(a joint stock limited company incorporated in the People's Republic of China with limited liability) (Stock Code: 8227)

2021

# CHARACTERISTICS OF GEM ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and midsized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the "Directors") of Xi'an Haitian Antenna Technologies Co., Ltd.\* (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief, the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

#### 27. EARNINGS PER SHARE

The calculation of basic earnings per share is based on the unaudited net profit attributable to owners of the parent company for the three months and six months ended 30 June 2021 of RMB(5,473,015.36) and RMB(8,240,122.60) respectively (2020: RMB(7,389,615.63) and RMB(11,944,243.05) respectively) and the weighted average number of 1,897,629,000 shares (2020: 1,797,629,000 shares) in issue during the period. The weighted average number of ordinary shares is the number of shares in issue at the beginning of the period, adjusted by the number of shares issued during the period multiplied by a time-weighting factor.

The diluted earnings per share is equal to the basic earnings per share as calculated above since the Company does not have any potential shares outstanding for the both periods.

#### 28. DIVIDENDS

The Board does not recommend the payment of an interim dividend for the six months ended 30 June 2021 (2020: nil).

#### MANAGEMENT DISCUSSION AND ANALYSIS

#### **BUSINESS REVIEW**

## **Total Operating Income**

The unaudited total operating income for the six months ended 30 June 2021 was approximately RMB16.45 million, representing approximately 447% of the unaudited total operating income for the corresponding period in 2020.

Following the procurement activities for artificial dielectric lens antenna products carried out by the mobile communication network operators, the operating income from the operating segment of sales of antenna products and provision of related services was increased from approximately RMB0.88 million for the corresponding period in 2020 to approximately RMB10.83 million for the six months ended 30 June 2021, which accounted for approximately 68% of main business income of the Group in the first half of 2021. In response to the procurement activities, the sales team and facilities, together with production capacity, of the Group were gradually expanded and rearranged during the period.

The operating segment of sales of underwater surveillance and related products still maintained technology research and development and after-sales technical support, and provided customised products and services to existing customers such as research institutes and universities. In addition to maintaining the operation of technology research and development and improvement, the operating segment of sales of aircraft products also monitored market development of unmanned aerial vehicles for large loading and transportation, and maintained communication with the industry to ensure that subsequent new products can meet market needs. The available resources were allocated to the operating segment of sales of antenna products and provision of related services to meet the gradually increasing production scale. No operating income was recorded for both operating segments in the first half of 2021.

In respect of the operating segment of sales of agricultural products which is mainly engaged in live chicken, chicken meat and related non-staple foods, approximately RMB5.04 million was generated during the period. Except for actively responding to the national policy on poverty alleviation and fulfilling social responsibilities of the Group, the well-established market channels are conducive to the cooperation of the Group with other market stakeholders and increase the operating income from the agricultural and sideline products.

#### **Gross profit**

During the six months ended 30 June 2021, an unaudited gross profit of approximately RMB6.45 million was recorded which represented gross profit margin of approximately 39.20%, compared to the unaudited gross loss rate for the corresponding period in 2020. The improvement in gross profit margin was mainly attributable to significant increase in the operating income from the operating segment of sales of antenna products and provision of related services in the first half of 2021.

## Segment performance

Segment performance was evaluated after considering gross profit, selling expenses, depreciation and amortisation expenses under administrative expenses, research and development expenses, credit and assets impairment loss of each operating segment.

Selling expenses were increased from approximately RMB0.17 million for the corresponding period in 2020 to approximately RMB1.99 million for the six months ended 30 June 2021 due to increase in payroll after the expansion of sales team, expenses for procurement activities and delivery charges for the sales of antenna products.

Research and development expenses were increased from approximately RMB5.36 million for the corresponding period in 2020 to approximately RMB6.46 million for the six months ended 30 June 2021 which were solely used for further improvement and development of antenna products.

No impairment loss was recognised for receivables and assets for the six months ended 30 June 2021 as the aging analysis of all receivables was good and all assets were under safe management.

Although the operating segment of sales of antenna products and provision of related services had significant increase in operating income and production scale during the period, the production scale was still below the normal operating level because of enlarged production capacity together with further improvement and development of antenna products. Therefore, the production scale did not generate sufficient income to cover all operating costs and relevant expenses, and a segment loss of approximately of RMB2.01 million was recorded.

In order to complete the sales of agricultural products before each long holidays during the period, the gross profit was affected due to the low market prices at that time and a segment loss of approximately RMB0.28 million was recorded even though the operating income from the segment of sales of agricultural products increased significantly.

Since no operating income was generated from the operating segments of sales of underwater surveillance and related products, and sales of aircraft products, segment losses of approximately RMB0.22 million and RMB0.35 million were recorded respectively.

#### Other expenses, expenditure, gain and income

Administrative expenses were decreased from approximately RMB9.53 million for the corresponding period in 2020 to approximately RMB7.05 million for the six months ended 30 June 2021 due to decrease in relevant expenses in respect of rented office as a result of deployment of resources within the Group.

Financial expenses were decreased from approximately RMB0.17 million for the corresponding period in 2020 to approximately RMB0.05 million for the six months ended 30 June 2021 of which approximately RMB0.08 million was attributable to the increase in the interest expenses of lease liabilities and approximately RMB0.06 million was attributable to exchange gain generated from termination of short-term borrowings denominated in Hong Kong dollars.

Approximately RMB0.48 million was received as government subsidy for the six months ended 30 June 2021.

No gain from change in fair value in respect of financial assets measured at fair value through profit or loss was recognised during the period as the investment was sold after considering its financial performance and working capital requirement for the operating segment of sales of antenna products and provision of related services. Accordingly, approximately RMB0.27 million was recognised as an investment gain during the period.

#### **Net loss**

Although unaudited total operating income was increased by 347% during the period, total operating costs were increased by approximately RMB6.66 million that total segment loss of approximately RMB2.86 million was still recorded. During the six months ended 30 June 2021, the Group recorded an unaudited net loss of approximately RMB8.41 million, compared to an unaudited net loss of approximately RMB12.25 million for the corresponding period in 2020.

Composite of the Group's main business income by reportable and operating segments for the six months ended 30 June 2021, together with the comparative figures for the corresponding period in 2020 are as follows:

#### **PROSPECTS**

In the first half of 2021, the Group's mobile communication business income achieved a relatively large increase over the same period last year, and the communication business made certain progress. With the steady progress of market development, the Group strengthened communication and business negotiations with customers on lens antenna technologies, and at the same time further accelerated the market development of the new artificial dielectric lens antennas for rapid development of the Group's mobile communication business.

The Group conducted a series of network field tests for the application of new artificial dielectric lens antennas in different scenarios in many provinces across the country with good test reports. Accordingly, the Group won several bidding projects of China Mobile based on the superior performance of the new antennas. With gradual advancement of the market, the Group accelerated the market promotion to China Unicom and China Telecom and won the bid for the centralised procurement project of Hunan Telecom and successfully became one of suppliers for Lumber lens antennas of Henan Unicom. At the same time, the Group is actively participating in the projects for market expansion in related provinces in northwest, southwest and east China in order to obtain more procurement orders. In general, the market development in the first half of the year achieved further results.

In order to consolidate the current results and further strengthen the progress of market development, the Group will always pay attention to the industry trends, continue to maintain business communication with and follow up project bidding progress of major mobile communication operators, and strive for more project procurement orders. At the same time, for the expansion of market scope, the Group will continue to communicate with other provinces that did not conduct lens antenna technology exchanges and perform network field tests. By introducing the superior performance of the Group's new antenna products to customers, the Group could enhance customers' recognition of the lens antenna products, understand the market needs of operators, establish close business relationship with customers, and seek further cooperation opportunities. In addition, the Group will continue to strengthen business exchanges and cooperation with non-operator customers such as mobile communication equipment suppliers and system integration suppliers, accelerate the promotion and market development of communication business, and continuously optimise the performance of new lens antennas according to market requirement to enhance customer satisfaction. Broadening the Group's customer base and expanding the product sales could comprehensively improve the business performance of the Group's communication products.

In the future, the Group will continue to develop a series of new dielectric lens antennas in different frequency bands that can be widely used in multiple industries. At the same time, the Group will also actively explore and expand the market and application of related communication equipment products which are based on lens materials in many industries and in different scenarios, and strive to establish the Group's core competitiveness in the field of mobile communications.

Regarding the funds required for the development of diversified operations, the Group will also adopt financing channels such as additional issuance, bank borrowings, and revitalising the Group's existing assets in a timely manner according to the needs of business development to ensure the Group's business development.

#### LIQUIDITY, FINANCIAL RESOURCES AND CAPITAL STRUCTURE

For the six months ended 30 June 2021, the Group was mainly financed by funds generated from operations, issue of shares, short-term borrowings, and lease liabilities under right-of-use assets. The short-term borrowings were mainly for daily operations and the lease liabilities were solely used for financing those assets under operating leases of the Group during the period. As at 30 June 2021, the short-term borrowings of approximately RMB1.78 million were repaid, and the lease liabilities of approximately RMB4.41 million were classified in accordance with the lease terms.

For the six months ended 30 June 2021, the interest-bearing borrowings borne interest rate of 1% per annum and the lease liabilities borne interest rate of 7.13% per annum. Majority of debts for operations were denominated in RMB during the period, the Directors consider that exposure to interest rate risk and foreign exchange risk was minimal.

As at 30 June 2021, the gearing ratio of the Group was approximately 12.94% (2020: 6.27%), which is calculated based on the sum of total interest-bearing borrowings and lease liabilities over the total shareholders' equity attributable to the parent company.

Cash and cash equivalents increased approximately from RMB2.07 million to RMB2.19 million during the period. As at 30 June 2021, no bank deposits were pledged to secure any operations and liabilities of the Group.

#### **FOREIGN EXCHANGE EXPOSURE**

For the six months ended 30 June 2021, the Group was not exposed to any significant foreign exchange risk as majority of the Group's transactions were denominated in RMB, no financial instruments for hedging were employed.

#### SIGNIFICANT INVESTMENT HELD

Except for investments in subsidiaries and financial assets at fair value through profit and loss, the Group did not hold any significant investment for the six months ended 30 June 2021.

For the six months ended 30 June 2021, an aggregate of 880,004 ordinary shares of nominal value of RMB1 each in the issued share capital of Cloud Live Technology Group Co., Ltd.\* (中科雲網科技集團股份有限公司) were sold at approximately RMB2.60 million for financing operation purposes. Accordingly, approximately RMB0.27 million was recognised as an investment gain.

#### **MATERIAL ACQUISITIONS AND DISPOSALS**

Save as disclosed in the paragraph headed "Significant Investment Held" above, the Group did not have any other material acquisitions and disposals of subsidiaries, associates and affiliated companies for the six months ended 30 June 2021.

#### **EMPLOYEES AND REMUNERATION POLICY**

As at 30 June 2021, the Group had 131 (2020: 74) full-time employees. Total staff costs for the six months ended 30 June 2021 amounted to approximately RMB7.41 million (2020: RMB5.53 million), including remuneration of the Directors and the Supervisors. All employees of the Group are eligible to participate in the defined contribution retirement schemes required by the law. The Group reviews employee remuneration from time to time and the increments in remuneration are normally granted annually or by special adjustment depending on length of service and performance when warranted. In addition to salaries, the Group provides employee benefits including medical insurance. Bonuses are also available to employees of the Group at the discretion of the Directors and depending upon the financial performance of the Group. The Group has not granted any share options to the Directors and its employees. A comprehensive career development programme is launched for all employees which provides diversified part-time training opportunities in accordance with the needs of their positions and specialities.

#### **CHARGES ON GROUP ASSETS**

As at 30 June 2021, no assets of the Group were pledged for its operations and liabilities.

#### **FUTURE PLANS FOR MATERIAL INVESTMENTS**

As at 30 June 2021, the Group had no material capital expenditure contracted for but not provided in the consolidated financial statements.

#### **CONTINGENT LIABILITIES**

As at 30 June 2021, the Group did not have any material contingent liabilities.
