Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The Company announced financial results for September Quarter and September Interim as follows:

The Company recorded revenue for the September Quarter of HK\$157.3 million, another revenue expanding quarter in 2020. As a result, September Interim revenue stood at HK\$421.5 million, representing an increase of HK\$17.7 million or 4.4% when compared to corresponding period in last year. Below is our revenue analysis for September Interim:

• The increase in revenue for September Interim was due to contribution from both Korea and Hong Kong operations. Korea operations contributed HK\$402.6 million in revenue, which was HK\$15.9 million or 4.1% increase compared to HK\$386.7 million a year ago. During the same period, Hong Kong operations contributed HK\$18.9 million in revenue, which was HK\$1.8 million or 10.7% increase compared to HK\$17.1 million a year ago.

Except a slight decrease in revenue from system integration segment arising from the currency translation of Korean Won, the Group recorded an increase in revenue contributed from maintenance services and cyber security services. Considering the amount in its original currency, revenue from system integration segment increased by KRW1.8 billion or 4.1% to KRW45.3 billion in September Interim and revenue from maintenance services segment increased by KRW3.3 billion or 24.0% to KRW17.1 billion in September Interim compared to year-ago period. Cyber security services recorded HK\$18.9 million in revenue, which was HK\$1.8 million or 10.7% higher than that of year-ago period.

- Public sector contributed HK\$182.6 million in revenue, which was HK\$25.9 million or 16.5% increase; and private sector contributed HK\$238.9 million in revenue, which was HK\$8.1 million decrease in September Interim as compared to yearago period.
- The increase in revenue has been driven by strong demand for online activities in the Korea's market. As announced in previous quarterly reports, we have received contracts from certain major enterprises in Korea. In the September Quarter, we have received a contract of KRW2.6 billion (HK\$17.0 million) from a finance corporation and a contract of KRW1.0 billion (HK\$6.8 million) from a global bank.

September Interim's gross profit margin of 12.5% was comparable to the gross profit margin of 12.1% in last year. The surge of gross profit to HK\$52.7 million from HK\$48.9 million, representing a HK\$3.8 million or 7.8% increase, was attributable to double-digit growth in service types profitable businesses.

In September Interim, we were able to lower selling and administrative expenses by HK\$13.6 million or 22.3% from HK\$60.9 million a year ago. The decrease was mainly attributable to substantially lower of impairment of trade receivable and exchange losses. Comparing to June Quarter, selling and administrative expenses further decreased in this quarter by HK\$3.0 million or 19.1% mainly resulting from a reversal of impairment of trade receivables. Our management team remains rigid cost control measures against the economic downturn triggered by current pandemic.

After a provision of HK\$2.4 million for tax expenses, the Group posted profit for the period of HK\$7.2 million in September Quarter which turned the loss position in June Interim of HK\$4.2 million to a profit of HK\$3.0 million in September Interim.

Liquidity and Financial Resources

As at 30 September 2020, the Group's net current assets were HK\$90.5 million showing a strong liquidity.

The Group expresses its gearing ratio as a percentage of total debt over total equity. As at 30 September 2020, the gearing ratio was 19.5% (as at 31 December 2019: 17.1%). The increase was mainly due to increase in lease liabilities of approximately HK\$3.0 million. The liquidity ratio, represented by a ratio of current assets over current liabilities, was 1.79 times (as at 31 December 2019: 1.5 times), reflecting the adequacy of financial resources.

As at 30 September 2020, the Group recorded cash and cash equivalents of approximately HK\$77.8 million (as at 31 December 2019: approximately HK\$116.1 million), which included approximately KRW8,937.9 million, HK\$4.0 million, US\$1.9 million and small amount of Singapore dollars.

As at 30 September 2020, the Group had variable rate bank borrowings of approximately US\$2.8 million, which was equivalent to approximately HK\$22.0 million (as at 31 December 2019: approximately HK\$20.6 million). Certain banking borrowings are guaranteed by Korea Credit Guarantee Fund which is a public financial institution independent of the Group.

Foreign Exchange Exposure

The Group's business in Korea was exposed to currency risk that mainly arose from the currency difference between our revenue receipts (which are denominated in KRW) and some of our payments for purchases (which are in US\$). In preparing the costing of our system integration project in which procurement of components in US\$ is required, we would add on a margin to the relevant cost items of the project as a cushion to safeguard against any unfavourable foreign exchange movement between the costing date and the relevant settlement date. During the nine months period of 2020, we experienced an unfavourable foreign exchange movement in the Korea operation, and hence, recorded an increase in cost of goods sold.

Revenue and cost of our Hong Kong operations are mainly denominated in HK\$. There is no significant currency risk arising from it.
