MANAGEMENT DISCUSSION AND ANALYSIS

Business review

The principal activities of the Group are sales of controller systems for electronic equipment and electronic component and subassembly for electronic appliances in the PRC.

The Group's activities are primarily operated in the PRC and the Group's revenue is mainly attributable to customers in the PRC.

With respect to product strategies in 2020, the Group has continued to take the initiative to develop the businesses of industrial electronic intelligent control equipment, machinery and equipment, industrial electronic automation digital control systems, and gradually enhanced the innovation level of its own products and technologies with the introduction of more high-end technological electronic products.

The marketing team of the Group has extended its business to customers in numerous cities such as Hangzhou, Changsha, Shanghai, Fuzhou, Wuhan, Hefei, Ningbo, Shenzhen and Xiamen and is now actively exploring more markets.

At present, the market environment is still challenging, the Group is waiting for emergence of profitable opportunities before expanding current operation. Actively taking the advantages of the Group's production capability, it is anticipating better opportunities under the latest market situation.

Financial review

For the nine months ended 30 September 2020, the Group recorded a turnover of approximately RMB25,345,000 (for the nine months ended 30 September 2019: RMB51,726,000), representing a decrease of approximately RMB26,381,000. Such decrease in turnover was mainly due to the outbreak of novel coronavirus ("COVID-19") in the PRC since early 2020 and the overall market environment remained challenging, and the Group's operating results recorded a considerable decrease.

Loss attributable to shareholders for the nine months ended 30 September 2020 was approximately RMB5,896,000 (for the nine months ended 30 September 2019: RMB3,379,000), representing an increase of loss of approximately RMB2,517,000. Such increase in loss was attributable to the higher cost of sales for relevant products, resulting in a lower gross profit margin of the Group and higher selling and administrative expenses. The 3G electronic module products mainly operated by a subsidiary of the Company (the "Subsidiary") have been eliminated from the market, and the current harsh environment has led to a sharp decline in the performance of the Subsidiary. During the period from January to September 2020, the revenue of the Subsidiary accounted for about 1% of the total revenue of the Group. In consideration of the prospect of the Subsidiary's business, the Group has terminated the labor contracts of some employees of the Subsidiary and severance compensation was paid in accordance with the labor contract law.

For the nine months ended 30 September 2020, the gross profit margin was 1.3% (for the nine months ended 30 September 2019: 4.3%). The increase of sales cost leads to the decrease of gross profit margin. The Group will continue to implement cost control to mitigate the impact of price competition caused by fierce competition in the electronics industry.

For the nine months ended 30 September 2020, administrative expenses recorded an increase of approximately RMB438,000 over the previous period. The increase in administrative expenses is due to the payment of severance compensation to some employees of the Subsidiary. In order to reduce the related expenses, the Group will continue to implement cost control.
