Group’s financial statements and amounts reported for the current period and prior period except as stated below.

HKFRS 16 “Leases”

On adoption of HKFRS 16, the Group recognised right-of-use assets and lease liabilities in relation to leases which had previously been classified as ‘operating leases’ under HKAS 17 “Leases”.

HKFRS 16 has been applied retrospectively and resulted in changes in the consolidated amounts reported in the financial statements as follows:

	HK\$'000
At 31 December 2018:	
Increase in right-of-use assets	3,259
Increase in lease liabilities	3,369
Increase in accumulated losses	110
For the six months ended 30 June 2018:	
Decrease in administrative expenses	115
Increase in lease interests	110
Decrease in loss for the period	5
Decrease in loss per share (cents)	—

The Group has not applied the new HKFRSs that have been issued but are not yet effective. The Group has already commenced an assessment of the impact of these new HKFRSs but is not yet in a position to state whether these new HKFRSs would have a material impact on its results of operations and financial position.

3. Operating segment information

The Group has four reportable segments as follows:

- the software development and system integration segment engages in (i) the sale of computer hardware; (ii) the provision of software development services; (iii) the provision of system integration services; and (iv) the provision of technical support and maintenance services;
- provision of IT infrastructure solutions and maintenance services (“IT solutions and maintenance”);
- money lending; and
- Securities trading (“Securities investments”).

Segment assets exclude equity investments at fair value through other comprehensive income and other unallocated head office and corporate assets.

Segment liabilities exclude income tax payables, deferred tax liabilities and other unallocated head office and corporate liabilities.

The following table presents revenue and loss for the Group’s operating segments for the six months ended 30 June 2019 and 2018 respectively.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following disclosures of fair value measurements use a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value:

Level 1 inputs: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2 inputs: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs: unobservable inputs for the asset or liability.

The Group's policy is to recognise transfers into and transfers out of any of the three levels as of the date of the event or change in circumstances that caused the transfer.
