11. ACCOUNTS AND BILLS RECEIVABLE

	As at 30 September 2020 RMB'000 (Unaudited)	As at 31 March 2020 RMB'000 (Audited)

	As at 30 September 2020 RMB'000 (Unaudited)	As at 31 March 2020 RMB'000 (Audited)
0 to 90 days	15,598	11,655

Out of the past due balances, approximately RMB35,688,000 (31 March 2020: approximately RMB31,650,000) has been past due 90 days or more and is not considered as in default as the management considers that the major customer is a state-owned company with strong financial position. MANAGEMENT'S DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group was principally engaged in (i) sales of renewable energy products; (ii) new energy power system integration business; (iii) sales of self-service automatic teller machine (“**ATM**”) systems and printing systems; and (iv) provision of hardware and software technical support services in the People’s Republic of China (“**PRC**” or “**China**”) during the six months ended 30 September 2020.

The Group recorded a profit attributable to owners of the Company of approximately RMB57.6 million for the six months ended 30 September 2020 (2019-1H: loss attributable to owners of the Company of approximately RMB9.6 million). The profit attributable to the owners of the Company for 2020-1H in the amount of approximately RMB57.6 million was mainly attributable to (1) the increase in revenue and gross profit of the Group during 2020-1H; and (2) an impairment loss reversed in respect of accounts receivable in the amount of approximately RMB40.1 million which had been written off in previous years.

The Group’s revenue amounted to approximately RMB139.5 million for the six months ended 30 September 2020, representing an increase of approximately 164.9 per cent. as compared with approximately RMB52.7 million recorded in 2019-1H. The increase in revenue was mainly attributable to revenue generated from the sales of renewable energy products of approximately RMB139.5 million during 2020-1H where the revenue generated therefrom during 2019-1H was approximately RMB25.8 million, which was partly offset by the decrease in revenue generated during 2020-1H from the rendering of new energy power system integration services by approximately RMB26.9 million when compared to 2019-1H.

The Group’s gross profit margin was approximately 20.0 per cent. for the six months ended 30 September 2020, as compared to approximately 13.9 per cent. for 2019-1H. The increase in the gross profit margin was due to (1) the increase in revenue generated from the sales of renewable energy products as stated above; and (2) that customers were willing to pay a higher price for renewable energy products for completion of new energy projects which had been postponed as a result of the outbreak of coronavirus disease (COVID-19) during the first quarter of 2020.

Selling expenses incurred by the Group for the six months ended 30 September 2020 amounted to approximately RMB1.4 million (2019-1H: approximately RMB1.4 million), representing an increase of approximately 0.5 per cent..

Administrative expenses incurred by the Group for the six months ended 30 September 2020 amounted to approximately RMB5.5 million (2019-1H: approximately RMB6.7 million), representing a decrease of approximately 18.1 per cent.; the decrease was due to the Group’s policy on cost control.

The impairment losses on financial assets subject to expected credit loss model (“**ECL**”) reversed during the six months ended 30 September 2020 amounted to approximately RMB40.1 million (2019-1H: impairment losses on financial assets subject to ECL recognized of approximately RMB0.1 million) due to the bad debts recovered of approximately RMB40.1 million during the period under review.

Basic earnings per share was approximately RMB2.64 cents for the six months ended 30 September 2020, as compared with the basic loss per share of approximately RMB0.52 cents for 2019-1H.

SALES OF RENEWABLE ENERGY PRODUCTS

The business of sales of renewable energy products includes the research and development, sales and provision of other relevant technology consultation services of photovoltaic mounting brackets, solar trackers, the guardrail of the solar power stations and solar related products as well as wind power related products.

The Group sources business for the sales of renewable energy products by negotiating and securing contracts with the engineering, procurement, and construction contractors of construction projects of solar photovoltaic power station and wind power station. The Group will supply the renewable energy products required under such projects and be responsible for their design optimisation. The Group will assess the geological condition of the construction site and propose specific design, requirements and standards for such construction and engage mounting manufacturers to provide the relevant products.

On 9 April 2020, the Group has entered into two supply contracts with a PRC state-owned entity (“**Purchaser**”) pursuant to which the Group agreed to (i) sell and the Purchaser agreed to purchase towers for wind turbines and (ii) provide to the Purchaser technical services associated with the wind power projects for which the towers for wind turbines will be used. Please refer to the section headed “Sales of Towers for Wind Turbines and Solar Power Related Products” below for details.

During the six months ended 30 September 2020, the revenue generated from the sales of renewable energy products was approximately RMB139.5 million (2019-1H: approximately RMB25.8 million), accounted for 100.0 per cent. (2019-1H: approximately 48.9 per cent.) of the Group’s total revenue.

NEW ENERGY POWER SYSTEM INTEGRATION BUSINESS

Power system integration refers to the optimisation of technologies in the civil engineering system, electrical system and other ancillary system, database technologies, surveillance and software management. The Group shall source equipment and products from different vendors based on the scale and capacity of the respective new energy power stations and subsequently carry out integration of the separated equipment, functions and information into a connected, unified and coordinated system. Power system integration enables the utilisation of resources at their best to enhance optimisation of performance of the entire system and achieve centralised, high efficiency, balanced performance, substitutable and available for maintenance, as well as low cost management. The Group also offers subsequent system management services to the new energy power stations.

Considering the PRC government’s encouragement on distributed photovoltaic power generation, the Group continues to look for business opportunities relating to solar energy generation projects and new energy power system integration services.

There was no revenue generated from the new energy power system integration business during the six months ended 30 September 2020 (2019-1H: approximately RMB26.9 million).

DISCLOSEABLE AND CONNECTED TRANSACTION IN RELATION TO ACQUISITION OF THE REMAINING 40% EQUITY INTEREST IN TIANJIN HENGQING AND ISSUE OF CONSIDERATION SHARES UNDER SPECIFIC MANDATE

THE ACQUISITION

On 20 December 2019 (after trading hours), the Company and 天津市新慶光伏科技有限公司 (Tianjin Xinqing Solar Photovoltaic Technology Company Limited*) (“**Vendor**”) entered into the Equity Interest Transfer Agreement (“**Equity Interest Transfer Agreement**”). Pursuant to the Equity Interest Transfer Agreement (as supplemented), the Company has conditionally agreed to acquire and the Vendor has conditionally agreed to dispose of the sale shares (representing 40% equity interests in 天津恆慶光伏科技有限公司 (Tianjin Hengqing Photovoltaic Technology Limited*) (“**Tianjin Hengqing**”) (“**Sale Shares**”) at a consideration of RMB26,500,000 (“**Acquisition**”). Tianjin Hengqing is the legal and beneficial owner of the entire equity interests in 西藏立能光伏科技有限公司 (Xizang Lineng Solar Photovoltaic Technology Company Limited)* (“**Xizang Lineng**”). Upon completion, the Sale Shares was transferred from the Vendor to Million Keen Limited (“**Million Keen**”), a company incorporated in the BVI and a wholly-owned subsidiary of the Company, as the designated holder of the Sale Shares of the Company. The consideration for the Acquisition (“**Consideration**”) was satisfied by the allotment and issue of 295,472,031 ordinary shares of the Company (“**Consideration Shares**”) at HK\$0.1 per Consideration Share (“**Issue Price**”) to the Vendor (or its nominee(s)) within a reasonable period of time after date on which the new business license of Tianjin Hengqing as a wholly foreign owned enterprise is issued.

GEM LISTING RULES IMPLICATIONS

As at 20 December 2019, Tianjin Hengqing is an indirect 60%-owned subsidiary of the Company, and the remaining 40% equity interests in Tianjin Hengqing is held by the Vendor. Therefore, the Vendor is a substantial shareholder of Tianjin Hengqing and a connected person of the Company at the subsidiary level under Chapter 20 of the GEM Listing Rules. As (i) the board of Directors ("**Board**") has approved the Acquisition; and (ii) the independent non-executive Directors have confirmed that the terms of the Acquisition are fair and reasonable, the transaction is on normal commercial terms or better and in the interests of the Company and the shareholders of the Company ("**Shareholders**") as a whole, the Acquisition is exempt from the circular, independent financial advice and independent shareholders' approval requirements under Rule 20.99 of the GEM Listing Rules. As the Vendor is a connected person to the Company, the issue of Consideration Shares of the Company to it will be subject to the announcement, reporting and shareholders' approval requirements unless otherwise exempted under Chapter 20 of the GEM Listing Rules.

Further, as one or more of the applicable percentage ratio(s) in respect of the Acquisition exceed 5% but none of the ratios exceeds 25%, the Acquisition also constitutes a discloseable transaction for the Company and is subject to announcement requirement under Chapter 19 of the GEM Listing Rules.

An extraordinary general meeting ("**EGM-1**") was convened on 17 February 2020 for the independent shareholders of the Company to consider and, if thought fit, approve the specific mandate for the allotment and issue of the Consideration Shares. Given that none of the shareholders has a material interest in the Acquisition and the Equity Interest Transfer Agreement, none of them would be required to abstain from voting in the EGM-1. BASIS OF DETERMINATION FOR CONSIDERATION

The Board confirmed that the consideration of the Subscription was determined on the basis of commercial terms negotiated at arm's length.

INVESTMENT STRATEGY FOR THE SUBSCRIPTION

The Subscription was made from the spare funds of the Group and was made for the treasury management purpose to increase the return of the idle funds of the Group after taking into account, among others, the level of risk and return on investment. Although the Wealth Management Product was marketed as a non-principal guaranteed financial product and without a guaranteed return, the Board considers that the Wealth Management Product with a flexible redemption term had relatively low risk as the Group would be readily able to recover the principal and receive the expected return on the Subscription. Therefore, the Board considers that the Subscription does not cause any adverse impact on the working capital of the Group.

Appropriate short-term wealth management with low risk exposure is conducive to enhancing the utilisation of capital while increasing income from idle funds. The Board is of the view that the Subscription, which offered a better interest rate than the prevailing fixed-term deposit interest rates offered by banks or licensed financial institutions, was made on normal commercial terms in the ordinary course of business of the Group, is fair and reasonable and is in the interest of the Company and the Shareholders as a whole.

IMPLICATIONS UNDER GEM LISTING RULES

At the relevant time, since at least one of the applicable percentage ratios for the Subscription exceeded 25% but were less than 100%, the Subscription constituted a major transaction under Chapter 19 of the GEM Listing Rules and was subject to the notification, announcement and shareholders' approval requirements set out under Chapter 19 of the GEM Listing Rules.

The Company regrets that it did not duly comply with the notification, announcement and shareholders' approval requirements under Rule 19.34, 19.38 and 19.40 of the GEM Listing Rules by omitting to issue an announcement and circular for shareholders' approval at the relevant time of making the Subscription. The Company wishes to apologise in this regard. It is always the intention of the Company to fully comply with the GEM Listing Rules. The Directors, having been fully informed of all the facts of the Subscription, consider that the failure to comply with Chapter 19 of the GEM Listing Rules in respect of the Subscription was inadvertent and can be avoided going forward. The Group has taken the incident seriously and shall implement remedial measures to prevent re-occurrence of similar incidents as detailed in the announcement of the Company dated 15 October 2020.

EXTRAORDINARY GENERAL MEETING (“EGM-3”) AND DESPATCH OF CIRCULAR

The EGM-3 will be convened to consider and, if thought fit, to ratify and approve the Subscription. To the best of the Directors' knowledge, information and belief, no Shareholder has a material interest in the Subscription and therefore, no Shareholder will be required to abstain from voting on the relevant resolution at the EGM-3.

A circular containing, among other things, (i) details of the Subscription, (ii) notice of the EGM-3 and (iii) other information as required by the GEM Listing Rules is expected to be despatched to the Shareholders on or before 24 November 2020.

Please refer to the announcements of the Company dated 15 October 2020 and 6 November 2020 for further details.

BUSINESS PROSPECTS

The Group has been identifying and exploring other business opportunities so as to diversify the Group's business into the wind power generation projects with growth potential and to broaden its sources of income to bring return to the Group and its shareholders.

On 9 April 2020 and 2 May 2020, the Group had entered into three supply contracts with a PRC state-owned entity (the “**Purchaser**”) pursuant to which the Group agreed to (i) sell and the Purchaser agreed to purchase towers for wind turbines and provide to the Purchaser technical services associated with the wind power projects for which the towers for wind turbines will be used, at an aggregate consideration of approximately RMB249.6 million; and (ii) sell and the Purchaser agreed to purchase mounting required under a construction project of a solar photovoltaic power station at a consideration of approximately RMB65.8 million. These transactions and matters contemplated thereunder are expected to be completed by 31 March 2021. The Board believes that these transactions represent a good opportunity in the renewable energy business.

Considering the PRC government's long-term encouragement on distributed photovoltaic power generation, the Group will continue to look for other solar energy generation projects and new energy power system integration services. The Group has been negotiating and securing new contracts for the new energy power system integration business during the period under review.

The Group will finance its future business plans by internally generated cash flow and borrowings.

Leveraging on the prudent and experienced management and the strong and determined workforce of the Group, the Group will strive to maintain and expand its operations further, thus bringing greater returns to its shareholders.
