MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

The Group is a well-established integrated logistics solution provider in Malaysia principally engaged in providing international freight forwarding and logistics services, with a primary focus on air/sea freight forwarding and related services, transportation and warehousing to customers worldwide.

The Group offers a comprehensive and wide range of services to meet its customers' needs, including air/sea freight forwarding and related services, trucking and warehousing related services. In addition, the Group provides value-added services such as supply chain management services including pick & pack, distribution and stock & inventory report, security escort services and tracking services. These services are complementary to one another, and provide customers a wide range of services with cost savings. Although the freight forwarding industry in Malaysia is highly fragmented and competitive, in particular, we directly and indirectly compete with other integrated logistics service providers on a local, regional and international basis in the form of pricing, range of services provided, information technology and network of customer, the Group will implement various strategies as stated in the Prospectus with the intention to strengthen our market position. The Group will closely monitor the market situations and make necessary adjustments to its strategies and operations.

For the nine months ended 30 September 2019, our integrated logistics services can be broadly categorised into (1) air freight forwarding and related services; (2) sea freight forwarding and related services; and (3) transportation and warehousing related services.

1. Air Freight Forwarding and Related Services

The revenue from the air freight services accounted for approximately RM14.1 million and RM25.1million for the nine months ended 30 September 2019 and 2018, respectively. Revenue from air freight services mainly consists of fee of import & export air freight cargo space, customs clearance, local trucking and haulage to and from seaport and customers/warehouses, other services related to air freight. Such revenue is mainly driven by the volume of goods, type of services provided, type of cargo, among other factors.

The shipment volume of the Group's air freight forwarding and related services during the period ended 30 September 2019 and 2018 is set out in the table as below:

	For the Nine months ended 30 September	
	2019 '000 kg	2018 '000 kg
Air freight shipment volume		
(a) Export	3,118	3,386
(b) Import	2,197	3,245

2. Sea Freight Forwarding and Related Services

The revenue from the sea freight services accounted for approximately RM26.1 million and RM24.7 million for the nine months ended 30 September 2019 and 2018, respectively. Revenue from sea freight services mainly consists of fee of import & export sea freight cargo space, customs clearance, local trucking and haulage to and from seaport and customers/warehouses, other services related to sea freight. Such revenue is driven by the volume of goods, type of services provided, type of cargo, among other factors.

The shipment volume in Twenty-foot Equivalent Unit ("TEU") of the Group's sea freight forwarding and related services during the period ended 30 September 2019 and 2018 is set out in the table as below:

	For the nine months ended 30 September	
	2019 TEU	2018 TEU
Sea freight shipment volume		
(a) Export	7,292	5,163
(b) Import	7,924	9,521

3. Trucking and Related Services

(i) Trucking and Related Services

The Group's trucking and related services can be divided into two categories: (i) supporting service for its freight forwarding business; and (ii) service which does not involve sea freight or air freight.

Majority of the transportation revenue was from the supporting services for the Group's freight forwarding business including income from haulage and trucking services. Such revenue has been taken into account as part of the revenue generated from the air/sea freight forwarding services provided by the Group.

The revenue from the trucking services which does not involve air freight or sea freight accounted for approximately RM1.8 million and RM1.5 million for the nine months ended 30 September 2019 and 2018, respectively. Revenue from such services mainly consists of delivery fee for trucking services. Such revenue is mainly driven by the volume of goods delivered, and the numbers of trips and types of customers served, among other factors.

(ii) Warehousing and Related Services

The Group's warehousing business mainly serves a supporting role for its freight forwarding services. The Group's warehousing services provided in Port Klang mainly consisted of general warehousing services. The warehousing services provided in Kuala Lumpur and Penang airports mainly served as temporary storages of goods for the Group's international air freight business. Therefore, revenue from the Group's warehouse business only accounted for an insignificant portion of approximately 1% of the Group's total revenue for the nine months ended 30 September 2019 (2018: 1%).

Future Prospects and Outlook

The Group aims to strengthen its position as an integrated logistics solution service provider in Malaysia. The Directors believe that there are (i) still plenty of room for growth for business in Penang given the fact that companies continue to set up new manufacturing plants in Penang; (ii) new business opportunities in Malacca, Johor and border of Thailand upon opening up of the borders of the ASEAN countries. To achieve this, the Group intends to further expand its business in major gateways of Malaysia and expand the scope of services to cover cross border trucking, haulage and rail freight. The Group has recently attracted a new customer which is a forwarding agent of a world leading multinational engineering and electronics company headquartered in Germany. It is expected that the new customer will generate recurring business and it may have a positive impact on our revenue.
