2020/21
First Quarterly Report

CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors collectively and individually accept full responsibility, includes particulars given in compliance with GEM Listing Rules for the purpose of giving information with regard to the company. The directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

PROSPECT

The adverse impact of the coronavirus pandemic on the Group's manufacturing and trading of swimwear and garment products segment has begun to materialize and reflected on the significant reduction of orders on hand. The prospects for this segment remain challenging as it is closely tied to the development of the coronavirus pandemic. The Group will continue to adopt costs cutting measures and to rationalise its production base in response to the current unfavourable market condition which is expected to be temporary. The Group is well position to capture the business opportunities from the expected market recovery. The Company is committed to maintaining this segment as the Group's principal business despite the uncertainties ahead. The Company will continue to deepen its relationships with existing customers and will seek new business opportunities with new customers including domestic customers in China.

For the E-commerce and on-line shopping related segment, due to the coronavirus pandemic, global trading activities and logistics were seriously disrupted which adversely affected the supply of second hand mobile phones. However the online demand for such products remained strong even in the midst of the pandemic. It is expected that with the gradual resumption of trading activities and cargo movement, this segment will catch up quickly. The Group intends to further expand its scale of operation in this segment and capture the business opportunities from the expected market recovery.

For the money leading business, the Group will continue to maintain and develop the business and to allocate sufficient resources to meet business demands.

The management of the Group continues to formulate its business strategies to optimise the use of its operating and financial resources. It will consider to diversify its operations where appropriate business opportunities arise.
