2019/20
FIRST QUARTERLY
REPORT

CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors collectively and individually accept full responsibility, includes particulars given in compliance with GEM Listing Rules for the purpose of giving information with regard to the company. The directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

PROSPECT

For the Swimwear and garment segment, due to the keen competition in the market, the orders of high-end swimwear and garment products for this segment decreased continuously in Current Period. In view of the above, we are actively seeking new business opportunities with new customers and new products. Nevertheless we shall continue with our strategy of expanding customer base and product mix with the aim to improve performance of this segment. Also, our Group continues to closely monitor and control cost in order to push up the gross profit margin of Swimwear and garment segment.

For the Trading and on-line shopping related segment, it mainly represented trading of second-hand mobile phones, cameras and electronic parts business. The demand from customers was stable and we would put more resources to develop this segment in the coming year. The Company intends to expand its existing trading business of second-hand mobile phones into assisting mobile phone wholesalers and mobile phone network operators to sell second-hand mobile phones through online platform globally. Our Group will continue to seek and explore other business opportunity for the Trading and on-line shopping related segment.

In order to diversify our business, the Group has obtained a Money Lenders Licence in July 2017 and started the business of money lending in August 2017.

The management of the Group continues to formulate its business strategies to optimise the use of its operating and financial resources. It will consider to diversify its operations including but not limited to invest in financial instruments in order to ensure cash availability through managing cash on hand to best meet the Group cash and liquidity needs to manage risk. It will also consider to reorganise the non-performing business segments including but not limited to the disposal or downsizing of the non-performing business segments.
