# Chairman's Statement

Dear Shareholders,

On behalf of the board (the "**Board**") of Directors, I am pleased to present the consolidated financial results of the Group for the year ended 31 December 2019 (the "**Year**") to the shareholders of the Company (the "**Shareholders**").

## REVIEW

For the year ended 31 December 2019, revenue of the Group increased to approximately S\$36.7 million as compared to approximately S\$34.8 million for the year ended 31 December 2018, representing an increase of approximately 5.5%. Increase in revenue was primarily attributable to increase in human resources outsourcing services in public sector and the increase in human resources recruitment services. In line with the increase in revenue, the Group's gross profit increased by approximately S\$0.1 million from approximately S\$5.6 million for the year ended 31 December 2018 to approximately S\$5.7 million for the year ended 31 December 2019. Gross profit margin decreased from approximately 16.0% for the year ended 31 December 2018 to approximately 15.6% for the year ended 31 December 2019 due to reaction to intense competition within the market by adjustment of our business strategies.

The Group recorded a loss for the year of approximately S\$1.2 million for the year ended 31 December 2019 compared to a loss for the year of approximately S\$2.5 million for the year ended 31 December 2018. This was mainly due to the combined effect of increase in revenue and gross profit exacerbated by lower administrative expenses and lesser government subsidies received.

## APPRECIATION

On behalf of the Board and the management, I would like to express my sincere gratitude to all of our clients, investors, suppliers, business partners and Shareholders for their continued valuable support and trust. I would also like to take this opportunity to thank all of our staff for their tireless efforts, diligence and contribution during the Year.

# Management Discussion and Analysis

## BUSINESS REVIEW AND OUTLOOK

We are a Singapore-based human resources service provider and we are principally engaged in the provision of human resources outsourcing services and human resources recruitment services.

The Group faced increasing competition in both human resources outsourcing services and human resources recruitment services during the year ended 31 December 2019. In particular, the Group noticed an increased number of competitors and their aggressive pricing strategies in bidding for new projects. Hence, the Group proactively secured new jobs from existing/potential clients by offering competitive pricing in response to the intense market competition to strengthen our market position in the industry.

We believe that the current financial year should continue to be challenging for the human resources services sector due to the uncertain global environment and rising costs in the Republic of Singapore (“**Singapore**”) together with the 2019 social unrest and the uncertain economic slowdown in Hong Kong that may affect the Singapore’s and Hong Kong Special Administrative Region of the People’s Republic of China’s (“**Hong Kong**”) economy. The current outbreak of coronavirus could have a deteriorated impact on the economy of Singapore and Hong Kong due to the increased economic links with the People’s Republic of China (“**China**”) resulting in further decline of mainland tourist arrivals and poor local consumer sentiment. Since the global economic conditions remain volatile, the Directors will constantly review the market condition and adjust the Group’s business strategy to counter the contingent risks.

The Group will explore any business opportunities by investing in new ventures which have strategic and/or operational synergies with the Group to further strengthen our position as an established human resources services provider both in Singapore and in Hong Kong and act prudently and selectively to explore potential investment opportunities in other regions or a better diversified business line at opportune time to leverage the Group’s business.

We will continue to capture market opportunities so as to achieve a sustainable business growth and long-term benefits of our Shareholders.

## FINANCIAL REVIEW REVENUE

The Group’s revenue increased by approximately S\$1.9 million, or 5.5%, from approximately S\$34.8 million for the year ended 31 December 2018 to approximately S\$36.7 million for the year ended 31 December 2019. The Group’s revenue from human resources outsourcing services increased by approximately S\$1.8 million from approximately S\$33.5 million for the year ended 31 December 2018 to approximately S\$35.3 million for the year ended 31 December 2019 and human resources recruitment services increased by approximately S\$0.2 million from approximately S\$1.2 million for the year ended 31 December 2018 to approximately S\$1.4 million for the year ended 31 December 2019.

## HUMAN RESOURCES OUTSOURCING SERVICES

The revenue from human resources outsourcing services increased from approximately S\$33.5 million for the year ended 31 December 2018 to approximately S\$35.3 million for the year ended 31 December 2019, which represented an increase of approximately 5.4%. The increase in the revenue from human resources outsourcing services was mainly attributable to increase in demand for our human resources outsourcing services from clients in the public sector and received more job orders from different Singapore government agencies due to offering competitive pricing in response to the market condition.

## HUMAN RESOURCES RECRUITMENT SERVICES

The revenue from human resources recruitment services increased by approximately S\$0.2 million or 16.7%, from approximately S\$1.2 million for the year ended 31 December 2018 to approximately S\$1.4 million for the year ended 31 December 2019, primarily attributable to the increase in demand on new recruits from our clients in private sector.

# Management Discussion and Analysis

## OTHER HUMAN RESOURCES SUPPORT SERVICES

The revenue derived from other human resources support services decreased by approximately S\$40,000 or 58.8% from approximately S\$68,000 for the year ended 31 December 2018 to approximately S\$28,000 for the year ended 31 December 2019, which was mainly attributable to the decrease in revenue derived from referral services and parking services.

## COST OF SERVICES

The Group's cost of services increased by approximately S\$1.8 million, or 6.2%, from approximately S\$29.2 million for the year ended 31 December 2018 to approximately S\$31.0 million for the year ended 31 December 2019. The labour costs and other related costs were approximately S\$30.3 million and S\$31.9 million for the year ended 31 December 2018 and 2019 respectively and the aggregate government subsidies received were approximately S\$1.1 million and S\$0.9 million for the year ended 31 December 2018 and 2019 respectively. Therefore, the cost of services increase mainly due to the increase in labour costs paid by approximately S\$1.6 million, or 5.3% which was generally in line with the increase in revenue and partially offset by the decrease in government subsidies received by approximately S\$0.2 million, or 18.2%. For details and reasons for such decrease in government subsidies received, please refer to the section headed "Summary — Government subsidies" and "Financial information — Principal components of consolidated statements of profit or loss and other comprehensive income — Cost of Services" in the Company's prospectus dated 28 June 2017 ("**Prospectus**"). The wage credit scheme mentioned therein has been extended to 2020.

## GROSS PROFIT AND GROSS PROFIT MARGIN

The Group's gross profit increased by approximately S\$0.1 million, or 1.8%, from approximately S\$5.6 million for the year ended 31 December 2018 to approximately S\$5.7 million for the year ended 31 December 2019, which was mainly due to the combined effect of increase in revenue and the decrease in government subsidies received. Our gross profit margin decreased from approximately 16.0% for the year ended 31 December 2018 to approximately 15.6% for the year ended 31 December 2019, which was primarily due to the reasons mentioned above.

## OTHER INCOME

Other income increased by approximately S\$66,000, or 63.5% from approximately S\$104,000 for the year ended 31 December 2018 to approximately S\$170,000 for the year ended 31 December 2019 due to increase in sundry income and interest income of approximately S\$40,000 and S\$37,000 respectively which are offset by the decrease in service income of approximately S\$11,000 in the year ended 31 December 2019.

## ADMINISTRATIVE EXPENSES

The Group's administrative expenses decreased by approximately S\$1.1 million, or 13.8%, from approximately S\$8.0 million for the year ended 31 December 2018 to approximately S\$6.9 million for the year ended 31 December 2019, which was mainly due to decrease in marketing expenses and internal staff costs in the year ended 31 December 2019.

## DEPRECIATION

Depreciation expenses of plant and equipment remained relatively stable at approximately S\$0.3 million and S\$0.3 million for the years ended 31 December 2018 and 2019, respectively. Depreciation expenses of right-of-use assets increased by approximately \$1.0 million from approximately S\$Nil for the year ended 31 December 2018 to approximately S\$1.0 million for the year ended 31 December 2019. The increase in depreciation expenses was mainly due to the amortisation arose from initial recognition of right-of-use assets under the International Financial Reporting Standards ("**IFRS**") 16 adopted for the year ended 31 December 2019.

# Management Discussion and Analysis

The decrease was mainly attributable to the increase in gross profit mainly resulting from the increase in revenue from human resources outsourcing and recruitment service due to offering competitive pricing in response to the market condition and the decrease in government subsidies received and decrease in administrative expenses due to the decrease in marketing expenses and internal staff costs in 2019 as mentioned above.

The Group has continued to provide adequate resources to monitor the ESG issues, policies and practices and performance on an ongoing basis, and has maintained high ethical standards on conducting business and complying strictly with all relevant laws, rules and regulations to achieve sustainable development of the environment and society and bring benefits to our employees and other stakeholders.

The ESG issues and performance of the Group's operations in Singapore and Hong Kong in particular on the material areas and aspects during the year are summarised below:

## A. ENVIRONMENTAL AREAS AND ASPECTS

### 1.1 ENVIRONMENTAL AREAS

The Group supports a "Green Environment" and has implemented policy measures to ensure our operation to be energy, water, and resources saving, and without environmental detriment, and has strictly abided to the local environmental laws, rules and regulations. We have also continued to work on raising the environmental awareness among our employees and business associates and contacts to protect the environment by implementing green practices.

Since the Group's principal business is to provide human resources services including human resources outsourcing services and human resources recruitment services, our activities are therefore operating under normal in-office environment. We only consume electricity and fresh water, printing paper and office utensils. We do not produce, emit or discharge any hazardous pollutants or polluted water.

### 1.2 ENVIRONMENTAL ASPECTS

#### A1. Emissions and Wastes

As the Group only operates under a normal in-office environment and does not operate any transportation fleet, we therefore do not directly generate any hazardous gases such as NO<sub>x</sub>, SO<sub>x</sub> or greenhouse gases namely carbon dioxide ("CO<sub>2</sub>") emissions and wastes. We, however, do indirectly generate CO<sub>2</sub> emissions, an important contributor to global warming, through the use of electricity.

As means to save costs and to reduce indirect CO<sub>2</sub> emissions and to combat global warming, we target to control our electricity consumption, and have introduced measures to ensure that power is turned off when work is not being carried out, encourage the use of natural ventilation to replace air-conditioning in allowable conditions, and all air-conditioners' temperature should not be lower than 24°C under normal conditions. The Group has also invested in energy saving tools and equipment such as the purchase of energy-saving copier and computers, installation of LED lights, and has encouraged the employees to use teleconferencing to reduce their flight travels, and to use public transport during works in the city.

# Environmental, Social and Governance Report

## (i) Greenhouse Gas Emissions

For the period from 1 January 2019 to 31 December 2019 (the “**2019 Reporting Period**”), a total of approximately 61.15 tonnes of greenhouse gases (mainly CO<sub>2</sub>) were indirectly generated and emitted from our Singapore and Hong Kong offices uses of electricity, which was approximately 2.85 tonnes or approximately 4.45% lower than the period from 1 January 2018 to 31 December 2018 (the “**2018 Reporting Period**”).

If we further consider that the Group’s overall turnover has increased approximately 5.5% in 2019 over that of 2018, this reduction of indirect emission of GHG-CO<sub>2</sub> is even more impressive. It is a solid endorsement to the successful implementation of our energy-saving policies. During the 2019 Reporting Period, in terms of per internal worker per year, we recorded 0.97 tonnes of GHG-CO<sub>2</sub> per year, which was approximately 13.7% higher than the 2018 Reporting Period due to the decrease in headcount from 75 to 63 internal workers. For the coming year, we will continue with our energy-saving measures and target to continuously lower the indirect GHG-CO<sub>2</sub> emission by 1.5%.

## (ii) Polluted Water Discharges

The Group does not generate any hazardous water. We only consume an insignificant amount of water for employees’ daily hygiene needs. The water is sourced and discharged without any problems through the offices centralised water supply and discharge network.

## (iii) Hazardous and Non-hazardous Wastes

The Group’s in-office principal activity of human resources services only produces general office wastes mainly used paper and office utensils. Most of these wastes are non-hazardous. However, a small amount of hazardous wastes such as printer toner cartridges, ink boxes and batteries are generated. For the obsolete and old electronic devices such as computers, we donate them to charity organisations. For the printer toner cartridges and ink boxes, we attempt to reduce them through the minimisation of printing. The remaining wastes are collected regularly by qualified collectors, who disposed of them in an environmentally friendly process.

For the 2019 Reporting Period, same as the 2018 Reporting Period, the Group had no non-compliance or fines or disputes or warning notices received in relation to hazardous and non-hazardous air emissions and wastes disposal, and polluted or clean water discharges. In the coming year, we are confident that our measures in controlling our activities will continue to result with no air, water and wastes pollutant will be unreasonably produced.

# Environmental, Social and Governance Report

## A2. Use of Resources

Given the in-office nature of our business activities, we only consume electricity, fresh water and printing paper and ink. Although we only have a small business operation, we are conscious of our responsibility of conserving natural resources. We have approved and implemented clear environmental policy and measures with the target of a green practices without pollution and saving of scarce resources. Our uses of electricity, printing papers and water for the 2018 Reporting Period and 2019 Reporting Period were recorded in below:

### (i) Efficient Use of Energy

Energy Consumption Sources	Energy Consumption (in kWh) during the Reporting Period		
	2018	2019	(+/-%)
Electricity	81,049	77,406	-4.5%

Electricity is sourced from the city grid line which is the only source of energy used for our offices daily operations. During the 2019 Reporting Period, our offices consumed a total of 77,406 kWh and achieve an approximate 4.5% reduction of electricity consumption when compared to the 2018 Reporting Period. The per internal worker per kWh per year was at 1,228.26 kWh during the 2019 Reporting Period, resulting in an approximate 13.6% increase when compared to the 2018 Reporting Period due to the decrease in headcount from 75 to 63 internal workers. Nevertheless, we have encouraged our employees to use electricity efficiently and in an environmentally friendly manner.

- Turn off electrical appliances, lights in a timely manner and when not in use;
- Install and use energy-saving electrical appliances; and
- Control heating and cooling devices with time controls.

For the coming year, we will persist to enforce energy saving practices and target to lower the electricity consumption by 1.5%.

### (ii) Efficient Use of Paper

For the 2019 Reporting Period, based on our copier reading, a total of 324,336 pieces of printing paper were used, which was 59,999 pieces or approximately 15.6% less than the 2018 Reporting Period. It was an encouraging saving on quantity of printing papers used as well as costs, which showed a success on our implementation of the following paper usage reduction measures:

- Avoid unnecessary printing and print on both sides;
- Use recycled papers and reuse paper-made products such as envelopes and folders; and
- Replace papers communication and files electronically.

# Environmental, Social and Governance Report

## (iii) Consumption of Fresh Water

Fresh water is supplied from the city water system and used mainly for our employees' daily general hygiene needs which the amount used is marginal and determined to be immaterial. We have continued to encourage employees to avoid excessive usage of fresh water.

## A3. The Environment and Natural Resources

Although the Group's business and operations have an insignificant impact on the environment and natural resource usage, the Group still continues to act responsibly to the environment by reducing and saving natural resource consumption, and constantly reviewing ways and means to accomplish further resource savings and environmental protection. It is not just for costs saving, it is also for conserving natural resources and the environment for tomorrow. The Group has always monitored the usage of electricity, water and printing paper, invested in modern technology and equipment with energy saving and resources conservation, educated and alerted our employees awareness on natural resources consumption, stopping pollution, and practicing green.

Throughout the 2019 Reporting Period, same as the 2018 Reporting Period, no irregularities on natural resource consumption were reported and alerted to the management.

## A4. Climate Change

The Group's Management Team identifies global warming and conservation of fresh water as the most significant climatic issues that may impact the Group after communicating with stakeholders and evaluating the Group's operations in light of the current global environmental conditions. These two climatic issues not only affect our environment, they also impinge on the operation costs of the Group.

Global warming is mainly caused by the excessive release of GHG-CO<sub>2</sub> into the atmosphere, which is directly and indirectly the result of uses of fossil fuels for transportation and electricity generation. For the Reporting Period, although the Group's operations and activities did not directly generate any GHG-CO<sub>2</sub> emission, we did generate GHG-CO<sub>2</sub> indirectly by consuming electricity. We have implemented policies and measures, explained in prior sections, to use electricity efficiently in order to reduce our GHG-CO<sub>2</sub> emission. Furthermore, we have supported reforestation and implemented less-paper office to curb our contribution to global warming.

To conserve the consumption of fresh water, one of the most precious natural resources today, the Group has taken measures to encourage employees to use water wisely and responsibly.

For the 2019 Reporting Period, the Group's business operations and activities, except for the above two issues, did not lead to any events or issues that may impact the climate significantly. The Group has also been taking measures to lower the indirect emission of GHG-CO<sub>2</sub> and reduce fresh water consumption for the coming year.

As per clients' request, the Group will provide training programmes to our outsourced employees to prepare them to render quality services to meet our clients' standards. ## 2.3 OPERATION PRACTICES ASPECTS

### B5. Supply Chain Management

Given the nature of our business operation, the Group only needs to purchase general office stationery and supplies, which are small in term of quantities and dollar amount compared to the total operation expenses. We therefore do not require to set up a purchase division and to formulate comprehensive purchase policies, rules and regulations. Our finance and accounting department has taken the general purchases role and normally procures those office items locally.

Although the Group does not make a large amount of purchases, it applies an open, fair and standardised process in procuring goods and services that adheres to our internal control requirements. This helps ensure fair pricing and acquisition of quality supplies and services. Furthermore, the Group tries to purchase items which are environmental-friendly and from official suppliers especially the purchase of professional software. The Group does not see its purchases posing any environmental and social risks to the society at large.

### B6. Product Responsibility

Product responsibility refers to the quality of the products and services provided in relating to health and safety, advertising, labelling and privacy matters. In our case as a human resources provider, no physical product is produced and only services are provided, the key product responsibilities are therefore on providing accurate and useful information, meeting the satisfaction and privacy matters of our clients.

For our human resources outsourcing service business, the important factors are the capability to select suitable employees and train up quality employees for the designated jobs, while for our human resources recruitment service business, the critical factors are the ability to screen and select the right potential candidates for the vacancies. The Group is committed to providing accurate and true service information to customers, and through many years of operation has developed very detailed human resources outsourcing and recruitment processes and systems, which are able to meet the requirements and to give satisfactions to the clients.

For the 2019 Reporting Period, same as the 2018 Reporting Period, the Group continued to provide and maintain good quality services to the clients as the return of sales was so low at only approximately 0.15% (approximately 0.2% in the 2018 Reporting Period) for outsourcing business.

*(Incorporated in the Cayman Islands with limited liability)*

### **OPINION**

We have audited the consolidated financial statements of Omnibridge Holdings Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") set out on pages 50 to 101, which comprise the consolidated statement of financial position as at 31 December 2019, and the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 December 2019, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs") issued by the International Accounting Standards Board (the "IASB") and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

### **BASIS FOR OPINION**

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

### Key audit matter

### How our audit addressed the key audit matter

#### Impairment of trade receivables

*Refer to Note 4 and Note 16 to the consolidated financial statements.*

As at 31 December 2019, trade receivables of the Group amounted to approximately S\$5,979,000 (2018: approximately S\$6,176,000) after allowance for expected credit losses of trade receivables of approximately S\$147,000 (2018: approximately S\$100,000). The Group's trade receivable balance was significant as it represented approximately 29.6% (2018: 29.5%) of the total assets of the Group. The collectability of trade receivables is a key element of the Group's working capital management, which is managed on an ongoing basis by management. Management applied judgement in assessing the expected credit losses. Trade receivables relating to customers that are individually significant are assessed individually for provision for impairment allowance based on the background and reputation of the customer, its historical settlement records and past experience. Expected credit losses are also estimated by grouping the remaining trade receivables based on shared credit risk characteristics and collectively assessed for likelihood of recovery, taking into account the nature of the customers and its ageing category, and applying expected credit loss rates to the respective gross carrying amounts of the trade receivables. The Group has performed historical analysis and identified key economic variables impacting credit risk and expected credit losses.

We focused on this area due to the magnitude of the trade receivables and the estimation and judgement involved in determining the expected credit losses allowance of the trade receivables.

Our procedures in relation to the management's impairment assessment of trade receivables included:

- Understanding and evaluating the key controls that the Group has implemented to manage and monitor its credit risk, and validating the control effectiveness on a sample basis;
- Checking, on a sample basis, the ageing profile of the trade receivables as at 31 December 2019 to the underlying financial records and post year-end settlements to bank receipts;
- Inquiring of management for the status of each of the material trade receivables past due as at year end and corroborating explanations from management with supporting evidence, such as performing public search of credit profile of selected customers, understanding on-going business relationship with the customers based on trade records, checking historical and subsequent settlement records of and other correspondence with the customers; and
- Assessing the appropriateness of the expected credit losses provisioning methodology, examining the key data inputs on a sample basis to assess their accuracy and completeness, and challenging the assumptions, including both historical and forward-looking information, used to determine the expected credit losses.

We found that the management judgment and estimates used to assess the recoverability of the trade receivables and determine the impairment provision to be supportable by available evidence.

## OTHER INFORMATION

The directors are responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated financial statements and our auditors' report thereon ("Other Information").

Our opinion on the consolidated financial statements does not cover the Other Information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the Other Information and, in doing so, consider whether the Other Information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this Other Information, we are required to report that fact. We have nothing to report in this regard.

## RESPONSIBILITIES OF THE DIRECTORS AND THE AUDIT COMMITTEE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRSs issued by the IASB and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Group's financial reporting process.

## AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. We report our opinion solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

## Independent Auditors' Report

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement director on the audit resulting in this independent auditors' report is Kwok Tsz Chun.

## 2. APPLICATION OF NEW AND AMENDMENTS TO INTERNATIONAL FINANCIAL REPORTING STANDARDS (“**IFRSs**”)

### NEW AND AMENDMENTS TO IFRSs THAT ARE MANDATORILY EFFECTIVE FOR THE CURRENT YEAR

The Group has applied the following new and amendments to IFRSs issued by the International Accounting Standards Board (the “**IASB**”) for the first time in the current year:

IAS 19 (Amendments)	Plan Amendment, Curtailment or Settlement
IAS 28 (Amendments)	Long-term interests in Associates and Joint Ventures
IFRS (Amendments)	Annual Improvements to IFRSs 2015–2017 Cycle
IFRS 9 (Amendments)	Prepayment Features with Negative Compensation
IFRS 16	Leases
IFRIC-Int 23	Uncertainty over Income Tax Treatments

Except as described below, the application of the new and amendments to IFRSs in the current year has had no material impact on the Group’s financial performance and positions for the current and prior periods and/or on the disclosures set out in these consolidated financial statements.

# Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

## 2. APPLICATION OF NEW AND AMENDMENTS TO INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRSs”) (Continued)

### IFRS 16 LEASES

The Group has applied IFRS 16 for the first time in the current year. IFRS 16 superseded IAS 17 *Leases* (“IAS 17”), and the related interpretations.

### DEFINITION OF A LEASE

The Group has elected the practical expedient to apply IFRS 16 to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 *Determining whether an Arrangement contains a Lease* and not apply this standard to contracts that were not previously identified as containing a lease. Therefore, the Group has not reassessed contracts which already existed prior to the date of initial application.

For contracts entered into or modified on or after 1 January 2019, the Group applies the definition of a lease in accordance with the requirements set out in IFRS 16 in assessing whether a contract contains a lease.

### AS A LESSEE

The Group has applied IFRS 16 retrospectively with the cumulative effect recognised at the date of initial application, 1 January 2019.

When applying the modified retrospective approach under IFRS 16 at transition, the Group applied the following practical expedients to leases previously classified as operating leases under IAS 17, on lease-by-lease basis, to the extent relevant to the respective lease contracts:

- (i) elected not to recognise right-of-use assets and lease liabilities for leases with lease term ends within 12 months of the date of initial application;
- (ii) excluded initial direct costs from measuring the right-of-use assets at the date of initial application;
- (iii) applied a single discount rate to a portfolio of leases with a similar remaining terms for similar class of underlying assets in similar economic environment; and
- (iv) relied on the assessment of whether leases are onerous by applying IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* as an alternative of impairment review.

When recognising the lease liabilities for leases previously classified as operating leases, the Group has applied incremental borrowing rates of the relevant group entities at the date of initial application. The weighted average incremental borrowing rate applied is 5.9%.

## 2. APPLICATION OF NEW AND AMENDMENTS TO INTERNATIONAL FINANCIAL REPORTING STANDARDS ("IFRSs") (Continued)

### IFRS 16 LEASES (Continued)

#### A. LESSEE ACCOUNTING AND TRANSITIONAL IMPACT

To ease the transition to IFRS 16, the Group applied the following recognition exemption and practical expedients at the date of initial application of IFRS 16:

- (i) the Group elected not to apply the requirements of IFRS 16 in respect of the recognition of lease liabilities and right-of-use assets to leases for which the remaining lease term ends within 12 months from the date of initial application of IFRS 16, i.e. where the lease term ends on or before 31 December 2019;
- (ii) when measuring the lease liabilities at the date of initial application of IFRS 16, the Group applied a single discount rate to a portfolio of lease with reasonably similar characteristics (such as leases with a similar remaining lease term for a similar class of underlying asset in a similar economic environment); and
- (iii) when measuring the right-of-use assets at the date of initial application of IFRS 16, the group relied on the previous assessment for onerous contract provisions as at 31 December 2018 as an alternative to performing an impairment review.

As at 1 January 2019, the Group recognised additional lease liabilities and measured right-of-use assets at the carrying amounts as if IFRS 16 had been applied since commencement dates, but discounted using the incremental borrowing rates of the relevant group entities at the date of initial application by applying IFRS 16.C8(b)(i) transition. Any difference at the date of initial application is recognised in the opening retained earnings and comparative information has not been restated.

The following table summarises the impact of transition to IFRS 16 on retained earnings as at 1 January 2019:

	<b>1 January 2019 S\$'000</b>
Retained earnings as at 31 December 2018	<b>4,047</b>
Adjustments under IFRS 16	<b>(373)</b>
Retained earnings as at 1 January 2019 (Restated)	<b>3,674</b>

The following table reconciles the operating lease commitments as disclosed in annual report as at 31 December 2018 to the opening balance for lease liabilities recognised as at 1 January 2019:

	<b>1 January 2019 S\$'000</b>
Operating lease commitments disclosed as at 31 December 2018	<b>1,940</b>
Less: Total future interest expenses	<b>(80)</b>

Analysed as:	
— Current	<b>1,101</b>
— Non-current	<b>759</b>
Total lease liabilities recognised as at 1 January 2019	<b>1,860</b>

The right-of-use assets in relation to leases previously classified as operating leases have been recognised at an amount equal to the amount recognised for the remaining lease liabilities, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the statement of financial position at 31 December 2018.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### STATEMENT OF COMPLIANCE

The consolidated financial statements have been prepared in accordance with IFRSs, which collective term includes all International Accounting Standards (“**IAS**”) and related Interpretations, as issued by the IASB. In addition, the consolidated financial statements includes applicable disclosures required by the Rules Governing the Listing of Securities on GEM of The Stock Exchange of Hong Kong Limited (“**GEM Listing Rules**”) and by the Hong Kong Companies Ordinance.

### BASIS OF PREPARATION

The consolidated financial statements have been prepared on the historical cost basis at the end of each reporting period, as explained in the accounting policies set out below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2 *Share-based Payment*, leasing transactions that are accounted for in accordance with IFRS 16, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of assets*.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

# Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### BASIS OF CONSOLIDATION

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether or not the Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

# Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### SEPARATE FINANCIAL STATEMENTS

Investments in subsidiaries are accounted for at cost less impairment. Cost includes direct attributable costs of investment. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

Impairment testing of the investments in subsidiaries is required upon receiving a dividend from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

### REVENUE FROM CONTRACTS WITH CUSTOMERS

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a service (or a bundle of services) that is distinct or a series of distinct services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates or enhances an asset that the customer controls as the Group performs; or
- the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct service.

A contract asset represents the Group's right to consideration in exchange for goods or services that the Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9. In contrast, a receivable represents the Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. A contract asset and a contract liability relating to the same contract are accounted for and presented on a net basis.

For contracts that contain more than one performance obligations, the Group allocates the transaction price to each performance obligation on a relative stand-alone selling price basis.

The Group recognises revenue from the following major source which was recognised over the terms of the services contracts as the work is performed:

- Provision of human resources outsourcing services (note (a))
- Provision of human resources recruitment services (note (b))

# Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)* REVENUE FROM CONTRACTS WITH CUSTOMERS *(Continued)*

notes:

- (a) Provision of human resources outsourcing service  
Service attributable mainly to Singapore Government agencies in sourcing and employing suitable candidates that match the Company's client job requirement.
- (b) Provision of human resources recruitment services  
Service attributable to private sector in assessing and procuring qualified candidates to be employed in order to suit the Company's clients' business need.

### LEASES (UPON APPLICATION OF IFRS 16 IN ACCORDANCE WITH TRANSITIONS IN NOTE 2)

Leases are classified as finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

#### THE GROUP AS LESSEE

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) or leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable;
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- The amount expected to be payable by the lessee under residual value guarantees;
- The exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the consolidated statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### LEASES (UPON APPLICATION OF IFRS 16 IN ACCORDANCE WITH TRANSITIONS IN NOTE 2)

*(Continued)*

#### THE GROUP AS LESSEE *(Continued)*

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Group did not make any such adjustments during the periods presented.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Group incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under IAS 37. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the consolidated statement of financial position.

The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Right-of-use Assets' policy.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Group has not used this practical expedient. For a contract that contains a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)* LEASES (PRIOR TO 1 JANUARY 2019)

Leases are classified as finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

### THE GROUP AS LESSEE

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

### FOREIGN CURRENCIES

In preparing the financial statements of each individual group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise.

For the purposes of presenting these consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into SGD using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the date of the transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in exchange reserves.

### BORROWING COSTS

All borrowing costs are recognised in profit or loss in the period in which they are included.

### EMPLOYEE BENEFITS

#### DEFINED CONTRIBUTION PLANS

The Group makes contributions to the Central Provident Fund ("**CPF**") scheme in Singapore, a defined contribution pension scheme. These contributions are recognised as an expense in the period in which they become payable in accordance with the scheme.

The Group operates a defined contribution Mandatory Provident Fund retirement benefits scheme (the "**MPF Scheme**") under the Hong Kong Mandatory Provident Fund Schemes Ordinance. Under the MPF Scheme, employees are required to contribute 5% of their monthly salaries or up to a maximum of HK\$1,500 and they can choose to make additional contributions. Employers' monthly contributions are calculated at 5% of the employee's monthly salaries or up to a maximum of HK\$1,500 (the "**mandatory contributions**"). Employees are entitled to 100% of the employer's mandatory contributions upon their retirement at the age of 65, death or total incapacity.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### TAXATION

Income tax expense represents the sum of the tax currently payable and deferred tax.

#### (A) CURRENT INCOME TAX

The tax currently payable is based on taxable profit for the year. Taxable profit differs from “profit before tax” as reported in the consolidated statement of profit or loss and other comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group’s liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

#### (B) DEFERRED TAX

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For leasing transactions in which the tax deductions are attributable to the lease liabilities, the Group applies IAS 12 Income Taxes requirements to right-of-use assets and lease liabilities separately. Temporary differences relating to right-of-use assets and lease liabilities are not recognised at initial recognition and over the lease terms due to application of the initial recognition exemption.

#### (C) CURRENT AND DEFERRED TAX FOR THE YEAR

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

### TAXATION *(Continued)*

#### (D) GOODS AND SERVICES TAX ("GST")

Revenues, expenses and assets are recognised net of the amount of GST except where the GST incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable.

Receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of other receivables or payables in the consolidated statement of financial position.

### PLANT AND EQUIPMENT

Plant and equipment are stated in the consolidated statement of financial position at cost, less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Depreciation is recognised so as to write off the cost of assets less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

The plant and equipment are depreciated over their estimated useful lives on a straight-line basis as follow:

Leasehold improvement	3 years
Computers and equipment	2–3 years
Furniture and fixtures	3 years

### IMPAIRMENT OF PLANT AND EQUIPMENT AND RIGHT-OF-USE ASSETS OTHER THAN GOODWILL

At the end of each reporting period, the Group reviews the carrying amounts of its plant and equipment and right-of-use assets with finite useful lives to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an plant and equipment and right-of-use assets (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the plant and equipment and right-of-use assets (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss to the extent that it eliminates the impairment loss which has been recognised for the asset in prior years.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### PROVISIONS

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

### FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

Financial assets and financial liabilities are initially measured at fair value except for trade receivables arising from contracts with customers which are initially measured in accordance with IFRS 15. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss ("FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in profit or loss.

### EFFECTIVE INTEREST METHOD

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Interest income is recognised on an effective interest basis for debt instruments.

### FINANCIAL ASSETS

#### (i) Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

### FINANCIAL INSTRUMENTS *(Continued)*

#### FINANCIAL ASSETS *(Continued)*

(i) Classification and subsequent measurement of financial assets *(Continued)*

Financial assets that meet the following conditions are subsequently measured at fair value through other comprehensive income ("FVTOCI"):

- the financial asset is held within a business model whose objective is achieved by both selling and collecting contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at FVTPL, except that at the date of initial application of IFRS 9/initial recognition of a financial asset the Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 *Business Combinations* applies.

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling in the near term; or
- on initial recognition it is a part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

In addition, the Group may irrevocably designate a financial asset that are required to be measured at the amortised cost or FVTOCI as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

#### Amortised cost and interest income

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit-impaired.

#### FINANCIAL ASSETS *(Continued)*

(ii) Impairment of financial assets

The Group performs impairment assessment under expected credit loss (“**ECL**”) model on financial assets (including trade receivables, deposits and other receivables), and other items which are subject to impairment under IFRS 9. The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of a the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date.

The Group always recognises lifetime ECL for trade receivables. The ECL on these assets are assessed using a provision matrix based on the Group’s historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.

(a) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group’s debtors operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group’s core operations.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- an actual or expected significant deterioration in the financial instrument’s external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortised cost;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor’s ability to meet its debt obligations;

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### FINANCIAL INSTRUMENTS *(Continued)*

#### FINANCIAL ASSETS *(Continued)*

##### (ii) Impairment of financial assets *(Continued)*

##### (a) Significant increase in credit risk *(Continued)*

- an actual or expected significant deterioration in the operating results of the debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 90 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if:

- (1) It has a low risk of default,
- (2) The borrower has a strong capacity to meet its contractual cash flow obligations in the near term, and
- (3) Adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

The Group considers a debt instrument to have low credit risk when it has internal or external credit rating of 'investment grade' in accordance with the globally understood definition.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

##### (b) Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:

- when there is a breach of financial covenants by the debtor; or
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collateral held by the Group).

Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### FINANCIAL INSTRUMENTS *(Continued)*

#### FINANCIAL ASSETS *(Continued)*

(ii) Impairment of financial assets *(Continued)*

(c) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- (a) significant financial difficulty of the issuer or the borrower;
- (b) a breach of contract, such as a default or past due event (see (ii) above);
- (c) the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;
- (d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- (e) the disappearance of an active market for that financial asset because of financial difficulties.

(d) Write-off policy

The Group writes off a financial asset when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of trade receivables, when the amounts are over 90 days past due, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes derecognition event. Any recoveries made are recognised in profit or loss.

(e) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

Generally, the ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the effective interest rate determined at initial recognition.

### FINANCIAL INSTRUMENTS *(Continued)*

#### FINANCIAL ASSETS *(Continued)*

##### (ii) Impairment of financial assets *(Continued)*

##### (e) Measurement and recognition of ECL *(Continued)*

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

- Nature of financial instruments (i.e. the Group's trade and other receivables and amounts due from customers are each assessed as a separate group. Loans to related parties are assessed for expected credit losses on an individual basis);
- Past-due status;
- Nature, size and industry of debtors; and
- External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on amortised cost of the financial asset.

Except for investments in debt instruments/receivables that are measured at FVTOCI, the Group recognises an impairment gain or loss in profit or loss for all financial instruments by adjusting their carrying amount, with the exception of trade and retention receivables and contract assets where the corresponding adjustment is recognised through a loss allowance account.

##### (iii) Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

### FINANCIAL INSTRUMENTS *(Continued)*

#### FINANCIAL LIABILITIES AND EQUITY

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Financial liabilities

(i) Financial liabilities at amortised cost

Financial liabilities including trade payables are subsequently measured at amortised cost, using the effective interest method.

(ii) Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

### RELATED PARTIES TRANSACTIONS

A party is considered to be related to the Group if:

(a) A person or a close member of that person's family is related to the Group if that person:

(i) has control or joint control over the Group;

(ii) has significant influence over the Group; or

(iii) is a member of the key management personnel of the Group or of a parent of the Group.

# Notes to the Consolidated Financial Statements

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### RELATED PARTIES TRANSACTIONS *(Continued)*

- (b) An entity is related to the Group if any of the following conditions applies:
- (i) The entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiaries is related to the others).
  - (ii) One entity is an associate or joint venture of the other entity (on an associate or joint venture of a member of a group which the other entity is a member).
  - (iii) Both entities are joint ventures of the same third party.
  - (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
  - (v) The entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group.
  - (vi) The entity is controlled or jointly controlled by a person identified in (a).
  - (vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
  - (viii) The entity or any member of a group of which it is a part, provides key management personnel services to the Group or the parent of the Group.

Close family members of an individual are those family members who may be expected to influence, or be influence by, that person in their dealing with the entity.

A transaction is considered to be a related party transaction when there is a transfer of resources, or obligations between the Group and a related party, regardless of whether a price is charged.

### CASH AND CASH EQUIVALENTS

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and at banks that are readily convertible into known amounts of cash, are subject to an insignificant risk of changes in value, and have a short maturity of generally within three months when acquired, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

For the purpose of the consolidated statement of financial position, cash and cash equivalents comprise cash on hand and at banks, which are not restricted as to use.

## 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

### GOVERNMENT GRANTS

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Group receives grants of non-monetary assets, the asset and the grant are recorded at nominal amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset by equal annual instalments.

### DIVIDENDS

Dividends proposed by the Directors are classified as a separate allocation of retained earnings within the equity section of the consolidated statement of financial position, until they have been approved by the shareholders in a general meeting. When these dividends have been approved by the shareholders and declared, they are recognised as a liability.

## 4. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in note 3, the directors of the Company are required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and underlying assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

### CRITICAL JUDGEMENTS IN APPLYING ACCOUNTING POLICIES

The following are the critical judgments, apart from those involving estimations, that the directors of the Company have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

### KEY SOURCES OF ESTIMATION UNCERTAINTY

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

#### (A) DETERMINING THE LEASE TERM

As explained in note 3, the lease liability is initially recognised at the present value of the lease payments payable over the lease term. In determining the lease term at the commencement date for leases that include renewal options exercisable by the Group, the Group evaluates the likelihood of exercising the renewal options taking into account all relevant facts and circumstances that create an economic incentive for the Group to exercise the option, including favourable terms, leasehold improvements undertaken and the importance of that underlying asset to the Group's operation. The lease term is reassessed when there is a significant event or significant change in circumstance that is within the Group's control. Any increase or decrease in the lease term would affect the amount of lease liabilities and right-of-use assets recognised in future years.

## 4. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY *(Continued)*

### KEY SOURCES OF ESTIMATION UNCERTAINTY *(Continued)*

#### (B) IMPAIRMENT OF PLANT AND EQUIPMENT AND RIGHT-OF-USE ASSETS

The Group reviews its plant and equipment and right-of-use assets for indications of impairment at each reporting period. In analysing potential impairments identified, the Group uses projections of future cash flows from the assets based on management's assignment of a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

#### (C) PROVISION OF ALLOWANCE FOR CREDIT LOSSES FOR TRADE RECEIVABLE

The Group uses provision matrix to calculate ECL for the trade receivables. The provision rates are based on internal credit ratings as groupings of various debtors that have similar loss patterns. The provision matrix is based on the Group's historical default rates taking into consideration forward-looking information that is reasonable and supportable available without undue costs or effort. At every reporting date, the historical observed default rates are reassessed and changes in the forward-looking information are considered. In addition, trade receivables with significant balances and credit impaired are assessed for ECL individually.

The provision of ECL is sensitive to changes in estimates. The information about the ECL and the Group's trade receivables are disclosed in note 16.

#### (D) DEPRECIATION

Items of plant and equipment are depreciated on a straight-line basis over the estimated useful lives of the assets, after taking into account the estimated residual value. The Group reviews the estimated useful lives of the assets regularly in order to determine the amount of depreciation expense to be recorded during any reporting period. The useful lives are based on the Group's historical experience with similar assets and taking into account anticipated technological changes. The depreciation expense for future periods is adjusted if there are significant changes from previous estimates.

#### (E) INCOME TAXES

The Group has exposure to income taxes in Singapore and Hong Kong. In determining the income tax liabilities, management is required to estimate the amount of capital allowances, deductibility of certain expenses and applicable tax incentives. There are transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the income tax and deferred tax provision in the year in which such determination is made. The carrying amounts of the Group's current income tax liabilities and deferred tax liabilities as at 31 December 2018 and 2019 were approximately Nil and S\$27,000 S\$24,000 and S\$24,000 respectively.

### (B) FINANCIAL RISK MANAGEMENT AND FAIR VALUES

The directors of the Company monitor and manage the financial risks relating to the operations of the Group through internal risks reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including foreign currency risk and interest rate risk), credit risk and liquidity risk.

The Group's major financial instruments include trade receivables, other receivables, deposit, cash and cash equivalents, accrued labour costs, other payables and accruals and lease liabilities. Details of these financial instruments and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

#### FOREIGN CURRENCY RISK

The Group's foreign currency exposure arises mainly from the exchange rate movements of the Hong Kong dollars against the Singapore dollars.

The Group's currently does not have a foreign currency hedging policy. However, the management monitors foreign currency risk exposure and will consider foreign currency hedging should the need arise.

#### *Sensitivity analysis for foreign currency risk*

The following table demonstrates the sensitivity of the Group's loss before tax to a reasonably possible change in the Hong Kong dollar exchange rate, with all other variables held constant.

— weakened 5% (2018: 5%)	<b>55</b>	63

#### INTEREST RATE RISK

The Group is exposed to interest rate risk through the impact of rate changes on interest bearing financial assets, mainly the interest bearing bank balances. The Group monitors the interest rate exposure on a continuous basis and adjusts the portfolio of bank saving balances where necessary.

### (B) FINANCIAL RISK MANAGEMENT AND FAIR VALUES *(Continued)*

#### CREDIT RISK

The credit risk of the Group mainly arises from bank balances and deposits, trade receivables and other receivables. The carrying amounts of these balances represent the Group's maximum exposure to credit risk in relation to financial assets.

In respect of cash deposited at banks, the credit risk is considered to be low as the counterparties are reputable banks. The existing counterparties do not have defaults in the past. Therefore, expected credit loss rate of cash at bank is assessed to be close to zero and no provision was made as of 31 December 2018 and 2019.

The Group applies the simplified approach to provide for expected credit losses prescribed by IFRS 9, which permits the use of the lifetime expected credit loss provision for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics. The Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit loss. It considers available reasonable and supportive forwarding-looking information.

As at 31 December 2018 and 2019, trade receivables that are individually significant have been separately assessed for impairment. The Group makes periodic assessments on the recoverability of the receivables based on the background and reputation of the customers, historical settlement records and past experience.

Majority of the Group's revenue is received from individual customers in relation to rendering of human resource services. The Group's trade receivables arise from rendering of human resources services. As at the end of the year, the top three debtors and the largest debtor accounted for approximately 32.3% and 17.9% (2018: approximately 63.3% and 15.0%), of the Group's trade receivables balance. In view of the history of business dealings with the debtors and the sound collection history of the receivables due from them, management believes that there is no material credit risk inherent in the Group's outstanding receivable balance due from these debtors saved for the debtor related to the impaired trade receivable disclosed in the below. Management makes periodic assessment on the recoverability of the trade and other receivables based on historical payment records, the length of overdue period, the financial strength of the debtors and whether there are any disputes with the debtors.

Individual credit evaluations are performed on all customers requiring credit over a certain amount. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer as well as pertaining to the economic environment in which the customer operates. Trade receivables are due within 30 to 60 days from the date of billing. Normally, the Group does not obtain collateral from customers.

The Group measures loss allowances for trade receivables at an amount equal to lifetime ECLs, which is calculated using a provision matrix. As the Group's historical credit loss experience does not indicate significantly different loss patterns for different customer segments, the loss allowance based on past due status is not further distinguished between the Group's different customer bases.

#### CREDIT RISK *(Continued)*

Other receivables with significant outstanding balances or credit impaired as at 31 December 2019 were assessed individually. During the year ended 31 December 2019, no allowance for credit losses was recognised by the Group (2018: approximately S\$83,000).

As at 31 December 2018 and 1 January 2019	83
Allowance for expected credit losses recognised	–
As at 31 December 2019	83

Trade and other receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Group, and a failure to make contractual payments for a period greater than 90 days past due.

Impairment losses on trade and other receivables are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item.

#### LIQUIDITY RISK

The Group is exposed to minimal liquidity risk as a substantial portion of its financial assets and financial liabilities are due within one year and it can finance its operations from existing shareholders' funds and internally generated cash flows.

In the management of the liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate by management to finance the Group's operations and mitigate the effect of fluctuations in cash flows. Management monitors current and expected liquidity requirements on a regular basis.
