# MANAGEMENT DISCUSSION AND ANALYSIS

## **Business review**

The principal activities of the Group are sales of controller systems for electronic equipment and electronic component and subassembly for electronic appliances in the PRC.

The Group's activities are primarily operated in the PRC and the Group's revenue is mainly attributable to customers in the PRC.

With respect to product strategies in 2020, the Company took the initiative to develop the businesses of industrial electronic intelligent control equipment, machinery and equipment, industrial electronic automation digital control systems, and gradually enhanced the innovation level of its own products and technologies with the introduction of more high-end technological electronic products.

The marketing team of the Group has extended its business to customers in numerous cities such as Shanghai, Hangzhou, Nanjing, Jiaxing, Zibo, Wuxi, Hefei and Cixi. The Group is now actively exploring more markets.

The Group is waiting for emergence of profitable opportunities before expanding current operation. Actively taking the advantages of the Group's production capability, it is anticipating better opportunities under the latest market situation.

## **Financial review**

For the three months ended 31 March 2020, the Group recorded a turnover of approximately RMB8,117,000 (2019: RMB16,690,000), representing a decrease of approximately RMB8,573,000. Such decrease was due to the travel restriction imposed and the extended Chinese New Year holiday since the outbreak of novel coronavirus (COVID-19) in the PRC, aiming at restraining the spread of the virus. The Group's operation concentrates in the PRC and given the extended Chinese New Year holiday and delay in resuming production, our operating result recorded a considerable decrease.

Loss attributable to shareholders was approximately RMB1,547,000 (2019: RMB996,000), representing an increase of loss of approximately RMB551,000. Such increase in loss was attributable to the higher cost of sales for relevant products, resulting in a lower gross profit margin of the Group and higher selling expenses.

For the three months ended 31 March 2020, the gross profit margin was 1.6% (2019: 5.6%). The increase in cost of sales resulted in a lower gross profit margin of the Group's products. The Group will continue to implement cost control to mitigate the impact of price competition caused by fierce competition in the electronics industry.

For the three months ended 31 March 2020 administrative expenses recorded a decrease of approximately RMB370,000 over the previous period, due to the decrease in expenses incurred by the Group in the market expansion. In order to reduce the related expenses, the Group will continue to implement cost management.

## **Finance Costs**

For the three months ended 31 March 2020, the finance costs amounted to approximately RMB897,000 (2019: RMB831,000) arising from the imputed interest on loan from a major shareholder.

As of the date hereof, the Company's not aware of any further developments in relation to the said proceedings since February 2018.

Taking into account the possible outcome and their obligations for the above cases, the Group has made a provision for claim of approximately RMB86,000 (equivalent to approximately HK\$96,000) for the year ended 31 December 2016 and no further provision was made thereafter.

Since the above cases are still in progress, the Directors would continue to exercise their due care in monitoring the progress of the cases and would assess the adequacy of provision of claim and the financial impact on the Group as and when appropriate. The Directors believe that the amount of approximately RMB86,000 as at 31 March 2020 (2019: RMB86,000) represents the best estimate of the Group's liability having taken legal advise.

Save as disclosed above, the Group had no material contingent liabilities.
