MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

During the Reporting Period, the Group continued to focus on promoting bentonite for paints and coatings, and its products were recognized by customers. The Group's sales and gross profit both increased as compared with the three months ended 31 March 2020 as a result of the market recovery from the novel coronavirus (COVID-19) epidemic (the "Epidemic"). The production, promotion and application of bentonite products for spray paint wastewater treatment were gradually mature with certain sales scale. The Group also participated in the annual meeting of inorganic non-metal industry and promoted products through this platform. Bentonite for spray paint wastewater treatment has also been listed by the Ministry of Industry and Information Technology as an out-standing project in the field of energy-saving and environmentally-friendly materials. The Group continued to focus on the development of overseas markets and consolidated the Southeast Asian and Middle Eastern markets during the Reporting Period. The Group attached great importance to investment in the research and development of new products. For the three months ended 31 March 2021, the Group's research and development expenses amounted to approximately RMB1,239,000.

Financial Review

Revenue of the Group for the three months ended 31 March 2021 amounted to approximately RMB26,798,000, representing an increase of approximately RMB10,065,000 or 60.2% compared to approximately RMB16,733,000 for the three months ended 31 March 2020. The increase in sales was mainly due to the increase in sales of organic bentonite and partially off-set by the decrease in bentonite for metallurgy pellet during the Reporting Period. The increase in revenue was mainly due to the gradual recovery of market demand due to the control of the Epidemic in the market during the Reporting Period as compared with the three months ended 31 March 2020.

Gross profit of the Group for the three months ended 31 March 2021 amounted to approximately RMB11,233,000, representing an increase of approximately RMB3,846,000 or 52.1% compared to approximately RMB7,387,000 for the three months ended 31 March 2020.

The distribution cost, mainly including transportation expenses, salaries and benefits, and travelling expenses, amounted to approximately RMB3,617,000 for the three months ended 31 March 2021, representing an increase of approximately RMB709,000 or 24.4% as compared to RMB2,908,000 for the three months ended 31 March 2020. This increase was mainly due to the increase in transportation expenses as a result of the increase sales volume.

The administrative expenses of the Group was approximately RMB4,771,000 for the three months ended 31 March 2021, representing an increase of approximately RMB1,656,000 or 53.2% as compared to approximately RMB3,115,000 for the three months ended 31 March 2020. The increase was primarily due to an increase in expenses for prevention of the spread of the Epidemic.

The research and development expenses decreased by approximately 8.6% from approximately RMB1,355,000 for the three months ended 31 March 2020 to approximately RMB1,239,000 for the three months ended 31 March 2021. The decrease was mainly due to the decrease in research and development projects for the environmental protection field.

As a result of the foregoing, for the three months ended 31 March 2021, the profit for the period attributable to the equity holders of the Company was approximately RMB1,071,000, while for the three months ended 31 March 2020, the loss for the period attributable to the equity holders of the Company was approximately RMB1,033,000.

FUTURE OUTLOOK AND DEVELOPMENT STRATEGY

In 2021, China authority continues to promote the policy of banning solid waste, which is an important system reform to promote the formation of green development methods and lifestyles, protect the safety of the ecological environment and the health of the people. The amount of imported waste paper has been significantly reduced. Banning the import of waste paper will have a huge impact on the industry's raw material structure and bring about a significant adjustment in the structure of papermaking raw materials. In order to stabilize the quality of packaging paper products, more attention shall be paid to the use of papermaking chemicals, which is conducive to the development of the Group's paper chemicals business.

In 2021, due to the uncertain impact of the Epidemic, the operation of the Group is facing greater challenges. The Group will continue to adhere to the development strategy of taking profit as the center and innovation as the driving force. On the basis of consolidating existing products, the Group will actively develop new products. To this end, the Group will adhere to the following strategies:

- 1) The Group will continue to strengthen the fine paper chemical market;
- 2) Focus on developing the market of bentonite for paints and coatings, improving product quality, and enlarge market share;
- 3) Increase the promotion and application of water treatment products; and
- 4) Develop new products and find new growth points for the Group.

The Group will further enhance the production management system to ensure a good market sales base. At the same time, through independent innovation and industry-institute-research cooperation, new products and new technical knowhow will be developed to enhance the Group's competitiveness.
